About the model annual report

Purpose

This model annual report has been designed by Deloitte Touche Tohmatsu to assist users with the preparation of **annual reports** for a **consolidated entity** in accordance with:

- Provisions of the Corporations Act 2001;
- Accounting Standards and Interpretations issued by the Australian Accounting Standards Board (except as noted below):
- Other requirements and guidelines current as at the date of issue, including Australian Stock Exchange ('ASX')
 Listing Rules and Australian Securities and Investments Commission ('ASIC') Class Orders, Regulatory Guides
 and Media Releases.

GAAP Holdings (Australia) Limited is assumed to have transitioned to the Australian equivalents to IFRS in June 2006, and accordingly, is not a first-time adopter of A-IFRS. Users should refer to AASB 1 'First-time Adoption of Australian Equivalents to International Financial Reporting Standards' for specific requirements regarding an entity's first A-IFRS compliant financial statements.

The model financial statements do not include separate financial statements for the parent, which have been historically required by entities preparing financial reports in accordance with the Corporations Act 2001. The proposed changes to the Corporations Act 2001, which at the time of publication are intended to be able to be adopted for years ending on 30 June 2010, would remove the requirement for reporting the separate financial statements of the parent when consolidated financial statements are prepared.

Where an entity presents separate financial statements that comply with A-IFRS, the requirements of AASB 127 Consolidated and Separate Financial Statements will apply. Separate statements of comprehensive income, financial position, changes in equity and cash flows for the parent will generally be required, together with supporting notes.

In these 2010 model financial statements, we have illustrated the impact of the adoption of a number of new and revised Standards and Interpretations (see note 2 to the financial statements for details).

AASB 101 (as revised in 2007) introduced a number of terminology changes, including revised titles for the financial statements (e.g. 'statement of financial position' instead of 'balance sheet'). The revised terminology has been adopted throughout these model financial statements. Preparers should be aware, however, that the new titles for the financial statements are not mandatory.

For the purposes of presenting the statements of comprehensive income and cash flows, the alternatives allowed under A-IFRSs for those statements have been illustrated. Preparers should select the alternatives most appropriate to their circumstances.

Note that in these model financial statements, we have frequently included line items for which a nil amount is shown, so as to illustrate items that, although not applicable to GAAP Holdings (Australia) Limited, are commonly encountered in practice. This does not mean that we have illustrated all possible disclosures. Nor should it be taken to mean that, in practice, entities are required to display line items for such 'nil' amounts.

This illustration is not designed to meet specific needs of specialised industries. Rather, it is intended to meet the needs of the majority of entities in complying with the annual reporting requirements of the Corporations Act 2001. Inquiries regarding specialised industries (e.g. life insurance companies, credit unions, etc.) should be directed to an industry specialist in your nearest Deloitte Touche Tohmatsu office.

Exclusions

This model does not, and cannot be expected to cover all situations that may be encountered in practice. Therefore, knowledge of the disclosure provisions of the Corporations Act 2001, Accounting Standards and Interpretations are pre-requisites for the preparation of annualreports.

Specifically, this illustration does not provide guidance on the 'not-for-profit' disclosure requirements of Accounting Standards, nor the disclosure requirements of the following Accounting Standards and Interpretations:

AASB 1 'First-time Adoption of Australian Equivalents to International Financial Reporting Standards'

AASB 4 'Insurance Contracts'

AASB 6 'Exploration for and Evaluation of Mineral Resources'

Note: While this illustration does not provide guidance on the disclosure requirements of AASB 6, a number of example accounting policies applicable to mining entities are included in note 3 to the

financial statements

AASB 129 'Financial Reporting in Hyperinflationary Economies'
AASB 134 'Interim Financial Reporting' (other than as noted)

AASB 141 'Agriculture' AASB 1004 'Contributions'

AASB 1023 'General Insurance Contracts'
AASB 1038 'Life Insurance Contracts'

AASB 1049 'Financial Reporting by General Government Sectors'
AAS 25 'Financial Reporting by Superannuation Plans'
AAS 27 'Financial Reporting by Local Governments'
AAS 29 'Financial Reporting by Government Departments'

AAS 31 'Financial Reporting by Governments'

Int 2 'Members' Shares In Co-Operative Entities and Similar Instruments'

Int 129 'Disclosure – Service Concession Arrangements'

Int 1017 'Developer and Customer Contributions for Connection to a Price-Regulated Network'

Int 1019 'The Superannuation Contributions Surcharge'

Int 1047 'Professional Indemnity Claims Liabilities in Medical Defence Organisations'

Further, unless otherwise specified, this illustration only includes references to Standards not yet effective (and not early adopted) in the context of illustrating the disclosures specified by AASB 108 'Accounting Policies, Changes in Accounting Estimates and Errors'.

We see this publication as an illustration and strongly encourage preparers of financial statements to ensure that disclosures made are relevant, practical and useful.

Source references

References to the relevant requirements are provided in the left hand column of each page of this illustration. Where doubt exists as to the appropriate treatment, examination of the source of the disclosure requirement is recommended.

GAAP Holdings (Australia) Limited

Corporate governance statement

ASX4.10.3

Australian Stock Exchange Listing Rule 4.10.3 requires companies to disclose the extent to which they have complied with the best practice recommendations of the ASX Corporate Governance Council, as summarised in ASX Guidance Note 9A 'Corporate Governance – ASX Corporate Governance Council – Revised Corporate Governance Principles and Recommendations'. Where a recommendation has not been followed the entity must justify the reason for the non-compliance. If a recommendation has been followed for only part of the period, the entity must state the period during which it had been followed.

Recommendations

ASX Guidance Note 9A

The ASX Corporate Governance Council released a second Edition of Corporate Governance Principles and Recommendations during August 2007. In addition, during December 2007, the ASX reissued Guidance Note 9A 'Corporate Governance – ASX Corporate Governance Council – Revised Corporate Governance Principles and Recommendations' to include discussion of the revised Principles. The change in the reporting requirement applies to the annual reporting periods commencing on or after 1 January 2008.

It is important that listed entities refer to the complete documents when preparing their reports as they provide comprehensive and invaluable guidance in relation to implementation of the Principles and Recommendations. The recommendations of the ASX Corporate Governance Council, including corporate governance practices and suggested disclosures, are set out below. The recommendations are differentiated between the eight core principles that the ASX Corporate Governance Council believes underlie good corporate governance. Entities must disclose any instances of non-compliance with these recommendations.

Principle 1 - Lay solid foundations for management and oversight

Formalise and disclose the functions reserved to the board and those delegated to management. Companies should establish and disclose the respective roles and responsibilities of board and management.

- 1.1 Companies should establish the functions reserved to the board and those delegated to senior executives and disclose these functions.
- 1.2 Content of a director's letter upon appointment
- 1.3 Companies should disclose the process for evaluating the performance of senior executives.
- 1.4 Companies should provide the information indicated in the Guide to reporting on Principle 1, that covers:
 - a. an explanation for any departure from the above recommendations
 - b. whether a performance evaluation for senior executives has taken place in the reporting period and whether it was in accordance with the process disclosed.

A statement of matters reserved for the board, or the board charter or the statement of areas of delegated authority to senior executives should be made publicly available, ideally by posting it to the company's website in a clearly marked corporate governance section.

Principle 2 - Structure the board to add value

- 2.1 A majority of the board should be independent directors.
 - a. Relationships affecting independence status.
- 2.2 The chair should be an independent director.
- 2.3 The roles of chair and chief executive officer should not be exercised by the same individual.
- 2.4 The board should establish a nomination committee.
- 2.5 Companies should disclose the process for evaluating the performance of the board, its committees and individual directors.
- 2.6 Companies should provide the information indicated in the Guide to reporting on Principle 2 as noted below:
 - the skills, experience and expertise relevant to the position of director held by each director in office at the date of the annual report;
 - the names of the directors considered by the board to constitute independent directors and the company's materiality thresholds used in determining a director's independence;
 - the existence of any of the relationships listed as affecting independence status of directors, and an explanation of why the board considers a director to be independent notwithstanding the existence of these relationships;
 - a statement as to whether there is a procedure agreed by the board of directors to take independent professional advice at the expense of the company;

Source GAAP Holdings (Australia) Limited

- the period of office held by each director as at the date of the annual report;
- the names of members of the nomination committee and their attendance at meetings
 of the committee, or where a company does not have a nomination committee, how the
 functions of a nomination committee are carried out;
- whether a performance evaluation for the board, its committees and directors has taken place in the reporting period and whether it was in accordance with the process disclosed; and
- an explanation of any departures from the above Recommendations 2.1 to 2.6.

Principle 3: Companies should actively promote ethical and responsible decision making

- 3.1 Companies should establish a code of conduct and disclose the code or a summary of the code as to:
 - the practices necessary to maintain confidence in the company's integrity;
 - the practices necessary to take into account their legal obligations and the reasonable expectations of their stakeholders; and
 - the responsibility and accountability of individuals for reporting and investigating reports
 of unethical practices.
- 3.2 Companies should establish a policy concerning trading in company securities by directors, senior executives and employees and disclose the policy or a summary of that policy.
- 3.3 Companies should provide an explanation of any departures from Recommendation 3.1 to 3.3 in the corporate governance statement in the annual report.

Principle 4 - Safeguard integrity in financial reporting

- 4.1. The board should establish an audit committee.
- 4.2. Structure the audit committee so that it consists of:
 - only non-executive directors;
 - a majority of independent directors;
 - an independent chair, who is not chair of the board; and
 - at least three members.
- 4.3. The audit committee should have a formal charter.
- 4.4. Disclose the following information in the corporate governance statement in the annual report:
 - details of the names and qualifications of those appointed to the audit committee and their attendance at meetings of the committee, or, where a company does not have an audit committee, how the functions of an audit committee are carried out;
 - the number of meetings of the audit committee and the names of the attendees; and
 - explanation of any departures from Recommendations 4.1 to 4.4.

Principle 5 - Make timely and balanced disclosures

- 5.1 Companies should establish written policies and procedures designed to ensure compliance with ASX Listing Rule disclosure requirements and to ensure accountability at a senior executive level for that compliance and disclose those policies or a summary of those policies.
- 5.2 Companies should provide an explanation of any departures from Recommendations 5.1 or 5.2 in the corporate governance statement in the annual report.

Principle 6 - Respect the rights of shareholders

- 6.1 Design and disclose a communications policy to promote effective communication with shareholders and encourage effective participation at general meetings.
- 6.2. An explanation of any departure from Recommendations 6.1 or 6.2 should be included in the corporate governance statement in the annual report.

Principle 7 - Recognise and manage risk

- 7.1 Companies should establish policies on risk oversight and management of material business risks and disclose a summary of those policies.
- 7.2 The board should require management to design and implement the risk management and internal control system to manage the company's material business risks and report to it on whether those risks are being managed effectively. The board should disclose that management has reported to it as to the effectiveness of the company's management of its material business risks.

GAAP Holdings (Australia) Limited

- 7.3 The board should disclose whether it has received assurance from the chief executive officer (or equivalent) and the chief financial officer (or equivalent) that the declaration provided in accordance with section 295A of the Corporations Act is founded on a system of risk management and internal control and that the system is operating effectively in all material aspects in relation to financial reporting risks.
- 7.4 The following material should be included in the corporate governance statement in the annual report:
 - explanation of any departures from Recommendations 7.1 to 7.4;
 - whether the board has received the report from management under Recommendation 7.2; and
 - whether the board has received assurance from the chief executive officer (or equivalent) and the chief financial officer (or equivalent) under Recommendation 7.3.

Principle 8 - Remunerate fairly and responsibly

- 8.1. The board should establish a remuneration committee. (Refer to section 300A of the Corporations Act and AASB 124 'Related Party Disclosures' for disclosure of remuneration policies and procedures.)
- 8.2. Clearly distinguish the structure of non-executive directors' remuneration from that of executive directors and senior executives.
- 8.3. The following material or a clear cross-reference to the location of the material should be included in the corporate governance statement in the annual report:
 - the names of the members of the remuneration committee and their attendance at the meetings of the committee or where a company does not have a remuneration committee, how the functions of a remuneration committee are carried out;
 - the existence and terms of any schemes for retirement benefits, other than superannuation, for non-executive directors; and
 - an explanation of any departures from Recommendations 8.1 to 8.3.

Information to be made publicly available

The ASX Corporate Governance Council has also determined that the following information should be made publicly available, ideally on the company's website in a clearly marked corporate governance section:

- the statement of matters reserved for the board, or the board charter, or the statement of areas of delegated authority to senior executives (Principle 1);
- a description of the procedure for the selection and appointment of new directors and the reelection of incumbent directors (Principle 2):
- the charter of the nomination committee, or a summary of the role, rights, responsibilities and membership requirements for that committee (Principle 2);
- the board's policy for the nomination and appointment of directors (Principle 2);

any applicable code of conduct, or a summary (Principle 3);

- the trading policy, or a summary of its main provisions (Principle 3):
- the audit committee charter (Principle 4);
- information on procedures for the selection and appointment of the external auditor and for the rotation of external audit engagement partners (Principle 4);
- the policies or a summary of the policies and procedures designed to guide compliance with ASX Listing Rule disclosure requirements (Principle 5):
- a description of how the company will communicate with its shareholders (Principle 6);
- a description of the company's policies on risk oversight and management of material business risks (Principle 7);
- the charter of the remuneration committee or a summary of the role, rights, responsibilities and membership requirements for that committee (Principle 8); and
- a summary of the company's policy on prohibiting entering into transactions in associated products which limit the economic risk of participating in unvested entitlements under any equity-based remuneration schemes (Principle 8).

Where the company does not have a website it must make relevant information available to shareholders by other means, for example, a company may provide the information on request by email, facsimile, or post.

Share options granted to directors and senior management

s.300(1)(d)

The directors' report should include details of options that are:

- granted over unissued shares or unissued interests during or since the end of the financial year; and
- (b) granted to any of the directors or any of the 5 most highly remunerated officers of the company (other than the directors); and
- (c) granted to them as part of their remuneration.

s.300(3)

The disclosures required by s.300(1)(d) (illustrated on page B6), s.300(1)(e) and s.300(1)(f) cover:

- (a) options over unissued shares and interests of the company, registered scheme or disclosing entity; and
- (b) if consolidated financial statements are required options over unissued shares and interests of any controlled entity that is a company, registered scheme or disclosing entity.

s.300(5)

The details of an option granted during or since the end of the financial year should include:

- (a) the identity of the company, registered scheme or disclosing entity granting the option;
- (b) the name of the person to whom the option is granted; and
- (c) the number and class of shares or interests over which the option is granted.

s.300(1)(d), s.300(5) During and since the end of the financial year an aggregate 140,870 share options were granted to the following directors and to the five highest remunerated officers of the company as part of their remuneration:

Directors and senior management	Number of options granted	Issuing entity	Number of ordinary shares under option
P.H. Taylor	88,000	GAAP Holdings (Australia) Limited	88,000

Company secretary [public companies only]

s.300(10)(d)

Mr A.B. Grey, Chartered Accountant, held the position of company secretary of GAAP Holdings (Australia) Limited at the end of the financial year. He joined GAAP Holdings (Australia) Limited in 2005 and previously held the company secretary position at a large manufacturing company. He is a member of the Chartered Institute of Company Secretaries in Australia.

s.300(10)

Disclosure of the company secretary's qualifications and experience is not required for a public company which is a wholly-owned controlled entity of another company.

Principal activities

s.299(1)(c)

The consolidated entity's principal activities in the course of the financial year were the manufacture of electronic equipment and leisure goods, and the construction and renovation of residential properties.

During the financial year the consolidated entity sold its toy business. Details of the sale are contained in note 11 and note 47 to the financial statements. During the year the board of directors decided to dispose of the bicycle business. Details of the planned disposal are contained in note 11 to the financial statements.

GAAP Holdings (Australia) Limited

Review of operations

s.299(1)(a), ASX4.10.17

The directors' report must contain a review of the consolidated entity's operations during the financial year and the results of those operations. The Corporations Act 2001 contains additional general requirements for listed public companies.

Additional requirements for listed public companies

s.299A(1), (2)

The directors' report for a company or disclosing entity that is a listed public company must also contain information that members of the company would reasonably require to make an informed assessment of:

- (a) the operations of the consolidated entity;
- (b) the financial position of the consolidated entity; and
- (c) the consolidated entity's business strategies and its prospects for future financial years. The directors' report may omit material that would otherwise be included under s.299A(1)(c) concerning the consolidated entity's business strategies and prospects for future financial years, if it is likely to result in unreasonable prejudice to the consolidated entity or any entity (including the company or disclosing entity) that is part of the consolidated entity. If material is omitted, the report must say so.

s.299A(3)

ASX Guidance Note 10 In preparing this disclosure, entities may wish to refer to ASX Guidance Note 10 'Review of Operations and Activities: Listing Rule 4.10.17' or to the G100's 'Guide to Review of Operations and Financial Condition', which provide general guidance on the form and content of the consolidated entity's review of operations and the results of those operations, together with specific guidance on items which might be appropriately included in such a review. Recommended contents of the review of operations include:

(a) overview:

- i. objectives of the consolidated entity and how they are achieved within the specific operating environment and industry within which the consolidated entity operates;
- ii. performance and indicators used by management; and
- iii. dynamics of the consolidated entity and the main opportunities and threats that may have a major effect on results regardless of whether they were significant in the period under review;

(b) review of operations:

- i. operating results of the consolidated entity by main business activity including a comparison to prior periods and any projections published by the company and its controlled entities. Consideration should be given to unusual or infrequent events or transactions, including material acquisitions or disposals, major sources of revenues and expenses, and changes in factors which affect the results; and
- ii. overall return attributable to shareholders in terms of dividends, and increase in shareholder funds. Consideration should be given to the company's distribution policy (including the extent of franking), other forms of shareholder returns, for example, dividend reinvestment plans or shareholder privileges, and movements in the company's share price:
- (c) details of investments for future performance, including the current and planned future level of capital expenditure, major projects and expected benefits;
- (d) review of financial conditions:
 - capital structure of the company including capital funding and treasury policies and objectives;
 - liquidity and funding as at year end including restrictions on funds transfer, covenants entered into and the maturity profile of borrowings;
 - iii. resources available to the consolidated entity not reflected in the balance sheet;
 - iv. cash generated from operations and other sources of cash flows during the period; and
 - v. impact of legislation and other external requirements having a material effect on the financial condition in the reporting period or expected to have a material effect on the financial condition in future periods; and
- (e) risk management and corporate governance practices.

Changes in state of affairs

s.299(1)(b)

During the financial year, the consolidated entity disposed of its toy business. The consolidated entity is also seeking to dispose of its bicycle business, in order to focus its operations towards the manufacture and distribution of electronic equipment and leisure goods as proposed and agreed at the company's last Annual General Meeting. Other than the above, there was no significant change in the state of affairs of the consolidated entity during the financial year.

Source	CAAR Holdings (Australia) Limited
Source	GAAP Holdings (Australia) Limited
s.299(1)(d)	Subsequent events On 18 July 2010, the premises of Subfive Limited were seriously damaged by fire. Insurance claims are in process, but the cost of refurbishment is currently expected to exceed the amount that will be reimbursed by \$8.3 million.
	Other than the above, there has not been any matter or circumstance occurring subsequent to the end of the financial year that has significantly affected, or may significantly affect, the operations of the consolidated entity, the results of those operations, or the state of affairs of the consolidated entity in future financial years.
	Future developments
s.299(1)(e), s.299(3)	Disclosure of information regarding likely developments in the operations of the consolidated entity in future financial years and the expected results of those operations is likely to result in unreasonable prejudice to the consolidated entity. Accordingly, this information has not been disclosed in this report.
s.299(1)(e), s.299(3)	Directors must bring likely developments in the operations of the consolidated entity in future financial years and the expected results of those operations to the attention of the users of the annual report. These disclosures are not required where they would result in unreasonable prejudice to the entity.
s.299A(1)(c), (2)	The directors' report for a company or disclosing entity that is a listed public company must also contain information that members of the company would reasonably require to make an informed assessment of the consolidated entity's prospects for future financial years. Environmental regulations
s.299(1)(f)	If the consolidated entity's operations are subject to any particular and significant environmental regulation under a law of the Commonwealth or of a State or Territory, the directors' report should disclose details of the consolidated entity's performance in relation to the environmental regulation.
ASIC-RG 68	 The ASIC has provided the following guidance on completing environmental regulations disclosures: prima facie, the requirements would normally apply where an entity is licensed or otherwise subject to conditions for the purposes of environmental legislation or regulation; the requirements are not related specifically to financial disclosures (e.g. contingent liabilities and capital commitments) but relate to performance in relation to environmental regulation. Hence, accounting concepts of materiality in financial statements are not applicable; the information provided in the directors' report cannot be reduced or eliminated because information has been provided to a regulatory authority for the purposes of any environmental legislation; and the information provided in the director's report would normally be more general and less technical than information which an entity is required to provide in any compliance reports to an environmental regulator.
	Dividends
s.300(1)(a)	In respect of the financial year ended 30 June 2009, as detailed in the directors' report for that financial year, a final dividend of 19.36 cents per share franked to 100% at 30% corporate income tax rate was paid to the holders of fully paid ordinary shares on 12 October 2009.
s.300(1)(a)	In respect of the financial year ended 30 June 2010, an interim dividend of 17.85 cents per share franked to 100% at 30% corporate income tax rate was paid to the holders of fully paid ordinary shares on 5 March 2010.
s.300(1)(a)	In respect of the financial year ended 30 June 2010, a dividend of 10.00 cents per share franked to 100% at 30% corporate income tax rate was paid to the holders of convertible non-participating preference shares on 20 June 2010.
s.300(1)(a)	In respect of the financial year ended 30 June 2010, an interim dividend of 20.33 cents per share franked to 100% at 30% corporate income tax rate was paid to the holders of redeemable cumulative preference shares on 20 June 2010.
s.300(1)(b)	In respect of the financial year ended 30 June 2010, the directors recommend the payment of a final dividend of 26.31 cents per share franked to 100% at 30% corporate income tax rate to the holders of fully paid ordinary shares on 3 October 2010.

Source	GAAP Holdings (Australia) Limited
AASB110.13	Where no dividends have been paid or declared since the start of the financial year, and/or the directors do not recommend the payment of a dividend in respect of the financial year, the directors' report should disclose that fact. If dividends are declared (i.e. the dividends are appropriately authorised and no longer at the discretion of the entity) after the reporting date but before the financial statements are authorised for issue, the dividends are not recognised as a liability at the reporting date because no obligations exist at that time. Such dividends are disclosed in the notes to the financial statements in accordance with AASB 101 'Presentation of Financial Statements'.
	Shares under option or issued on exercise of options
s.300(1)(f)	The directors' report should include details of: (a) shares or interests issued during or since the end of the financial year as a result of the exercise of an option over unissued shares or interests; and
s.300(1)(e) s.300(3)	(b) unissued shares or interests under option as at the date of the directors' report. The disclosures required by s.300(1)(d) (illustrated on page B6), s.300(1)(e) and s.300(1)(f) cover:
	 (a) options over unissued shares and interests of the company, registered scheme or disclosing entity; and (b) if consolidated financial statements are required – options over unissued shares and interests of any controlled entity that is a company, registered scheme or disclosing entity.
s.300(6)	The details of unissued shares or interests under option should include: (a) the company, registered scheme or disclosing entity that will issue shares or interests when the options are exercised;
	 (b) the number and classes of those shares or interests; (c) the issue price, or the method of determining the issue price, of those shares or interests; (d) the expiry date of the options; and (e) any rights that option holders have under the options to participate in any share issue or interest issue of the company, registered scheme or disclosing entity or of any other body
s.300(7)	corporate or registered scheme. The details of shares and interests issued as a result of the exercise of any option should include:
	 (a) the company, registered scheme or disclosing entity issuing the shares or interests; (b) the number of shares or interests issued; (c) if the company, registered scheme or disclosing entity has different classes of shares or interests, the class to which each of those shares or interests belongs;
	(d) the amount unpaid on each of those shares or interests; and (e) the amount paid, or agreed to be considered as paid, on each of those shares or interests.

s.300(1)(e), s.300(3), s.300(6) Details of unissued shares or interests under option as at the date of this report are:

Issuing entity	Number of shares under option	Class of shares	Exercise price of option	Expiry date of options
GAAP Holdings	126 000	Ordinary	¢1.00	20 Contambor 2010
(Australia) Limited	136,000	Ordinary	\$1.00 \$1.00 ^(a)	30 September 2010
GAAP Holdings (Australia) Limited	60,000	Ordinary	\$1.00	27 March 2011

⁽a) These share options can only be exercised once the share price of GAAP Holdings (Australia) Limited exceeds \$4.00.

The holders of these options do not have the right, by virtue of the option, to participate in any share issue or interest issue of the company or of any other body corporate or registered scheme.

GAAP Holdings (Australia) Limited

s.300(1)(f), s.300(3), s.300(7) Details of shares or interests issued during or since the end of the financial year as a result of exercise of an option are:

Issuing entity	Number of shares issued	Class of shares	Amount paid for shares	Amount unpaid on shares
GAAP Holdings	314,000	Ordinary	\$1.00	\$nil
(Australia) Limited				

Indemnification of officers and auditors

s.300(1)(g), s.300(8), s.300(9) During the financial year, the company paid a premium in respect of a contract insuring the directors of the company (as named above), the company secretary, Mr A.B. Grey, and all executive officers of the company and of any related body corporate against a liability incurred as such a director, secretary or executive officer to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

The company has not otherwise, during or since the end of the financial year, except to the extent permitted by law, indemnified or agreed to indemnify an officer or auditor of the company or of any related body corporate against a liability incurred as such an officer or auditor.

Where the company has not indemnified or agreed to indemnify an officer or auditor against a liability incurred, or paid an insurance premium in respect of a contract insuring against a liability incurred by an officer or auditor, the following disclosure is encouraged:

'During or since the end of the financial year the company has not indemnified or made a relevant agreement to indemnify an officer or auditor of the company or of any related body corporate against a liability incurred as such an officer or auditor. In addition, the company has not paid, or agreed to pay, a premium in respect of a contract insuring against a liability incurred by an officer or auditor.'

Directors' meetings [public companies only]

s.300(10)(b), (c)

The following table sets out the number of directors' meetings (including meetings of committees of directors) held during the financial year and the number of meetings attended by each director (while they were a director or committee member). During the financial year, 12 board meetings, 2 nomination and remuneration committee meetings, 4 audit committee meetings and 4 risk management committee meetings were held.

s.300(10)

Disclosure of directors' meetings is not required for a public company which is a wholly-owned controlled entity of another company.

Source **GAAP Holdings (Australia) Limited** Registered schemes [registered schemes only] The directors' report for a listed registered scheme should disclose the following details for each s.300(12)director of the company that is the responsible entity for the scheme: their relevant interests in the scheme; (b) their rights or options over interests in the scheme; and (c) contracts to which the director is a party or under which the director is entitled to a benefit and that confer a right to call for or deliver interests in the scheme. The directors' report for a registered scheme (whether listed or unlisted) should disclose details s.300(13)of: (a) the fees paid to the responsible entity and its associates out of scheme property during the financial year; (b) the number of interests in the scheme held by the responsible entity or its associates as at the end of the financial year: (c) interests in the scheme issued during the financial year; (d) withdrawals from the scheme during the financial year; the value of the scheme's assets as at the end of the financial year, and the basis for the (e) valuation; and (f) the number of interests in the scheme as at the end of the financial year. Proceedings on behalf of the company The directors' report should disclose, with respect to persons applying for leave under s.237 to s.300(14)bring, or intervene in, proceedings on behalf of the company, the applicant's name and a statement whether leave was granted. Where leave is granted under s.237, the directors' report should disclose the following details of s.300(15)any proceedings that a person has brought, or intervened in, on behalf of the company: (a) the person's name: (b) the names of the parties to the proceedings; and sufficient information to enable members to understand the nature and status of the (c) proceedings (including the cause of action and any orders made by the court). Non-audit services [listed companies only] Details of amounts paid or payable to the auditor for non-audit services provided during the year s.300(2A), s.300(11B)(a) by the auditor are outlined in note 53 to the financial statements. The directors are satisfied that the provision of non-audit services, during the year, by the s.300(11B)(b) auditor (or by another person or firm on the auditor's behalf) is compatible with the general standard of independence for auditors imposed by the Corporations Act 2001. The directors are of the opinion that the services as disclosed in note 53 to the financial s.300(11B)(c) statements do not compromise the external auditor's independence, based on advice received from the Audit Committee, for the following reasons: all non-audit services have been reviewed and approved to ensure that they do not impact the integrity and objectivity of the auditor, and none of the services undermine the general principles relating to auditor independence as set out in Code of Conduct APES 110 Code of Ethics for Professional Accountants issued by the Accounting Professional & Ethical Standards Board, including reviewing or auditing the auditor's own work, acting in a management or decision-making capacity for the company, acting as advocate for the company or jointly sharing economic risks and rewards. s.300(11D) The statements under s.300(11B)(b) and (c) must be made in accordance with: advice provided by the listed company's audit committee if the company has an audit (a) committee: or a resolution of the directors of the listed company if the company does not have an audit committee. A statement is taken to be made in accordance with advice provided by the company's audit s.300(11E) committee only if: the statement is consistent with that advice and does not contain any material omission of material included in that advice: (b) the advice is endorsed by a resolution passed by the members of the audit committee; the advice is written advice signed by a member of the audit committee on behalf of the (c)

audit committee and given to the directors.

Source	GAAP Holdings (Australia) Limited
	Auditor's independence declaration
s.298(1)(c)	The auditor's independence declaration is included on page B22 of the annual report.
	Extension of audit rotation period [listed companies only]
s.300(11A)	Where, in accordance with s.342A, ASIC has made a declaration to enable an individual who is a registered company auditor to continue to play a significant role (as defined in s.9 of the Corporations Act 2001) in the audit of a listed company (by extending the audit involvement period from the normal five successive financial years to six or seven successive financial years), the directors' report must include details of the declaration.
	True and fair view
s.298(1A)	If the financial statements for a financial year include additional information under s.295(3)(c) to give a true and fair view of financial position and performance, the directors' report for the financial year must also:
	 (a) set out the directors' reasons for forming the opinion that the inclusion of that additional information was necessary to give a true and fair view required by s.297; and (b) specify where that additional information can be found in the financial statements.
	Rounding off of amounts
	If the company is of the kind referred to in ASIC Class Order 98/0100, dated 10 July 1998, and consequently the amounts in the directors' report and the financial statements are rounded, that fact must be disclosed in the financial statements or the directors' report.
ASIC-CO 98/0100	The company is a company of the kind referred to in ASIC Class Order 98/0100, dated 10 July 1998, and in accordance with that Class Order amounts in the directors' report and the financial statements are rounded off to the nearest thousand dollars, unless otherwise indicated. or
ASIC-CO 98/0100	The company is a company of the kind referred to in ASIC Class Order 98/0100, dated 10 July 1998, and in accordance with that Class Order amounts in the directors' report and the financial statements are rounded off to the nearest hundred thousand dollars, unless otherwise indicated.
ASIC-CO 98/0100	or The company is a company of the kind referred to in ASIC Class Order 98/0100, dated 10 July 1998, and in accordance with that Class Order amounts in the directors' report and the financial statements are rounded off to the nearest million dollars, unless otherwise indicated.

s.300A(1), (1A),

Remuneration report [all disclosing entities that are companies]

This model remuneration report is suitable for use as a **guide** only and will not be appropriate for use by all companies required to prepare a remuneration report. Each company shall consider its respective circumstances and amend the disclosures as necessary.

Defined terms

s.300A(1B)(a) s.300A(1B)(b) A <u>company executive</u> of the company is a secretary or senior manager of the company.

A <u>relevant group executive</u> of the company is a group executive of the consolidated entity who is not also a director of the company.

s.9

Senior manager:

- (a) in relation to a corporation means a person (other than a director or secretary of the corporation) who:
 - makes, or participates in making, decisions that affect the whole, or a substantial part, of the business of the corporation; or
 - ii. has the capacity to affect significantly the corporation's financial standing; and
- (b) in relation to a partnership means a person (other than a partner) who:
 - i. makes, or participates in making, decisions that affect the whole, or a substantial part, of the business of the partnership; or
 - ii. has the capacity to affect significantly the partnership's financial standing; and
- (c) in relation to a trust means a person (other than a trustee) who:
 - makes, or participates in making, decisions that affect the whole, or a substantial part, of the business of the trust; or
 - ii. has the capacity to affect significantly the financial standing of the trust; and
- (d) in relation to a joint venture means a person (other than a director or secretary of the corporation participating in the joint venture) who:
 - i. makes, or participates in making, decisions that affect the whole, or a substantial part, of the business of the joint venture; or
 - ii. has the capacity to affect significantly the financial standing of the joint venture.

s.9

Group executives for a consolidated entity means:

- the directors of the companies or bodies within the consolidated entity:
- the secretaries of the companies or bodies within the consolidated entity;
- the senior managers of any corporation within the consolidated entity;
- the partners, and senior managers, of any partnership within the consolidated entity;
- the trustees, and senior managers, of any trusts within the consolidated entity; and
- the senior managers of any joint venture within the consolidated entity.

s.300A(1AAA), AASB124.9

<u>Key management personnel</u> are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including any director (whether executive or otherwise) of that entity.

Prescribed details in relation to remuneration

s.300A(1)(c), Reg2M.3.03

The prescribed details in relation to remuneration referred to in s.300A(1)(c) are detailed in Regulation 2M.3.03 of the Corporations Regulations 2001. The prescribed details must be provided in respect of the following persons:

- (a) if consolidated financial statements are required each member of the key management personnel for the consolidated entity;
- (b) if consolidated financial statements are not required each member of the key management personnel for the company;
- (c) if consolidated financial statements are required each of the 5 named relevant group executives who receive the highest remuneration for that year; and
- (d) in any case each of the 5 named company executives who receive the highest remuneration for that year.

s.300A(1)(d), (1)(da), (1)(e)

Note, s.300A(1)(d), s.300A(1)(da) and s.300A(1)(e) specify further remuneration details that must be made in the remuneration report in respect of the persons noted above.

Source **GAAP Holdings (Australia) Limited** Persons who are covered by more than one of the categories of identified s.300A(1)(c) persons If a person is covered by more than one of the following groups: s.300A(1) if consolidated financial statements are required - each member of the key management personnel for the consolidated entity; if consolidated financial statements are not required – each member of the key (b) management personnel for the company; (c) one of the 5 named company executives who receive the highest remuneration for the year; or one of the 5 named relevant group executives who receive the highest remuneration for the year (if consolidated financial statements are required), details of the person's remuneration are only required in the report under one of the groups. Remuneration from each entity If consolidated financial statements are required, and a person is a group executive who is a s.300A(4) group executive of 2 or more entities within the consolidated entity, the person's remuneration is taken to include all of the person's remuneration from those entities (regardless of the capacity in which the person received the remuneration). This remuneration report, which forms part of the directors' report, sets out information about the remuneration of GAAP Holdings (Australia) Limited's directors and its senior management for the financial year ended 30 June 2010. The prescribed details for each person covered by this report are detailed below under the following headings: director and senior management details remuneration policy relationship between the remuneration policy and company performance remuneration of directors and senior management key terms of employment contracts. Director and senior management details Reg2M.3.03(1) The following persons acted as directors of the company during or since the end of the financial (Item 1-4) Mr C.J. Chambers (Chairman) Mr P.H. Taylor (Chief Executive Officer) Ms F.R. Ridley Mr A.K. Black (appointed 21 July 2010) Mr B.M. Stavrinidis Mr W.K. Flinders (resigned 20 July 2009) Ms S.M. Saunders (appointed 1 August 2009, resigned 30 July 2010) The term 'senior management' is used in this remuneration report to refer to the following Reg2M.3.03(1) (Item 1-3, 5) persons. Except as noted, the named persons held their current position for the whole of the financial year and since the end of the financial year: W.L. Lee (Chief Financial Officer - Subthree Limited) L.J. Jackson (Chief Marketing Officer - Subfour Limited) C.P. Daniels (Chief Operations Officer, resigned 3 July 2010) N.W. Wright (General Manager - Electronic equipment division, resigned 27 June 2010) T.L. Smith (General Manager – Leisure goods division, appointed 3 July 2009) A.B. Grey (Company Secretary)

s.300A, Reg2M.3.03

s.300A of the Corporations Act 2001 and Regulation 2M.3.03 prescribe information that must be disclosed in respect of the following persons:

- (a) if consolidated financial statements are required each member of the key management personnel for the consolidated entity; and
- (b) if consolidated financial statements are not required each member of the key management personnel for the company; and
- (c) if consolidated financial statements are required each of the 5 named relevant group executives who receive the highest remuneration for that year; and
- (d) in any case each of the 5 named company executives who receive the highest remuneration for that year.

GAAP Holdings (Australia) Limited

For the purposes of this model annual report, the persons listed above under 'senior management' represent the five highest paid group executives (excluding executive directors) and five highest paid company executives of GAAP Holdings (Australia) Limited. The group executives together with the directors of the company represent the key management personnel of the consolidated entity. This model annual report also illustrates the inclusion of Mr A.B. Grey as one of the five highest paid company executives of GAAP Holdings (Australia) Limited who is not also a group executive or a member of the key management personnel of the consolidated entity.

Remuneration policy

s.300A(1)(a)

The directors' report must include discussion of:

- board policy for determining, or in relation to, the nature and amount (or value, as appropriate) of remuneration of <u>key management personnel</u> for the company; and
- (b) if consolidated financial statements are required board policy in relation to the nature and amount (or value, as appropriate) of remuneration of <u>key management personnel</u> for the consolidated entity.

s.300A(1)(f)

The report must also include such other matters related to the policy or policies referred to in s.300A(1)(a) above as are prescribed by the regulations.

Relationship between the remuneration policy and company performance

Extent (or otherwise) of remuneration being dependent on satisfaction of a performance condition

A disclosing entity that is a company must disclose:

s.300A(1)(e)(i)

 an explanation of the relative proportions of those elements of the remuneration of a s.300A(1)(c) identified person that are related to performance and those elements of the person's remuneration that are not;

s.300A(1)(d)

(b) if an element of the remuneration of a s.300A(1)(c) identified person consists of securities
of a body and that element is not dependent on the satisfaction of a performance
condition – an explanation of why that element of the remuneration is not dependent on
the satisfaction of a performance condition must be disclosed;

s.300A(1)(da)

(c) if an element of the remuneration of a s.300A(1)(c) identified person consists of securities of a body – discussion of board policy in relation to the person limiting his or her exposure to risk in relation to the securities, and the mechanism to enforce the policy; and

s.300A(1)(ba)

- (d) if an element of the remuneration of a member of <u>key management personnel</u> for the company, or if consolidated financial statements are required, for the consolidated entity, is dependent on the satisfaction of a performance condition:
 - i. a detailed summary of the performance condition;
 - ii. an explanation of why the performance condition was chosen;
 - iii. a summary of the methods used in assessing whether the performance condition is satisfied and an explanation of why those methods were chosen; and
 - iv. if the performance condition involves a comparison with factors external to the company:
 - (A) a summary of the factors to be used in making the comparison; and
 - (B) if any of the factors relates to the performance of another company, of 2 or more other companies or of an index in which the securities of a company or companies are included – the identity of that company, of each of those companies or of the index.

Discussion of the relationship between the remuneration policy and company performance

s.300A(1)(b)

The directors' report must include discussion of the relationship between the remuneration policy for key management personnel and the company's performance.

s.300A(1AA)

Without limiting the requirements of s.300A(1)(b), the discussion under that subsection of the company's performance must specifically deal with:

- (a) the company's earnings; and
- (b) the consequences of the company's performance on shareholder wealth;

in the financial year to which the report relates and in the previous 4 financial years.

Source GAAP Holdings (Australia) Limited

s.300A(1AB)

In determining, for the purposes of s.300A(1AA), the consequences of the company's performance on shareholder wealth in a financial year, have regard to:

- (a) dividends paid by the company to its shareholders during that year;
- (b) changes in the price at which shares in the company are traded between the beginning and the end of that year;
- (c) any return of capital by the company to its shareholders during that year that involves:
 - i. the cancellation of shares in the company; and
 - ii. a payment to the holders of those shares that exceeds the price at which shares in that class are being traded at the time when the shares are cancelled; and
- (d) any other relevant matter.

s.300A(1)(b)

Illustrated below is an example of how an entity may present information to comply with s.300A(1AA) and s.300A(1AB). Alternatively, an entity may elect to present such information graphically. The illustrative tables must be accompanied by discussion relevant to explaining the relationship between the remuneration policy and company performance.

s.300A(1AA), (1AB) The tables below set out summary information about the consolidated entity's earnings and movements in shareholder wealth for the five years to 30June 2010:

	30 June 2010 \$'000	30 June 2009 \$'000	30 June 2008 \$'000	30 June 2007 \$'000	30 June 2006 \$'000

Reg2M.3.03(1) (Item 10)

No director or senior management person appointed during the period received a payment as part of his or her consideration for agreeing to hold the position.

Reg2M.3.03(1) (Item 6-11)

Payments and benefits

The tables above do not illustrate all the payments and benefits specified by Regulation 2M.3.03 that shall be disclosed, if present. Disclosure of the following payments and benefits in respect of each s.300A(1)(c) identified person is required:

- the person's short-term employee benefits, divided into at least the following components:
 - (a) cash salary, fees and short-term compensated absences;
 - (b) short-term cash profit-sharing and other bonuses;
 - (c) non-monetary benefits;
 - (d) other short-term employee benefits;
- the person's post-employment benefits, divided into at least the following components:
 - (a) pension and superannuation benefits;
 - (b) other post-employment benefits:
- the person's long-term employee benefits other than benefits mentioned in items 6 and 7, separately identifying any amount attributable to a long-term incentive plan;
- the person's termination benefits;

GAAP Holdings (Australia) Limited

- for any position the person started to hold during the financial year, payments (if any)
 made to the person, before the person started to hold the position, as part of the
 consideration for the person agreeing to hold the position, including:
 - (a) the monetary value of the payment; and
 - (b) the date of the payment;
- share-based payments made to the person, divided into at least the following components:
 - (a) equity-settled share-based payment transactions, showing separately:
 - (i) shares and units; and
 - (ii) options and rights;
 - (b) cash-settled share-based payment transactions;
 - (c) all other forms of share-based payment compensation (including hybrids).

Total of a person's compensation

Disclosure of the total compensation for each identified person is not specifically required by s.300A or Regulation 2M.3.03, however Deloitte recommend that it be made as a matter of good practice.

Comparative information

Reg2M.3.03(2)

For items 6-9 and 11 of Regulation 2M.3.03, information of the kind described in the item for the previous financial year must also be disclosed in the financial year to which the item relates (to give comparative information for the purposes of the item), but this does not apply in relation to the first financial year in which paragraph 300A(1)(c) of the Corporations Act 2001 applies in relation to a person.

Bonuses and share-based payments granted as compensation for the current financial year

Reg2M.3.03(1) (Item 12)

Bonuses

Mr. W.L. Lee was granted a cash bonus of \$10,000 on 12 June 2010. The bonus was given, on successful acquisition by the consolidated entity, for his identification of the distribution business of Minus Pty Limited as an advantageous investment opportunity earlier in the reporting period. No other bonuses were granted during 2010.

Reg2M.3.03(1) (Item 12(b), (c), 15(b)(ii), (b)(iii), (b)(v))

Employee share option plan

GAAP Holdings (Australia) Limited operates an ownership-based scheme for executives and senior employees of the consolidated entity. In accordance with the provisions of the plan, as approved by shareholders at a previous annual general meeting, executives and senior employees with more than five years service with the company may be granted options to purchase parcels of ordinary shares at an exercise price of \$1.00 per ordinary share. Each employee share option converts into one ordinary share of GAAP Holdings (Australia) Limited on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry.

The number of options granted is calculated in accordance with the performance based formula approved by shareholders at a previous annual general meeting and is subject to approval by the Remuneration Committee. The formula rewards executives and senior employees against the extent of the consolidated entity's and individual's achievement against both qualitative and quantitative criteria from the following financial and customer service measures:

- improvement in share price
- improvement in net profit
- improvement in return to shareholders
- reduction in warranty claims
- results of client satisfaction surveys
- reduction in rate of staff turnover

The options granted expire within twelve months of their issue, or one month of the resignation of the executive or senior employee, whichever is the earlier.

GAAP Holdings (Australia) Limited

Reg2M.3.03(1) (Item 12(a), 15(b)(i), (b)(iv), (b)(v)) During the financial year, the following share-based payment arrangements were in existence

Options series	Grant date	Expiry date	Grant date fair value	Vesting date
(1) Issued 30 September				
2008	30/09/08	30/09/09	\$1.15	Vests at date of grant
(2) Issued 31 March 2009	31/03/09	31/03/10	\$1.18	Vests at date of grant
(3) Issued 30 September				
2009	30/09/09	30/09/10	\$1.20	Vests at date of grant
(4) Issued 29 March 2010	29/03/10	27/03/11	\$1.05	Vests when the GAAP
•				Holdings (Australia) Limited
				share price exceeds \$4.00

Reg2M.3.03(1) (Item 12(g), 15(b)(vi)) There are no further service or performance criteria that need to be met in relation to options granted under series (1)-(3) before the beneficial interest vests in the recipient. Executives and senior employees receiving options under option series (4) are entitled to the beneficial interest under the option when the performance condition (share price exceeds \$4.00) is met only if they continue to be employed with the company at that time.

s.300A(1)(e)(vi), Reg2M.3.03(1) (Item 12(e), (f), 15(a)) The following grants of share-based payment compensation to directors and senior management relate to the current financial year:

		Du	During the financial year				
Name	Option series	No. granted	No. vested	% of grant vested	% of grant forfeited	compensation for the year consisting of options	
Mr P.H.	(1) Issued 30	88,000	88,000	100%	n/a	22.5%	
Taylor W.L. Lee	Sep 09 (1) Issued 30 Sep 09	6,250	6,250	100%	n/a	3.2%	
L.J. Jackson	(1) Issued 30 Sep 09	6,250	6,250	100%	n/a	3.2%	
C.P. Daniels	(1) Issued 30 Sep 09	4,167	4,167	100%	n/a	2.2%	
N.W. Wright	(1) Issued 30 Sep 09	4,167	4,167	100%	n/a	2.3%	
T.L. Smith	(4) Issued 29 Mar 10	32,036	nil	nil	nil	4.1%	

Reg2M.3.03(1) (Item 16)

During the year, the following directors and senior management exercised options that were granted to them as part of their compensation. Each option converts into one ordinary share of GAAP Holdings (Australia) Limited.

Name	No. of options exercised	No. of ordinary shares of GAAP Holdings (Australia) Limited issued	Amount paid	Amount unpaid
Mr P.H.	50,000	50,000	\$50,000	\$nil
Taylor				
W.L. Lee	6,250	6,250	\$6,250	\$nil
L.J. Jackson	6,250	6,250	\$6,250	\$nil
C.P. Daniels	4,167	4,167	\$4,167	\$nil
N.W. Wright	4,167	4,167	\$4,167	\$nil

GAAP Holdings (Australia) Limited

s.300A(1)(e)(ii)-(iv)

The following table summarises the value of options granted, exercised or lapsed during to directors and senior management:

	Value of options granted at the grant date (i) \$	Value of options exercised at the exercise date \$	Value of options lapsed at the date of lapse (ii) \$
P.H. Taylor	105,600	88,000	-
W.L. Lee	7,500	15,750	-
L.J. Jackson	7,500	15,750	-
C.P. Daniels	5,000	10,501	-
N.W. Wright	5,000	10,501	-
T.L. Smith	33,638	-	-

- (i) The value of options granted during the period is recognised in compensation over the vesting period of the grant, in accordance with Australian accounting standards.
- (ii) The value of options lapsing during the period due to the failure to satisfy a vesting condition is determined assuming the vesting condition had been satisfied.

Compensation

Reg2M.3.03(1) (Item 12)

For each grant of a cash bonus, performance related bonus or share-based payment compensation benefit made to a s.300A(1)(c) identified person, whether part of a specific contract for services or not, the remuneration report must include the terms and conditions of each grant affecting compensation in the reporting period or a future reporting period, including the following:

- (a) the grant date;
- (b) the nature of the compensation;
- (c) the service and performance criteria used to determine the amount of compensation;
- (d) if there has been any alteration of the terms or conditions of the grant since the grant date

 the date, details and effect of each alteration (see also 'alterations and modifications' below);
- (e) the percentage of the bonus or grant for the financial year that was paid to the period, or that vested in the person, in the financial year;
- (f) the percentage of the bonus or grant for the financial year that was forfeited by the person (because the person did not meet the service and performance criteria for the bonus or grant) in the financial year;
- (g) the financial years, after the financial year which the report relates, for which the bonus or grant will be payable if the person meets the service and performance criteria for the bonus or grant; and
- (h) estimates of the maximum and minimum possible total value of the bonus or grant (other than option grants) for financial years after the financial year to which the report relates.

Options and rights over equity instruments

Reg2M.3.03(3)

A disclosure required by Regulation 2M.3.03(1)(Item 15) and Regulation 2M.3.03(1)(Item 16) must:

- (a) be separated into each class of equity instrument; and
- (b) identify each class of equity instrument by:
 - i. the name of the issuing entity;
 - ii. the class of equity instrument; and
 - iii. if the instrument is an option or right the class and number of equity instruments for which it may be exercised.

Reg2M.3.03(1) (Item 15)

If options and rights over an equity instrument issued or issuable by the disclosing entity or any of its subsidiaries have been provided as compensation to a s.300A(1)(c) identified person during the reporting period:

- (a) the number of options and the number of rights that:
 - i. have been granted; and
 - ii. have vested
 - during the reporting period;

GAAP Holdings (Australia) Limited

- (b) the terms and conditions of each grant made during the reporting period, including:
 - the fair value per option or right at grant date; and
 - ii. the exercise price per share or unit; and
 - iii. the amount, if any, paid or payable, by the recipient; and
 - iv. the expiry date; and
 - v. the date or dates when the options or rights may be exercised; and
 - vi. a summary of the service and performance criteria that must be met before the beneficial interest vests in the person.

Reg2M.3.03(1) (Item 16)

If an equity instrument that is issued or issuable by the disclosing entity or any of its subsidiaries has been provided as a result of the exercise during the reporting period of options and rights that have been granted as compensation to a person:

- (a) the number of equity instruments;
- (b) if the number of options or rights exercised differs from the number of equity instruments disclosed under paragraph (a) the number of options or rights exercised;
- (c) the amount paid per instrument; and
- (d) the amount unpaid per instrument.

Alterations and modifications

Reg2M.3.03(1) (Item 14)

If the terms of share-based payment transactions (including options or rights) granted as compensation to key management personnel have been altered or modified by the issuing entity during the reporting period:

- (a) the date of the alteration;
- (b) the market price of the underlying equity instrument at the date of the alteration;
- (c) the terms of the grant of compensation immediately before the alteration, including:
 - i. the number and class of the underlying equity instruments, exercise price; and
 - ii. the time remaining until expiry; and
 - iii. each other condition in the terms that affects the vesting or exercise of an option or other right;
- (d) the new terms; and
- (e) the difference between:
 - i. the total of the fair value of the options or other rights affected by the alteration immediately before the alteration; and
 - ii. the total of the fair value of the options or other rights immediately after the alteration.

Key terms of employment contracts

s.300A(1)(e)(vii)

The report must also include, for each s.300A(1)(c) identified person:

(a) if the person is employed by the company under a contract – the duration of the contract, the
periods of notice required to terminate the contract and the termination payments provided for
under the contract;

Reg2M.3.03(1) (Item 13)

- (b) for each contract for services between a person and the disclosing entity (or any of its subsidiaries), any further explanation that is necessary in addition to those prescribed in s.300A(1)(ba) (refer page B15) and Regulation 2M.3.03(1)(Item 12) (refer page B20) to provide an understanding of:
 - i. how the amount of compensation in the current reporting period was determined; and
 - ii. how the terms of the contract affect compensation in future periods.

s.298(2)

This directors' report is signed in accordance with a resolution of directors made pursuant to s.298(2) of the Corporations Act 2001.

The Board of Directors GAAP Holdings (Australia) Limited 167 Admin Ave SYDNEY, NSW 2000

11 September 2010

Dear Board Members,

GAAP Holdings (Australia) Limited

s.298(1)(c), s.307C, ASIC-CO 98/2395 In accordance with section 307C of the Corporations Act 2001, I am pleased to provide the following declaration of independence to the directors of GAAP Holdings (Australia) Limited.

As lead audit partner for the audit of the financial statements of GAAP Holdings (Australia) Limited for the financial year ended 30 June 2010, I declare that to the best of my knowledge and belief, there have been no contraventions of:

- (i) the auditor independence requirements of the Corporations Act 2001 in relation to the
- (ii) any applicable code of professional conduct in relation to the audit.

Yours sincerely

DELOITTE TOUCHE TOHMATSU

T.L. Green Partner Chartered Accountants

Liability limited by a scheme approved under Professional Standards Legislation.

Source GAAP Holdings (Australia) Limited s.307C(1), (3) If an audit firm, audit company or ind

307C(1), (3) If an audit firm, audit company or individual auditor conducts an audit of the financial statements for the financial year, the lead auditor must give the directors of the company, registered scheme or disclosing entity a written declaration that, to the best of the lead auditor's knowledge and belief, there have been:

- no contraventions of the auditor independence requirements of the Corporations Act 2001 in relation to the audit; and
- (ii) no contraventions of any applicable code of professional conduct in relation to the audit; or a written declaration that, to the best of the lead auditor's knowledge and belief, the only contraventions of:
- the auditor independence requirements of the Corporations Act 2001 in relation to the audit;
 or
- (ii) any applicable code of professional conduct in relation to the audit;

are those contraventions details of which are set out in the declaration.

The auditor's independence declaration must be given when the audit report is given to the directors of the company, registered scheme or disclosing entity (other than when the conditions in s.307(5A) are satisfied – see below) and must be signed by the person making the declaration.

A declaration under s.307C(1) or s.307C(3) in relation to financial statements for a financial year satisfies the conditions in this subsection if:

- the declaration is given to the directors of the company, registered scheme or disclosing entity before the directors pass a resolution under s.298(2) in relation to the directors' report for the financial year; and
- a director signs the directors' report within 7 days after the declaration is given to the directors; and
- (c) the auditors' report on the financial statements is made within 7 days after the directors' report is signed; and
- (d) the auditors' report includes either of the following statements:
 - i. a statement to the effect that the declaration would be in the same terms if it had been given to the directors at the time that auditors' report was made:
 - ii. a statement to the effect that circumstances have changed since the declaration was given to the directors, and setting out how the declaration would differ if it had been given to the directors at the time the auditor's report was made.

An individual auditor or lead auditor is not required to give a declaration under s.307C(1) and s.307C(3) in respect of a contravention if:

- the contravention was a contravention by a person of s.324CE(2) or s.324CG(2) (strict liability contravention of specific independence requirements by individual auditor or audit firm), or s.324CF(2) (contravention of independence requirements by members of audit firms); and
- (b) the person does not commit an offence because of s.324CE(4), s.324CF(4) or s.324CG(4) (quality control system defence).

s.307C(5)(a)

s.307(5A)

s.307C(5B)

GAAP Holdings (Australia) Limited

Independent auditor's report to the members of GAAP Holdings (Australia) Limited

An independent auditor's report shall be prepared by the auditor in accordance with the Australian Auditing Standards.

Duty to form an opinion

The auditor is required to form an opinion on the following:

- s.307(a), s.308(1)
- whether the financial statements are in accordance with the Corporations Act 2001, including:
 - i. whether the financial statements comply with accounting standards; and
 - ii. whether the financial statements give a true and fair view of the financial performance and position of the entity (or consolidated entity);
- s.307(aa)
- if the financial statements include additional information under s.295(3)(c) (information included to give true and fair view of financial position and performance) whether the inclusion of that additional information was necessary to give the true and fair view required by s.297:
- s.307(b)
- whether the auditor has been given all information, explanations and assistance necessary for the conduct of the audit;
- s.307(c)
- whether the company, registered scheme or disclosing entity has kept financial records sufficient to enable financial statements to be prepared and audited;
- s.307(d)
- whether the company, registered scheme or disclosing entity has kept other records and registers as required by the Corporations Act 2001;
- s.308(3C)
- if the directors' report for the financial year includes a remuneration report, whether the auditor is of the opinion that the remuneration report complies with s.300A of the Corporations Act 2001. If not of that opinion, the auditor's report must say why; and
- s.308(3A), ASA700.49A
- when an entity, in accordance with Accounting Standard AASB 101 'Presentation of Financial Statements', has included in the notes to the financial statements an explicit and unreserved statement of compliance with IFRSs, whether the auditor is of the opinion that the financial statements comply with IFRSs. The auditor is only required to include in the audit report this opinion where the auditor agrees with the entity's statement of compliance,
- s.308(3)(b)
- The auditor is only required to include in the audit report particulars of any deficiency, failure or shortcoming in respect of any matter referred to in s.307(b), (c) or (d) above.

Qualified audit opinions

s.308(2)

Where, in the auditor's opinion, there has been a departure from a particular Accounting Standard, the audit report must, to the extent that is practicable to do so, quantify the effect that non-compliance has on the financial statements. If it is not practicable to quantify the effect fully, the report must say why.

Duty to report

s.308(3)(a) s.308(3A) s.308(3B) The auditor is required to report any defect or irregularity in the financial statements.

The audit report must include any statements or disclosures required by the auditing standards.

If the financial statements include additional information under s.295(3)(c) (information included to give true and fair view of financial position and performance), the audit report must also include a statement of the auditor's opinion on whether the inclusion of that additional information was necessary to give the true and fair view required by s.297.

Duty to inform

s.311(c)

The auditor must inform the ASIC in writing if the auditor is aware of circumstances that:

- the auditor has reasonable grounds to suspect amount to a contravention of the Corporations Act 2001; or
- amount to an attempt, in relation to the audit, by any person to unduly influence, coerce, manipulate or mislead a person involved in the conduct of the audit; or
- amount to an attempt, by any person, to otherwise interfere with the proper conduct of the audit.

s.311

The auditor is required to notify ASIC in writing of the circumstances of the matters outlined above as soon as practicable and in any case within 28 days, after the auditor becomes aware of those circumstances.

ASIC-RG 34

ASIC Regulatory Guide 34 provides guidance on the procedures to be followed by registered company auditors in complying with s.311 of the Corporations Act 2001, including specific reference to evidence of a contravention, examples of contraventions and timing of notification.

^{*} This requirement is proposed to be introduced into the *Corporations Act 2001* by the *Corporations Amendment (Corporate Reporting Reform) Bill 2010.* At the date of publication the Bill was only in draft form and had not been passed into law. This statement would donly be mandatorily included where the necessary legislation is enacted in appropriate timeframes. More information about the proposed changes can be found in Accounting Alert 2009/11 available at www.deloitte.com/au/AccountingAlerts.

GAAP Holdings (Australia) Limited

Format of the financial statements

General disclosures

Minimum general requirements relating to the format of the financial statements are included in Accounting Standards AASB 101 'Presentation of Financial Statements' and AASB 108 'Accounting Policies, Changes in Accounting Estimates and Errors' and have been implicitly applied in the model financial statements. These include:

AASB101.Aus50.1 AASB101.49

- (a) The financial statements shall be presented in the English language;
- (b) An entity shall clearly identify the financial statements and distinguish them from other information in the same published document;

AASB101.36

(c) An entity shall present a complete set of financial statements (including comparative information) at least annually;

AASB101.36

- (d) If an entity changes the end of its reporting period and presents financial statements for a period longer or shorter than one year, an entity shall disclose, in addition to the period covered by the financial statements:
 - i. the reason for using a longer or shorter period; and
 - ii. the fact that amounts presented in the financial statements are not entirely comparable;

AASB101.51 AASB101.51

- (e) An entity shall clearly identify each financial statement and the notes;
- (f) an entity shall display the following information prominently, and repeat it when necessary for the information presented to be understandable:

AASB101.51(a)

- i. the name of the reporting entity or other means of identification, and any change in that
 information from the end of the preceding reporting period (for example, to give a proper
 understanding, the change of name may be disclosed on the cover of the annual report
 and repeated in the directors' report, the directors' declaration, auditor's independence
- AASB101.51(b) AASB101.51(c)
- declaration, independent auditor's report and on the face of the financial statements); ii. whether the financial statements are of the individual entity or a group of entities;
- AASB101.51(d)
- iii. the date of the end of the reporting period or the period covered by the set of financial statements or notes;
- AASB101.51(d) AASB101.51(e) AASB101.45
- iv. the presentation currency; and
- AASB101.45(a)
- v. the level of rounding used in presenting amounts in the financial statements; and
- , ,
- An entity shall retain the presentation and classification of items in the financial statements from one period to the next unless:

 i. it is apparent, following a significant change in the nature of the entity's operations or a
- AASB101.45(b)
- review of its financial statements, that another presentation or classification would be more appropriate having regard to the criteria for the selection and application of accounting policies in AASB 108; or
- ii. an Australian Accounting Standard requires a change in presentation.

Specific disclosures

Where the following is not disclosed elsewhere in information published with the financial statements, the information shall be disclosed in the financial statements:

AASB101.138(a)

(a) the domicile and legal form of the entity, its country of incorporation and the address of its registered office (or principal place of business, if different from the registered office); For a listed entity, this information would normally be disclosed in additional stock exchange information. However, non-listed entities will need to ensure that this information is specifically included in the financial statements. These disclosure requirements are illustrated in note 1 to the model financial statements.

AASB101.138(b)

(b) a description of the nature of the entity's operations and its principal activities; Complying with the Corporations Act 2001 directors' report requirements, in relation to principal activities, will ensure compliance with these requirements. This disclosure requirement is illustrated in the directors' report.

AASB101.138(c) AASB101.138(d)

- (c) the name of the parent and the ultimate parent of the group; and
- (d) if it is a limited life entity, information regarding the length of its life.

Notes to the financial statements

AASB101.112

The notes shall:

- (a) present information about the basis of preparation of the financial statements and the specific accounting policies used;
- (b) disclose the information required by Australian Accounting Standards that is not presented elsewhere in the financial statements: and
- (c) provide information that is not presented elsewhere in the financial statements, but is relevant to an understanding of any of them.

Source	GAAP Holdings (Australia) Limited
AASB101.113	An entity shall, as far as practicable, present notes in a systematic manner. An entity shall cross-reference each item in the statements of financial position and of comprehensive income, in the separate income statement (if presented), and in the statements of changes in equity and of cash flows to any related information in the notes.
AASB101.38	Comparative information Except when Australian Accounting Standards permit or require otherwise, an entity shall disclose comparative information in respect of the previous period for all amounts reported in the current period's financial statements. An entity shall include comparative information for narrative and descriptive information when it is relevant to an understanding of the current period's financial statements.
AASB101.41	Reclassification of financial information When the entity changes the presentation or classification of itemsin its financial statements, the entity shall reclassify comparative amounts unless reclassification is impracticable. When the entity reclassifies comparative amounts, the entity shall disclose: (a) the nature of the reclassification;
AASB101.42	 (b) the amount of each item or class of items that is reclassified; and (c) the reason for the reclassification. When it is impracticable to reclassify comparative amounts, an entity shall disclose: (a) the reason for not reclassifying the amounts; and. the nature of the adjustments that would have been made if the amounts had been reclassified
AASB108.42	Errors made in prior periods Material prior period errors shall be retrospectively corrected in the first financial statements authorised for issue after their discovery by: (a) restating the comparative amounts for the prior period(s) presented in which the error occurred; or (b) if the error occurred before the earliest prior period presented, restating the opening balances of assets, liabilities and equity for the earliest prior period presented.
AASB108.43	However, to the extent that it is impracticable to determine either:
AASB108.44	(a) the period-specific effects of an error on comparative information for one or more prior periods presented, the entity shall restate the opening balances of assets, liabilities and equity for the earliest period for which retrospective restatement is practicable (which may be the current period); or
AASB108.45	(b) the cumulative effect, at the beginning of the current period, of an error on all prior periods, the entity shall restate the comparative information to correct the error prospectively from the earliest date practicable.
AASB108.46	The correction of a prior period error is excluded from profit or loss for the period in which the error is discovered. Any information presented about prior periods, including any historical summaries of financial data, is restated as far back as is practicable. The disclosure requirements are illustrated in note 4 to the model financial statements.
AASB108.36	Change in accounting estimates The effect of a change in an accounting estimate shall be recognised prospectively by including it in profit or loss in: (a) the period of the change, if the change affects that period only; or
AASB108.37	(b) the period of the change and future periods, if the change affects both. To the extent that a change in an accounting estimate gives rise to changes in assets and liabilities, or relates to an item of equity, it shall be recognised by adjusting the carrying amount of the related asset, liability or equity item in the period of the change. The disclosure requirements with respect to revisions of accounting estimates are illustrated in note 4 to the model financial statements.

GAAP Holdings (Australia) Limited

AASB101.15

True and fair override

AASB101.Aus15.1

Financial statements shall present fairly the financial position, financial performance and cash flows of an entity. Fair presentation requires the faithful representation of the effects of transactions, other events and conditions in accordance with the definitions and recognition criteria for assets, liabilities, income and expenses set out in the *Framework*. The application of IFRSs, with additional disclosure when necessary, is presumed to result in financial statements that achieve a fair presentation.

The Corporations Act requires an entity's financial statements to comply with Australian Accounting Standards and, if necessary to give a true and fair view, further information to be disclosed in the notes.

AASB101.23

In the extremely rare circumstances in which management concludes that compliance with a requirement in an Australian Accounting Standard would be so misleading that it would conflict with the objective of financial statements set out in the Framework, but the relevant regulatory framework prohibits departure from the requirement, the entity shall, to the maximum extent possible, reduce the perceived misleading aspects of compliance by disclosing:

- (a) the title of the Australian Accounting Standard in question, the nature of the requirement, and the reason why management has concluded that complying with that requirement is so misleading in the circumstances that it conflicts with the objective of financial statements set out in the Framework; and
- (b) for each period presented, the adjustments to each item in the financial statements that management has concluded would be necessary to achieve a fair presentation.

Consolidated entity vs. group

The provisions of the Corporations Act 2001 use the term 'consolidated entity', rather than 'group', to refer to the parent entity and the subsidiaries included in the consolidated financial statements. Therefore, where consolidated financial statements are prepared under the Corporations Act 2001, the directors' report, directors' declaration, auditor's independence declaration and independent auditor's report shall adopt the term 'consolidated entity'. However, as the Accounting Standards use the term 'group' to refer to the parent entity and its subsidiaries, it would be equally acceptable for the financial statements and the notes thereto to adopt the term 'group', as has been illustrated in the model financial statements.

GAAP Holdings (Australia) Limited Source Presentation of revenues and expenses An entity shall present all items of income and expense recognised in a period: AASB101.81 in a single statement of comprehensive income; or (b) in two statements (i) a statement displaying components of profit or loss (separate income statement); and a second statement beginning with profit or loss and displaying components of other comprehensive income (statement of comprehensive income). AASB101.82 As a minimum, the statement of comprehensive income shall include line items that present the following amounts for the period: revenue: (b) finance costs: share of the profit or loss of associates and joint ventures accounted for using the equity (c) method; (d) tax expense; a single amount comprising of: (e) the post-tax profit or loss of discontinued operations; and the post-tax gain or loss recognised on the measurement to fair value less costs to sell or on the disposal of the assets or disposal group(s) constituting the discontinued operation; (f) profit or loss; each component of other comprehensive income classified by nature (excluding amounts in (g) (h) share of the other comprehensive income of associates and joint ventures accounted for using the equity method; and total comprehensive income. AASB101.84 An entity may present in a separate income statement the line items in paragraph a – f (above) and the allocation of profit or loss for the period between minority interest and owners of the AASB101.83 An entity shall disclose the following allocations in the statement of comprehensive income for the period: (a) profit or loss for the period attributable to: (i) non-controlling interests; and (ii) owners of the parent; and (b) total comprehensive income for the period attributable to: non-controlling interests; and (ii) owners of the parent. AASB101.88 All items of income and expense recognised in a period are to be included in profit or loss unless another Accounting Standard requires otherwise. Other Accounting Standards require some gains and losses (for example, revaluation increases and decreases, particular foreign exchange differences, gains or losses on remeasuring available-for-sale financial assets, and related amounts of current tax and deferred tax) to be recognised directly in other comprehensive income. Examples of items of income and expense recognised directly in other comprehensive income not illustrated in these model financial statements include: transfers to profit or loss on impairment of available-for-sale financial assets share of increments in reserves attributable to jointly controlled entities. An entity shall present, in the statement of comprehensive income or in the separate income AASB101.99.100 statement (if presented), or in the notes, an analysis of expenses recognised in profit or loss using a classification based on either their nature or their function within the entity, whichever provides information that is reliable and more relevant. Sub-classifications of expenses by nature or function have been illustrated in the example on the face of the separate income statement and in the statement of comprehensive income respectively as is encouraged by the Accounting Standard. AASB101.105 The choice between the function of expense method and the nature of expense method depends on historical and industry factors and the nature of the entity. Both methods provide an indication of those costs that might vary, directly or indirectly, with the level of sales or production of the

entity. Because each method of presentation has merit for different types of entities, management is required to select the more relevant and reliable presentation. However, because information on the nature of expenses is useful in predicting future cash flows, additional disclosure is required

when the function of expense classification is used.

Source	GAAP Holdings (Australia) Limited
AASB101.29, 30 AASB1031	Regardless of whether expenses are classified by nature or by function, each material class is separately disclosed. Unclassified expenses that are immaterial both individually and in aggregate may be combined and presented as a single line item. An item that is not sufficiently material to warrant separate presentation on the face of the financial statements may nevertheless be sufficiently material for it to be presented separately in the notes. It follows that the total of unclassified expenses is unlikely to exceed 10 per cent of total expenses classified by nature or by function, whether disclosed either on the face or in the notes to the financial statements.
AASB101.32	Offsetting An entity shall not offset income and expenses, unless required or permitted by an Australian Accounting Standard.
AASB101.34	 An entity undertakes, in the course of its ordinary activities, transactions that do not generate revenue but are incidental to the main revenue-generating activities. An entity presents the results of such transactions, when this presentation reflects the substance of the transaction or other event, by netting any income with related expenses arising on the same transaction. For example: (a) an entity presents gains and losses on the disposal of non-current assets, including investments and operating assets, by deducting from the proceeds on disposal the carrying amount of the asset and related selling expenses; and (b) an entity may net expenditure related to a provision that is recognised in accordance with AASB 137 Provisions, Contingent Liabilities and Contingent Assets and reimbursed under a contractual arrangement with a third party (for example, a supplier's warranty agreement) against the related reimbursement.
AASB101.35	An entity presents on a net basis gains and losses arising from a group of similar transactions, for example, foreign exchange gains and losses or gains and losses arising on financial instruments held for trading. However, an entity presents such gains and losses separately if they are material.
AASB101.97	Disclosure of specific revenues and expenses When items of income and expense are material, an entity shall disclose their nature and amount separately either in the statement of comprehensive income or in the notes.
AASB101.85	Disclosure of additional information An entity shall present additional line items, headings and subtotals in the statement of comprehensive income and the separate income statement (if presented), when such presentation is relevant to an understanding of the entity's financial performance.
AASB101.87	Prohibition on extraordinary items An entity shall not present any items of income or expense as extraordinary items, in the statement of comprehensive income or the separate income statement (if presented), or in the notes.
AASB119.93B	Where an entity recognises actuarial gains and losses with respect to defined benefit plans in other comprehensive income, the entity must present these in the statement of comprehensive income. Illustrative examples of a statement of comprehensive income are presented on pages B31 and B33.

Source	GAAP Holdings (Australia) Limited
AASB101.10(f)	Third statement of financial position An entity is required to present a statement of financial position as at the beginning of the earliest comparative period when it applies an accounting policy retrospectively or makes a retrospective restatement of items in its financial statements, or when it reclassifies items in its financial statements. Note that a third statement of financial position is illustrated on page B37.
AASB101.60	Current/non-current vs. liquidity presentation All assets and all liabilities shall be classified and presented as either current or non-current unless they are presented in order of their liquidity. The term 'current' is defined for:
AASB101.66	 (a) assets, as an asset that is: expected to be realised in, or is intended for sale or consumption in, the entity's normal operating cycle; held primarily for the purpose of being traded; expected to be realised within 12 months after the reporting period; or cash or a cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period;
AASB101.69	 (b) liabilities, as a liability that: i. is expected to be settled in the entity's normal operating cycle; ii. is held primarily for the purpose of being traded; iii. is due to be settled within 12 months after the end of the reporting period; or iv. the entity does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.
AASB101.60	A liquidity basis shall only be presented where a liquidity presentation provides information that is reliable and more relevant than the current/non-current presentation. The liquidity basis of presentation is not illustrated in these model financial statements.
AASB101.68	Operating cycle A company's operating cycle is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents. Once an entity defines their operating cycle it affects the classification and presentation of assets and liabilities as either current or non-current.
AASB101.68, 70	When an entity's normal operating cycle is not clearly identifiable, its duration is assumed to be 12 months.
AASB101.66, 69	However, where there is a single clearly identifiable operating cycle that extends over a period greater than 12 months, the longer period shall be used as the basis for identifying as: (a) current assets, those assets expected to be realised in, or intended for sale or consumption in, the entity's normal operating cycle; and (b) current liabilities, those liabilities expected to be settled in the entity's normal operating cycle.
AASB101.68, 70	Current assets will include inventories and trade receivables that are sold, consumed or realised as part of the normal operating cycle and current liabilities will include those liabilities that form part of the working capital used in a normal operating cycle of the entity, for example trade payables and accruals for employee benefits expense. This is the case even when they are not expected to be realised/settled within 12 months of the reporting period.
AASB101.72	Refinancing liabilities Where current and non-current liabilities are presented separately, financial liabilities shall be categorised as current when they are due to be settled within 12 months of the reporting period, even if:
	 (a) the original term was for a period longer than 12 months; and (b) an agreement to refinance, or to reschedule payments, on a long term basis is completed after the reporting period and before the financial statements are authorised for issue.
AASB101.73	However, if an entity expects, and has the discretion, to refinance or roll over an obligation for at least 12 months after the reporting period under an existing loan facility, it classifies the obligation as non-current, even if it would otherwise be due within a shorter period. However, when refinancing or rolling over the obligation is not at the discretion of the entity (for example, there is no arrangement for refinancing), the entity does not consider the potential to refinance the obligation and classifies the obligation as current.

Source **GAAP Holdings (Australia) Limited Breach of loan covenants** AASB101.74 When an entity breaches a provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand, it classifies the liability as current, even if the lender has agreed, after the reporting period, and before the authorisation of the financial statements for issue, not to demand payment as a consequence of the breach. An entity classifies the liability as current because, at the end of the reporting period, it does not have an unconditional right to defer its settlement for at least twelve months after that date AASB101.75 However, an entity classifies the liability as non-current if the lender agreed by the end of the reporting period to provide a period of grace ending at least 12 months after the reporting period, within which the entity can rectify the breach and during which the lender cannot demand immediate repayment. Offsetting AASB101.32 An entity shall not offset assets and liabilities, unless required or permitted by an Accounting Standard, for example, AASB 132 Financial Instruments: Presentation. Income taxes AASB112.71 An entity shall offset current tax assets and current tax liabilities if, and only if, the entity: has a legally enforceable right to set-off the recognised amounts; and (b) intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously. AASB112.74 An entity shall offset deferred tax assets and deferred tax liabilities if, and only if: the entity has a legally enforceable right to set-off current tax assets against current tax liabilities; and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either: the same taxable entity; or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered. Presentation of a non-current asset or disposal group classified as held for sale **AASB5.40** An entity shall not reclassify or re-present amounts presented for non-current assets or for the assets and liabilities of disposal groups classified as held for sale in the statements of financial position for prior periods to reflect the classification in the statement of financial position for the latest period presented.

See the explanatory note preceding note 37 regarding the level of detail presented in the statement of changes in equity. The format adopted on this page shows a single line for 'Total comprehensive income for the year'. Due to concern that this presentation appears to be inconsistent with the requirements of AASB101.106 as currently drafted, the International Accounting Standards Board has clarified that its original intention was to allow this aggregated presentation and a proposal to clarify the wording of AASB101.106 has recently been issued. This model has been prepared taking account of the proposed clarification.

Source GAAP Holdings (Australia) Limited

AASB101.106

An entity shall present a statement of changes in equity showing in the statement:

- (a) total comprehensive income for the period, showing separately the total amounts attributable to owners of the parent and to non-controlling interests;
- (b) for each component of equity, the effects of retrospective application or retrospective restatement recognised in accordance with AASB 108; and
- (c) for each component of equity, a reconciliation between the carrying amount at the beginning and end of the period, separately disclosing changes resulting from:
 - (i) profit or loss;
 - (ii) each item of other comprehensive incomes; and
 - (iii) transactions with owners in their capacity as owners, showing separately contributions by and distributions to owners and changes in ownership interests in subsidiaries that do not result in a loss of control.

AASB101.107

AASB 101.BC75

An entity shall present, either in the statement of changes in equity or in the notes, the amount of dividends recognised as distributions to owners during the period, and the related amount per share. (Note that presentation of dividend disclosures in the statement of comprehensive income is no longer permitted.)

An illustrative example of a statement of changes in equity is presented on page B41.

AASB101.109

Changes in an entity's equity between the beginning and the end of the reporting period reflect the increase or decrease in its net assets during the period. Except for changes resulting from transactions with owners in their capacity as owners (such as equity contributions, reacquisitions of the entity's own equity instruments and dividends) and transaction costs directly related to such transactions, the overall change in equity during a period represents the total amount of income and expense, including gains and losses, generated by the entity's activities during that period.

GAAP Holdings (Australia) Limited

AASB107.14

Operating activities

Cash flows from operating activities are primarily derived from the principal revenue-producing activities of the entity. Therefore, they generally result from the transactions and other events that enter into the determination of profit or loss. Examples of cash flows from operating activities are:

- cash receipts from the sale of goods and the rendering of services; (a)
- cash receipts from royalties, fees, commissions and other revenue; (b)
- cash payments to suppliers for goods and services: (c)
- (d) cash payments to and on behalf of employees;
- cash receipts and cash payments of an insurance entity for premiums and claims, annuities (e) and other policy benefits:
- cash payments or refunds of income taxes unless they can be specifically identified with (f) financing and investing activities; and
- cash receipts and payments from contracts held for dealing or trading purposes.

Some transactions, such as the sale of an item of plant, may give rise to a gain or loss that is included in recognised profit or loss. The cash flows relating to such transactions are cash flows from investing activities. However, cash payments to manufacture or acquire assets held for rental to others and subsequently held for sale as described in paragraph 68A of AASB 116 Property. Plant and Equipment are cash flows from operating activities. The cash receipts from rents and subsequent sales of such assets are also cash flows from operating activities.

AASB107.18

Entities shall report cash flows from operations using the direct method or indirect method.

AASB107.19

Entities are encouraged to report cash flows from operating activities using the direct method.

AASB107.Aus20.

When the direct method is used, a reconciliation of cash flows arising from operating activities to profit or loss shall be disclosed in the notes to the financial statements.

Investing activities

The separate disclosure of cash flows arising from investing activities is important because the cash flows represent the extent to which expenditures have been made for resources intended to generate future income and cash flows. Examples of cash flows arising from investing activities are:

- (a) cash payments to acquire property, plant and equipment, intangibles and other long-term assets. These payments include those relating to capitalised development costs and selfconstructed property, plant and equipment;
- cash receipts from sales of property, plant and equipment, intangibles and other long-term (b) assets:
- cash payments to acquire equity or debt instruments of other entities and interests in joint (c) ventures (other than payments for those instruments considered to be cash equivalents or those held for dealing or trading purposes);
- cash receipts from sales of equity or debt instruments of other entities and interests in joint (d) ventures (other than receipts for those instruments considered to be cash equivalents and those held for dealing or trading purposes);
- cash advances and loans made to other parties (other than advances and loans made by a (e) financial institution):
- cash receipts from the repayment of advances and loans made to other parties (other than (f) advances and loans of a financial institution);
- cash payments for futures contracts, forward contracts, option contracts and swap contracts (g) except when the contracts are held for dealing or trading purposes, or the payments are classified as financing activities; and
- cash receipts from futures contracts, forward contracts, option contracts and swap contracts (h) except when the contracts are held for dealing or trading purposes, or the receipts are classified as financing activities.

When a contract is accounted for as a hedge of an identifiable position, the cash flows of the contract are classified in the same manner as the cash flows of the position being hedged.

AASB107.16

Source	GAAP Holdings (Australia) Limited
AASB107.17	Financing activities The separate disclosure of cash flows arising from financing activities is important because it is useful in predicting claims on future cash flows by providers of capital to the entity. Examples of cash flows arising from financing activities are: (a) cash proceeds from issuing shares or other equity instruments; (b) cash payments to owners to acquire or redeem the entity's shares; (c) cash proceeds from issuing debentures, loans, notes, bonds, mortgages and other short or long-term borrowings; (d) cash repayments of amounts borrowed; and (e) cash payments by a lessee for the reduction of the outstanding liability relating to a finance lease.
AASB107.31	Interest and dividends Cash flows from interest and dividends received and paid shall each be disclosed separately. Each shall be classified in a consistent manner from period to period as either operating, investing or financing activities.
AASB107.32	The total amount of interest paid during a period is disclosed in the cash flow statement whether it has been recognised as an expense in profit or loss or capitalised in accordance with AASB 123 Borrowing Costs.
AASB107.33	Interest paid and interest and dividends received are usually classified as operating cash flows for a financial institution. However, there is no consensus on the classification of these cash flows for other entities. Interest paid and interest and dividends received may be classified as operating cash flows because they enter into the determination of net profit or loss. Alternatively, interest paid and interest and dividends received may be classified as financing cash flows and investing cash flows respectively, because they are costs of obtaining financial resources or returns on investments.
AASB107.34	Dividends paid may be classified as a financing cash flow because they are a cost of obtaining financial resources. Alternatively, dividends paid may be classified as a component of cash flows from operating activities in order to assist users to determine the ability of an entity to pay dividends out of operating cash flows.
AASB107.35	Taxes on income Cash flows arising from taxes on income shall be separately disclosed and shall be classified as cash flows from operating activities unless they can be specifically identified with financing and investing activities.
AASB107.37	Investments in subsidiaries, associates and joint ventures When accounting for an investment in an associate or a subsidiary accounted for by use of the equity or cost method, an investor restricts its reporting in the cash flow statement to the cash flows between itself and the investee, for example, to dividends and advances.
AASB107.38	An entity which reports its interest in a jointly controlled entity (see AASB 131 <i>Interests in Joint Ventures</i>) using proportionate consolidation, includes in its consolidated cash flow statement its proportionate share of the jointly controlled entity's cash flows. An entity which reports such an interest using the equity method includes in its cash flow statement the cash flows in respect of its investments in the jointly controlled entity, and distributions and other payments or receipts between it and the jointly controlled entity.
AASB107.43	Non-cash transactions Investing and financing transactions that do not require the use of cash or cash equivalents shall be excluded from a cash flow statement. Such transactions shall be disclosed elsewhere in the financial statements in a way that provides all the relevant information about these investing and financing activities.

Source **GAAP Holdings (Australia) Limited** 1. General information AASB101.10(e), 51(b),(c) AASB101.138(a) GAAP Holdings (Australia) Limited (the Company) is a limited company incorporated in Australia. The addresses of its registered office and principal place of business are disclosed in the introduction to the annual report. The principal activities of the Company and its subsidiaries (the Group) are described in note 6. AASB101.138(a) Disclosures in relation to the domicile and legal form of the entity, the country of incorporation and the address of the registered office (or principal place of business, if different from the registered office) only need be made in the financial report where such information is not disclosed elsewhere in information published with the financial report. The following sentence is suggested in the year of incorporation: 'The company was incorporated on [date] and accordingly only current year figures covering the period from incorporation are shown." 2. Adoption of new and revised Accounting Standards 2.1 Standards and Interpretations affecting amounts reported in the current period (and/or prior periods) AASB 108.28 The following new and revised Standards and Interpretations have been adopted in the current period and have affected the amounts reported in these financial statements. Details of other Standards and Interpretations adopted in these financial statements but that have had no effect on the amounts reported are set out in section 2.2. Standards affecting presentation and disclosure AASB 101 Presentation of AASB 101(September 2007) has introduced terminology Financial Statements (as changes (including revised titles for the financial statements) revised in September 2007). and changes in the format and content of the financial AASB 2007-8 Amendments to statements. In addition, the revised Standard has required the Australian Acounting Standards presentation of a third statement of financial position at 1 July arising from AASB 101 and 2008, because the entity has applied new accounting policies AASB 2007-10 Further retrospectively (see below). Amendments to Australian Acounting Standards arising from AASB 101 AASB 8 Operating Segments AASB 8 is a disclosure Standard that has resulted in a redesignation of the Group's reportable segments (see note 6). AASB 2009-2 Amendments to The amendments to AASB 7 expand the disclosures required in Australian Accounting respect of fair value measurements and liquidity risk. The Group

Disclosures about Financial

has elected not to provide comparative information for these expanded disclosures in the current year in accordance with the transitional reliefs offered in these amendments.

Disclosures in these financial statements have been modified to reflect the clarification in AASB 2009-5 Further Amendments to

Disclosures in these financial statements have been modified to reflect the clarification in AASB 2009-5 Further Amendments to Australian Accounting Standards arising from the Annual Improvements Project that the disclosure requirements in Standards other than AASB 5 do not generally apply to noncurrent assets classified as held for sale and discontinued operations.

Source **GAAP Holdings (Australia) Limited** 2. Adoption of new and revised Accounting Standards (cont'd) AASB107.56 Amendments to AASB 107 The amendments (part of AASB 2009-5 Further Amendments to Statement of Cash Flows Australian Accounting Standards arising from the Annual (adopted in advance of effective Improvements Project) specify that only expenditures that result in a recognised asset in the statement of financial position can date of 1 January 2010) be classified as investing activities in the statement of cash flows. Consequently, cash flows in respect of development costs that do not meet the criteria in AASB 138 Intangible Assets for capitalisation as part of an internally generated intangible asset (and, therefore, are recognised in profit or loss as incurred) have been reclassified from investing to operating activities in the statement of cash flows. Prior year amounts have been restated for consistent presentation. Standards and Interpretations affecting the reported results or financial position The impact of the changes described in this section on basic and diluted earnings per share is disclosed in note 14. AASB 108,28(a) AASB 3 Business Combinations (as revised in 2008) **AASB 3.64** AASB 3(2008) has been adopted in the current year. Its adoption has affected the accounting for business combinations in the current period. **AASB** In accordance with the relevant transitional provisions, AASB 3(2008) has been applied prospectively 108.28(b),(d) to business combinations for which the acquisition date is on or after 1 July 2009. The impact of the AASB 108.28(c) adoption of AASB 3(2008) Business Combinations has been: to allow a choice on a transaction-by-transaction basis for the measurement of non-controlling interests (previously referred to as 'minority' interests) either at fair value or at the non-controlling interests' share of the fair value of the identifiable net assets of the acquiree. In the current period, when accounting for the acquisition of Subsix Limited, the Group has elected to measure the non-controlling interests at fair value at the date of acquisition. Consequently, the goodwill recognised in respect of that acquisition reflects the impact of the difference between the fair value of the non-controlling interests and their share of the fair value of the identifiable net assets of the acquiree;

 where the business combination in effect settles a pre-existing relationship between the Group and the acquiree, to require the recognition of a settlement gain or loss; and

the acquisition date). All other subsequent adjustments are recognised in profit or loss;

to change the recognition and subsequent accounting requirements for contingent consideration. Under the previous version of the Standard, contingent consideration was recognised at the acquisition date only if payment of the contingent consideration was probable and it could be measured reliably; any subsequent adjustments to the contingent consideration were recognised against goodwill. Under the revised Standard, contingent consideration is measured at fair value at the acquisition date; subsequent adjustments to the consideration are recognised against goodwill only to the extent that they arise from better information about the fair value at the acquisition date, and they occur within the 'measurement period' (a maximum of 12 months from

 to require that acquisition-related costs be accounted for separately from the business combination, generally leading to those costs being recognised as an expense in profit or loss as incurred, whereas previously they were accounted for as part of the cost of the acquisition.

Source	GAAP Holdings (Australia) Limited		
	2. Adoption of new and revised Accounting Standards (cont'd)		
AASB 108.28(f)(i)	In the current period, these changes in policies have affected the accounting for the acquisition of Subsix Limited and Subseven Limited as follows:		
	Statement of financial position	20/06/10	
		30/06/10 \$'000	
	Excess of the fair value of non-controlling interests in Subsix Limited over their share of the fair value of the identifiable net assets (reflected in non-controlling interests)	62	
	Liability recognised in respect of the fair value of contingent consideration that would not have been recognised under the previous version of the Standard (reflected in 'other financial liabilities')	75	
	Adjustment to purchase consideration to reflect the effective settlement of the Group's law suit against Subseven Limited (profit or loss)	40	
	Acquisition-related costs expensed when incurred (profit or loss)	(145)	
	Additional goodwill recognised as result of the adoption of AASB 3(2008)	32	
	Statement of comprehensive income	Vasu	
		Year ended 30/06/10 \$'000	
	Gain recognised to reflect the effective settlement of the Group's lawsuit against Subseven Limited (included in 'other gains and losses')	40	
	Cost of share-based payment awards allocated to post-combination service	-	
	Acquisition-related costs expensed when incurred (included in 'other expenses')	(145)	
	Decrease in profit for the year as a result of the adoption of AASB 3(2008)	(105)	
	AASB 3(2008) has also required additional disclosures in respect of the business combinations in the period (see note 46).		
	Results in future periods may be affected by future impairment losses relating to the increased goodwill, and by changes in the fair value of contingent consideration recognised as a liability.		
AASB 108.28(a)	AASB 127 Consolidated and Separate Financial Statements (as revised in 2008)		
AASB 127.45	The revisions to AASB 127(2008) principally affect the accounting for transactions or events that result in a change in the Group's interests in its subsidiaries. The adoption of the revised Standard has affected the accounting for the Group's disposal of part of its interest in Subone Limited in the year (see below).		
AASB 108.28(b),(d) AASB 108.28(c)	AASB 127(2008) has been adopted for periods beginning on of after 1 July 2009 and has been applied retrospectively (subject to specified exceptions) in accordance with the relevant transitional provisions. The revised Standard has affected the Group's accounting policies regarding changes in ownership interests in its subsidiaries that do not result in a change in control. In prior years, in the absence of specific requirements in A-IFRS, increases in interests in existing subsidiaries were treated in the same manner as the acquisition of subsidiaries, with goodwill or a bargain purchase gain being recognised where appropriate; for decreases in interests in existing subsidiaries that did not involve a loss of control, the difference between the consideration received and the carrying amount of the share of net assets disposed of was recognised in profit or loss. Under AASB 127(2008), all such increases or decreases are dealt with in equity, with no impact on goodwill or profit or loss.		

Source **GAAP Holdings (Australia) Limited** 2. Adoption of new and revised Accounting Standards (cont'd) When control of a subsidiary is lost as a result of a transaction, event or other circumstance, the revised Standard requires that the Group derecognise all assets, liabilities and non-controlling interests at their carrying amount. Any retained interest in the former subsidiary is recognised at its fair value at the date control is lost, with the gain or loss arising recognised in profit or loss. AASB 108.28(f)(i) In respect of the disposal during the period of part of the Group's interest in Subone Limited, the change in policy has resulted in the difference of \$34,000 between the consideration received and the non-controlling interests recognised being recognised directly in equity, instead of in profit or loss. Therefore, the change in accounting policy has resulted in a decrease in the profit for the year of \$34.000. AASB 108.28(a) Amendments to AASB 128 Investments in Associates The principle adopted under AASB 127(2008) (see above) that a loss of control is recognised as a disposal and re-acquisition of any retained interest at fair value is extended by consequential amendment to AASB 128 in AASB 2008-3 Amendments to Australian Accounting Standards arising from AASB 3 and AASB 127; therefore, when significant influence is lost, the investor measures any investment retained in the former associate at fair value, with any consequential gain or loss recognised in profit or loss. AASB 108.28(b) AASB 2008-3 has been adopted for periods beginning on or after 1 July 2009 and has been applied prospectively in accordance with the relevant transitional provisions. The changes have affected the to (f)(i) accounting for the partial disposal of the Group's interest in E Plus Limited in the year. The difference of \$104,000 between the carrying amount of the interest retained in E Plus Limited and its fair value has been recognised in profit or loss in the period, net of a deferred tax expense of \$32,000. Had the Group's previous accounting policy been followed, the carrying amount of the investment retained would have been regarded as cost for the purpose of subsequent accounting as an available-for-sale investment under AASB 139 Financial Instruments: Recognition and Measurement and the movement in fair value (and related deferred tax) would have been recognised in other comprehensive income. The profit reported for 2010 has therefore been increased by \$72,000 as a result of the change in accounting policy. This increase will be offset by a decrease in profits of an equivalent amount when the investment is disposed of in future accounting periods. Amendments to AASB 138 Intangible Assets AASB 108.28(a) As part of AASB 2008-5 Amendments to Australian Accounting Standards arising from the Annual AASB 108.28(c) Improvements Project, AASB 138 has been amended to state that an entity is permitted to recognise a prepayment asset for advertising or promotional expenditure only up to the point at which the entity has the right to access the goods purchased or up to the point of receipt of services. Mail order catalogues have been specifically identified as a form of advertising and promotional activities. In the past, the Group had recognised inventories of catalogues held as an asset up to the date of dispatch to the customer. **AASB** 108.28(b),(d), The amendments have been applied retrospectively in accordance with the relevant transitional (f)(i), (g)provisions, resulting in a reduction in inventories held at 1 July 2008 of \$132,000 and a reduction in deferred tax liabilities of \$40,000 at the same date, leading to a net adjustment to retained earnings at 1 July 2008 of \$92,000. [Marketing expenses/raw materials and consumables used] in 2010 have

retained earnings by \$105,000 (2009: \$97,000).

been increased by \$12,000 (2009: \$7,000), and the income tax expense reduced by \$4,000 (2009: \$2,000). The impact of the change at 30 June 2010 has been to decrease inventories by \$151,000 (2009: \$139,000), to decrease deferred tax liabilities by \$46,000 (2009: \$42,000) and to decrease

Source **GAAP Holdings (Australia) Limited** 2. Adoption of new and revised Accounting Standards (cont'd) AASB 108.28(a) Amendments to AASB 140 Investment Property AASB 108.28(c) As part of AASB 2008-5 Amendments to Australian Accounting Standards arising from the Annual Improvements Project, AASB 140 has been amended to include within its scope investment property in the course of construction. Therefore, following the adoption of the amendments and in line with the Group's general accounting policy, investment property under construction is measured at fair value (where that fair value is reliably determinable), with changes in fair value recognised in profit or loss. The Group had previously accounted for such assets at cost less accumulated impairment losses under AASB 116 Property. Plant and Equipment. **AASB** 108.28(b),(d), The change has been applied prospectively from 1 July 2009 in accordance with the relevant (f)(i) transitional provisions, resulting in a reclassification of investment property at its previous carrying amount of \$1.51 million in the year, and the recognition of a gain on revaluation of the property in profit or loss (reported as part of 'other gains and losses') of \$290,000, offset by a deferred tax expense of \$87,000. At 30 June 2010, the impact has been to decrease property, plant and equipment by \$1.51 million, to increase investment property by \$1.8 million, to increase deferred tax liabilities by \$87,000 and to increase retained earnings by \$203,000. Amendments to AASB 120 Accounting for Government Grants and Disclosure of Government AASB 108.28(a) Assistance AASB 108.28(c) As part of AASB 2008-5 Amendments to Australian Accounting Standards arising from the Annual Improvements Project, AASB 120 has been amended to require that the benefit of a government loan at a below-market rate of interest be treated as a government grant. This accounting treatment was not permitted prior to these amendments. **AASB** In accordance with the relevant transitional provisions, the policy has been applied prospectively to 108.28(b),(d), government loans received on or after 1 July 2009. On 17 June 2010, the Group received an interest-(f)(i)free government loan of \$3 million to finance staff training over a two-year period. Using prevailing market interest rates for an equivalent loan of 7.2% per annum, the fair value of the loan is estimated at \$2.61 million. The difference between the gross proceeds and the fair value of the loan of \$390,000 is the benefit derived from the interest-free loan and is recognised as deferred revenue. This amount will be offset against training costs incurred in 2011 (\$250,000) and 2012 (\$140,000). Interest expenses will be recognised in 2011 (\$188,000) and 2012 (\$202,000), resulting in a net increase in profit for 2011 of \$62,000, and an equivalent reduction in profit for 2012. Changes in accounting policies on initial application of Accounting Standards AASB108.28 When initial application of an Accounting Standard has an effect on the current period or any prior period, or would have such an effect except that it is impracticable to determine the amount of the adjustment, or might have an effect on future periods, an entity shall disclose: the title of the Accounting Standard; (a) when applicable, that the change in accounting policy is made in accordance with its transitional (b) provisions: the nature of the change in accounting policy; (c) (d) when applicable, a description of the transitional provisions; (e) when applicable, the transitional provisions that might have an effect on future periods; for the current period and each prior period presented, to the extent practicable, the amount of the adjustment: for each financial statement line item affected; and i. ii. if AASB 133 'Earnings per Share' applies to the entity, for basic and diluted earnings per the amount of the adjustment relating to periods before those presented, to the extent (g)practicable; and if retrospective application required by AASB 108 is impracticable for a particular prior period, or for periods before those presented, the circumstances that led to the existence of that condition and a description of how and from when the change in accounting policy has been applied.

Financial reports of subsequent periods need not repeat these disclosures.

the relevant note for the item, or a change in accounting policy note.

The above information would likely be disclosed in the accounting policy note of the relevant item and

Source	GAAP Holdings (Australia) Limited		
	2. Adoption of new and revised Accounting Standards (cont'd)		
	Voluntary changes in accounting policies		
AASB108.29	When a voluntary change in accounting policy has an effect on the current period or any prior period, would have an effect on that period except that it is impracticable to determine the amount of the adjustment, or might have an effect on future periods, an entity shall disclose:		
	(a) the nature of the change in accounting policy;		
	(b) the reasons why applying the new accounting policy provides reliable and more relevant information;		
	(c) for the current period and each prior period presented, to the extent practicable, the amount of the adjustment:		
	i. for each financial statement line item affected; and		
	ii. if AASB 133 'Earnings per Share' applies to the entity, for basic and diluted earnings per share;		
	(d) the amount of the adjustment relating to periods before those presented, to the extent practicable; and		
	(e) if retrospective application of the accounting policy is impracticable for a particular prior period, or for periods before those presented, the circumstances that led to the existence of that condition and a description of how and from when the change in accounting policy has been applied.		
AASB108.20	Financial reports of subsequent periods need not repeat these disclosures. The early application of an Accounting Standard is not a voluntary change in accounting policy.		
AASB108.29	Reclassification of financial assets		
	In August 2009, the Group reclassified certain asset-backed securities from held for trading to available-for-sale. The Group's original intention at initial recognition was to sell these financial assets in the short-term. However, as a result of the severe reduction in the liquidity of those assets accompanied by a deterioration of price transparency and reduction in investor appetite to acquire such assets, the Group concluded that the criteria for reclassification were met. Consequently, the assets were reclassified at 1 September 2009 (see note 42.4 for further details). The reclassification took effect only from the date of reclassification.		
	The effect of the reclassification is that subsequent movements in the fair value of these securities are recognised in other comprehensive income (unless they are determined to be impaired) rather than in profit or loss. The asset-backed securities do not contain embedded derivatives that require separation and recognition at fair value through profit or loss. The fair value of the securities at the date of reclassification was \$509,000, and had declined by the end of the reporting period to \$419,000. Therefore, the profit for the year is \$90,000 higher than it would have been if the assets had not been reclassified, retained earnings at 31 December 2009 have been increased by \$90,000 and the investments revaluation reserve has been reduced by \$90,000. The amount reported for the assets in the statement of financial position has not been affected as both categories ('held for trading' and 'available-for-sale') are reported within 'other financial assets'.		
	Changes in accounting policy since the most recent interim financial report		
AASB134.26	Where there is a change in an accounting policy during the final current interim period of the annual reporting period but a separate interim financial report is not published for that final current interim period, the nature of the change in accounting policy and the financial effect of the change on prior interim financial reports of the current annual reporting period shall be disclosed in the notes in the annual financial report for that annual reporting period.		
AASB134.27	If the entity does not prepare interim financial reports other than for the first half-year, the requirements above apply where there is a change in accounting policy between the first half-year reporting date and the annual reporting date.		
AASB134.43	A change in accounting policy, other than one for which the transition is specified by a new Accounting Standard, shall be reflected by:		
	(a) restating the financial statements of prior interim periods of the current annual reporting period and the comparable interim periods of any prior annual reporting periods that will be restated in the annual financial statements in accordance with AASB 108 'Accounting Policies, Changes in Accounting Estimates and Errors'; or		

GAAP Holdings (Australia) Limited

2. Adoption of new and revised Accounting Standards (cont'd)

(b) when it is impracticable to determine the cumulative effect at the beginning of the annual reporting period of applying a new accounting policy to all prior periods, adjusting the financial statements of prior interim periods of the current annual reporting period, and comparable interim periods of prior annual reporting periods to apply the new accounting policy prospectively from the earliest date practicable.

2.2 Standards and Interpretations adopted with no effect on financial statements

The following new and revised Standards and Interpretations have also been adopted in these financial statements. Their adoption has not had any significant impact on the amounts reported in these financial statements but may affect the accounting for future transactions or arrangements.

AASB 2008-7 Amendments to Australian Accounting Standards – Cost of an Investment in a Subsidiary, Jointly Controlled Entity or Associate The amendments deal with the measurement of the cost of investments in subsidiaries, jointly controlled entities and associates when adopting A-IFRS for the first time and with the recognition of dividend income from subsidiaries in a parent's separate financial statements.

AASB 2008-1 Amendments to Australian Accounting Standard -Share-based Payments: Vesting Conditions and Cancellations

The amendments clarify the definition of vesting conditions for the purposes of AASB 2, introduce the concept of 'non-vesting' conditions, and clarify the accounting treatment for cancellations.

AASB 123 Borrowing Costs (as revised in 2007) and AASB 2007-6 Amendments to Australian Accounting Standards arising from AASB 123 The principal change to AASB 123 was to eliminate the option to expense all borrowing costs when incurred. This change has had no impact on these financial statements because it has always been the Group's accounting policy to capitalise borrowing costs incurred on qualifying assets.

AASB 2008-2 Amendments to Australian Accounting Standards – Puttable Financial Instruments and Obligations Arising on Liquidation The revisions to AASB 132 Financial Instruments: Presentation amend the criteria for debt/equity classification by permitting certain puttable financial instruments and instruments (or components of instruments) that impose on an entity an obligation to deliver to another party a pro-rata share of the net assets of the entity only on liquidation, to be classified as equity, subject to specified criteria being met.

AASB 2008-8 Amendments to Australian Accounting Standards— Eligible Hedged Items The amendments provide clarification on two aspects of hedge accounting: identifying inflation as a hedged risk or portion, and hedging with options.

Interpretation 15 Agreements for the Construction of Real Estate

The Interpretation addresses how entities should determine whether an agreement for the construction of real estate is within the scope of AASB 111 *Construction Contracts* or AASB 118 *Revenue* and when revenue from the construction of real estate should be recognised. The requirements have not affected the accounting for the Group's construction activities.

Interpretation 16 Hedges of a Net Investment in a Foreign Operation

The Interpretation provides guidance on the detailed requirements for net investment hedging for certain hedge accounting designations.

Interpretation 17 Distributions of Non-cash Assets to Owners and AASB 2008-13 Amendments to Australian Accounting Standards arising from AASB Interpretation 17 Distributions of Non-cash Assets to Owners The Interpretation provides guidance on the appropriate accounting treatment when an entity distributes assets other than cash as dividends to its shareholders.

GAAP Holdings (Australia) Limited

2. Adoption of new and revised Accounting Standards (cont'd)

Interpretation 18 *Transfers of Assets from Customers*

The Interpretation addresses the accounting by recipients for transfers of property, plant and equipment from 'customers' and concludes that when the item of property, plant and equipment transferred meets the definition of an asset from the perspective of the recipient, the recipient should recognise the asset at its fair value on the date of the transfer, with the credit recognised as revenue in accordance with AASB 118 *Revenue*.

AASB 2008-5 Amendments to Australian Accounting Standards arising from the Annual Improvements Project and AASB 2008-6 Further Amendments to Australian Accounting Standards arising from the Annual Improvements Project AASB 2009-4 Amendments to Australian Accounting Standards arising from the Annual Improvements Project and AASB 2009-5 Further Amendments to Australian Accounting Standards arising from the Annual Improvements Project

In addition to the changes affecting amounts reported in the financial statements described at 2.1 above, the amendments have led to a number of changes in the detail of the Group's accounting policies – some of which are changes in terminology only, and some of which are substantive but have had no material effect on amounts reported.

In addition to the amendments to AASB 5 and AASB 107 described earlier in this section, and the amendments to AASB 117 discussed in section 2.3 below, the amendments have led to a number of changes in the detail of the Group's accounting policies – some of which are changes in terminology only, and some of which are substantive but have had no material effect on amounts reported. Except as noted in 2.3 below, the changes in AASB 2009-5 have been adopted in advance of their effective dates of 1 January 2010.

2. Adoption of new and revised Accounting Standards (cont'd)

AASB108.31

* AASB 2009-5 Further Amendments to Australian Accounting Standards arising from the Annual Improvements Project specify amendments resulting from the IASB's annual improvement project to various Australian accounting standards and interpretations. As permitted, the group has early adopted most of the amendments in AASB 2009-5 (refer note 2.2). However, the amendments to AASB 117 Leases have not been early adopted. Adoption of these amendments will potentially result in the reclassification of several leases over land as finance leases. The amendments, which apply retrospectively to unexpired leases from 1 July 2010, remove the guidance from AASB 117 which effectively prohibited the classification of leases over land as finance leases. It is not practical to provide a reasonable estimate of the impact of this amendment until a detailed review of existing leases has been completed.

The following IASB Standards and IFRIC Interpretations are also in issue but not yet effective, although Australian equivalent Standards/Interpretations have not yet been issued.

	Effective for annual	Expected to be initially

Example disclosures

AASB108.31

Having completed assessment of the impact of the various pronouncements in issue but not yet effective, the following example disclosures should be **tailored as appropriate** for the entity. In some cases, an entity may not yet have determined the impact and therefore may state "The potential effect of the revised Standards/Interpretations on the Group's financial statements has not yet been determined."

A. Changes in accounting policies

Where Standards or Interpretations in issue but not yet effective will result in changes in recognition or measurement, the following wording should be **tailored as appropriate** to reflect the amendments affecting the entity. For example, where AASB 2009-8 is not relevant to the entity, it is not necessary to include explanations about the pronouncement:

"A number of Australian Accounting Standards and Interpretations [and IFRSs and IFRIC Interpretations] are in issue but are not effective for the current year end. The following existing group accounting policies will change on adoption of these pronouncements:

- AASB 9 Financial Instruments and its associated amending standards specify new recognition and measurement requirements for financial assets within the scope of AASB 139. Broadly, the amendments require financial assets to be measured at fair value through profit and loss unless the criteria for amortised cost measurement are met or the entity qualifies and elects to recognise gains and losses on equity securities that are not held for trading directly in other comprehensive income. The directors have not yet had an opportunity to consider how AASB 9 impacts the group's financial assets.
- AASB 2009-5 Further Amendments to Australian Accounting Standards arising from the Annual Improvements Project specify amendments resulting from the IASB's annual improvement project to various Australian accounting standards and interpretations. As permitted, the group has early adopted the amendments to AASB 5, AASB 8 and AASB 101 (refer note [x]). Adoption of this Standard will also:
 - o result in reclassification of research and development expenditure not qualifying for capitalisation from investing cash flows to operating cash flows. On adoption of this amendment from 1 July 2010, cash flows from operations for the current year (which will be reported as comparative information) will decrease by [\$x,xxx].
 - o require the synthetic forward contract to acquire a prospective subsidiary which remains unexpired at 1 July 2010 to be accounted for in accordance with AASB 139. This amendment will result in the fair value of the derivative instruments being included in the statement of financial position from 1 July 2010; that is, a net increase in assets of [\$x,xxx], reflecting the in-the-money call option held
 - o potentially result in the reclassification of several leases over land as finance leases. The amendments, which apply retrospectively to unexpired leases from 1 July 2010, remove the guidance from AASB 117 which effectively prohibited the classification of leases over land as finance leases. It is not practical to provide a reasonable estimate of the impact of this amendment until a detailed review of existing leases has been completed.

GAAP Holdings (Australia) Limited

2. Adoption of new and revised Accounting Standards (cont'd)

- AASB 2009-8 Amendments to Australian Accounting Standards Group Cash-Settled Share-based Payment Transactions requires, in respect of group cash-settled share-based payment transactions, that the group entity receiving the goods or services recognises an equity-settled share-based payment expense even though another group entity or shareholder has the obligation to settle the award. The amendments apply retrospectively from 1 July 2010. The group is party to cash-settled share-based payment arrangements where the ultimate parent entity (outside this consolidated group) has the obligation to settle the share-based payment. On adoption, the group and the parent recognises the grant date fair value of each such share-based payment award over the vesting period of the grant, rather than recognising an expense reflecting the remeasurement of the award in accordance with cash-settled share-based payment principles of AASB 2. The impact of the amendments on reported performance and position has not yet been fully analysed.
- AASB 2009-10 Amendments to Australian Accounting Standards Classification of Rights Issues amends AASB 132 Financial Instruments: Presentation to require a financial instrument that gives the holder the right to acquire a fixed number of the entity's own equity instruments for a fixed amount of any currency to be classified as an equity instrument if, and only if, the entity offers the financial instrument pro rata to all of its existing owners of the same class of its non-derivative equity instruments. Prior to this amendment, rights issues (rights, options or warrants) denominated in a currency other than the functional currency of the issuer were accounted for as derivative instruments.
- AASB 2009-14 Amendments to Australian Interpretation Prepayments of a Minimum Funding Requirement makes limited-application amendments to Interpretation 14 AASB 119 The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction. The amendments apply when an entity is subject to minimum funding requirements and makes an early payment of contributions to cover those requirements, permitting the benefit of such an early payment to be recognised as an asset.
- Interpretation 19 Extinguishing Financial Liabilities with Equity Instruments and associated amending standards requires the extinguishment of a liability to a creditor by the issue of equity instruments (other than common control transactions and transactions with shareholders as shareholders) to be measured at fair value with the difference between the fair value of the instrument issued and the carrying value of the liability extinguished being recognised in profit and loss. This Interpretation, which applies retrospectively, will first apply to the group's annual reporting period beginning 1 July 2010. The directors have not yet had an opportunity to consider the potential impact of the adoption of this Interpretation.

Other than as noted above, the adoption of the various Australian Accounting Standards and Interpretations in issue but not yet effective will not impact the group's accounting policies. However, the pronouncements will result in changes to information currently disclosed in the financial statements. The group does not intend to adopt any of these pronouncements before their effective dates."

B. No changes in recognition or measurement accounting policies

Where <u>none</u> of the Standards or Interpretations in issue but not yet effective will result in changes in recognition or measurement, the example wording could be collapsed into the following paragraph. This wording should be **tailored as appropriate**:

"A number of Australian Accounting Standards and Interpretations [and IFRSs and IFRIC Interpretations] are in issue but are not effective for the current year end. The reported results and position of the group will not change on adoption of these pronouncements as they do not result in any changes to the group's existing accounting policies. Adoption will, however, result in changes to information currently disclosed in the financial statements. The group does not intend to adopt any of these pronouncements before their effective dates."

Source **GAAP Holdings (Australia) Limited** 2. Adoption of new and revised Accounting Standards (cont'd) Accounting Standards and Interpretations issued and not yet effective AASB108.30 When an entity has not applied a new Accounting Standard that has been issued but is not yet effective, the entity shall disclose: (a) this fact; and known or reasonably estimable information relevant to assessing the possible impact that (b) application of the new Accounting Standard will have on the entity's financial report in the period of initial application. AASB108.31 In complying with the requirements above, an entity considers disclosing: the title of the new Accounting Standard: (a) the nature of the impending change or changes in accounting policy; (b) the date by which application of the Accounting Standard is required; (c) the date as at which it plans to apply the Accounting Standard initially; and (d) either: (e) a discussion of the impact that initial application of the Accounting Standard is i. expected to have on the entity's financial report; or ii. if that impact is not known or reasonably estimable, a statement to that effect. The disclosures set out above regarding adoption of Standards and Interpretations not yet effective reflect a cut-off date of 31 March 2010. The potential impact of any new or revised Standards and Interpretations issued by the Australian Accounting Standards Board after that date, but before the

issue of the financial statements, should also be considered and disclosed.

AASB101.112(a),

3. Significant accounting policies

The following are examples of the types of accounting policies that might be disclosed in this entity's financial statements. Entities are required to disclose in the summary of significant accounting policies the measurement basis (or bases) used in preparing the financial statements, and the other accounting policies used that are relevant to an understanding of the financial statements. An accounting policy may be significant because of the nature of the entity's operations even if amounts for the current and prior periods are not material.

In deciding whether a particular accounting policy should be disclosed, management considers whether disclosure would assist users in understanding how transactions, other events and conditions are reflected in the reported financial performance and financial position. Disclosure of particular accounting policies is especially useful to users when those policies are selected from alternatives allowed in Standards and Interpretations.

Each entity considers the nature of its operations and the policies that users of its financial statements would expect to be disclosed for that type of entity. It is also appropriate to disclose each significant accounting policy that is not specifically required by Accounting Standards, but that is selected and applied in accordance with AASB 108 Accounting Policies, Changes in Accounting Estimates and Errors.

For completeness, in these model financial statements accounting policies have been provided for some immaterial items, although this is not required under Accounting Standards.

Materiality

In accordance with AASB 1031 *Materiality*, accounting polices need only be identified in the summary of accounting policies where they are considered 'material'. Accounting policies will be considered material if their omission, misstatement or non-disclosure has the potential, individually or collectively, to:

- (a) influence the economic decisions of users taken on the basis of the financial report; and
- (b) affect the discharge of accountability by the management or governing body of the entity.

	3. Significant accounting policies (cont'd)
	3.1 Statement of compliance
AASB101.Aus15. 2, Aus15.3, Aus15.4, 16, Aus16.1, AASB127.42(a)	These financial statements are general purpose financial statements which have been prepared in accordance with the Corporations Act 2001, Accounting Standards and Interpretations, and comply with other requirements of the law. The financial statements comprise the consolidated financial statements of the Group.
, ,	Accounting Standards include Australian equivalents to International Financial Reporting Standards ('A-IFRS'). Compliance with A-IFRS ensures that the financial statements and notes of the company and the Group comply with International Financial Reporting Standards ('IFRS').
AASB110.17	The financial statements were authorised for issue by the directors on 11 September 2010.
AASB101.112(a) AASB101.51(d), 108(a)	3.2 Basis of preparation The financial report has been prepared on the basis of historical cost, except for the revaluation of certain non-current assets and financial instruments. Cost is based on the fair values of the consideration given in exchange for assets. All amounts are presented in Australian dollars, unless otherwise noted.
ASIC-CO 98/100	If the company is of the kind referred to in ASIC Class Order 98/0100, dated 10 July 1998, and consequently the amounts in the directors' report and the financial report are rounded, that fact must be disclosed in the report. Where the conditions of the Class Order are met, entities may round to the nearest thousand dollars, nearest hundred thousand dollars, or to the nearest million dollars.
ASIC-CO 98/100, AASB101.51(e)	The company is a company of the kind referred to in ASIC Class Order 98/0100, dated 10 July 1998, and in accordance with that Class Order amounts in the financial report are rounded off to the nearest thousand dollars, unless otherwise indicated.
	Early adoption of Accounting Standards The directors have elected under s.334(5) of the Corporations Act 2001 to apply Amendments to AASB 5 Non-Current Assets Held for Sale and Discontinued Operations and Amendments to AASB 107 Statement of Cash Flows in advance of their effective dates. The Standards are not required to be applied until annual reporting periods beginning on or after 1 January 2009. The impact of the adoption of these standards is disclosed in Note 2.1 to the financial statements.
AASB101.117(b)	The following significant accounting policies have been adopted in the preparation and presentation of the financial report:
AASB101.25	Going concern basis Where the financial report is prepared on a going concern basis, but material uncertainties exist in relation to events or conditions which cast doubt on the entity's ability to continue as a going concern, those uncertainties shall be disclosed. The events or conditions requiring disclosure may arise after the reporting date.
AASB101.25, AASB110.14	Where the going concern basis has not been used, this shall be disclosed together with a statement of the reasons for not applying this basis and the basis on which the financial report has been prepared. An entity shall not prepare its financial report on a going concern basis if management determines after the reporting date either that it intends to liquidate the entity or to cease trading, or that it has no realistic alternative but to do so.
	Example accounting policies The following illustrations are quoted by way of example only, and do not necessarily represent the only treatment which may be appropriate for the item concerned and does not cover all items that shall be considered for inclusion in the summary of accounting policies.
AASB139.98, 99	not to adjust the initial measurement of the cost of a non-financial asset or a non-financial liability arising from a hedged forecast transaction by the amount deferred in equity;
AASB119.92-93D	for actuarial gains and losses arising in relation to defined benefit plans, to adopt the corridor approach or to recognise actuarial gains and losses directly in retained profits or in full in profit or loss;
AASB139.38	to recognise investments on settlement date or on trade date;

Source	GAAP Holdings (Australia) Limited
	3. Significant accounting policies (cont'd)
AASB139.92	 in respect of fair value hedges, to amortise the adjustment to a hedged item measured at amortised cost to profit or loss from the date the adjustment is made or to begin the amortisation no later than when hedge accounting is discontinued;
AASB112.78	• to present exchange differences on deferred foreign tax liabilities or assets recognised in the income statement as deferred tax expense (income);
AASB138.72	to measure intangible assets after initial recognition on either the cost or revaluation (fair value) basis, where conditions for doing so are met;
AASB140.30	to measure investment property under either the cost model or the fair value model;
AASB140.6	to classify and account for property interests held under operating leases as investment properties on a property-by-property basis;
AASB131.30	 to account for jointly controlled entities using proportionate consolidation or the equity method;
AASB120.23	• to account for government grants in the form of a non-monetary asset at a nominal amount;
AASB120.24	to present government grants related to assets as a deduction from the carrying amount of the asset;
AASB120.29	to deduct government grants received and recognised in the income statement in reporting the related expense; or
AASB107.18	to prepare the statement of cash flows using either the direct or the indirect method. Entities may also need to disclose the manner in which they account for:
AASB3.3(b)	business combinations involving entities under common control;
AASB141	biological assets or agricultural produce; or
	exploration and evaluation activities.

AASB127

The consolidated financial statements incorporate the financial statements of the Company and entities (including special purpose entities) controlled by the Company (its subsidiaries). Control is achieved where the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated statement of comprehensive income from the effective date of acquisition and up to the effective date of disposal, as appropriate.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by other members of the Group.

All intra-group transactions, balances, income and expenses are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are identified separately from the Group's equity therein. The interests of non-controlling shareholders may be initially measured either at fair value or at the non-controlling interests' proportionate share of the fair value of the acquiree's identifiable net assets. The choice of measurement basis is made on an acquisition-by-acquisition basis. Subsequent to acquisition, the carrying amount of non-controlling interests is the amount of those interests at initial recognition plus the non-controlling interests' share of subsequent changes in equity. Total comprehensive income is attributed to non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Changes in the Group's interests in subsidiaries that do not result in a loss of control are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Company.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

When the Group loses control of a subsidiary, the profit or loss on disposal is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interests. Amounts previously recognised in other comprehensive income in relation to the subsidiary are accounted for (i.e. reclassified to profit or loss or transferred directly to retained earnings) in the same manner as would be required if the relevant assets or liabilities were disposed of. The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under AASB 139 Financial Instruments: Recognition and Measurement or, when applicable, the cost on initial recognition of an investment in an associate or jointly controlled entity.

3.4 Business combinations

AASB3

Acquisitions of subsidiaries and businesses are accounted for using the acquisition method. The consideration for each acquisition is measured at the aggregate of the fair values (at the date of exchange) of assets given, liabilities incurred or assumed, and equity instruments issued by the Group in exchange for control of the acquiree. Acquisition-related costs are recognised in profit or loss as incurred.

Where applicable, the consideration for the acquisition includes any asset or liability resulting from a contingent consideration arrangement, measured at its acquisition-date fair value. Subsequent changes in such fair values are adjusted against the cost of acquisition where they qualify as measurement period adjustments (see below). All other subsequent changes in the fair value of contingent consideration classified as an asset or liability are accounted for in accordance with relevant Standards. Changes in the fair value of contingent consideration classified as equity are not recognised.

Where a business combination is achieved in stages, the Group's previously held interests in the acquired entity are remeasured to fair value at the acquisition date (i.e. the date the Group attains control) and the resulting gain or loss, if any, is recognised in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are reclassified to profit or loss, where such treatment would be appropriate if that interest were disposed of.

The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under AASB 3(2008) are recognised at their fair value at the acquisition date, except that:

- deferred tax assets or liabilities and liabilities or assets related to employee benefit arrangements are recognised and measured in accordance with AASB 112 Income Taxes and AASB 119 Employee Benefits respectively;
- liabilities or equity instruments related to the replacement by the Group of an acquiree's share-based payment awards are measured in accordance with AASB 2 Share-based Payment; and
- assets (or disposal groups) that are classified as held for sale in accordance with AASB 5 Noncurrent Assets Held for Sale and Discontinued Operations are measured in accordance with that Standard.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see below), or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the amounts recognised as of that date.

The measurement period is the period from the date of acquisition to the date the Group obtains complete information about facts and circumstances that existed as of the acquisition date – and is subject to a maximum of one year.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

3.5 Investments in associates

AASB128

An associate is an entity over which the Group has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these financial statements using the equity method of accounting, except when the investment is classified as held for sale, in which case it is accounted for in accordance with AASB 5 *Non-current Assets Held for Sale and Discontinued Operations*. Under the equity method, investments in associates are carried in the consolidated statement of financial position at cost as adjusted for post-acquisition changes in the Group's share of the net assets of the associate, less any impairment in the value of individual investments. Losses of an associate in excess of the Group's interest in that associate (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate) are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

Any excess of the cost of acquisition over the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of the associate recognised at the date of acquisition is recognised as goodwill. The goodwill is included within the carrying amount of the investment and is assessed for impairment as part of that investment. Any excess of the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities over the cost of acquisition, after reassessment, is recognised immediately in profit or loss.

When a group entity transacts with an associate of the Group, profits and losses are eliminated to the extent of the Group's interest in the relevant associate.

3.6 Interests in joint ventures

AASB131

A joint venture is a contractual arrangement whereby the Group and other parties undertake an economic activity that is subject to joint control (i.e. when the strategic financial and operating policy decisions relating to the activities of the joint venture require the unanimous consent of the parties sharing control).

When a group entity undertakes its activities under joint venture arrangements directly, the Group's share of jointly controlled assets and any liabilities incurred jointly with other venturers are recognised in the financial statements of the relevant entity and classified according to their nature. Liabilities and expenses incurred directly in respect of interests in jointly controlled assets are accounted for on an accrual basis. Income from the sale or use of the Group's share of the output of jointly controlled assets, and its share of joint venture expenses, are recognised when it is probable that the economic benefits associated with the transactions will flow to/from the Group and their amount can be measured reliably.

The Group's interests in assets where the Group does not have joint control are accounted for in accordance with the substance of the Group's interest. Where such arrangements give rise to an undivided interest in the individual assets and liabilities of the joint venture, the Group recognises its undivided interest in each asset and liability and classifies and presents those items according to their nature

The following wording, amended as appropriate for an entity's circumstances, should be included as required:

Where the joint venture arrangement does not embody an undivided interest in individual assets and liabilities, but gives rise to:

- a right to output, the Group recognises an intangible asset (refer note 3.20).
- a right to a net return in the form of cash or other financial assets, the Group recognises a financial asset (refer note 3.24).

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

A joint venture characterised as a 'jointly controlled asset' involves the joint control, and often the joint ownership, by the venturers of one or more assets contributed to, or acquired for the purpose of, the joint venture and dedicated to the purposes of the joint venture. The assets are used to obtain benefits for the venturers. Each venturer may take a share of the output from the assets and each bears an agreed share of the expenses incurred. Jointly controlled assets do not involve the establishment of a corporation, partnership or other entity, or a financial structure that is separate from the venturers themselves. Each venturer has control over its share of future economic benefits through its share of the jointly controlled asset.

AASB131.57

Joint venture arrangements that involve the establishment of a separate entity in which each venturer has an interest are referred to as jointly controlled entities. The Group reports its interests in jointly controlled entities using proportionate consolidation, except when the investment is classified as held for sale, in which case it is accounted for in accordance with AASB 5 *Non-current Assets Held for Sale and Discontinued Operations*. The Group's share of the assets, liabilities, income and expenses of jointly controlled entities is combined with the equivalent items in the consolidated financial statements on a line-by-line basis.

Any goodwill arising on the acquisition of the Group's interest in a jointly controlled entity is accounted for in accordance with the Group's accounting policy for goodwill arising in a business combination (see 3.7 below).

When a group entity transacts with a jointly controlled entity of the Group, unrealised profits and losses are eliminated to the extent of the Group's interest in the joint venture.

3.7 Goodwill

AASB3

Goodwill arising in a business combination is recognised as an asset at the date that control is acquired (the acquisition date). Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

If, after reassessment, the Group's interest in the fair value of the acquiree's identifiable net assets exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held equity interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Goodwill is not amortised but is reviewed for impairment at least annually. For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units expected to benefit from the synergies of the combination. Cash-generating units to which goodwill has been allocated are tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. An impairment loss recognised for goodwill is not reversed in a subsequent period.

On disposal of a subsidiary, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

The Group's policy for goodwill arising on the acquisition of an associate is described at 3.5 above.

3.8 Non-current assets held for sale

AASB5

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the non-current asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

When the Group is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the Group will retain a non-controlling interest in its former subsidiary after the sale.

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their previous carrying amount and fair value less costs to sell.

AASB118.35(a)

3.9 Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances.

AASB118.35(a)

The revenue accounting policies that follow are generic and must be adapted to suit the specific circumstances of each entity. The entity should disclose the accounting policies adopted for each significant category of revenue recognised in the period including the methods adopted to determine the stage of completion of transactions involving the rendering of services.

3.9.1 Sale of goods

Revenue from the sale of goods is recognised when all the following conditions are satisfied:

- the Group has transferred to the buyer the significant risks and rewards of ownership of the goods:
- The Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the entity;
 and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Sales of goods that result in award credits for customers, under the Group's Maxi-Points Scheme, are accounted for as multiple element revenue transactions and the fair value of the consideration received or receivable is allocated between the goods supplied and the award credits granted. The consideration allocated to the award credits is measured by reference to their fair value – the amount for which the award credits could be sold separately. Such consideration is not recognised as revenue at the time of the initial sale transaction – but is deferred and recognised as revenue when the award credits are redeemed and the Group's obligations have been fulfilled.

AASB118.20

3.9.2 Rendering of services

AASB118.35(a)

The accounting policies disclosed must disclose the methods adopted to determine the stage of completion of transactions involving the rendering of services.

Revenue from a contract to provide services is recognised by reference to the stage of completion of the contract. The stage of completion of the contract is determined as follows:

- installation fees are recognised by reference to the stage of completion of the installation, determined as the proportion of the total time expected to install that has elapsed at the end of the reporting period;
- servicing fees included in the price of products sold are recognised by reference to the proportion
 of the total cost of providing the servicing for the product sold, taking into account historical
 trends in the number of services actually provided on past goods sold; and
- revenue from time and material contracts is recognised at the contractual rates as labour hours are delivered and direct expenses are incurred.

The Group's policy for recognition of revenue from construction contracts is described at 3.10 below.

Source	GAAP Holdings (Australia) Limited
	3. Significant accounting policies (cont'd)
AASB118.30(c)	3.9.3 Royalties
	Royalty revenue is recognised on an accrual basis in accordance with the substance of the relevant agreement (provided that it is probable that the economic benefits will flow to the Group and the amount of revenue can be measured reliably). Royalties determined on a time basis are recognised on a straight-line basis over the period of the agreement. Royalty arrangements that are based on production, sales and other measures are recognised by reference to the underlying arrangement.
	3.9.4 <u>Dividend and interest revenue</u>
AASB118.30(c)	Dividend revenue from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the Group and the amount of revenue can be measured reliably).
AASB118.30(a)	Interest revenue is recognised when it is probable that the economic benefits will flow to the Group and the amount of revenue can be measured reliably. Interest revenue is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.
	3.9.5 Rental income
	The Group's policy for recognition of revenue from operating leases is described in 3.11.1 below.
AASB111.39(b),	3.10 Construction contracts
(c)	Where the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the end of the reporting period, measured based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs, except where this would not be representative of the stage of completion. Variations in contract work, claims and incentive payments are included to the extent that the amount can be measured reliably and its receipt is considered probable.
	Where the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that it is probable will be recoverable. Contract costs are recognised as expenses in the period in which they are incurred.
	When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.
	3.11 Leasing
AASB117	Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.
	3.11.1 The Group as lessor
	Amounts due from lessees under finance leases are recognised as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.
	Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

3.11.2 The Group as lessee

Assets held under finance leases are initially recognised as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognised immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalised in accordance with the Group's general policy on borrowing costs (see 3.13 below). Contingent rentals are recognised as expenses in the periods in which they are incurred.

Operating lease payments are recognised as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

3.12 Foreign currencies

AASB121

The individual financial statements of each group entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each group entity are expressed in Australian dollars ('\$'), which is the functional currency of the Company and the presentation currency for the consolidated financial statements.

In preparing the financial statements of the individual entities, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

AASB123.5(e)

Exchange differences are recognised in profit or loss in the period in which they arise except for:

AASB139.72

 exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;

AASB121.15

- exchange differences on transactions entered into in order to hedge certain foreign currency risks (see 3.26 below for hedging accounting policies); and
- exchange differences on monetary items receivable from or payable to a foreign operation for
 which settlement is neither planned nor likely to occur (therefore forming part of the net
 investment in the foreign operation), which are recognised initially in other comprehensive
 income and reclassified from equity to profit or loss on disposal or partial disposal of the net
 investment.

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations are expressed in Australian dollars using exchange rates prevailing at the end of the reporting period. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuated significantly during that period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity (attributed to non-controlling interests as appropriate).

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

On the disposal of a foreign operation (i.e. a disposal of the Group's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation, loss of joint control over a jointly controlled entity that includes a foreign operation, or loss of significant influence over an associate that includes a foreign operation), all of the accumulated exchange differences in respect of that operation attributable to the Group are reclassified to profit or loss. Any exchange differences that have previously been attributed to non-controlling interests are derecognised, but they are not reclassified to profit or loss.

In the case of a partial disposal (i.e. no loss of control) of a subsidiary that includes a foreign operation, the proportionate share of accumulated exchange differences are re-attributed to non-controlling interests and are not recognised in profit or loss. For all other partial disposals (i.e. of associates or jointly controlled entities not involving a change of accounting basis), the proportionate share of the accumulated exchange differences is reclassified to profit or loss.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

3.13 Borrowing costs

AASB123

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

AASB120.39(a)

3.14 Government grants

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

Government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred revenue in the statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Other government grants are recognised as revenue over the periods necessary to match them with the costs for which they are intended to compensate, on a systematic basis. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

Int110

Government assistance which does not have conditions attached specifically relating to the operating activities of the entity is recognised in accordance with the accounting policies above.

AASB119.120A (a)

3.15 Employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave, long service leave, and sick leave when it is probable that settlement will be required and they are capable of being measured reliably.

Liabilities recognised in respect of short-term employee benefits, are measured at their nominal values using the remuneration rate expected to apply at the time of settlement.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

Liabilities recognised in respect of long term employee benefits are measured as the present value of the estimated future cash outflows to be made by the Group in respect of services provided by employees up to reporting date.

Contributions to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at the end of each reporting period. Actuarial gains and losses that exceed 10 per cent of the greater of the present value of the Group's defined benefit obligation and the fair value of plan assets as at the end of the prior year are amortised over the expected average remaining working lives of the participating employees. Past service cost is recognised immediately to the extent that the benefits are already vested, and otherwise is amortised on a straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognised in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and losses and unrecognised past service cost, and as reduced by the fair value of plan assets. Any asset resulting from this calculation is limited to unrecognised actuarial losses and past service cost, plus the present value of available refunds and reductions in future contributions to the plan.

3.16 Share-based payments

AASB2.46,11-12

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in note 43.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest. At the end of each reporting period, the Group revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled employee benefits reserve.

The policy described above is applied to all equity-settled share-based payments that were granted after 7 November 2002 and vested after 1 January 2005. No amounts have been recognised in the financial statements in respect of other equity-settled shared-based payments.

AASB2.10, 13

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the service.

For cash-settled share-based payments, a liability is recognised for the goods or services acquired, measured initially at the fair value of the liability. At the end of each reporting period until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in fair value recognised in profit or loss for the year.

3.17 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

3.17.1 Current tax

AASB112.12, 46

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the consolidated [statement of comprehensive income/income statement] because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Source	GAAP Holdings (Australia) Limited
	3. Significant accounting policies (cont'd)
	3.17.2 <u>Deferred tax</u>
AASB112.15, 24	Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.
AASB112.39, 44	Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.
	The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.
AASB112.47, 51	Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.
AASB112.74	Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.
	3.17.3 Current and deferred tax for the period
AASB112.58	Current and deferred tax are recognised as an expense or income in profit or loss, except when they relate to items that are recognised outside profit or loss (whether in other comprehensive income or directly in equity), in which case the tax is also recognised outside profit or loss, or where they arise from the initial accounting for a business combination. In the case of a business combination, the tax effect is included in the accounting for the business combination.
	Additional information on accounting policies shall be included where the entity has other material tax balances not covered by the above analysis, such as in relation to tax deductible share-based payments.
AASB116.73(a),	3.18 Property, plant and equipment
(b)	Land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the statement of financial position at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are performed with sufficient regularity such that the carrying amounts do not differ materially from those that would be determined using fair values at the end of the reporting period.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

Any revaluation increase arising on the revaluation of such land and buildings is recognised in other comprehensive income, except to the extent that it reverses a revaluation decrease for the same asset previously recognised in profit or loss, in which case the increase is credited to profit or loss to the extent of the decrease previously expensed. A decrease in the carrying amount arising on the revaluation of such land and buildings is recognised in profit or loss to the extent that it exceeds the balance, if any, held in the properties revaluation reserve relating to a previous revaluation of that asset.

Depreciation on revalued buildings is recognised in profit or loss. On the subsequent sale or retirement of a revalued property, the attributable revaluation surplus remaining in the properties revaluation reserve is transferred directly to retained earnings. No transfer is made from the revaluation reserve to retained earnings except when an asset is derecognised.

Properties in the course of construction for production, supply or administrative purposes, or for purposes not yet determined, are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Freehold land is not depreciated.

Fixtures and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognised so as to write off the cost or valuation of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.

AASB116.51, 61

Depreciation rates and methods shall be reviewed at least annually and, where changed, shall be accounted for as a change in accounting estimate as illustrated in note 4.2.3. Where depreciation rates or methods are changed, the net written down value of the asset is depreciated from the date of the change in accordance with the new depreciation rate or method. Depreciation recognised in prior financial years shall not be changed, that is, the change in depreciation rate or method shall be accounted for on a 'prospective' basis.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease.

The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

AASB140.75(a)

3.19 Investment property

Investment property, which is property held to earn rentals and/or for capital appreciation (including property under construction for such purposes), is measured initially at its cost, including transaction costs. Subsequent to initial recognition, investment property is measured at fair value. Gains and losses arising from changes in the fair value of investment property are included in profit or loss in the period in which they arise.

AASB140.75(c)

When classification is difficult, an entity shall disclose the criteria it uses to distinguish investment property from owner-occupied property and from property held for sale in the ordinary course of business.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

3.20 Intangible assets

3.20.1 Intangible assets acquired separately

AASB138.118(b)

Intangible assets acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each annual reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

3.20.2 Internally-generated intangible assets - research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset:
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

AASB138.118(b)

Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

Where entities have intangible assets that have been assessed as having an indefinite useful life, an appropriate accounting policy shall be disclosed, for example:

Brand names

Brand names recognised by the company have an indefinite useful life and are not amortised. Each period, the useful life of this asset is reviewed to determine whether events and circumstances continue to support an indefinite useful life assessment for the asset. Such assets are tested for impairment in accordance with the policy stated in note 3.21.

3.20.3 Intangible assets acquired in a business combination

Intangible assets acquired in a business combination and recognised separately from goodwill are initially recognised at their fair value at the acquisition date (which is regarded as their cost).

AASB138.118(b)

Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

3.21 Impairment of tangible and intangible assets excluding goodwill

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease (see 3.18 above).

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase (see 3.18 above).

AASB102.36(a)

3.22 Inventories

Inventories are stated at the lower of cost and net realisable value. Costs, including an appropriate portion of fixed and variable overhead expenses, are assigned to inventories by the method most appropriate to the particular class of inventory, with the majority being valued on a first-in-first-out basis. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

3.23 Provisions

AASB137

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

3.23.1 Onerous contracts

Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Group has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it.

3.23.2 Restructurings

A restructuring provision is recognised when the Group has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the entity.

3.23.3 Warranties

Provisions for the expected cost of warranty obligations under local sale of goods legislation are recognised at the date of sale of the relevant products, at the directors' best estimate of the expenditure required to settle the Group's obligation.

3.23.4 Contingent liabilities acquired in a business combination

Contingent liabilities acquired in a business combination are initially measured at fair value at the date of acquisition. At the end of subsequent reporting periods, such contingent liabilities are measured at the higher of the amount that would be recognised in accordance with AASB 137 *Provisions, Contingent Liabilities and Contingent Assets* and the amount initially recognised less cumulative amortisation recognised in accordance with AASB 118 *Revenue*.

3.24 Financial assets

AASB7.21

All financial assets are recognised and derecognised on trade date where the purchase or sale of a financial asset is under a contract whose terms require delivery of the financial asset within the timeframe established by the market concerned, and are initially measured at fair value, plus transaction costs, except for those financial assets classified as at fair value through profit or loss, which are initially measured at fair value.

AASB139.9

Financial assets are classified into the following specified categories: financial assets 'at fair value through profit or loss' (FVTPL), 'held-to-maturity' investments, 'available-for-sale' (AFS) financial assets and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

3.24.1 Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees on points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

AASB7.B5(e)

Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL.

3.24.2 Financial assets at FVTPL

Financial assets are classified as at FVTPL when the financial asset is either held for trading or it is designated as at FVTPL.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

A financial asset is classified as held for trading if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

A financial asset other than a financial asset held for trading may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial asset forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and AASB 139 Financial Instruments: Recognition and Measurement permits the entire combined contract (asset or liability) to be designated as at FVTPL.

AASB7.B5(e)

Financial assets at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the 'other gains and losses' line item in the [statement of comprehensive income/income statement]. Fair value is determined in the manner described in note 42.

3.24.3 Held-to-maturity investments

Bills of exchange and debentures with fixed or determinable payments and fixed maturity dates that the Group has the positive intent and ability to hold to maturity are classified as held-to-maturity investments. Held-to-maturity investments are measured at amortised cost using the effective interest method less any impairment, with revenue recognised on an effective yield basis.

3.24.4 AFS financial assets

Listed shares and listed redeemable notes held by the Group that are traded in an active market are classified as AFS and are stated at fair value. The Group also has investments in unlisted shares that are not traded in an active market but that are also classified as AFS financial assets and stated at fair value (because the directors consider that fair value can be reliably measured). Fair value is determined in the manner described in note 42. Gains and losses arising from changes in fair value are recognised in other comprehensive income and accumulated in the investments revaluation reserve, with the exception of impairment losses, interest calculated using the effective interest method, and foreign exchange gains and losses on monetary assets, which are recognised in profit or loss. Where the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss.

AASB132.35

Dividends on AFS equity instruments are recognised in profit or loss when the Group's right to receive the dividends is established.

The fair value of AFS monetary assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. The foreign exchange gains and losses that are recognised in profit or loss are determined based on the amortised cost of the monetary asset. Other foreign exchange gains and losses are recognised in other comprehensive income.

3.24.5 Loans and receivables

Trade receivables, loans, and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables'. Loans and receivables are measured at amortised cost using the effective interest method, less any impairment. Interest income is recognised by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

3.24.6 Impairment of financial assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

AASB139.61

For equity instruments, including listed or unlisted shares, objective evidence of impairment includes information about significant changes with an adverse effect that have take place in the technological, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment in the equity instrument may not be recovered. A significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment for unlisted shares classified as available-for-sale.

AASB139.58, 59

For all other financial assets, including redeemable notes classified as available-for-sale and finance lease receivables, objective evidence of impairment could include:

- · significant financial difficulty of the issuer or counterparty; or
- default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organisation.

For certain categories of financial assets, such as trade receivables, assets that are assessed not to be impaired individually are subsequently assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period of 60 days, as well as observable changes in national or local economic conditions that correlate with default on receivables.

For certain categories of financial asset, such as trade receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period of 60 days, as well as observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortised cost, the amount of the impairment loss recognised is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss.

When an AFS financial asset is considered to be impaired, cumulative gains or losses previously recognised in other comprehensive income are reclassified to profit or loss in the period.

With the exception of AFS equity instruments, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

In respect of AFS equity securities, impairment losses previously recognised in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognised in other comprehensive income.

Source GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

3.24.7 Reclassification of financial assets

AASB7.21

The Group has reclassified certain non-derivative financial assets out of held for trading (part of the FVTPL category) to AFS financial assets. Reclassification is only permitted in rare circumstances and where the asset is no longer held for the purpose of selling in the short-term. In all cases, reclassifications of financial assets are limited to debt instruments. Reclassifications are accounted for at the fair value of the financial asset at the date of reclassification.

3.24.8 Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

AASB7.21

3.25 Financial liabilities and equity instruments issued by the Group

3.25.1 Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

3.25.2 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognised at the proceeds received, net of direct issue costs.

3.25.3 Compound instruments

AASB7.27

The component parts of compound instruments (convertible bonds) issued by the Group are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangement. At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for a similar non-convertible instrument. This amount is recorded as a liability on an amortised cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date. The equity component is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently remeasured.

3.25.4 Financial guarantee contract liabilities

Financial guarantee contract liabilities are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- the amount of the obligation under the contract, as determined in accordance with AASB 137
 Provisions, Contingent Liabilities and Contingent Assets; and
- the amount initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the revenue recognition policies set out at 3.9.4 above.

3.25.5 Financial liabilities

Financial liabilities are classified as either financial liabilities 'at FVTPL' or 'other financial liabilities'.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

3.25.6 Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when the financial liability is either held for trading or it is designated as at FVTPL.

A financial liability is classified as held for trading if:

- it has been acquired principally for the purpose of repurchasing it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial liability forms part of a group of financial assets or financial liabilities or both, which
 is managed and its performance is evaluated on a fair value basis, in accordance with the
 Group's documented risk management or investment strategy, and information about the
 grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and AASB 139 Financial Instruments: Recognition and Measurement permits the entire combined contract (asset or liability) to be designated as at FVTPL.

AASB7.B5(e)

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'other gains and losses' line item in the [statement of comprehensive income/income statement]. Fair value is determined in the manner described in note 42.

3.25.7 Other financial liabilities

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

3.25.8 Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or they expire.

AASB7.21

3.26 Derivative financial instruments

The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risk, including foreign exchange forward contracts, interest rate swaps and cross currency swaps. Further details of derivative financial instruments are disclosed in note 42.

Derivatives are initially recognised at fair value at the date the derivative contract is entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship. The Group designates certain derivatives as either hedges of the fair value of recognised assets or liabilities or firm commitments (fair value hedges), hedges of highly probable forecast transactions or hedges of foreign currency risk of firm commitments (cash flow hedges), or hedges of net investments in foreign operations.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

A derivative with a positive fair value is recognised as a financial asset; a derivative with a negative fair value is recognised as a financial liability. A derivative is presented as a non-current asset or a non-current liability if the remaining maturity of the instrument is more than 12 months and it is not expected to be realised or settled within 12 months. Other derivatives are presented as current assets or current liabilities.

3.26.1 Embedded derivatives

Derivatives embedded in other financial instruments or other host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL.

An embedded derivative is presented as a non-current asset or a non-current liability if the remaining maturity of the hybrid instrument to which the embedded derivative relates is more than 12 months and it is not expected to be realised or settled within 12 months. Other embedded derivatives are presented as current assets or current liabilities.

3.26.2 Hedge accounting

The Group designates certain hedging instruments, which include derivatives, embedded derivatives and non-derivatives in respect of foreign currency risk, as either fair value hedges, cash flow hedges, or hedges of net investments in foreign operations. Hedges of foreign exchange risk on firm commitments are accounted for as cash flow hedges.

At the inception of the hedge relationship, the entity documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item.

Note 42 sets out details of the fair values of the derivative instruments used for hedging purposes.

3.26.3 Fair value hedges

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recognised in profit or loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The change in the fair value of the hedging instrument and the change in the hedged item attributable to the hedged risk are recognised in the line of the [statement of comprehensive income/income statement] relating to the hedged item.

Hedge accounting is discontinued when the Group revokes the hedging relationship, when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. The fair value adjustment to the carrying amount of the hedged item arising from the hedged risk is amortised to profit or loss from that date.

3.26.4 Cash flow hedges

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, and is included in the 'other gains and losses' line item.

Amounts previously recognised in other comprehensive income and accumulated in equity are reclassified to profit or loss in the periods when the hedged item is recognised in profit or loss, in the same line of the [statement of comprehensive income/income statement] as the recognised hedged item. However, when the forecast transaction that is hedged results in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously accumulated in equity are transferred from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

Hedge accounting is discontinued when the Group revokes the hedging relationship, when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. Any gain or loss accumulated in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in profit or loss. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognised immediately in profit or loss.

3.26.5 Hedges of net investments in foreign operations

Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. Any gain or loss on the hedging instrument relating to the effective portion of the hedge is recognised in other comprehensive income and accumulated in the foreign currency translation reserve. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, and is included in the 'other gains and losses' line item.

Gains and losses on the hedging instrument relating to the effective portion of the hedge accumulated in the foreign currency translation reserve are reclassified to profit or loss in the same way as exchange differences relating to the foreign operation as described at 3.12 above.

3.27 Goods and services tax

Int1031

Revenues, expenses and assets are recognised net of the amount of goods and services tax (GST), except:

- i. where the amount of GST incurred is not recoverable from the taxation authority, it is recognised as part of the cost of acquisition of an asset or as part of an item of expense; or
- ii. for receivables and payables which are recognised inclusive of GST.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables.

Cash flows are included in the cash flow statement on a gross basis. The GST component of cash flows arising from investing and financing activities which is recoverable from, or payable to, the taxation authority is classified within operating cash flows.

3.28 Comparative amounts

AASB101.41, 42

When an entity changes the presentation or classification of items in its financial statements comparative amounts shall be reclassified unless the reclassification is impracticable.

When comparative amounts are reclassified, an entity shall disclose:

- (a) the nature of the reclassification;
- (b) the amount of each item or class of items that is reclassified; and
- (c) the reason for the reclassification.

When it is impracticable to reclassify comparative amounts, an entity shall disclose:

- (a) the reason for not reclassifying the amounts; and
- (b) the nature of the adjustments that would have been made if the amounts had been reclassified.

Example accounting policies for mining entities

The following example accounting policies may be relevant for entities operating in the resources industry. Entities will need to edit and adapt the accounting policies below to reflect their entity's policies and circumstances:

(xx) Provision for restoration and rehabilitation

A provision for restoration and rehabilitation is recognised when there is a present obligation as a result of *[exploration, development, production, transportation or storage]* activities undertaken, it is probable that an outflow of economic benefits will be required to settle the obligation, and the amount of the provision can be measured reliably. The estimated future obligations include the costs of *[removing facilities, abandoning sites/wells and restoring the affected areas].*

The provision for future restoration costs is the best estimate of the present value of the expenditure required to settle the restoration obligation at the reporting date, [based on current legal and other requirements and technology]. Future restoration costs are reviewed annually and any changes in the estimate are reflected in the present value of the restoration provision at each reporting date.

GAAP Holdings (Australia) Limited

3. Significant accounting policies (cont'd)

The initial estimate of the restoration and rehabilitation provision relating to [exploration, development and milling/production facilities] is capitalised into the cost of the related asset and [depreciated/amortised] on the same basis as the related asset, unless the present obligation arises from the production of inventory in the period, in which case the amount is included in the cost of production for the period. Changes in the estimate of the provision for restoration and rehabilitation are treated in the same manner, except that the unwinding of the effect of discounting on the provision is recognised as a finance cost rather than being capitalised into the cost of the related asset.

(xx) Exploration and evaluation

The following example accounting policy assumes that an entity has adopted an 'area of interest' approach towards the capitalisation of exploration and evaluation, as is suggested by paragraph Aus7.2 of AASB 6 'Exploration for and Evaluation of Mineral Resources'. Where other approaches are adopted, the following wording will need to be edited as appropriate:

Exploration and evaluation expenditures in relation to each separate area of interest are recognised as an exploration and evaluation asset in the year in which they are incurred where the following conditions are satisfied:

- (i) the rights to tenure of the area of interest are current; and
- (ii) at least one of the following conditions is also met:
 - the exploration and evaluation expenditures are expected to be recouped through successful development and exploration of the area of interest, or alternatively, by its sale; or
 - (b) exploration and evaluation activities in the area of interest have not, at the reporting date, reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable reserves, and active and significant operations in, or in relation to, the area of interest are continuing.

Exploration and evaluation assets are initially measured at cost and include acquisition of rights to explore, studies, exploratory drilling, trenching and sampling and associated activities and an allocation of depreciation and amortisation of assets used in exploration and evaluation activities. General and administrative costs are only included in the measurement of exploration and evaluation costs where they are related directly to operational activities in a particular area of interest.

Exploration and evaluation assets are assessed for impairment when facts and circumstances suggest that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount. The recoverable amount of the exploration and evaluation asset (or the cash-generating unit(s) to which it has been allocated, being no larger than the relevant area of interest) is estimated to determine the extent of the impairment loss (if any). Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in previous years. Where a decision is made to proceed with development in respect of a particular area of interest, the relevant exploration and evaluation asset is tested for impairment and the balance is then reclassified to [development].

(xx) Development

Development expenditure is recognised at cost less accumulated [amortisation/depletion] and any impairment losses. Where commercial production in an area of interest has commenced, the associated costs [together with any forecast future capital expenditure necessary to develop proved and probable reserves] are amortised over the estimated economic life of the [mine/field] on a units-of-production basis.

Changes in factors such as estimates of proved and probable reserves that affect unit-of-production calculations are dealt with on a prospective basis.

GAAP Holdings (Australia) Limited

4. Critical accounting judgments and key sources of estimation uncertainty

The following are examples of the types of disclosures that might be required in this area. The matters disclosed will be dictated by the circumstances of the individual entity, and by the significance of judgements and estimates made to the results and financial position of the entity. Instead of disclosing this information in a separate note, it may be more appropriate to include such disclosures in the relevant asset and liability notes, or as part of the relevant accounting policy disclosures.

In the application of the Group's accounting policies, which are described in note 3, the directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

AASB101.122

4.1 Critical judgements in applying accounting policies

The following are the critical judgements, apart from those involving estimations (see 4.2 below), that the directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

4.1.1 Revenue recognition

Note 13.5 describes the expenditure required in the year for rectification work carried out on goods supplied to one of the Group's major customers. These goods were delivered to the customer in the months of July 2009 to January 2010, and shortly thereafter the defects were identified by the customer. Following negotiations, a schedule of works was agreed, which will involve expenditure by the Group until 2012. In the light of the problems identified, the directors were required to consider whether it was appropriate to recognise the revenue from these transactions of \$19 million in the current period, in line with the Group's general policy of recognising revenue when goods are delivered, or whether it was more appropriate to defer recognition until the rectification work was complete.

In making their judgement, the directors considered the detailed criteria for the recognition of revenue from the sale of goods set out in AASB 118 *Revenue* and, in particular, whether the Group had transferred to the buyer the significant risks and rewards of ownership of the goods. Following the detailed quantification of the Group's liability in respect of rectification work, and the agreed limitation on the customer's ability to require further work or to require replacement of the goods, the directors are satisfied that the significant risks and rewards have been transferred and that recognition of the revenue in the current year is appropriate, in conjunction with the recognition of an appropriate provision for the rectification costs.

4.1.2 Held-to-maturity financial assets

The directors have reviewed the Group's held-to-maturity financial assets in the light of its capital maintenance and liquidity requirements and have confirmed the Group's positive intention and ability to hold those assets to maturity. The carrying amount of the held-to-maturity financial assets is \$5.905 million. Details of these assets are set out in note 17.

GAAP Holdings (Australia) Limited

4. Critical accounting judgments and key sources of estimation uncertainty (cont'd)

AASB101.125, 129

4.2 Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

4.2.1 Recoverability of internally generated intangible asset

During the year, the directors reconsidered the recoverability of the Group's internally generated intangible asset arising from its e-business development, which is included in the consolidated statement of financial position at 30 June 2010 at \$0.5 million.

The project continues to progress in a very satisfactory manner, and customer reaction has reconfirmed the directors' previous estimates of anticipated revenues from the project. However, increased competitor activity has caused the directors to reconsider their assumptions regarding future market share and anticipated margins on these products. Detailed sensitivity analysis has been carried out and the directors are confident that the carrying amount of the asset will be recovered in full, even if returns are reduced. This situation will be closely monitored, and adjustments made in future periods if future market activity indicates that such adjustments are appropriate.

4.2.2 Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cashgenerating units to which goodwill has been allocated. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value.

The carrying amount of goodwill at the end of the reporting period was \$20.3 million after an impairment loss of \$235,000 was recognised during 2010. Details of the impairment loss calculation are set out in note 24.

4.2.3 Useful lives of property, plant and equipment

As described at 3.18 above, the Group reviews the estimated useful lives of property, plant and equipment at the end of each annual reporting period. During the financial year, the directors determined that the useful lives of certain items of equipment should be shortened, due to developments in technology.

The financial effect of this reassessment, assuming the assets are held until the end of their estimated useful lives, is to increase the consolidated depreciation expense in the current financial year and for the next 3 years, by the following amounts:

	<u>\$'000</u>
2010	879
2011	607
2012	144
2013	102

AASB108.36

The effect of a change in an accounting estimate, shall be recognised prospectively by including it in profit or loss in:

- (a) the period of the change, if the change affects that period only; or
- (b) the period of the change and future periods, if the change affects both.

Source	GAAP Holdings (Australia) Limited		
	4. Critical accounting judgments and key sources of estimation uncertainty (cont'd)		
AASB108.37	To the extent that a change in an accounting estimate gives rise to changes in assets and liabilities, or relates to an item of equity, it shall be recognised by adjusting the carrying amount of the related asset, liability or equity item in the period of the change.		
AASB108.39	An entity shall disclose the nature and amount of a change in an accounting estimate that has an effect in the current period or is expected to have an effect in future periods, except for the disclosure of the effect on future periods when it is impracticable to estimate that effect.		
AASB108.40	If the amount of the effect in future periods is not disclosed because estimating it is impracticable, an entity shall disclose that fact.		
AASB116.76	For property, plant and equipment, such disclosure may arise from changes in estimates with respect to:		
	 (a) residual values; (b) the estimated costs of dismantling, removing or restoring items of property, plant and equipment; (c) useful lives; and 		
4.4.0.D.4.0.4.0.4	(d) depreciation methods.		
AASB101.131	When it is impracticable to disclose the extent of the possible effects of a key assumption or another key source of estimation uncertainty at the reporting date, the entity discloses that it is reasonably possible, based on existing knowledge, that outcomes within the next annual reporting period that are different from assumptions could require a material adjustment to the carrying amount of the asset or liability affected. In all cases, the entity discloses the nature and carrying amount of the specific asset or liability (or class of assets or liabilities) affected by the assumption.		
	5. Revenue		
AASB118.35(b)	The following is an analysis of the Group's revenue for the year from continuing operations (excluding investment revenue – see note 7).

GAAP Holdings (Australia) Limited

6. Segment information

The following segment information is required by AASB 8 Operating Segments to be presented in the consolidated financial statements of a group with a parent (and in the separate or individual financial statements of an entity):

- whose debt or equity instruments are traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets); or
- that files, or is in the process of filing, its (consolidated) financial statements with a securities commission or other regulatory organisation for the purpose of issuing any class of instruments in a public market.

6.1 Adoption of AASB 8 Operating Segments

AASB8.35

The Group has adopted AASB 8 *Operating Segments* with effect from 1 July 2009. AASB 8 requires operating segments to be identified on the basis of internal reports about components of the Group that are regularly reviewed by the chief operating decision maker in order to allocate resources to the segments and to assess their performance. In contrast, the predecessor Standard (AASB 114 *Segment Reporting*) required an entity to identify two sets of segments (business and geographical), using a risks and returns approach, with the entity's 'system of internal financial reporting to key management personnel' serving only as the starting point for the identification of such segments. As a result, following the adoption of AASB 8, the identification of the Group's reportable segments has changed.

6.2 Products and services from which reportable segments derive their revenues

AASB8.22 AASB101.138(b)

In prior years, segment information reported externally was analysed on the basis of the types of goods supplied and services provided by the Group's operating divisions (i.e. electronic equipment, leisure goods, construction services, toys, bicycles and 'other'). However, information reported to the Group's chief operating decision maker for the purposes of resource allocation and assessment of segment performance is more specifically focussed on the category of customer for each type of goods. The principal categories of customer for these goods are direct sales, wholesalers, retail outlets and internet sales. The Group's reportable segments under AASB 8 are therefore as follows:

Electronic equipment - direct sales

- wholesalers and retail outlets

- internet sales

Leisure goods

- wholesalers

- retail outlets

Other

The leisure goods segments supply sports shoes and equipment, and outdoor play equipment.

AASB8.16

Other operations include the construction of residential properties; the development, sale and installation of computer software for specialised business applications; and the leasing out of specialised storage equipment.

The two operations (toys and bicycles) discontinued in the year were reported as separate segments under AASB 114. The segment information reported on the next pages does not include any amounts for these discontinued operations, which are described in more detail in note 11.

Information regarding the Group's reportable segments is presented below. Amounts reported for the prior year have been restated to conform to the requirements of AASB 8.

6. Segment information (cont'd)

6.7 Geographical information

The Group operates in three principal geographical areas – Australia (country of domicile), B Land and C Land.

AASB8.33(a),(b)

The Group's revenue from continuing operations from external customers and information about its non-current assets* by geographical location are detailed below.

		Revenue from external customers		Non-current assets*		
	Year ended 30/06/10 \$'000	Year ended 30/06/09 \$'000	30/06/10 \$'000	30/06/09 \$'000

	140,918	151,840	141,743	156,238		

Non-current assets excluding those relating to bicycle operations and excluding financial instruments, deferred tax assets, post-employment benefit assets, and assets arising from insurance contracts.

6.8 Information about major customers

AASB8.34

Included in revenues arising from direct sales of electronic equipment of \$37.5 million (2009: \$39.6 million) (see 6.3 above) are revenues of approximately \$25.6 million (2009: \$19.8 million) which arose from sales to the Group's largest customer.

- (i) The net loss on redeemable cumulative preference shares designated as at FVTPL comprises a gain of \$125,000 resulting from the decrease in fair value of the liabilities, offset by dividends of \$613,000 paid during the year.
- (ii) The net loss arising on an interest rate swap that economically hedges the fair value of the redeemable cumulative preference shares, but for which hedge accounting is not applied (see note 31) and on non-derivative financial assets held for trading (see note 17). The net loss on the interest rate swap comprises a decrease in fair value of \$51,000 and net interest of \$3,000 paid during the year. The net loss on non-derivative financial assets held for trading comprises a decrease in fair value of \$121,000 (2009: \$87,000) and net interest of \$46,000 (2009: \$87,000) received during the year.

No other gains or losses have been recognised in respect of loans and receivables or held-to-maturity investments, other than as disclosed in note 7 and impairment losses recognised/reversed in respect of trade receivables (see notes 13 and 15).

Source	GAAP Holdings (Australia) Limited								
	10. Income taxes (cont'd)								
AASB112.81(c)	The expense for the year can be reconciled to the accounting profit as follows:								
		Year ended 30/06/10 \$'000	Year ended 30/06/09 \$'000						
	Profit from continuing operations	30,303	32,131						
AASB112.81(d)	Income tax expense calculated at 30% Effect of revenue that is exempt from taxation Effect of expenses that are not deductible in determining taxable profit Effect of concessions (research and development and other allowances) Impairment losses on goodwill that are not deductible Effect of revaluations of assets for taxation purposes Effect of unused tax losses and tax offsets not recognised as deferred tax assets Effect of previously unrecognised and unused tax losses and tax offsets now recognised deferred tax assets Effect of different tax rates of subsidiaries operating in other jurisdictions Effect on deferred tax balances due to the change in income tax rate from xx% to xx% (effective [insert date])	9,091 (30) 2,562 (75) 5 - - 11	9,639 - 2,221 (66) - - - 5						
	Adjustments recognised in the current year in relation to the current tax of prior years	11,564	11,799						
	Income tax expense recognised in profit or loss	11,564	11,799						
AASB112.81(c)	The tax rate used for the 2010 and 2009 reconciliations above is the corporate tax rate of 30% payable by Australian corporate entities on taxable profits under Australian tax law. Where the entity is subject to a number of different tax rates in the different jurisdictions in which it operates, the above disclosures may need to be expanded to highlight the various rates applicable to the entity, particularly where the effect on aggregate income tax expense is material.								
AASB112.81(d)	Where there is a change in the applicable tax rate(s) compared to the previous reporting period, a explanation must be given. The following example can be adapted as necessary: 'The corporate tax rate in Country Z was changed from [x]% to [y]% with effect from [date]. This revised rate has not impacted the current tax liability for the current year but will do so in future periods. However, the impact of the change in tax rate has been taken into account in the measurement of deferred taxes at the end of the reporting period. The effect of this change in tax rate on deferred taxes has been disclosed in the reconciliation of deferred taxes below.'

Deferred tax balances

The following illustrative deferred tax balances disclosure is considered 'best practice'. The only requirements for a breakdown by type of temporary difference, i.e. the first column, are the opening and closing balances, and the amount charged to income (being the aggregate of the second and fifth columns). The other columns could be amalgamated or excluded so long as the other disclosures required by AASB 112 are made elsewhere in the financial statements in aggregate. Best practice would have all the deferred tax assets and deferred tax liabilities disclosed separately, albeit in the same note.

Int1052.54	Investments within tax-consolidated groups The amounts (if any) disclosed in the above table will depend on the view taken by the entity in relation to the deferred tax consequences of investments within tax-consolidated groups and other factors. For a detailed analysis of this issue, refer to the Deloitte 'Accounting for tax consolidation under A-IFRS' publication, which can be obtained from the Deloitte web site, www.deloitte.com.au. There are three main views as to how deferred taxes should be calculated in relation to investments within tax-consolidated groups. The disclosures below are provided as examples of suggested disclosure under each view and should be adapted as necessary to the entity's circumstances: 'End of time' view (i) Under the tax law, the taxable profit made by a tax-consolidated group in relation to an entity leaving the group depends on a range of factors, including the tax values and/or carrying values of the assets and liabilities of the leaving entities, which vary in line with the transactions and events recognised in each entity. The above taxable temporary differences include an amount of \$[x] that arises in relation to investments within the tax-consolidated group. This temporary difference represents the taxable profit that would be realised if the investments within the tax-consolidated group (or the net assets arising on consolidation in relation to those investments) were disposed of at the reporting date at their carrying amount Because the Group has no current intention to dispose of these investments, a deferred tax liability has not been recognised in relation to these taxable temporary differences. Furthermore, the taxable profit or loss ultimately made on disposal of the investments within the tax-consolidated group may be higher or lower than this amount depending upon when the entity leaves the tax-consolidated group and the assets and liabilities that the leaving entity holds at that time.					

GAAP Holdings (Australia) Limited

10. Income taxes (cont'd)

'Change in tax status' view

(ii) Under the tax law, the taxable profit made by a tax-consolidated group in relation to an entity leaving the group depends on a range of factors, including the tax values and/or carrying values of the assets and liabilities of the leaving entities, which vary in line with the transactions and events recognised in each entity. The taxable profit or loss ultimately made on any disposal of the investments within the tax-consolidated group will therefore depend upon when each entity leaves the tax-consolidated group and the assets and liabilities that the leaving entity holds at that time.

The Group considers the effects of entities entering or leaving the tax-consolidated group to be a change of tax status that is only recognised when those events occur. As a result, temporary differences and deferred tax liabilities have not been measured or recognised in relation to investments within the tax-consolidated group.

'Foreseeable future' view

(iii) Under the tax law, the taxable profit made by a tax-consolidated group in relation to an entity leaving the group depends on a range of factors, including the tax values and/or carrying values of the assets and liabilities of the leaving entities, which vary in line with the transactions and events recognised in each entity. The taxable profit or loss ultimately made on any disposal of the investments within the tax-consolidated group will therefore depend upon when each entity leaves the tax-consolidated group and the assets and liabilities that the leaving entity holds at that time.

Because the Group has no current intention to dispose of these investments, a deferred tax liability has not been recognised in relation to investments within the tax-consolidated group. Furthermore, temporary differences that might arise on disposal of the entities in the tax-consolidated group cannot be reliably measured because of the inherent uncertainties surrounding the nature of any future disposal that might occur.

However, the directors believe that certain non-taxable transactions could be put in place within the tax-consolidated group before any disposal that could reduce any taxable amount that might arise to nil. Because the directors have no current intention to dispose of these investments and because of the existence of these tax planning opportunities, the directors believe the minimum amount of any temporary difference arising would be nil.

10.8 Tax consolidation

Int1052.16(a), (b)

Relevance of tax consolidation to the Group

The company and its wholly-owned Australian resident entities have formed a tax-consolidated group with effect from 1 July 2003 and are therefore taxed as a single entity from that date. The head entity within the tax-consolidated group is GAAP Holdings (Australia) Limited. The members of the tax-consolidated group are identified in note 19. Tax expense/income, deferred tax liabilities and deferred tax assets arising from temporary differences of the members of the tax-consolidated group are recognised in the separate financial statements of the members of the tax-consolidated group using the 'separate taxpayer within group' approach by reference to the carrying amounts in the separate financial statements of each entity and the tax values applying under tax consolidation. Current tax liabilities and assets and deferred tax assets arising from unused tax losses and relevant tax credits of the members of the tax-consolidated group are recognised by the company (as head entity in the tax-consolidated group).

Due to the existence of a tax funding arrangement between the entities in the tax-consolidated group, amounts are recognised as payable to or receivable by the company and each member of the group in relation to the tax contribution amounts paid or payable between the parent entity and the other members of the tax-consolidated group in accordance with the arrangement.

Where the decision to tax consolidate has not been notified to the Australian Taxation Office, the following wording should also be included: 'The decision to consolidate for tax purposes has not yet been formally notified to the Australian Taxation Office.'

Int1052.16(c)

Nature of tax funding arrangements and tax sharing agreements

Entities within the tax-consolidated group have entered into a tax funding arrangement and a tax-sharing agreement with the head entity. Under the terms of the tax funding arrangement, GAAP Holdings (Australia) Limited and each of the entities in the tax-consolidated group has agreed to pay a tax equivalent payment to or from the head entity, based on the current tax liability or current tax asset of the entity.

GAAP Holdings (Australia) Limited

10. Income taxes (cont'd)

The tax sharing agreement entered into between members of the tax-consolidated group provides for the determination of the allocation of income tax liabilities between the entities should the head entity default on its tax payment obligations or if an entity should leave the tax-consolidated group. The effect of the tax sharing agreement is that each member's liability for tax payable by the tax-consolidated group is limited to the amount payable to the head entity under the tax funding arrangement.

Other acceptable allocation methods include:

- (a) a 'stand alone taxpayer' approach for each entity, as if it continued to be a taxable entity in its own right; or
- (b) a 'group allocation' approach, under which the current and deferred tax amounts for the taxconsolidated group are allocated among each entity in the group (subject to certain limitations).

Where the 'stand alone taxpayer' approach is adopted, the following accounting policy wording may be adopted:

The company and all its wholly-owned Australian resident entities are part of a tax-consolidated group under Australian taxation law. GAAP Holdings (Australia) Limited is the head entity in the tax-consolidated group. Tax expense/income, deferred tax liabilities and deferred tax assets arising from temporary differences of the members of the tax-consolidated group are recognised in the separate financial statements of the members of the tax-consolidated group using the 'stand alone taxpayer' approach by reference to the carrying amounts in the separate financial statements of each entity and the tax values applying under tax consolidation. Current tax liabilities and assets and deferred tax assets arising from unused tax losses and tax credits of the members of the tax-consolidated group are recognised by the company (as head entity in the tax-consolidated group).

Due to the existence of a tax funding arrangement between the entities in the tax-consolidated group, amounts are recognised as payable to or receivable by the company and each member of the group in relation to the tax contribution amounts paid or payable between the parent entity and the other members of the tax-consolidated group in accordance with the arrangement.. Where the tax contribution amount recognised by each member of the tax-consolidated group for a particular period is different to the aggregate of the current tax liability or asset and any deferred tax asset arising from unused tax losses and tax credits in respect of that period, the difference is recognised as a contribution from (or distribution to) equity participants.

Interpretation 1052 provides little guidance on how the 'group allocation method should be implemented. However, it does specifically note that the following 'group allocation' methods would not be considered 'acceptable methods' for the calculation of current and deferred taxes by members of the tax-consolidated group:

- a method that allocates only current tax liabilities to an entity in the group that has taxable temporary differences
- a method that allocated deferred taxes to an entity in the group using a method that is fundamentally different from the temporary difference approach required by AASB 112
- a method that allocates no current or deferred tax expense to an entity in the group that has taxable income because the tax-consolidated group has no current or deferred income tax expense
- a method that only allocates current taxes to entities in the group that have accounting profits, with no allocation to entities that have accounting losses
- a method that allocated current taxes to entities in the group on an arbitrary basis, for example on the basis of sales revenue, total assets, net assets or operating profits without adjustment for material items that are not assessable or deductible for tax purposes.

Where the 'group allocation' approach is adopted, the following accounting policy wording may be adapted to reflect the actual mechanics of the method adopted:

GAAP Holdings (Australia) Limited

10. Income taxes (cont'd)

The company and all its wholly-owned Australian resident entities are part of a tax-consolidated group under Australian taxation law. GAAP Holdings (Australia) Limited is the head entity in the tax-consolidated group. Tax expense/income, deferred tax liabilities and deferred tax assets arising from temporary differences of the members of the tax-consolidated group are recognised in the separate financial statements of the members of the tax-consolidated group using a 'group allocation' approach based on the allocation specified in the tax funding arrangement.

The tax funding arrangement requires a notional current and deferred tax calculation for each entity as if it were a taxpayer in its own right, except that unrealised profits, distributions made and received and capital gains and losses and similar items arising on transactions within the tax-consolidated group are treated as having no tax consequence [amend as applicable]. Current tax liabilities and assets and deferred tax assets arising from unused tax losses and tax credits of the members of the tax-consolidated group are recognised by the company (as head entity in the tax-consolidated group).

Due to the existence of a tax funding arrangement between the entities in the tax-consolidated group, amounts are recognised as payable to or receivable by the company and each member of the group in relation to the tax contribution amounts paid or payable between the parent entity and the other members of the tax-consolidated group in accordance with the arrangement. Where the tax contribution amount recognised by each member of the tax-consolidated group for a particular period is different to the aggregate of the current tax liability or asset and any deferred tax asset arising from unused tax losses and tax credits in respect of that period, the difference is recognised as a contribution from (or distribution to) equity participants.

11. Discontinued operations

11.1 Disposal of toy manufacturing operations

AASB5.30 AASB5.41

On 28 March 2010, the board of directors entered into a sale agreement to dispose of Subzero Limited, which carried out all of the Group's toy manufacturing operations. The proceeds of sale substantially exceeded the carrying amount of the related net assets and, accordingly, no impairment losses were recognised on the reclassification of these operations as held for sale. The disposal of the toy manufacturing operations is consistent with the Group's long-term policy to focus its activities in the electronic equipment and other leisure goods markets. The disposal was completed on 31 May 2010, on which date control of the toy manufacturing operations passed to the acquirer. Details of the assets and liabilities disposed of, and the calculation of the profit or loss on disposal, are disclosed in note 47.

11.2 Plan to dispose of the bicycle business

AASB5.30 AASB5.41

On 31 May 2010, the board of directors announced a plan to dispose of the Group's bicycle business. The disposal is consistent with the Group's long-term policy to focus its activities in the electronic equipment and other leisure goods markets. The Group is actively seeking a buyer for its bicycle business and expects to complete the sale by 31 January 2011. The Group has not recognised any impairment losses in respect of the bicycle business, neither when the operation was reclassified as held for sale nor at the end of the reporting period.

AASB133.69

An entity shall present basic and diluted earnings per share even if the amounts are negative (a loss per share).

AASB133.68

An entity that reports a discontinued operation shall disclose the basic and diluted amounts per share for the discontinued operation either on the face of the income statement or in the notes to the financial statements.

AASB133.72

Financial instruments and other contracts generating potential ordinary shares may incorporate terms and conditions that affect the measurement of basic and diluted earnings per share. These terms and conditions may determine whether any potential ordinary shares are dilutive and, if so, the effect on the weighted average number of shares outstanding and any consequent adjustments to profit or loss attributable to ordinary equity holders. The disclosure of the terms and conditions of such financial instruments and other contracts is encouraged, if not otherwise already disclosed in accordance with AASB 7 'Financial Instruments: Disclosures'.

AASB133.70(d)

Ordinary shares and potential ordinary shares transactions occurring after reporting date

A description of ordinary share transactions or potential ordinary shares transactions, other than those adjusted for retrospectively (refer below), that occur after the reporting date and that would have changed significantly the number of ordinary shares or potential ordinary shares outstanding at the end of the period if those transactions had occurred before the end of the reporting period shall be disclosed.

Restatement of earnings per share

AASB133.64

If the number of ordinary or potential ordinary shares outstanding increases as a result of a capitalisation, bonus issue or share split, or decreases as a result of a reverse share split, the calculation of basic and diluted earnings per share for all periods presented shall be adjusted retrospectively. If these changes occur after the reporting date but before the financial report is authorised for issue, the per share calculations for those and any prior period financial statements presented shall be based on the new number of shares. The fact that per share calculations reflect such changes in the number of shares shall be disclosed.

AASB133.64, 65

Basic and diluted earnings per share of all periods presented shall be adjusted for the effects of errors and adjustments resulting from changes in accounting policies, accounted for retrospectively. Diluted earnings per share of any prior period presented are not restated for changes in the assumptions used in earnings per share calculations or for the conversion of potential ordinary shares into ordinary shares.

Comparative information

AASB133.67

Earnings per share is presented for every period for which an income statement is presented.

	15.2 Transfer of financial assets				
AASB7.13, 14(a)	During the period, the Group transferred \$1.052 million of trade receivables to an unrelated entity. As part of the transfer, the Group provided the transferee with a credit guarantee over the expected losses of those receivables. Accordingly, the Group continues to recognise the full carrying amount of the receivables and has recognised the cash received on the transfer as a secured borrowing (see note 29). At the end of the reporting period, the carrying amount of the transferred short-term receivables, which have been pledged as security for the borrowing, is \$0.946 million. The carrying amount of the associated liability is \$0.923 million. The transferee is entitled to sell the trade receivables or deposit them as security for other loans.				
AASB7.13	Derecognition of financial assets An entity may have either transferred a financial asset in such a way that part or all of the financial assets do not qualify for derecognition. The entity must disclose for each class of such financial assets: (a) the nature of the assets; (b) the nature of the risks and rewards of ownership to which the entity remains exposed; (c) when the entity continues to recognise all of the asset, the carrying amounts of the asset and of the associated liability; and (d) when the entity continues to recognise the asset to the extent of its continuing involvement, the total amount of the asset, the amount of the asset that the entity continues to recognise and the carrying amount of the associated liabilities.

The circumstances of the entity may also warrant the inclusion other amounts, such as distribution costs.			often nt of nounts of

Source GAAP Holdings (Australia) Limited

18. Inventories (cont'd)

AASB102.36(e), (f),(g)

The cost of inventories recognised as an expense includes \$2.34 million (2009: \$1.86 million) in respect of write-downs of inventory to net realisable value, and has been reduced by \$0.5 million (2009: \$0.4 million) in respect of the reversal of such write-downs. Previous write-downs have been reversed as a result of increased sales prices in certain markets.

Inventory

The write-down of inventory to net realisable value would be included in the cost of sales line on the face of the income statement where classification by function is used, and in the changes in inventory line where classification by nature is used.

Reversal of previous write-downs of inventory

The financial report shall disclose the circumstances or events that led to the reversal of a write-down of inventories arising from an increase in net realisable value.

AASB101.61

Inventories of \$1.29 million (30 June 2009: \$0.86 million) are expected to be recovered after more than twelve months.

AASB102.3(b), 36(c)

Inventories held by commodity broker-traders may be measured at fair value less costs to sell. The financial report shall disclose the carrying amount of inventories carried at fair value less costs to sell.

Proportion of

- (i) GAAP Holdings (Australia) Limited is the head entity within the tax-consolidated group.
- (ii) These companies are members of the tax-consolidated group.

ASIC-C0 98/1418

These wholly-owned subsidiaries have entered into a deed of cross guarantee with GAAP Holdings (Australia) Limited pursuant to ASIC Class Order 98/1418 and are relieved from the requirement to prepare and lodge an audited financial report. Subseven Limited became a party to the deed of cross guarantee on 15 December 2009.

Source **GAAP Holdings (Australia) Limited** 19. Subsidiaries (cont'd) During the period, the Group disposed of 10% of its interest in Subone Limited, reducing its continuing interest to 90%. The proceeds on disposal of \$213,000 were received in cash. An amount of \$179,000 (being the proportionate share of the carrying amount of the net assets of Subone Limited) has been transferred to non-controlling interests (see note 41). The difference of \$34,000 between that amount and the consideration received has been credited to retained earnings (see note 39). AASB127.41(a) Although the Company does not own more than half of the equity shares of Subtwo Limited, and consequently it does not control more than half of the voting power of those shares, it has the power to appoint and remove the majority of the board of directors and control of the entity is by the board. Consequently, Subtwo Limited is controlled by the Company and is consolidated in these financial statements. ASIC-CO 98/1418 The consolidated income statement and statement of financial position of the entities party to the deed of cross guarantee are: Year Year ended ended 30/06/10 30/06/09 \$'000 \$'000 Income statement Revenue 90,669 92,440 Other income 622 1,435 Share of profits of associates 1,186 1,589 Changes in inventories of finished goods and work in progress (4,273)1,822 Raw materials and consumables used (42,208)(51,202)Employee benefits expense (5,882)(6,993)Depreciation and amortisation expense (8,544)(7,316)Finance costs (3,299)(4,037)Consulting expense (1,797)(976)Other expenses (5,343)(2.986)Profit before tax expense 23,172 21,735 Income tax expense (7,336)(8,971)Profit for the year from continuing operations 15,836 12,764 Profit for the year from discontinued operations 12,764 Profit for the year 15.836 Other comprehensive Income Net Value gain on available-for-sale financial assets 22 25 Net value gain on cash flow hedges 17 18 Gain on revaluation of properties Share of other comprehensive income of associates 43 Other comprehensive income for the year, net of tax 39

	22. Property, plant and equipment (cont'd)			
	22.2 Freehold land and buildings carried at fair value			
AASB116.77(a) to (d)	An independent valuation of the Group's land and buildings was performed by Messrs R & P Trent to determine the fair value of the land and buildings. The valuation, which conforms to International Valuation Standards, was determined by reference to discounted cash flows using a discount rate of 10%. The effective date of the valuation is 30 June 2010.			
AASB116.77(e)	Had the Group's land and buildings (other than land and buildings classified as held for sale or included in a disposal group) been measured on a historical cost basis, their carrying amount would have been as follows.			
	30/06/10 30/06/09			
	\$'000 \$'000			
	Freehold land 11,957 14,750 Buildings 9,455 12,460			
	22.3 Assets pledged as security			
AASB116.74(a)	Freehold land and buildings with a carrying amount of \$23 million approx (30 June 2009: \$28.8 million approx) have been pledged to secure borrowings of the Group (see note 29). The freehold land and buildings have been pledged as security for bank loans under a mortgage. The Group is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.			
AASB7.14(a)	In addition, the Group's obligations under finance leases (see note 35) are secured by the lessors' title to the leased assets, which have a carrying amount of \$28,000 (30 June 2009: \$162,000).			
AASB116.74(d)	Compensation from third parties If not disclosed separately on the face of the income statement, the amount of compensation from third parties for items of property, plant and equipment that were impaired, lost or given up that is included in profit or loss shall be disclosed.			
AASB116.35	Property, plant and equipment stated at revalued amounts When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is treated in one of the following ways: (a) restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount. This method is often used when an asset is revalued by means of applying an index to its depreciated			
	replacement cost; or (b) eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset. This method is often used for buildings. The amount of the adjustment arising on the restatement or elimination of accumulated depreciation forms part of the increase or decrease in carrying amount that is accounted for in accordance with AASB 116 'Property, Plant and Equipment'.			
AASB136.5	Impairment of revalued property, plant and equipment Property, plant and equipment carried at revalued amounts shall also be tested for impairment. Identifying whether a revalued asset may be impaired depends on the basis used to determine fair value: (a) if the asset's fair value is its market value, the only difference between the asset's fair value and its fair value less costs to sell is the direct incremental costs to dispose of the asset: i. if the disposal costs are negligible, the recoverable amount of the revalued asset is necessarily close to, or greater than, its revalued amount (i.e. fair value). In this case, after the revaluation requirements have been applied, it is unlikely that the revalued asset is impaired and recoverable amount need not be estimated;			

Source GAAP Holdings (Australia) Limited

22. Property, plant and equipment (cont'd)

- i. if the disposal costs are not negligible, the fair value less costs to sell of the revalued asset is necessarily less than its fair value. Therefore, the revalued asset will be impaired if its value in use is less than its revalued amount (i.e. fair value). In this case, after the revaluation requirements have been applied, an entity applies AASB 136 'Impairment of Assets' to determine whether the asset may be impaired; and
- (b) if the asset's fair value is determined on a basis other than its market value, its revalued amount (i.e. fair value) may be greater or lower than its recoverable amount. Hence, after the revaluation requirements have been applied, an entity applies AASB 136 to determine whether the asset may be impaired.

Disclosure of impairment of property, plant and equipment

An entity shall disclose the information requirement by AASB 136 'Impairment of Assets' for each material impairment loss recognised or reversed during the period for property, plant and equipment

Additional disclosures

AASB116.79

AASB140.76

Entities are encouraged to disclose the following information, as users of the financial report may find the information relevant to their needs:

- (a) the carrying amount of temporarily idle property, plant and equipment;
- (b) the gross carrying amount of any fully depreciated property, plant and equipment that is still in use:
- (c) the carrying amount of property, plant and equipment retired from active use and not classified as held for sale in accordance with AASB 5 'Non-current Assets Held for Sale and Discontinued Operations'; and

30/06/10

30/06/09

01/07/08

(d) when the cost model is used, the fair value of property, plant and equipment when this is materially different from the carrying amount.

Investment property under construction with a cost of \$1.51 million was transferred from property, plant and equipment to investment property following the adoption of the amendments to AASB 140 *Investment Property* resulting from AASB 2008-5 *Amendments to Australian Accounting Standards arising from the Annual Improvements Project* (see note 2.1).

R 122

Source	GAAP Holdings (Australia) Limited
	23. Investment property (cont'd)
AASB140.75(d), (e)	The fair value of the Group's investment property at 30 June 2010 has been arrived at on the basis of a valuation carried out at that date by Messrs R & P Trent, independent valuers not related to the Group. Messrs R & P Trent are members of the Institute of Valuers of Australia, and they have appropriate qualifications and recent experience in the valuation of properties in the relevant locations. The valuation, which conforms to International Valuation Standards, was arrived at by reference to market evidence of transaction prices for similar properties.
	All of the Group's investment property is held under freehold interests.
AASB140.75(d)	An entity shall disclose the methods and significant assumptions applied in determining the fair value of investment property, including a statement whether the determination of fair value was supported by market evidence or was more heavily based on other factors (which the entity shall disclose) because of the nature of the property and lack of comparable market data.
AASB140.75(e)	The extent to which the fair value of investment property is based on a valuation by an independent valuer who holds a recognised and relevant professional qualification and has recent experience in the location and category of the investment property being valued shall be disclosed. If there has been no such valuation, that fact shall be disclosed.
AASB140.77	Adjustment for recognised assets and liabilities When a valuation obtained for investment property is adjusted significantly for the purpose of the financial statements, for example to avoid double-counting of assets or liabilities that are recognised as separate assets and liabilities, the entity shall disclose a reconciliation between the valuation obtained and the adjusted valuation included in the financial statements, showing separately the aggregate amount of any recognised lease obligations that have been added back, and any other significant adjustments.
AASB140.78	Inability to determine fair value reliably In the exceptional cases where an entity is unable to reliably determine the fair value of an investment property, and accordingly measures that investment property using the cost model, the reconciliation illustrated above shall disclose amounts relating to that investment property separately from amounts relating to other investment property. In addition, an entity shall disclose: (a) a description of the investment property; (b) an explanation of why fair value cannot be determined reliably; (c) if possible, the range of estimates within which fair value is highly likely to lie; and (d) on disposal of investment property not carried at fair value: i. the fact that the entity has disposed of investment property not carried at fair value; ii. the carrying amount of that investment property at the time of sale; and iii. the amount of gain or loss recognised.
AASB140.75(b)	Property interests held under operating leases treated as investment property An entity shall disclose, if it applies the fair value model, whether, and in what circumstances, property interests held under operating leases are classified and accounted for as investment property.
AASB140.79	Investment properties measured under the cost model An entity that applies the cost model shall disclose, in addition to the disclosures illustrated in notes 3.19, 8, 23 and 51 to these model financial statements: (a) the depreciation methods used; (b) the useful lives or the depreciation rates used; (c) the gross carrying amount and the accumulated depreciation (aggregated with accumulated impairment losses) at the beginning and end of the period; (d) a reconciliation of the carrying amount of investment property at the beginning and end of the period, showing the following: i. additions, disclosing separately those additions resulting from acquisitions and those resulting from subsequent expenditure recognised as an asset; ii. additions resulting from acquisitions through business combinations; iii. assets classified as held for sale or included in a disposal group in accordance with AASB 5 'Non-current Assets Held for Sale and Discontinued Operations' and other disposals;

The recoverable amount of the construction activities was assessed by reference to the cash-generating unit's value in use. A discount factor of 10% per annum (2009: 9.5%

per annum) was applied in the value in use model.

GAAP Holdings (Australia) Limited

24. Goodwill (cont'd)

The main factor contributing to the impairment of the cash-generating unit was a change during the year in building regulations, requiring registration and certification of builders for government contracts, and the directors' decision not to register the Group's Murphy Construction operating unit for such purposes. The directors have decided to focus the Group's construction activities through the other operating units in Subthree Limited and have consequently determined to write off the goodwill directly related to the activities of Murphy Construction. No write-down of the carrying amounts of other assets in the cash-generating unit was necessary. The goodwill is included in the 'other' reportable segment disclosed in note 6.

The impairment loss has been included in the 'other expenses' line item in the [statement of comprehensive income/income statement].

24.2 Allocation of goodwill to cash-generating units

AASB136.134, 135

Goodwill has been allocated for impairment testing purposes to the following cash-generating units.

- Leisure goods retail outlets
- Electronic equipment internet sales
- Construction operations Murphy Construction
- Construction operations other.

Before recognition of impairment losses, the carrying amount of goodwill (other than goodwill classified as held for sale and goodwill relating to discontinued operations) was allocated to cash-generating units as follows.

	30/06/10	30/06/09
	\$'000	\$'000
Leisure goods – retail outlets	10,162	9,620
Electronic equipment – internet sales	8,623	8,478
Construction operations – Murphy Construction	235	235
Construction operations – other	1,500	1,500
	20,520	19,833

Leisure goods - retail outlets

The recoverable amount of this cash-generating unit is determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period, and a discount rate of 10% per annum (2009: 9.5% per annum).

Cash flow projections during the budget period are based on the same expected gross margins and raw materials price inflation throughout the budget period. The cash flows beyond that five-year period have been extrapolated using a steady 5% per annum growth rate which is the projected long-term average growth rate for the international leisure goods market. The directors believe that any reasonably possible change in the key assumptions on which recoverable amount is based would not cause the aggregate carrying amount to exceed the aggregate recoverable amount of the cash-generating unit.

GAAP Holdings (Australia) Limited

24. Goodwill (cont'd)

Electronic equipment – internet sales

The recoverable amount of the 'electronic equipment – internet sales' segment and cash-generating unit is determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period, and a discount rate of 10% per annum (2009: 9.5% per annum). Cash flows beyond that five-year period have been extrapolated using a steady 11% per annum growth rate. This growth rate exceeds by 0.5 percentage points the long-term average growth rate for the international electronic equipment market. However, among other factors, the internet sales cash-generating unit benefits from the protection of a 20-year patent on the Series Z electronic equipment, granted in 2006, which is still acknowledged as one of the top models in the market. The directors believe that an 11% per annum growth rate is reasonable in the light of that patent, and of other products being developed, and their intention to focus the Group's operations in this market. The directors believe that any reasonably possible change in the key assumptions on which recoverable amount is based would not cause the 'electronic equipment – internet sales' carrying amount to exceed its recoverable amount.

Construction operations – Murphy Construction

The goodwill associated with Murphy Construction arose when that business was acquired by the Group in 2005. The business has continued to operate on a satisfactory basis, but without achieving any significant increase in market share. During the year, the government of Australia introduced new regulations requiring registration and certification of builders for government contracts. In the light of the decision to focus the Group's construction activities through the other operating units in Subthree Limited, the directors have decided not to register Murphy Construction for this purpose, which means that it has no prospects of obtaining future contracts. The directors have consequently determined to write off the goodwill directly related to Murphy Construction. No other write-down of the assets of Murphy Construction is considered necessary. Contracts in progress at the end of the year will be completed without loss to the Group.

Construction operations - other

The recoverable amount of the Group's remaining construction operations has been determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period, and a discount rate of 10% per annum (2009: 9.5% per annum). Cash flows beyond that five-year period have been extrapolated using a steady 8% per annum growth rate. This growth rate does not exceed the long-term average growth rate for the construction market in Australia. The directors believe that any reasonably possible further change in the key assumptions on which recoverable amount is based would not cause the construction operations carrying amount to exceed its recoverable amount.

The key assumptions used in the value in use calculations for the leisure goods and electronic equipment cash-generating units are as follows.

period, plus a growth of 1-2% of market share per year. The values assigned to the assumption reflect past experience, except for the growth factor, which is consistent with the directors' plans for focusing operations in these markets. The directors believe that the planned market share growth per year for the next five years is

reasonably achievable.

Budgeted gross margin Average gross margins achieved in the period immediately before

the budget period, increased for expected efficiency improvements. This reflects past experience, except for efficiency improvements. The directors expect efficiency improvements of 3 - 5% per year to

be reasonably achievable.

Raw materials price inflation Forecast consumer price indices during the budget period for the countries from which raw materials are purchased. The values

assigned to the key assumption are consistent with external sources

of information.

	24. Goodwill (cont'd)
AASB136.135	Where goodwill allocated to a cash-generating unit (or groups of units) is not significant individually in comparison with the entity's total carrying amount of goodwill, but is significant when aggregated with another unit (or units) based on the same key assumptions, the key assumptions to be disclosed in relation to those aggregate units are only the assumptions that are used in the recoverable amount calculation for both units.
AASB136.133	Goodwill not yet allocated to a cash-generating unit If any portion of the goodwill acquired in a business combination during the period has not been allocated to a cash-generating unit (or group of units) at the reporting date, the amount of the unallocated goodwill shall be disclosed together with the reasons why that amount remains unallocated.
AASB136.130	Impairment of cash-generating units including goodwill An entity shall disclose the following for each material impairment loss recognised or reversed during the period for an individual asset, including goodwill, or a cash-generating unit: (a) the events and circumstances that led to the recognition or reversal of the impairment loss; (b) the amount of the impairment loss recognised or reversed; (c) for an individual asset: i. the nature of the asset; and ii. if the entity reports segment information in accordance with AASB 8 'Operating Segments', the reportable segment to which the asset belongs; (d) for a cash-generating unit: i. a description of the cash-generating unit (such as whether it is a product line, a plant, a business operation, a geographical area, or a reportable segment as defined in AASB 8); ii. the amount of the impairment loss recognised or reversed by class of assets and, if the entity reports segment information in accordance with AASB 8, by reportable segment; and iii. if the aggregation of assets for identifying the cash-generating unit has changed since the previous estimate of the cash-generating unit's recoverable amount (if any), a description of the current and former way of aggregating assets and the reasons for changing the way the cash-generating unit is identified; (e) whether the recoverable amount of the asset (or cash-generating unit) is its fair value less costs to sell or its value in use; (f) if recoverable amount is fair value less costs to sell, the basis used to determine fair value less costs to sell (such as whether fair value was determined by reference to an active market); and if recoverable amount is value in use, the discount rate(s) used in the current estimate and
AASB136.131	 (g) if recoverable amount is value in use, the discount rate(s) used in the current estimate and previous estimate (if any) of value in use. An entity shall disclose the following information for the aggregate impairment losses recognised during the period for which no information is disclosed in accordance with the above requirements: (a) the main classes of assets affected by impairment losses and the main classes of assets affected by reversals of impairment losses; and (b) the main events and circumstances that led to the recognition of these impairment losses and reversals of impairment losses.
	Estimates used to measure recoverable amounts of cash-generating units containing goodwill or intangible assets with indefinite useful lives
AASB136.134	An entity shall disclose the following information for each cash-generating unit (or group of units) for which the carrying amount of goodwill or intangible assets with indefinite useful lives allocated to that unit (or group of units) is significant in comparison with the entity's total carrying amount of goodwill or intangible assets with indefinite useful lives: (a) the carrying amount of goodwill allocated to the unit (or group of units); (b) the carrying amount of intangible assets with indefinite useful lives allocated to the unit (or group of units); (c) the basis on which the unit's (or group of units') recoverable amount has been determined (i.e. value in use or fair value less costs to sell);

GAAP Holdings (Australia) Limited

24. Goodwill (cont'd)

- (d) if the unit's (or group of units') recoverable amount is based on value in use:
 - a description of each key assumption on which management has based its cash flow projections for the period covered by the most recent budgets/forecasts. Key assumptions are those to which the unit's (or group of units') recoverable amount is most sensitive;
 - ii. a description of management's approach to determining the value(s) assigned to each key assumption, whether those value(s) reflect past experience or, if appropriate, are consistent with external sources of information, and, if not, how and why they differ from past experience or external sources of information:
 - iii. the period over which management has projected cash flows based on financial budgets/forecasts approved by management and, when a period greater than five years is used for a cash-generating unit (or group of units), an explanation of why that longer period is justified;
 - iv. the growth rate used to extrapolate cash flow projections beyond the period covered by the most recent budgets/forecasts, and the justification for using any growth rate that exceeds the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market to which the unit (or group of units) is dedicated; and
 - v. the discount rate(s) applied to the cash flow projections;
- (e) if the unit's (or group of units') recoverable amount is based on fair value less costs to sell, the methodology used to determine fair value less costs to sell. If fair value less costs to sell is not determined using an observable market price for the unit (or group of units), the following information shall also be disclosed:
 - a description of each key assumption on which management has based its determination
 of fair value less costs to sell. Key assumptions are those to which the unit's (or group of
 units') recoverable amount is most sensitive; and
 - ii. a description of management's approach to determining the value(s) assigned to each key assumption, whether those value(s) reflect past experience or, if appropriate, are consistent with external sources of information, and, if not, how and why they differ from past experience or external sources of information; and
- (f) if a reasonably possible change in a key assumption on which management has based its determination of the unit's (or group of units') recoverable amount would cause the unit's (or group of units') carrying amount to exceed its recoverable amount:
 - i. the amount by which the unit's (or group of units') recoverable amount exceeds its carrying amount;
 - ii. the value assigned to the key assumption; and
 - iii. the amount by which the value assigned to the key assumption must change, after incorporating any consequential effects of that change on the other variables used to measure recoverable amount, in order for the unit's (or group of units') recoverable amount to be equal to its carrying amount.

AASB136.135

If some or all of the carrying amount of goodwill or intangible assets with indefinite useful lives is allocated across multiple cash-generating units (or groups of units), and the amount so allocated to each unit (or group of units) is not significant in comparison with the entity's total carrying amount of goodwill or intangible assets with indefinite useful lives, that fact shall be disclosed, together with the aggregate carrying amount of goodwill or intangible assets with indefinite useful lives allocated to those units (or groups of units). In addition, if the recoverable amounts of any of those units (or groups of units) are based on the same key assumption(s) and the aggregate carrying amount of goodwill or intangible assets with indefinite useful lives allocated to them is significant in comparison with the entity's total carrying amount of goodwill or intangible assets with indefinite useful lives, an entity shall disclose that fact, together with:

- (a) the aggregate carrying amount of goodwill allocated to those units (or groups of units);
- (b) the aggregate carrying amount of intangible assets with indefinite useful lives allocated to those units (or groups of units);
- (c) a description of the key assumption(s);
- (d) a description of management's approach to determining the value(s) assigned to the key assumption(s), whether those value(s) reflect past experience or, if appropriate, are consistent with external sources of information, and, if not, how and why they differ from past experience or external sources of information; and

Source **GAAP Holdings (Australia) Limited** 24. Goodwill (cont'd) if a reasonably possible change in the key assumption(s) would cause the aggregate of the (e) units' (or groups of units') carrying amounts to exceed the aggregate of their recoverable the amount by which the aggregate of the units' (or groups of units') recoverable amounts exceeds the aggregate of their carrying amounts; the value(s) assigned to the key assumption(s); and ii. the amount by which the value(s) assigned to the key assumption(s) must change, after incorporating any consequential effects of the change on the other variables used to measure recoverable amount, in order for the aggregate of the units' (or groups of units') recoverable amounts to be equal to the aggregate of their carrying amounts. 25. AASB138.122(b)	The Group holds a patent for the manufacture of its Series Z electronic equipment. The carrying amount of the patent of \$2.25 million (30 June 2009: \$2.4 million) will be fully amortised in 15 years (30 June 2009: 16 years).					
AASB138.120	Impairment of intangible assets An entity discloses information on impaired intangible assets and estimates used to measure the recoverable amounts of cash-generating units containing intangible assets with indefinite useful lives in accordance with AASB 136 'Impairment of Assets' in addition to the information required by AASB 138 'Intangible Assets' (refer pages B127 to B129).					
AASB138.122(a)	Additional disclosures for indefinite life intangible assets An entity shall disclose, for an intangible asset assessed as having an indefinite useful life, the carrying amount of that asset and the reasons supporting the assessment of an indefinite useful life. In giving these reasons, the entity shall describe the factor(s) that played a significant role in determining that the asset has an indefinite useful life.					

Source	GAAP Holdings (Australia) Limited			
	25. Other intangible assets (cont'd)			
AASB138.90	Factors that are considered in determining the useful life of an intangible asset include: (a) the expected usage of the asset by the entity and whether the asset could be managed efficiently by another management team; (b) typical product life cycles for the asset and public information on estimates of useful lives of similar assets that are used in a similar way; (c) technical, technological, commercial or other types of obsolescence; (d) the stability of the industry in which the asset operates and changes in the market demand for the products or services output from the asset; (e) expected actions by competitors or potential competitors; (f) the level of maintenance expenditure required to obtain the expected future economic benefits from the asset and the entity's ability and intention to reach such a level; (g) the period of control over the asset and legal or similar limits on the use of the asset, such as the expiry dates of related leases; and (h) whether the useful life of the asset is dependent on the useful life of other assets of the entity.			
AASB138.122(c)	Additional disclosures for intangible assets acquired by way of a government grant and initially recognised at fair value For intangible assets acquired by way of a government grant and initially recognised at fair value, an entity shall disclose: (a) the fair value initially recognised for these assets; (b) their carrying amount; and (c) whether they are measured after recognition under the cost model or the revaluation model.			
AASB138.124	Intangible assets measured after revaluation using the revaluation model If intangible assets are accounted for at revalued amounts, an entity shall disclose the following: (a) by class of intangible assets: i. the effective date of the revaluation; ii. the carrying amount of revalued intangible assets; and iii. the carrying amount that would have been recognised had the revalued class of intangible assets been measured after recognition using the cost model; (b) the amount of the revaluation reserve that relates to intangible assets at the beginning and end of the period, indicating the changes during the period and any restrictions on the distribution of the balance to shareholders; and (c) the methods and significant assumptions applied in estimating the assets' fair values.			
AASB138.128	Other information An entity is encouraged, but not required, to disclose the following information: (a) a description of any fully amortised intangible asset that is still in use; and (b) a brief description of significant intangible assets controlled by the entity but not recognised as assets because they did not meet the recognition criteria in AASB 138 'Intangible Assets'.

AASB7.7

29.1 Summary of borrowing arrangements

- (i) Bills of exchange with a variable interest rate were issued in 2003. The current weighted average effective interest rate on the bills is 6.8% per annum (30 June 2009: 6.8%).
- (ii) Amounts repayable to related parties of the Group. Interest of 8.0% 8.2% per annum is charged on the outstanding loan balances (30 June 2009: 8.0% 8.2%).
- (iii) Fixed rate loans with a finance company with remaining maturity periods not exceeding 3 years (30 June 2009: 4 years). The weighted average effective interest rate on the loans is 8.15% per annum (30 June 2009: 8.10%). The Group hedges a portion of the loans for interest rate risk via an interest rate swap exchanging fixed rate interest for variable rate interest. The outstanding balance is adjusted for fair value movements in the hedged risk, being movements in the interbank rate in Australia.
- (iv) On 17 June 2010, the Group received an interest-free loan of \$3 million from the government of Australia to finance staff training over a two-year period. The loan is repayable in full at the end of that two-year period. Using prevailing market interest rates for an equivalent loan of 7.2%, the fair value of the loan is estimated at \$2.61 million. The difference of \$390,000 between the gross proceeds and the fair value of the loan is the benefit derived from the interest-free loan and is recognised as deferred revenue (see note 33). Interest expenses will be recognised on this loan in 2011 (\$188,000) and 2012 (\$202,000).
- (v) 2,500 6% perpetual notes were issued on 27 February 2010 at \$2.5 million principal value. Issue costs of \$0.595 million were incurred.
- (vi) Secured by a mortgage over the Group's freehold land and buildings (see note 22). The weighted average effective interest rate on the bank loans is 8.30% per annum (30 June 2009: 8.32% per annum).
- (vii) Secured by a charge over certain of the Group's trade receivables (see note 15).
- (viii) Secured by the assets leased. The borrowings are a mix of variable and fixed interest rate debt with repayment periods not exceeding 5 years.

Source	GAAP Holdings (Australia) Limited		
	29. Borrowings (cont'd)		
	29.2 Breach of loan agreement		
AASB7.18	During 2010, the Group was late in paying interest for the first quarter on one of its loans with a carrying amount of \$5 million. The delay arose because of a temporary lack of funds on the date interest was payable due to a technical problem on settlement. The interest payment outstanding of \$107,500 was repaid in full on the following day, including the additional interest and penalty. The lender did not request accelerated repayment of the loan and the terms of the loan were not changed. Management has reviewed the Group's settlement procedures to ensure that such circumstances do not recur.		
AASB7.18	Defaults and breaches For loans payable recognised at the reporting date, an entity must disclose:		
AASB7.19	 (a) details of any defaults during the period of principal, interest, sinking fund, or redemption terms of those loans payable; (b) the carrying amount of the loans payable in default at the reporting date; and (c) whether the default was remedied, or the terms of the loans payable were renegotiated, before the financial statements were authorised for issue. If during the period there were breaches of loan agreement terms other than those illustrated in the above note, an entity shall disclose the same information as in the above note if those breaches permitted the lender to demand accelerated repayment (unless the breaches were remedied, or the terms of the loan were renegotiated, on or before the reporting date.) 		
	30. Convertible notes		
AASB7.7	4.5 million 5.5% \$ denominated convertible notes were issued by the Company on 1 March 2010 at an issue price of \$1.10 per note. Each note entitles the holder to convert to one ordinary share at a cost of \$3 per share. Conversion may occur at any time between 1 January 2013 and 28 February 2013. If the notes have not been converted, they will be redeemed on 1 March 2013 at \$1. Interest of 5.5% will be paid quarterly up until that settlement date.		
AASB132.28	The net proceeds received from the issue of the convertible notes have been split between the financial liability element and an equity component, representing the residual attributable to the option to convert the financial liability into equity of the Company, as follows.		
	\$'000		
	Proceeds of issue 4,950 Liability component at date of issue (4,116)		
	Equity component 834		
	The equity component of \$834,000 has been credited to equity (option premium on convertible notes – see note 38.7).		
AASB7.7	The liability component is measured at amortised cost. The interest expense for the year (\$110,000) is calculated by applying an effective interest rate of 8% to the liability component for the four-month period since the loan notes were issued. Interest paid in the period since issue is \$82,000. The difference between the carrying amount of the liability component at the date of issue (\$4.116 million) and the amount reported in the statement of financial position at 30 June 2010 (\$4.144 million) represents the effective interest rate less interest paid to that date.

- (i) 3,000,000 7% redeemable cumulative preference shares were issued on 1 January 2010 at an issue price of \$5 per share. The shares are redeemable on 30 November 2011 at \$5 per share. The shares are unsecured borrowings of the Group and are designated as at FVTPL (see below).
- (ii) A pay-floating receive-fixed interest rate swap economically hedges fair value interest rate risk of redeemable cumulative preference shares.

The Group has designated its redeemable cumulative preference shares as financial liabilities at fair value through profit or loss (FVTPL) as permitted by AASB 139 *Financial Instruments: Recognition and Measurement.* The preference shares have fixed interest payments and mature on 30 November 2011. To reduce the fair value risk of changing interest rates, the Group has entered into a payfloating receive-fixed interest rate swap. The swap's notional principal is \$15 million and matches the principal of the cumulative redeemable preference shares. The swap matures on 30 November 2011. The designation of preference shares as at FVTPL eliminates the accounting mismatch arising on measuring the liability at amortised cost and measuring the derivative at FVTPL.

(iii) Other financial liabilities include \$75,000 representing the estimated fair value of the contingent consideration relating to the acquisition of Subsix Limited (see note 46.2).

Source **GAAP Holdings (Australia) Limited** 31. Other financial liabilities (cont'd) **Disclosure** AASB7.8(e), (f) An entity shall disclose on either the face of the statement of financial position or in the notes the carrying amount of: financial liabilities at fair value through profit or loss, showing separately those designated as such upon initial recognition; and ii. those classified as held for trading in accordance with AASB 139; and financial liabilities measured at amortised cost (b) **AASB7.10** If an entity has designated a financial liability as at fair value through profit or loss in accordance with paragraph 9 of AASB 139, it shall disclose: the amount of change during the period, and cumulatively, in the fair value of the financial liability that is attributable to changes in the credit risk of that liability. This is determined either as the amount of change in its fair value that is not attributable to changes in market conditions that give rise to market risk, or using an alternative method the entity believes more faithfully represents the amount of change in its fair value that is attributable to the changes in credit risk of the liability; and (b) the difference between the financial liabilities carrying amount and the amount the entity would be contractually required to pay at maturity to the holder of the obligation. Changes in market conditions (as referred to in (a) above) that give rise to market risk include changes in a benchmark interest rate, the price of another entity's financial instrument, a commodity price, a foreign exchange rate or an index of prices or rates. For contracts that include a unit-linking feature, changes in market conditions include changes in the performance of the related internal or external investment fund. AASB7.11 The entity shall disclose: the methods used to comply with the requirements of (a) as noted above, and if the entity believes that the disclosure it has given to comply with (a) above does not faithfully (b) represent the change in fair value of the financial liability attributable to changes in its credit risk, the reasons for reaching this conclusion and the factors it believes are relevant. 32. 	32. Provisions (cont'd)			
AASB3.B64(j)	(i) The provision for employee benefits represents annual leave and vested long service leave entitlements accrued and compensation claims made by employees. On the acquisition of Subsix Limited, the Group recognised an additional contingent liability of \$45,000 in respect of employees' compensation claims outstanding against that company, which was settled in August 2010.			
AASB137.85(a), (b)	(ii) The provision for rectification work relates to the estimated cost of work agreed to be carried out for the rectification of goods supplied to one of the Group's major customers (see note 13.5). Anticipated expenditure for 2011 is \$1.94 million, and for 2012 is \$1.118 million. These amounts have not been discounted for the purpose of measuring the provision for rectification work, because the effect is not material.			
AASB137.85(a), (b)	(iii) The provision for warranty claims represents the present value of the directors' best estimate of the future outflow of economic benefits that will be required under the Group's obligations for warranties under local sale of goods legislation. The estimate has been made on the basis of historical warranty trends and may vary as a result of new materials, altered manufacturing processes or other events affecting product quality.			
AASB137.85(a), (b)	(iv) The provision for onerous lease contracts represents the present value of the future lease payments that the Group is presently obligated to make under non-cancellable onerous operating lease contracts, less revenue expected to be earned on the lease, including estimated future sub-lease revenue, where applicable. The estimate may vary as a result of changes in the utilisation of the leased premises and sub-lease arrangements where applicable. The unexpired terms of the leases range from 3 to 5 years.			
AASB137.85(c)	Reimbursements In respect of each class of provision the financial report shall disclose the amount of any related reimbursement, stating the amount of any asset recognised for that expected reimbursement.			
AASB137.92	Exemptions In extremely rare cases, disclosure of some or all of the information required by AASB 137 'Provisions, Contingent Liabilities and Contingent Assets' can be expected to prejudice seriously the position of the entity in a dispute with other parties on the subject matter of the provision. In such cases, an entity need not disclose the information, but shall disclose the general nature of the dispute, together with the fact that, and reason why, the information has not been disclosed. Regardless of how sensitive certain information about provisions may be, this exemption from disclosure does not affect the requirement to recognise provisions that satisfy the criteria for recognition set out in AASB 137.			
AASB137.88	Contingent liabilities Where a provision and a contingent liability arise from the same set of circumstances, the disclosures in the financial report shall be made in such a way to show the link between the provision and the contingent liability.			
AASB3.B64(j)	Contingent liabilities recognised as part of a business combination For contingent liabilities recognised separately as part of the allocation of the cost of a business combination, the acquirer shall disclose the information required by AASB 137 'Provisions, Contingent Liabilities and Contingent Assets' for each class of provision.

	35.3 Fair value
AASB7.25	The fair value of the finance lease liabilities is approximately equal to their carrying amount.
AASB117.31(e)	Disclosures for lessees A general description about the lessee's material leasing arrangements shall be disclosed, including: (a) the basis on which contingent rent payable is determined; (b) the existence and terms of renewal or purchase options and escalation clauses; and (c) restrictions imposed by lease arrangements such as those concerning dividends, additional debt and further leasing.
AASB117.31(d), 35(b)	Sub-leases For non-cancellable sub-leases, the total of future minimum lease payments expected to be received shall be disclosed.
Int4.15(b)	Arrangements containing an operating lease If an arrangement contains a lease, and the purchaser concludes that it is impracticable to separate lease payments from other payments reliably, it shall treat all payments under the arrangement as lease payments for the purposes of complying with the disclosure requirements of AASB 117 'Leases', but also:
	 (a) disclose those payments separately from minimum lease payments of other arrangements that do not include payments for non-lease elements; and (b) state that the disclosed payments also include payments for non-lease elements in the arrangement.
AASB117.32, 57	Assets under lease The disclosure requirements specified by the relevant standards in relation to property, plant and equipment, intangible assets, impairment of assets, investment property and agriculture apply to: (a) lessees for assets leased under finance leases (b) lessors for assets provided under operating leases. Disclosure of these items would normally be incorporated into other existing notes to the financial statements, for example notes 22, 23 and 25 to these model financial statements.
Int127.10	Arrangements involving the legal form of a lease All aspects of an arrangement that does not, in substance, involve a lease under AASB 117 shall be considered in determining the appropriate disclosures that are necessary to understand the arrangement and the accounting treatment adopted.
Int127.10	An entity shall disclose the following in each period that an arrangement exists (a) a description of the arrangement including:
Int127.11	 i. the underlying asset and any restrictions on its use; ii. the life and other significant terms of the arrangement; iii. the transactions that are linked together, including any options; and (b) the accounting treatment applied to any fee received, the amount recognised as income in the period, and the line item of the income statement in which it is included. The disclosures shall be provided individually for each arrangement or in aggregate for each class of arrangement. A class is a grouping of arrangements with underlying assets of a similar nature (e.g., power plants).

GAAP Holdings (Australia) Limited

36. Retirement benefit plans

36.1 Defined contribution plans

The Group operates defined contribution retirement benefit plans for all qualifying employees of its subsidiary in C Land. The assets of the plans are held separately from those of the Group in funds under the control of trustees. Where employees leave the plans prior to full vesting of the contributions, the contributions payable by the Group are reduced by the amount of forfeited contributions.

The employees of the Group's subsidiary in B Land are members of a state-managed retirement benefit plan operated by the government of B Land. The subsidiary is required to contribute a specified percentage of payroll costs to the retirement benefit scheme to fund the benefits. The only obligation of the Group with respect to the retirement benefit plan is to make the specified contributions.

AASB119.46

The total expense recognised in the [statement of comprehensive income/income statement] of \$160,000 (2009: \$148,000) represents contributions payable to these plans by the Group at rates specified in the rules of the plans. As at 30 June 2010, contributions of \$8,000 (2009: \$8,000) due in respect of the 2010 (2009) reporting period had not been paid over to the plans. The amounts were paid subsequent to the end of the reporting period.

36.2 Defined benefit plans

AASB119.120A (b)

The Group operates funded defined benefit plans for qualifying employees of its subsidiaries in Australia. Under the plans, the employees are entitled to retirement benefits varying between 40% and 45% of final salary on attainment of a retirement age of 65. No other post-retirement benefits are provided to these employees.

The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out at 30 June 2010 by Mr. F.G. Ho, Fellow of the Institute of Actuaries of Australia. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

AASB119.120A (n)

The principal assumptions used for the purposes of the actuarial valuations were as follows.

		valuation at
	30/06/10	30/06/09
	%	%
Discount rate(s)	5.52	5.20

extent that a surplus or deficit in the plan may affect the amount of future contributions: ny available information about that surplus or deficit; ne basis used to determine that surplus or deficit; and ne implications, if any, for the entity.

GAAP Holdings (Australia) Limited

36. Retirement benefit plans (cont'd)

AASB119.34, 34A

Defined benefit plans that share risks between various entities under common control Defined benefit plans that share risks between various entities under common control, for example, a parent and its subsidiaries, are not multi-employer plans. An entity participating in such a plan

shall obtain information for the plan as a whole measured in accordance with AASB 119 on the basis of assumptions that apply to the plan as a whole.

AASB119.34B

Participation in such a plan is a related party transaction for each individual group entity. An entity shall therefore, in its separate or individual financial statements, make the following disclosure:

- (a) the contractual agreement or stated policy for charging the net defined benefit cost or the fact that there is no such policy:
- (b) the policy for determining the contribution to be paid by the entity;
- (c) if the entity accounts for an allocation of the net defined benefit cost in accordance with AASB 119, all the information about the plan as a whole in accordance with paragraphs 120-121 of the Standard; and
- (d) if the entity accounts for the contribution payable for the period because there is no contractual agreement or stated policy for charging the net defined benefit cost for the plan as a whole to individual group entities, the information about the plan as a whole required in accordance with AASB 119 paragraphs 120A(b)-(e), (j), (n), (o), (q) and 121.

37. Issued capital

Notes 37-39 and 41 below set out detailed descriptions and reconciliations for each class of share capital and each component of equity, as required by AASB 101.79 and AASB 101.106. AASB 101 permits some flexibility regarding the level of detail presented in the statement of changes in equity (see page B41) and these supporting notes. The Standard also allows that some of the details regarding components of other comprehensive income (income tax and reclassification adjustments) may be disclosed in the notes rather than in the statement of comprehensive income. Entities will determine the most appropriate presentation for their circumstances – electing to present much of the detail in the notes (as we have done in these model financial statements) ensures that the primary financial statements are not cluttered by unnecessary detail, but it does result in very detailed supporting notes.

Whichever presentation is selected, entities will need to ensure that the following requirements are met:

- detailed reconciliations are required for each class of share capital (in the statement of financial position or the statement of changes in equity or in the notes);
- detailed reconciliations are required for each component of equity separately disclosing the
 impact on each such component of (i) profit or loss, (ii) each component of other comprehensive
 income, and (iii) transactions with owners in their capacity as owners (in the statement of changes
 in equity or in the notes);
- the amount of income tax relating to each component of other comprehensive income should be disclosed (in the statement of comprehensive income or in the notes) and
- reclassification adjustments should be presented separately from the related component of other comprehensive income (in the statement of comprehensive income or in the notes).

An entity that elects to present a statement of changes in equity showing reconciliations between the carrying amount of each class of contributed equity at the beginning and the end of the period on the face of the statement need not repeat these disclosures in the notes to the financial statements. However, such entities shall disclose, either on the face of the statement of financial position or in the notes to the financial statements, for each class of share capital:

AASB101.79(a)(i) AASB101.79(a)(ii) AASB101.79(a)(iii)

AASB101.79(a)(iv)

- (a) the number of shares authorised;
- (b) the number of shares issued and fully paid, and issued but not fully paid;
- (c) par value per share, or that the shares have no par value;
- (d) a reconciliation of the number of shares outstanding at the beginning and at the end of the period;
- (e) the rights, preferences and restrictions attaching to that class including restrictions on the distribution of dividends and the repayment of capital;
- (f) shares in the entity held by the entity or by its subsidiaries or associates; and
- (g) shares reserved for issue under options and contracts for sale of shares, including the terms and amounts.

	38. Reserves (cont'd)				
AASB101.79(b)	The properties revaluation reserve arises on the revaluation of land and buildings. When revalued land or buildings are sold, the portion of the properties revaluation reserve that relates to that asset, and that is effectively realised, is transferred directly to retained earnings.				
AASB116.41	The asset revaluation reserve included in equity in respect of an item of property, plant and equipment may be transferred directly to retained earnings when the asset is derecognised. This may involve transferring the whole of the surplus when the asset is retired or disposed of. However, some of the surplus may be transferred as the asset is used by an entity through a transfer directly to retained earnings. In such a case, the amount of the surplus transferred would be the difference between depreciation based on the revalued carrying amount of the asset and depreciation based on the asset's original cost.

Note: The following are <u>examples</u> of the types of disclosures that might be required in this area. The matters disclosed will be dictated by the circumstances of the individual entity, by the significance of judgements and estimates made to the results and financial position, and the information provided to key management personnel.

AASB101.134,13

42.1 Capital risk management

The Group manages its capital to ensure that entities in the Group will be able to continue as going concerns while maximising the return to stakeholders through the optimisation of the debt and equity balance. The Group's overall strategy remains unchanged from 2009.

The capital structure of the Group consists of net debt (borrowings as detailed in notes 29 and 31 offset by cash and bank balances) and equity of the Group (comprising issued capital, reserves, retained earnings and non-controlling interests as detailed in notes 37 to 39 and 41).

The Group is not subject to any externally imposed capital requirements.

The Group's risk management committee reviews the capital structure of the Group on a semi-annual basis. As part of this review, the committee considers the cost of capital and the risks associated with each class of capital. The Group has a target gearing ratio of 20% - 25% determined as the proportion of net debt to equity. The gearing ratio at 30 June 2010 of 19.7% (see below) was at the lower end of the target range, and has returned to a more typical level of 23% since the end of the reporting period.

AASB7.12A(c)	The Group has elected to reclassify certain asset-backed securities from held for trading to available-for-sale. The Group's intention at initial recognition was to sell these securities in the sho term. However, as a result of the severe reduction in the liquidity of those assets in the markets in which they would trade during the reporting period, accompanied by a deterioration of price transparency and reduction in investor appetite to acquire the assets, the Group concluded that the criteria for reclassification were met. Consequently, the assets were reclassified at 1 September 2009.					
	The securities were reclassified at their fair value at the date of reclassified	cation.

	42. Financial instruments (cont'd)
AASB7.31	42.5 Financial risk management objectives
	The Group's Corporate Treasury function provides services to the business, co-ordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports which analyse exposures by degree and magnitude of risks. These risks include market risk (including currency risk, fair value interest rate risk and price risk), credit risk, liquidity risk and cash flow interest rate risk.
	The Group seeks to minimise the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives is governed by the Group's policies approved by the board of directors, which provide written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by the internal auditors on a continuous basis. The Group does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.
	The Corporate Treasury function reports quarterly to the Group's risk management committee, an independent body that monitors risks and policies implemented to mitigate risk exposures.
AASB7.31	Financial risk management An entity shall disclose information that enables users of its financial statements to evaluate the nature
AASB7.32	and extent of risks arising from financial instruments to which the entity is exposed at the reporting date. AASB 7 requires certain disclosures be made about the nature and extent of risks arising from financial instruments. These disclosures focus on the risks that arise from financial instruments and how they have been managed. These risks typically include, but are not limited to, credit risk, liquidity risk and market risk.
AASB7.33	For each type of risk arising from financial instruments, an entity shall disclose: (a) the exposures to risk and how they arise; (b) its objectives, policies and processes for managing the risk and the methods used to measure the risk; and
AASB7.34	 (c) any changes in (a) or (b) from the previous period. For each type of risk arising from financial instruments, an entity shall disclose: (a) summary quantitative data about its exposure to that risk at the reporting date. This disclosure shabe based on the information provided internally to key management personnel of the entity, for example the entity's board of directors or chief executive officer;
	(b) the disclosures about credit risk, liquidity risk and market risk required by the standard (refer AAS 7 paragraphs 36 to 42), to the extent not provided in (a), unless the risk is not material; and
AASB7.34, B8	 (c) concentrations of risk if not apparent from (a) and (b). Disclosure of concentrations of risk shall include: (a) a description of how management determines concentrations; (b) a description of the shared characteristic that identifies each concentration (e.g. counterparty, geographical area, currency or market); and (c) the amount of the risk exposure associated with all financial instruments sharing that characteristic

Source	GAAP Holdings (Australia) Limited
	42. Financial instruments (cont'd)
	42.6 Market risk
AASB7.33	The Group's activities expose it primarily to the financial risks of changes in foreign currency exchange rates (see 42.8 below) and interest rates (see 42.9 below). The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign currency risk, including:
	 forward foreign exchange contracts to hedge the exchange rate risk arising on the export of electronic equipment to B Land and C Land;
	interest rate swaps to mitigate the risk of rising interest rates; and
	 forward foreign exchange contracts to hedge the exchange rate risk arising on translation of the Group's investment in foreign operation Subfour Limited, which has B Currency as its functional currency.
	Market risk exposures are measured using value-at-risk (VaR) supplemented by sensitivity analysis.
AASB7.33(c)	There has been no change to the Group's exposure to market risks or the manner in which these risks are managed and measured.
4.4.0.D.T. 4.0	Market risk – sensitivity analysis
AASB7.40	An entity shall disclose:
	 (a) a sensitivity analysis for each type of market risk to which the entity is exposed at the reporting date, showing how profit or loss and equity would have been affected by changes in the relevant risk variable that were reasonably possible at that date;
	(b) the methods and assumptions used in preparing the sensitivity analysis; and
	(c) changes from the previous period in the methods and assumptions used, and the reasons for such changes.
AASB7. B19	In determining what a reasonably possible change in the relevant risk variable is, an entity should consider:
	(a) the economic environments in which it operates. A reasonably possible change should not include remote or 'worst case' scenarios or 'stress tests'. Moreover, if the rate of change in the underlying risk variable is stable, the entity need not alter the chosen reasonably possible change in the risk variable; and
	(b) the time frame over which it is making the assessment. The sensitivity analysis shall show the effects of changes that are considered to be reasonably possible over the period until the entity will next present these disclosures, which is usually its next annual reporting period;
AASB7.41	If an entity prepares a sensitivity analysis, such as value-at-risk, that reflects interdependencies between risk variables (e.g. interest rates and exchange rates) and uses it to manage financial risks, it may use that sensitivity analysis in place of the analysis specified above. The entity shall also disclose:
	(a) an explanation of the method used in preparing such a sensitivity analysis, and of the main parameters and assumptions underlying the data provided; and
	(b) an explanation of the objective of the method used and of limitations that may result in the information not fully reflecting the fair value of the assets and liabilities involved.
AASB7.42	When the sensitivity analyses disclosed are unrepresentative of a risk inherent in a financial instrument (e.g. because the year-end exposure does not reflect the exposure during the year), the entity shall disclose that fact and the reason it believes the sensitivity analyses are unrepresentative.
AASB7.41	42.7 Value at Risk (VaR) analysis
	The VaR measure estimates the potential loss in pre-taxation profit over a given holding period for a specified confidence level. The VaR methodology is a statistically defined, probability-based approach that takes into account market volatilities as well as risk diversification by recognising offsetting positions and correlations between products and markets. Risks can be measured consistently across all markets and products, and risk measures can be aggregated to arrive at a single risk number. The one-day 99% VaR number used by the Group reflects the 99% probability that the daily loss will not exceed the reported VaR.

exceed the reported VaR.

GAAP Holdings (Australia) Limited

42. Financial instruments (cont'd)

VaR methodologies employed to calculate daily risk numbers include the historical and variance-covariance approaches. In addition to these two methodologies, Monte Carlo simulations are applied to the various portfolios on a monthly basis to determine potential future exposure.

Historical VaR (99%, one-day)	,	Average	N	1inimum_	Ma	aximum	Ye	ear ended
by risk type	2010	2009	2010	2009	2010	2009	30/06/10	30/06/09
-	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000
Foreign exchange	980	1,340	546	943	1,200	1,600	980	1,350
Interest rate	115	60	85	45	150	95	105	55
Diversification	(45)	(40)	-	-	-	-	(55)	(50)
Total VaR exposure	1,050	1,360					1,030	1,355

While VaR captures the Group's daily exposure to currency and interest rate risk, sensitivity analysis evaluates the impact of a reasonably possible change in interest or foreign currency rates over a year. The longer time frame of sensitivity analysis complements VaR and helps the Group to assess its market risk exposures. Details of sensitivity analysis for foreign currency risk are set out in 42.8 below and for interest rate risk in 42.9 below.

42.8 Foreign currency risk management

AASB7.33, 34

The Group undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters utilising forward foreign exchange contracts.

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows.

		Liabilities		Assets
	30/06/10	30/06/09	30/06/10	30/06/09
	\$'000	\$'000	\$'000	\$'000
Currency of B Land	6,297	7,469	1,574	1,671
Currency of C Land	186	135	-	-
Other	-	-	-	-

42.8.1 Foreign currency sensitivity analysis

The Group is mainly exposed to the currency of B Land and the currency of C Land.

AASB7. 34(a), 40(b)

The following table details the Group's sensitivity to a 10% increase and decrease in the Australian dollar against the relevant foreign currencies. 10% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 10% change in foreign currency rates. The sensitivity analysis includes external loans as well as loans to foreign operations within the Group where the denomination of the loan is in a currency other than the currency of the lender or the borrower. A positive number below indicates an increase in profit and other equity where the Australian dollar strengthens 10% against the relevant currency. For a 10% weakening of the Australian dollar against the relevant currency, there would be a comparable impact on the profit and other equity, and the balances below would be negative.

Source	GAAP Holdings (Australia) Limited
	42. Financial instruments (cont'd)
	Currency B impact Currency C impact 2010 2009 2010 2009 \$'000 \$'000 \$'000 \$'000
AASB7.40(a) AASB7.40(a)	Profit or loss 834 1,792 (i) 134 257 (iii) Other equity 962 1,232 (ii) 70 69 (iv)
	 (i) This is mainly attributable to the exposure outstanding on Currency B receivables and payables in the Group at the end of the reporting period. (ii) This is as a result of the changes in fair value of derivative instruments designated as cash flow hedges and net investment hedges. (iii) This is mainly attributable to the exposure to outstanding Currency C payables at the end of the reporting period. (iv) This is mainly as a result of the changes in fair value of derivative instruments designated as cash flow hedges.
AASB7.33(c) AASB7.42	The Group's sensitivity to foreign currency has decreased during the current period mainly due to the disposal of Currency B investments and the reduction in Currency B sales in the last quarter of the financial year which has resulted in lower Currency B denominated trade receivables. In management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign exchange risk because the year end exposure does not reflect the exposure during the year. Currency B denominated sales are seasonal, with lower sales volumes in the last quarter of the financial year, resulting in a reduction in Currency B receivables at year end. In addition, the change in equity due to a 10% change in the Australian dollar against all exchange rates for the translation of new investment hedging instruments would be a decrease of \$13,000 (2009: \$9,000). However, there would be no net effect on equity because there would be an offset in the currency translation of the foreign operation.
AASB7.35	If the quantitative data disclosed as at the reporting date are unrepresentative of an entity's exposure to risk during the period, an entity shall provide further information that is representative.
	42.8.2 Forward foreign exchange contracts
AASB7.22, 33, 34	It is the policy of the Group to enter into forward foreign exchange contracts to cover specific foreign currency payments and receipts within 70% to 80% of the exposure generated. The Group also enters into forward foreign exchange contracts to manage the risk associated with anticipated sales and purchase transactions out to 6 months within 40% to 50% of the exposure generated. Basis adjustments are made to the carrying amounts of non-financial hedged items when the anticipated sale or purchase transaction takes place.
	In the current year, the Group has designated certain forward contracts as a hedge of its net investment in Subfour Limited, which has B Currency as its functional currency. The Group's policy has been reviewed and, due to the increased volatility in B Currency, it was decided to hedge up to 50% of the net assets of the Subfour Limited for forward foreign currency risk arising on translation of the foreign operation. The Group utilises a rollover hedging strategy, using contracts with terms of up to 6 months. Upon the maturity of a forward contract, the Group enters into a new contract designated as a separate hedging relationship.

GAAP Holdings (Australia) Limited

42. Financial instruments (cont'd)

The following table details the forward foreign currency (FC) contracts outstanding at the end of the reporting period:

Outstanding contracts	excha	Average nge rate 30/06/09	30/06/10 FC'000	Foreign currency 30/06/09 FC'000	30/06/10 \$'000	Notional value 30/06/09 \$'000	30/06/10 \$'000	Fair value 30/06/09 \$'000
Cash flow hedges Buy Currency B Less than 3 months 3 to 6 months	0.770 0.768	0.768 0.750	2,493 1,974	2,010 1,958	3,238 2,570	2,617 2,611	152 92	110 34
Sell Currency B Less than 3 months	0.780	0.769	982	1,028	1,259	1,337	(70)	26
Buy Currency C Less than 3 months	86.29	85.53	12,850	20,000	149	234	(5)	50
Net investment hedge Sell Currency B 3 to 6 months	0.763	-	1,000	-	1,297	-	(12) 157	

The table above provides an example of summary quantitative data about exposure to foreign exchange risks at the end of the reporting period that an entity may provide internally to key management personnel.

The Group has entered into contracts to supply electronic equipment to customers in B Land. The Group has entered into forward foreign exchange contracts (for terms not exceeding 3 months) to hedge the exchange rate risk arising from these anticipated future transactions, which are designated as cash flow hedges.

AASB7.23(a)

At 30 June 2010, the aggregate amount of losses under forward foreign exchange contracts deferred in the cash flow hedging reserve relating to the exposure on these anticipated future transactions is \$70,000 (2009: gains of \$26,000). It is anticipated that the sales will take place during the first 3 months of the next financial year, at which time the amount deferred in equity will be reclassified to profit or loss.

The Group has entered into contracts to purchase raw materials from suppliers in B Land and C Land. The Group has entered into forward foreign exchange contracts (for terms not exceeding 6 months) to hedge the exchange rate risk arising from these anticipated future purchases, which are designated into cash flow hedges.

AASB7.23(a)

At 30 June 2010, the aggregate amount of gains under forward foreign exchange contracts deferred in the cash flow hedging reserve relating to these anticipated future purchase transactions is \$239,000 (2009: unrealised gains of \$194,000). It is anticipated that the purchases will take place during the first 6 months of the next financial year at which time the amount deferred in equity will be included in the carrying amount of the raw materials. It is anticipated that the raw materials will be converted into inventory and sold within 12 months after purchase, at which time the amount deferred in equity will be reclassified to profit or loss.

AASB7.23(b)

At the start of the third quarter, the Group reduced its forecasts on sales of electronic equipment to B Land due to increased local competition and higher shipping costs. The Group had previously hedged \$1.079 million of future sales of which \$97,000 are no longer expected to occur, and \$982,000 remain highly probable. Accordingly, the Group has reclassified \$3,000 of gains on foreign currency forward contracts relating to forecast transactions that are no longer expected to occur from the cash flow hedging reserve to profit or loss.

AASB7.24(c)

At 30 June 2010, no ineffectiveness has been recognised in profit or loss arising from hedging the net investment in Subfour Limited.

AASB7.33, 34

42.9 Interest rate risk management

The Group is exposed to interest rate risk because entities in the Group borrow funds at both fixed and floating interest rates. The risk is managed by the Group by maintaining an appropriate mix between fixed and floating rate borrowings, and by the use of interest rate swap contracts and forward interest rate contracts. Hedging activities are evaluated regularly to align with interest rate views and defined risk appetite, ensuring the most cost-effective hedging strategies are applied.

The Group's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note.

42.9.1 Interest rate sensitivity analysis

AASB7.40(b)

The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

AASB7.40(a)

If interest rates had been 50 basis points higher/lower and all other variables were held constant, the Group's:

- profit for the year ended 30 June 2010 would decrease/increase by \$43,000 (2009: decrease/increase by \$93,000). This is mainly attributable to the Group's exposure to interest rates on its variable rate borrowings; and
- other comprehensive income for the year would decrease/increase by \$19,000 (2009: decrease/increase by \$12,000), mainly as a result of the changes in the fair value of available-forsale fixed rate instruments.

AASB7.33(c)

The Group's sensitivity to interest rates has decreased during the current period mainly due to the reduction in variable rate debt instruments and the increase in interest rate swaps to swap floating rate debt to fixed.

42.9.2 Interest rate swap contracts

AASB7.22, 33, 34

Under interest rate swap contracts, the Group agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Such contracts enable the Group to mitigate the risk of changing interest rates on the fair value of issued fixed rate debt and the cash flow exposures on the issued variable rate debt. The fair value of interest rate swaps at the end of the reporting period is determined by discounting the future cash flows using the curves at the end of the reporting period and the credit risk inherent in the contract, and is disclosed below. The average interest rate is based on the outstanding balances at the end of the reporting period.

AASB7.34(a)

The following tables detail the notional principal amounts and remaining terms of interest rate swap contracts outstanding at the end of the reporting period.

Cash flow hedges

Outstanding receive floating pay fixed contracts	Average contracted fixed interest rate		Notional prin	cipal value	Fair value		
	30/06/10	30/06/09	30/06/10	30/06/09	30/06/10	30/06/09	
	%	%	\$'000	\$'000	\$'000	\$'000	
Less than 1 year	7.45	6.75	1,000	4,000	72	37	
1 to 2 years	7.15	7.05	2,000	1,620	55	47	
2 to 5 years	6.75	6.50	3,000	1,359	130	93	
5 years +	7.05		1,000	-	27	-	
			7,000	6,979	284	177	

The table above provides an example of summary quantitative data about exposure to interest rate risks at the end of the reporting period that an entity may provide internally to key management personnel.

The interest rate swaps settle on a quarterly basis. The floating rate on the interest rate swaps is the local interbank rate of Australia. The Group will settle the difference between the fixed and floating interest rate on a net basis.

AASB7.22, 23(a)

All interest rate swap contracts exchanging floating rate interest amounts for fixed rate interest amounts are designated as cash flow hedges in order to reduce the Group's cash flow exposure resulting from variable interest rates on borrowings. The interest rate swaps and the interest payments on the loan occur simultaneously and the amount accumulated in equity is reclassified to profit or loss over the period that the floating rate interest payments on debt affect profit or loss.

AASB7.34(a)

Fair value hedges

Outstanding receive fixed pay floating contracts	Average contracted fixed interest rate		Notional principal amount		Fair value	
	30/06/10	30/06/09	30/06/10	30/06/09	30/06/10	30/06/09
•	%	%	\$'000	\$'000	\$'000	\$'000
Less than 1 year	8.15	-	3,701	_	(5)	-
[describe]	-	-			<u> </u>	
			3,701	-	(5)	_
Held for trading interest rate swaps 1 to 2 years	7.5	-	15,000	-	(51)	-
[describe]	-	-				
			15,000	_	(51)	_

The table above provides an example of summary quantitative data about exposure to interest rate risks at the end of the reporting period that an entity may provide internally to key management personnel.

AASB7.39(a)

The interest rate swaps settle on a quarterly basis. The floating rate on the interest rate swaps is the local interbank rate of Australia. The Group will settle the difference between the fixed and floating interest rate on a net basis.

AASB7.24(a)

Interest rate swap contracts exchanging fixed rate interest for floating rate interest are designated and effective as fair value hedges in respect of interest rates. During the period, the hedge was 100% effective in hedging the fair value exposure to interest rate movements and as a result the carrying amount of the loan was adjusted by \$5,000 which was included in profit or loss at the same time that the fair value of the interest rate swap was included in profit or loss.

42.10 Other price risks

The Group is exposed to equity price risks arising from equity investments. Equity investments are held for strategic rather than trading purposes. The Group does not actively trade these investments.

42.10.1 Equity price sensitivity analysis

AASB7.40(b)

The sensitivity analyses below have been determined based on the exposure to equity price risks at the end of the reporting period.

AASB7.40(a)

If equity prices had been 5% higher/lower:

- net profit for the year ended 30 June 2010 would have been unaffected as the equity investments are classified as available-for-sale and no investments were disposed of or impaired; and
- other equity reserves would increase/decrease by \$297,000 (2009: increase/decrease by \$286,000) as a result of the changes in fair value of available-for-sale shares.

AASB7.40(c)

The Group's sensitivity to equity prices has not changed significantly from the prior year.

AASB7.33, 34,B8

42.11 Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group only transacts with entities that are rated the equivalent of investment grade and above. This information is supplied by independent rating agencies where available and, if not available, the Group uses other publicly available financial information and its own trading records to rate its major customers. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the risk management committee annually.

Trade receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable and, where appropriate, credit guarantee insurance cover is purchased.

Apart from Company A, the largest customer of the Group (see below and refer to notes 6.8 and 15.1), the Group does not have significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The Group defines counterparties as having similar characteristics if they are related entities. Concentration of credit risk related to Company A did not exceed 20% of gross monetary assets at any time during the year. Concentration of credit risk to any other counterparty did not exceed 5% of gross monetary assets at any time during the year.

The credit risk on liquid funds and derivative financial instruments is limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies.

AASB7.36(a)

Except as detailed in the following table, the carrying amount of financial assets recognised in the financial statements, which is net of impairment losses, represents the Group's maximum exposure to credit risk, without taking into account collateral or other credit enhancements held.

42.11.1 Financial assets and other credit exposures	Maximum credit risk			
	30/06/10	30/06/09		
	\$'000	\$'000		
Guarantee provided by a subsidiary to secure financing for a sister company controlled by the Group's overseas parent	18,000	15,000		
Guarantee provided to bank on a jointly controlled entity's loan	-	-		
Other [describe]	-	-		

The Group does not hold any collateral or other credit enhancements to cover this credit risk.

AASB7.34(c)

The table below shows the credit limit and balance of 4 major counterparties at the end of the reporting period using the Standard and Poor's credit rating symbols.

				30/06/10		30/06/09
				Carrying		Carrying
Counterparty	Location	Rating	Credit limit	amount	Credit limit	amount
			\$'000	\$'000	\$'000	\$'000
						. =
Company A	Australia	AA	2,000	1,900	2,000	1,700
Company B	Australia	Α	5,000	4,256	5,000	4,719
Company C	Australia	Α	5,500	4,300	5,500	4,350
Company D	B Land	BB	800	750	800	700

AASB7.36(b)

AASB7.B10

An entity shall disclose a description of collateral held as security and other credit enhancements in respect of the amounts disclosed above.

Activities that give rise to credit risk and the associated maximum exposure to credit risk include, but are not limited to:

- granting loans and receivables to customers and placing deposits with other entities. In these
 cases, the maximum exposure to credit risk is the carrying amount of the related financial
 assets;
- entering into derivative contracts, for example, foreign exchange contracts, interest rate swaps and credit derivatives. When the resulting asset is measured at fair value, the maximum exposure to credit risk at the reporting date will equal the carrying amount;
- granting financial guarantees. In this case, the maximum exposure to credit risk is the maximum amount the entity could have to pay if the guarantee is called on, which may be significantly greater than the amount recognised as a liability; and
- making a loan commitment that is irrevocable over the life of the facility or is revocable only in response to a material adverse change. If the issuer cannot settle the loan commitment net in cash or another financial instrument, the maximum credit exposure is the full amount of the commitment. This is because it is uncertain whether the amount of any undrawn portion may be drawn upon in the future. This may be significantly greater than the amount recognised as an asset.

42.12 Liquidity risk management

AASB7.33, 39(c)

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Group's short-, medium- and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities. Note 42.12.2 below sets out details of additional undrawn facilities that the Group has at its disposal to further reduce liquidity risk.

42.12.1 Liquidity and interest risk tables

AASB7.34, 35, 39(a)

The following tables detail the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The tables include both interest and principal cash flows. To the extent that interest flows are at floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Group may be required to pay.

The tables below includes the weighted average effective interest rate and a reconciliation to the carrying amount in the statement of financial position as an example of summary quantitative data about exposure to interest rates at the end of the reporting period that an entity may provide internally to key management personnel.

	Weighted average effective interest rate	Less than	1-3 months	3 months to 1 year	1-5 years	5+ years	Total

AASB7.B10(c)

The amounts included above for financial guarantee contracts are the maximum amounts the Group could be forced to settle under the arrangement for the full guaranteed amount if that amount is claimed by the counterparty to the guarantee. Based on expectations at the end of the reporting period, the Group considers that it is more likely than not that no amount will be payable under the arrangement. However, this estimate is subject to change depending on the probability of the counterparty claiming under the guarantee which is a function of the likelihood that the financial receivables held by the counterparty which are guaranteed suffer credit losses.

AASB7.B10(c)

The maximum amount the Group could be forced to settle under the financial guarantee contracts if the fully guaranteed amount is claimed by the counterparty to the guarantee is \$2 million (2009: \$1.6 million). At the end of the reporting period, it was not considered probable that the counterparty to the financial guarantee contract will claim under the contract

AASB7.34, 35

The following table details the Group's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Group's liquidity risk management as the liquidity is managed on a net asset and liability basis.

30 June 2010	Weighted average effective interest rate	Less than 1 month \$'000	1-3 months \$'000	3 months to 1 year \$'000	1-5 years \$'000	5+ years \$'000	Total \$'000

		28,911	9,641	5,452	4,511		48,515

AASB7.B10A(b)

The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.

AASB7.39(c)

The Group has access to financing facilities as described in note 42.12.2 below, of which \$9.268 million were unused at the end of the reporting period (2009: \$12.617million). The Group expects to meet its other obligations from operating cash flows and proceeds of maturing financial assets.

AASB7.39(b)

The following table details the Group's liquidity analysis for its derivative financial instruments. The table has been drawn up based on the undiscounted contractual net cash inflows and outflows on derivative instruments that settle on a net basis, and the undiscounted gross inflows and outflows on those derivatives that require gross settlement. When the amount payable or receivable is not fixed, the amount disclosed has been determined by reference to the projected interest rates as illustrated by the yield curves at the end of the reporting period.

42.13.2 Valuation techniques and assumptions applied for the purposes of measuring fair value

AASB7.27

The fair values of financial assets and financial liabilities are determined as follows.

- The fair values of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market prices (includes listed redeemable notes, bills of exchange, debentures and perpetual notes).
- The fair values of other financial assets and financial liabilities (excluding derivative instruments)
 are determined in accordance with generally accepted pricing models based on discounted cash
 flow analysis using prices from observable current market transactions and dealer quotes for
 similar instruments.
- The fair values of derivative instruments are calculated using quoted prices. Where such prices are not available, a discounted cash flow analysis is performed using the applicable yield curve for the duration of the instruments for non-optional derivatives, and option pricing models for optional derivatives. Foreign currency forward contracts are measured using quoted forward exchange rates and yield curves derived from quoted interest rates matching maturities of the contracts. Interest rate swaps are measured at the present value of future cash flows estimated and discounted based on the applicable yield curves derived from quoted interest rates.

GAAP Holdings (Australia) Limited

42. Financial instruments (cont'd)

In the cases described above an entity shall disclose information to help users of the financial report make their own judgments about the extent of possible differences between the carrying amount of those financial assets or financial liabilities and their fair value, including:

- (a) the fact that fair value information has not been disclosed for these instruments because their fair value cannot be measured reliably:
- (b) a description of the financial instruments, their carrying amount, and an explanation of why fair value cannot be measured reliably:
- (c) information about the market for the instruments;
- (d) information about whether and how the entity intends to dispose of the financial instruments;
- (e) if financial instruments whose fair value previously could not be reliably measured are derecognised, that fact, their carrying amount at the time of derecognition, and the amount of gain or loss recognised.

AASB7.28

Accounting for deferred 'day 1' gains

Where an entity is precluded from recognising a 'day 1' gain or loss on a financial instrument the entity shall disclose, by class of financial instrument:

- (a) its accounting policy for recognising that difference in profit or loss to reflect a change in factors (including time) that market participants would consider in setting a price; and
- (b) the aggregate difference yet to be recognised in profit or loss at the beginning and end of the period and a reconciliation of changes in the balance of this difference.

AASB7.17

Compound financial instruments with multiple embedded derivatives

If an entity has issued an instrument that contains both a liability and an equity component and the instrument has multiple embedded derivatives whose values are interdependent (such as a callable convertible debt instrument), it shall disclose the existence of those features.

AASB2.44

43. Share-based payments

43.1 Employee share option plan

AASB2.45(a), AASB124.Aus25. 5(d)(iii), Aus25.7.1(b)(ii), (b)(iii) The Group has an ownership-based compensation scheme for executives and senior employees. In accordance with the terms of the plan, as approved by shareholders at a previous annual general meeting, executives and senior employees with more than five years service with the Group may be granted options to purchase ordinary shares at an exercise price of \$1.00 per ordinary share.

Each employee share option converts into one ordinary share of GAAP Holdings (Australia) Limited on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry.

The number of options granted is calculated in accordance with the performance-based formula approved by shareholders at a previous annual general meeting and is subject to approval by the remuneration committee. The formula rewards executives and senior employees to the extent of the Group's and the individual's achievement judged against both qualitative and quantitative criteria from the following financial and customer service measures:

- improvement in share price
- improvement in net profit
- improvement in return to shareholders
- · reduction in warranty claims
- results of client satisfaction surveys
- reduction in rate of staff turnover

I	(4) Issued 29 March 2010 (**)	60,000	29/03/10	27/03/11	1.00	1.05

- (*) In accordance with the terms of the share-based arrangement, options issued during the financial year ended 30 June 2009, and on 30 September 2009, vest at the date of their issue.
- (**) In accordance with the terms of the share-based arrangement, options issued on 29 March 2010 will vest when the share price of GAAP Holdings (Australia) Limited, as quoted on the Australian Stock Exchange, exceeds \$4.00.

43.2 Fair value of share options granted in the year

The weighted average fair value of the share options granted during the financial year is \$1.16 (2009: \$1.17). Options were priced using a binomial option pricing model. Where relevant, the expected life used in the model has been adjusted based on management's best estimate for the effects of non-transferability, exercise restrictions (including the probability of meeting market conditions attached to the option), and behavioural considerations. Expected volatility is based on the historical share price volatility over the past 5 years. To allow for the effects of early exercise, it was assumed that executives and senior employees would exercise the options after vesting date when the share price was two and a half times the exercise price.

Inputs into the model				Option series
	Series 1	Series 2	Series 3	Series 4
Grant date share price	2.64	2.67	2.69	2.53
Exercise price	1.00	1.00	1.00	1.00

	Fair value of goods and services determined indirectly by reference to the fair value of
AASB2.47	equity instruments granted Where the fair value of goods and services received as consideration for equity instruments has been measured indirectly by reference to the fair value of the equity instruments granted, an entity shall disclose:
	 (a) for share options granted during the period, the weighted average fair value of those options at the measurement date and information on how that fair value was measured, including: the option pricing model used and the inputs to that model, including the weighted average share price, exercise price, expected volatility, option life, expected dividends, the risk-free interest rate and any other inputs to the model, including the method used and the assumptions made to incorporate the effects of expected early exercise;
	 ii. how expected volatility was determined, including an explanation of the extent to which expected volatility was based on historical volatility; and iii. whether and how any other features of the option grant were incorporated into the
	measurement of fair value, such as a market condition; and (b) for equity instruments other than share options granted during the period, the number and weighted average fair value of those equity instruments at the measurement date, and information on how that fair value was measured, including:
	 i. if fair value was not measured on the basis of an observable market price, how it was determined;
	ii. whether and how expected dividends were incorporated into the measurement of fair value; and
	iii. whether and how any other features of the equity instruments granted were incorporated into the measurement of fair value.
AASB2.49	If the entity has rebutted the presumption in paragraph 13 of AASB 2 that the fair value of the goods or services received from parties other than employees can be measured reliably (and, consequently, the entity has measured the fair value of goods and services received from such parties by reference to the equity instruments granted), the entity shall disclose: (a) that fact; and
	(b) an explanation of why the presumption was rebutted.
AASB2.47(c)	Modified share-based payment arrangements Where the entity has measured the fair value of goods or services received as consideration for equity instruments of the entity indirectly, by reference to the fair value of the equity instruments granted, the entity shall disclose for share-based payment arrangements that were modified during the period:
	(a) an explanation of those modifications; (b) the incremental fair value granted (as a result of those modifications); and
	(c) information on how the incremental fair value granted was measured, consistently with the requirements set out in (a) and (b) above, where applicable.
AASB124.Aus25.	Modification of terms of share-based payment transactions granted to key management personnel Where the terms of share-based payment transactions (including options or rights) granted as compensation to a key management person have been altered or modified by the issuing entity during the reporting period, the following details shall be disclosed for each such person: (a) the date of each alteration of the terms; (b) the market price of the underlying equity instrument at the date of alteration; (c) the terms of the grant immediately prior to alteration, including the number and class of the underlying equity instruments, exercise price, time remaining until expiry and each other condition in the terms affecting the exercise of the option or other right; (d) the new terms; and (e) the difference between the total of the fair value of the options or other rights affected by the
	alteration immediately before the alteration and the total of the fair value of those options or other rights immediately after the alteration.

GAAP Holdings (Australia) Limited

44. Key management personnel compensation (cont'd)

AASB124.Aus25. 5(d)

(i) Mr T. L. Smith was granted share options under the employee share option plan on 29 March 2010. Mr P.H. Taylor and other executives were granted share options on 30 September 2009. Further details of the options granted are contained in notes 43 and 45 to the financial statements.

AASB124.Aus25. 5(d)

(ii) Mr W.L. Lee was granted a cash bonus of \$10,000 on 12 June 2010. The bonus was given, on successful acquisition by the Group, for his identification of the distribution business of Subseven Limited as an advantageous investment opportunity earlier in the reporting period.

AASB124.Aus25. 5(d)

(iii) Mr P.H. Taylor was granted share options under the employee share option plan on 30 September 2008. Further details of the options granted are contained in notes 43 and 45 to the financial statements.

AASB124.Aus25 5(d)

Grants of cash bonuses, performance-related bonuses and share-based payment compensation benefits

An entity shall disclose, for each grant of a cash bonus, performance-related bonus or share-based payment compensation benefit, whether part of a specific contract for services or not, the terms and conditions of each grant affecting the compensation of a key management person in this or future reporting periods, including:

- (a) the grant date;
- (b) the nature of the compensation granted;
- (c) the service and performance criteria used to determine the amount of compensation; and
- (d) if there has been any alteration of the terms or conditions of the grant since the grant date, the date, details and effect of each alteration.

AASB124.Aus25.

Modification of share-based payment transactions

Where the terms of share-based payment transactions (including options or rights) granted as compensation to a key management person have been altered or modified by the issuing entity during the reporting period, the following details shall be disclosed for each such person:

- (a) the date of each alteration of the terms;
- (b) the market price of the underlying equity instrument at the date of alteration;
- (c) the terms of the grant immediately prior to alteration, including the number and class of the underlying equity instruments, exercise price, time remaining until expiry and each other condition in the terms affecting the vesting or exercise of the option or other right;
- (d) the new terms; and
- (e) the difference between the total of the fair value of the options or other rights affected by the alteration immediately before the alteration and the total of the fair value of those options or other rights immediately after the alteration.

AASB124.Aus25. 5(e)

Contracts for services of key management personnel

For each contract for services between the key management person and the disclosing entity (or any of its subsidiaries), the financial report shall include such explanations as are necessary, in addition to disclosures regarding bonuses and share-based compensation benefits as specified by AASB124.Aus25.5(c) and (d), to provide an understanding of how the amount of compensation in the current reporting period was determined and how the terms of the contract affect compensation in future periods.

AASB124.Aus25. 5(h)

If the person is employed by the entity under a contract, the financial report shall disclose the duration of the contract, the periods of notice required to terminate the contract and the termination payments provided for under the contract.

Source **GAAP Holdings (Australia) Limited** 45. Related party transactions AASB124.12, The immediate parent and ultimate controlling party respectively of the Group are X Holdings Limited Aus12.1(a), (incorporated in M Land) and Y Holdings Limited (incorporated in N Land). AASB101.126(c) If neither the entity's parent nor the ultimate controlling party produces financial reports available AASB124.12 for public use, the name of the next most senior parent that does so shall also be disclosed. When any of the parent entities and/or ultimate controlling parties named above is incorporated or AASB124.Aus12. otherwise constituted outside Australia, an entity shall: (a)identify which of those entities is incorporated overseas and where; and (b) disclose the name of the ultimate controlling entity incorporated within Australia. Balances and transactions between the Company and its subsidiaries, which are related parties of the Company, have been eliminated on consolidation and are not disclosed in this note. 2009						
[describe]						

AASB124.Aus25.8 .1 (h)

Key management personnel are charged interest on loans provided by the Group at 8%p.a., which is comparable to the average commercial rate of interest. Loans are provided for a maximum period of 12 months. Interest on the outstanding loan balance is payable monthly. The loans to key management personnel are unsecured

45.3 Other related party transactions

AASB124.17,18

In addition to the above, X Holdings Limited performed certain administrative services for the Company, for which a management fee of \$0.18 million (2009: \$0.16 million) was charged and paid, being an appropriate allocation of costs incurred by relevant administrative departments.

45.3.1 Equity interests in related parties

Equity interests in subsidiaries

Details of the percentage of ordinary shares held in subsidiaries are disclosed in note 19 to the financial statements.

In addition, Subone Limited holds 100% of the share options of Subone International Limited, giving the company the right to purchase an additional 500,000 ordinary shares of Subone International Limited at \$1.20 each. The share options may be exercised during the period from 1 January 2011 to 30 June 2012.

Equity interests in associates and joint ventures

Details of interests in associates and joint ventures are disclosed in notes 20 and 21 to the financial statements.

GAAP Holdings (Australia) Limited

45. Related party transactions (cont'd)

Equity interests in other related parties

GAAP Holdings (Australia) Limited holds 3% of the ordinary share capital of Subone Related plc, a subsidiary of one of the Group's associates.

45.3.2 Transactions with key management personnel

i. Key management personnel compensation

AASB124.Aus25. 7.1 (b), Aus25.7.2(a), (c), (d)

All share options issued to key management personnel were made in accordance with the provisions of the employee share option plan.

During the financial year, 70,834 options (2009: nil) were exercised by key management personnel at an exercise price of \$1 per option for 70,834 ordinary shares in GAAP Holdings (Australia) Limited (2009: nil). No amounts remain unpaid on the options exercised during the financial year at year end.

Further details of the employee share option plan and of share options granted during the 2009 and 2008 financial years are contained in notes 43 and 44 to the financial statements.

Disclosures of equity holdings

An equity holding shall be included in these disclosures only once in respect of the same equity instrument. That is, an indirect holding in the disclosing entity (or a subsidiary of that disclosing entity) through a related party of the key management person is not again considered as a direct holding of that related party when considering the equity holdings of that key management person (including their related parties).

Equity holdings held 'nominally'

Nominally means 'in name only'. Disclosure of equity holdings held nominally means disclosure of the equity instruments held by the key management person (or their related entity) in his or her name for the benefit of someone outside their related entity group.

AASB124.Aus25.

Disclosure of non-arm's length transactions involving share-based payment compensation

Where transactions involving equity instruments other than those granted as share-based payment compensation have occurred between a key management person, including their related parties (as referred to in (e) and (f) of the related party definition) and the issuing entity during the financial year on terms or conditions that were more favourable than those in an arm's length transaction, the financial report shall disclose the nature of the transaction and details of the terms and conditions.

iii. Other transactions with key management personnel of the Group [disclosing entities only] Profit for the year includes the following items of revenue and expense that resulted from transactions, other than compensation, loans or equity holdings, with key management personnel or their related entities:

AASB124.Aus25. 9.1 (a) Consolidated revenue includes the following amounts arising from transactions with key management personnel of the Group or their related parties:

	accountability by the key management person; and (c) they are trivial or domestic in nature.				

GAAP Holdings (Australia) Limited

45. Related party transactions (cont'd)

iv. Transactions with key management personnel of GAAP Holdings (Australia) Limited and Y Holdings Limited

AASB124.17

During the financial year:

- GAAP Holdings (Australia) Limited advanced \$2,420,000 in loans to its key management personnel (2009: nil)
- GAAP Holdings (Australia) Limited repaid loans owing to key management personnel of its ultimate parent entity, Y Holdings Limited of \$948,012 (2009: \$nil)

No amounts were provided for doubtful debts relating to receivables owing to the Group from key management personnel of GAAP Holdings (Australia) Limited or its parent at reporting date (2009: \$nil).

At reporting date 30 June 2010, the following balances arising from transactions with key management personnel of the Group and key management personnel of the Group's parent entity remain outstanding to the Group:

- loans receivable of \$2,420,000
- other [describe]

At reporting date 30 June 2009, the following balances arising from transactions with key management personnel of the Group and key management personnel of the Group's parent entity remain outstanding to the Group:

- loans payable of \$948,000
- other [describe]

All loans advanced to and payable to key management personnel of the company and its parent are unsecured and subordinate to other liabilities. Interest is charged monthly on the outstanding loan balances at commercial interest rates, which range between 7.90%p.a. and 8.20%p.a.

AASB124.18

(c) Transactions with other related parties

Other related parties include:

- the parent entity
- entities with joint control or significant influence over the Group
- associates
- joint ventures in which the entity is a venturer
- subsidiaries
- other related parties.

AASB124.17

Transactions between GAAP Holdings (Australia) Limited and its related parties

During the financial year, the following transactions occurred between the company and its other related parties:

• GAAP Holdings (Australia) Limited made dividend payments totalling \$4,000,050 to its parent entity (2009: \$3,415,200). The parent entity, X Holdings Limited, holds 70.74% of the fully paid ordinary share capital of GAAP Holdings (Australia) Limited (2009: 52.16%), 56.67% of the partly-paid ordinary shares on issue (2009: 56.67%), and 77.5% of the converting non-participating preference shares on issue (2009: 84.55%)

The following balances arising from transactions between the company and its other related parties are outstanding at reporting date:

Current loans totalling \$74,098 are repayable to X Holdings Limited (2009: \$6,302,246)

All amounts advanced to or payable to related parties are unsecured and are subordinate to other liabilities.

The amounts outstanding will be settled in cash. No guarantees have been given or received. No expense has been recognised in the period for bad or doubtful debts in respect of the amounts owed by related parties.

Transactions and balances between the company and its subsidiaries were eliminated in the preparation of consolidated financial statements of the Group.

GAAP Holdings (Australia) Limited

45. Related party transactions (cont'd)

AASB124.17

Transactions between the Group and its related parties

During the financial year ended 30 June 2010, the following transactions occurred between the Group and its other related parties:

- subsidiaries of GAAP Holdings (Australia) Limited contributed cash totalling \$440,000 to the Group's defined benefit superannuation plans (2009: \$400,000). Cash contributions of \$135,000 (2009: \$118,000) were made to the defined contribution plan
- associates of GAAP Holdings (Australia) Limited sold goods totalling \$3,991,456 (2009: \$3,494,000) to the Group at market price discounted to reflect the quantity of goods purchased and the relationships between the parties
- a subsidiary rented premises from an associate of the Group at commercial rates totalling \$20,180 (2009: \$18,000)
- GAAP Holdings (Australia) Limited received management services from its parent entity, X
 Holdings Limited, for no charge. The total value of the services received was \$522,000 (2009:
 \$495,000)
- GAAP Holdings (Australia) Limited made interest payments of \$25,000 (2009: \$315,000) to its parent entity. The weighted average interest rate on the loans is 8.10% (2009: 8.06%).
 Interest is payable on the last business day of each month.
- interest payments of \$1,855,562 (2009: \$2,651,000) were made by group entities to Y Holdings Limited on intercompany loan payables. The weighted average interest rate on the loans is 8.10% (2009: 8.06%). Interest is payable on the last business day of each month.

The following balances arising from transactions between the Group and its other related parties are outstanding at reporting date:

- current loans totalling \$1,217,430 are receivable from a jointly controlled entity of the Group (2009: \$3,088,120)
- loans totalling \$11,969,000 are repayable to Y Holdings Limited (2009: \$34,124,000).

All amounts advanced to or payable to related parties are unsecured and are subordinate to other liabilities. Interest is charged monthly on the outstanding loan balance at 8% - 8.15%p.a.

The amounts outstanding will be settled in cash. No guarantees have been given or received. No expense has been recognised in the period for bad or doubtful debts in respect of the amounts owed by related parties.

Transactions between the Group and its associates were eliminated in the preparation of the consolidated financial statements of the Group to the extent of the Group's share in profits and losses of the associate resulting from these transactions.

AASB124.18

Disclosures about transactions (other than key management personnel compensation) with related parties shall be made separately for each of the following categories:

- (a) the parent;
- (b) entities with joint control or significant influence over the entity;
- (c) subsidiaries;
- (d) associates:
- (e) joint ventures in which the entity is a venturer;
- (f) key management personnel of the entity or its parent; and
- (g) other related parties.

Terms and conditions of related party transactions

AASB124.21

Disclosures that related party transactions were made on terms equivalent to those that prevail in arm's length transactions are made only if such terms can be substantiated.

Separate disclosure of individual transactions

AASB124.22

Items of a similar nature may be disclosed in aggregate except when separate disclosure is necessary for an understanding of the effects of related party transactions on the financial statements of the entity.

GAAP Holdings (Australia) Limited

46. Business combinations (cont'd)

46.5 Goodwill arising on acquisition

	Subsix Limited \$'000	Subseven Limited \$'000	
Consideration transferred Plus: non-controlling interests Less: fair value of identifiable net assets acquired	505 132 (350)	687 - (496)	1,192 132 (846)
Goodwill arising on acquisition	287	191	478

AASB3.B64(e)

Goodwill arose in the acquisition of Subsix Limited because the cost of the combination included a control premium. In addition, the consideration paid for the combination effectively included amounts in relation to the benefit of expected synergies, revenue growth, future market development and the assembled workforce of Subsix Limited. These benefits are not recognised separately from goodwill because they do not meet the recognition criteria for identifiable intangible assets.

The Group also acquired the customer lists and customer relationships of Subseven Limited as part of the acquisition. These assets could not be separately recognised from goodwill because they are not capable of being separated from the Group and sold, transferred, licensed, rented or exchanged, either individually or together with any related contracts.

AASB3.B64(k)

None of the goodwill arising on these acquisitions is expected to be deductible for tax purposes.

46.6 Net cash outflow on acquisition of subsidiaries

Year

Year

AASB107.40(b) AASB107.40(c)

46.7 Impact of acquisitions on the results of the Group

AASB3.B64(q)

Included in the profit for the year is \$35,000 attributable to the additional business generated by Subsix Limited, and \$13,000 attributable to Subseven Limited. Revenue for the period includes \$2.3 million in respect of Subsix Limited and \$2.8 million in respect of Subseven Limited.

AASB3.61

Had these business combinations been effected at 1 July 2009, the revenue of the Group from continuing operations would have been \$145 million, and the profit for the year from continuing operations would have been \$19.7 million. The directors of the Group consider these 'pro-forma' numbers to represent an approximate measure of the performance of the combined group on an annualised basis and to provide a reference point for comparison in future periods.

In determining the 'pro-forma' revenue and profit of the Group had Subsix Limited and Subseven Limited been acquired at the beginning of the current reporting period, the directors have:

- calculated depreciation of plant and equipment acquired on the basis of the fair values arising in the initial accounting for the business combination rather than the carrying amounts recognised in the pre-acquisition financial statements;
- based borrowing costs on the funding levels, credit ratings and debt/equity position of the Group after the business combination; and
- excluded takeover defence costs of the acquiree as a one-off pre-acquisition transaction.

GAAP Holdings (Australia) Limited Notes to the financial statements **GAAP Holdings (Australia) Limited** Source 48. Cash and cash equivalents (cont'd) Other disclosures AASB107.50 Additional information may be relevant to users in understanding the financial position and liquidity of an entity. Disclosure of this information, together with a commentary by management, is encouraged and may include: the amount of undrawn borrowing facilities that may be available for future operating activities and to settle capital commitments, indicating any restrictions on the use of these facilities; the aggregate amounts of the cash flows from each of operating, investing and financing (b) activities related to interests in joint ventures reported using proportionate consolidation; the aggregate amount of cash flows that represent increases in operating capacity separately (c) from those cash flows that are required to maintain operating capacity; and (d) the amount of the cash flows arising from the operating, investing and financing activities of each reportable segment (refer also note 6). AASB107.51 The separate disclosure of cash flows that represent increases in operating capacity and cash flows that are required to maintain operating capacity is useful in enabling the user to determine whether the entity is investing adequately in the maintenance of its operating capacity. The disclosure of segmental cash flows enables users to obtain a better understanding of the AASB107.52 relationship between the cash flows of the business as a whole and those of its component parts and the availability and variability of segmental cash flows. 49. Non-cash transactions AASB107.43 During the 2010 financial year, the Group entered into the following non-cash investing and financing activities which are not reflected in the statement of cash flows: the Group disposed of property, plant and equipment with an aggregate fair value of \$0.4 million to acquire Subseven Limited as indicated in note 46; proceeds in respect of the Group's disposal of part of its interest in E Plus Limited and its entire interest in Subzero Limited (\$1.245 million and \$960,000 respectively – see notes 20 and 47) had not been received in cash at the end of the reporting period; share issue proceeds of \$8,000 were received in the form of consulting services, as described in note 37.1; and the Group acquired \$40,000 of equipment under a finance lease (2009: nil). 50. Operating lease arrangements 50.1 The Group as lessee

50.1.1 Leasing arrangements

AASB117.35(d) AASB7.7

AASB117.35(c) AASB117.35(c) AASB117.35(c) Operating leases relate to leases of land with lease terms of between 5 and 60 years. All operating lease contracts over 5 years contain clauses for 5-yearly market rental reviews. The Group does not have an option to purchase the leased land at the expiry of the lease periods.

	52. Contingent liabilities and contingent assets (cont'd)
AASB128.40(b)	Interests in associates An entity shall disclose those contingent liabilities that arise because the investor is severally liable for all or part of the liabilities of the associate.
AASB131.54	Interests in joint ventures A venturer shall disclose the aggregate amount of the following contingent liabilities, unless the probability of loss is remote, separately from the amount of other contingent liabilities (a) any contingent liabilities that the venturer has incurred in relation to its interests in joint ventures and its share in each of the contingent liabilities that have been incurred jointly with other venturers; and (b) its share of the contingent liabilities of the joint ventures themselves for which it is contingently liable.
AASB131.54(c)	Disclosure is also required of those contingent liabilities that arise because the venturer is contingently liable for the liabilities of the other venturers of a joint venture as part of the aggregate amount above. Such circumstances would generally qualify as a financial guarantee contract, and should be recognised in accordance with AASB 139 'Financial Instruments: Recognition and Measurement'.
AASB137.89, 91	Contingent assets Where an inflow of economic benefits is probable, an entity shall disclose a brief description of the nature of the contingent assets at the reporting date, and, where practicable, an estimate of their financial effect. Where any of this information is not disclosed because it is not practicable to do so,
AASB137.90	that fact shall be stated. It is important that disclosures for contingent assets avoid giving misleading indications of the likelihood of income arising.
AASB137.92	Exemptions In extremely rare cases, disclosure of some or all of the information illustrated above would be expected to seriously prejudice the position of the entity in a dispute with other parties on the subject matter of the contingent liability or contingent asset. In such cases, an entity need not disclose the information, but shall disclose the general nature of the dispute, together with the fact that, and reason why, the information has not been disclosed.
AASB137.88	Provisions Where a provision and a contingent liability arise from the same set of circumstances, an entity makes the required disclosures in a way that shows the link between the provision and the contingent liability.
	Rights to interests arising from decommissioning, restoration and environmental rehabilitation funds
Int5.11	A contributor to a decommissioning, restoration and environmental rehabilitation fund shall disclose the nature of its interest in the fund and any restrictions on access to the assets in the fund.
Int5.12	Where a contributor has an obligation to make potential additional contributions to a decommissioning, restoration and environmental rehabilitation fund that is not recognised as a liability, the contributor shall disclose the information required by AASB 137 in respect of contingent liabilities.
Int5.13	Where a contributor accounts for its interest in a decommissioning, restoration and environmental rehabilitation fund by recognising its right to receive reimbursement from the fund in accordance with AASB 137, measured in accordance with Interpretation 5, the contributor shall disclose the amount of any expected reimbursement, stating the amount of any asset that has been recognised for that expected reimbursement.

54. Supplementary information

AASB121.55, 57

When an entity presents its financial statements in a currency that is different from its functional currency, it shall describe the financial statements as complying with A-IFRS only if they comply with all the requirements of each applicable Accounting Standard and each applicable Interpretation of those Accounting Standards. When an entity displays its financial statements or other financial information in a currency that is different from either its functional currency or its presentation currency and these requirements are not met, it shall:

- clearly identify the information as supplementary information to distinguish it from the information that complies with A-IFRS;
- (b) disclose the currency in which the supplementary information is displayed; and
- (c) disclose the entity's functional currency and the method of translation used to determine the supplementary information.

55. Events after the reporting period

AASB110.21

On 18 July 2010, the premises of Subfive Limited were seriously damaged by fire. Insurance claims are in process, but the cost of refurbishment is currently expected to exceed the amount that will be reimbursed by \$8.3 million.

AASB110.21

The financial report shall disclose for each material category of subsequent events (other than those events whose financial effects have already been brought to account):

a) the nature of the event: and

AASB110.22

- (b) an estimate of its financial effect, or a statement that such an estimate cannot be made. Examples of events occurring after the end of the reporting period that do not provide evidence about conditions existing at the reporting date include:
- a major business combination after the end of the reporting period or disposing of a major subsidiary;
- announcing a plan to discontinue an operation;
- major purchases of assets, classifications of assets as held for sale, other disposals of assets, or expropriation of major assets by government;
- the destruction of a major production plant by a fire after the end of the reporting period;
- announcing, or commencing the implementation of, a major restructuring;
- major ordinary share transactions and potential ordinary share transactions after the end of the reporting period;
- abnormally large changes after the reporting period in asset prices or foreign exchange rates
- changes in tax rates or tax laws enacted or announced after the end of the reporting period that have a significant effect on current and deferred tax assets and liabilities;
- entering into significant commitments or contingent liabilities, for example, by issuing significant guarantees; and
- commencing major litigation arising solely out of events that occurred after the end of the reporting period.

AASB110.8, 19

The effects of events after the end of the reporting period providing evidence of conditions that existed at the end of the reporting period shall be brought to account rather than disclosed by way of note to the financial statements. If an entity receives information after the end of the reporting period about conditions that existed at the end of the reporting period, it shall update disclosures that relate to these conditions, in the light of the new information.

56. Parent entity information

The proposed changes to the Corporations Act 2001, which would permit entities not to prepare parent entity financial statements where consolidated financial statements are prepared for the group, propose that in such cases additional disclosures be made in the notes to the consolidated financial statements in respect of the financial position and performance of the parent entity. At the date of this publication the exact nature of these additional disclosures is yet to be finalised. Any entity seeking to take advantage of this exemption should refer to the final enacted changes to the Corporations Act 2001 to understand the relevant disclosure requirements.

57. Approval of financial statements

AASB110.17

The financial statements were approved by the board of directors and authorised for issue on 15 September 2010.

Walker Pty Ltd

Source **GAAP Holdings (Australia) Limited** A substantial holder, in relation to a company and a trust which is a registered managed investment scheme, a substantial holder under s.671B of the Corporations Act. A person has a substantial shareholding in a body corporate, or listed registered managed s.9 investment scheme, if: the total votes attached to voting shares in the body, or voting interests in the scheme, in which they or their associates: have relevant interests; and i. would have a relevant interest but for subsection 609(6) (exchange traded options) or ii. 609(7) (conditional agreements); is 5% or more of the total number of votes attached to voting shares in the body, or interests in the scheme: or (b) the person has made a takeover bid for voting shares in the body, or voting interests in the scheme, and the bid period has started and not yet ended. A voting share means an issued share in the body that carries any voting rights beyond the s.9 a right to vote while a dividend (or part of a dividend) in respect of the share is unpaid; (a) (b) a right to vote on a proposal to reduce the body's share capital: a right to vote on a resolution to approve the terms of a buy-back agreement; (c)

(d) a right to vote on a proposal that affects the rights attached to the share;(e) a right to vote on a proposal to wind the body up;

- (f) a right to vote on a proposal for the disposal of the whole of the body's property, business and undertaking; and
- (g) a right to vote during the body's winding up.

	Other ASX information
ASX4.10.14 ASX4.10.18	All listed entities The number and class of restricted securities or securities subject to voluntary escrow that are on issue, and the date that the escrow period ends, must be disclosed. An entity shall disclose whether there is a current on-market buy-back. That is, if an Appendix 3C
ASX4.10.21	has been given to the ASX for an on-market buy-back and no Appendix 3F has been given to the ASX for that buy-back. A summary of any issues of securities approved for the purposes of Item 7 of s.611 of the Corporations Act which have not yet been completed must be disclosed.
ASX4.10.13	Stock exchange listings Where the entity is listed on a stock exchange other than the Australian Stock Exchange, the name of that exchange must be disclosed.
ASX5.6	For listed mining companies Statements in the annual report must comply with Appendix 5A of the Listing Rules.
ASX4.10.15	For listed mining exploration companies A list of interests in mining tenements held, where they are situated, and the percentage interest therein must be disclosed.
ASX4.10.20	For listed investment entities Listed investment entities must disclose: (a) a list of all investments held by it and its child entities; (b) the total number of transactions in securities during the reporting period, together with the total brokerage paid or accrued during the period; and
ASX19.12	 (c) the total management fees paid or accrued during the reporting period, together with a summary of any management agreement. An investment entity is an entity which, in ASX's opinion, is an entity to which both of the following apply: its activities or the principal part of its activities consist of investing (directly or through a child
	 entity) in listed or unlisted securities or futures contracts; and its objectives do not include exercising control over or managing any entity, or the business of any entity, in which it invests. In deciding whether an entity is an investment entity ASX will normally have regard to factors including the extent of board representation, the size of the holdings, the investment period and the
ASX4.10.19	amount of cash held by the entity. For recently listed entities In the first two annual financial reports after admission to the ASX, where an entity is admitted under
	ASX Listing Rule 1.3.2(b) or is required to comply with ASX Listing Rule 1.3.2(b) because of the application of ASX Listing Rule 11.1.3, the entity must state whether the entity used the cash and assets in a form readily convertible to cash that it had at the time of admission in a way consistent with its business objectives. If the use was not consistent, an explanation of how the cash and assets were used must be disclosed.
ASX4.5A	Disclosure of circumstances affecting preliminary final report with full year documents If the entity is or becomes aware of any circumstances which are likely to materially affect the results or other information contained in the preliminary final report (the Appendix 4E) given to ASX, the entity must also give ASX an explanation of the circumstances and the effects the circumstances are expected to have on the entity's current or future financial performance or financial position. This rule does not apply if the entity has already given ASX the information under ASX Listing Rule 4.3D.
