## Acknowledgement

These model financial statements have been prepared by the IFRS Centre of Excellence in Hong Kong, Deloitte China.

Deloitte's IAS Plus ([www.iasplus.com](http://www.iasplus.com)) is one of the most comprehensive sources of global financial reporting news on the Web. It is a central repository for information about International Financial Reporting Standards (IFRSs) as well as the activities of the International Accounting Standards Board (IASB). The site, which is also available in German, includes portals tailored to the United Kingdom and the United States, each with a focus on local GAAP and jurisdiction-specific corporate reporting requirements. Canadian portals in English and French have been added in 2015. They feature news and publications related to all Canadian financial reporting frameworks, including IFRS.

IAS Plus features:

- news about global financial reporting developments, presented intuitively with related news, publications, events and more;
- summaries of all standards, interpretations and projects, with complete histories of developments and standard-setter discussions together with related news and publications;
- rich jurisdiction-specific information, including background and financial reporting requirements, links to country-specific resources, related news and publications and a comprehensive history of the adoption of IFRSs around the world;
- detailed personalisation of the site, which is available by selecting particular topics of interest and viewing tailored views of the site;
- dedicated resource pages for research and education, sustainability and integrated reporting, accounting developments in Europe, global financial crisis, XBRL and Islamic accounting;
- important dates highlighted throughout the site for upcoming meetings, deadlines and more;
- a library of IFRS-related publications available for download and subscription including our popular *IFRS in Focus newsletter* and other publications;
- model IFRS financial statements and checklists, with many versions available tailored to specific jurisdictions;
- an extensive electronic library of both global and jurisdiction-specific IFRS resources;
- expert analysis and commentary from Deloitte subject matter experts, including webcasts, podcasts and interviews;
- e-learning modules for most International Accounting Standards (IASs) and IFRSs;
- enhanced search functionality, allowing easy access to topics of interest by tags, categories or free text searches, with search results intuitively presented by category with further filtering options;
- Deloitte comment letters to the IASB and numerous other bodies; and
- a mobile-friendly interface and updates through Twitter and RSS feeds.

Section 1 – New and revised IFRSs for 2016 annual financial statements and beyond	1
Section 2 – Model financial statements for the year ended 31 December 2016	11
Appendix 1 – Early application of IFRS 9 <i>Financial Instruments</i> (as revised in July 2014)	180

# Section 1 – New and revised IFRSs for 2016 annual financial statements and beyond

This section provides you with a high level summary of the new and revised IFRSs that are effective for 2016 and beyond. Specifically, this section covers the following:

- An overview of the amendments to IFRSs that are mandatorily effective for the year ending 31 December 2016; and
- An overview of new and revised IFRSs that are not yet mandatorily effective (but allow early application) for the year ending 31 December 2016. For this purpose, the discussion below reflects IFRSs issued on or before 31 August 2016. When entities prepare financial statements for the year ending 31 December 2016, they should also consider and disclose the potential impact of the application of any new and revised IFRSs issued by the IASB after 31 August 2016 but before the financial statements are authorised for issue.

## **Section 1A: Amendments to IFRSs that are mandatorily effective for annual periods beginning on or after 1 January 2016**

The following amendments to IFRSs became mandatorily effective in the current year. All these amendments to IFRSs generally require full retrospective application (i.e. comparative amounts have to be restated), with some amendments requiring prospective application.

For December year-end entities, below is a list of the amendments to IFRSs that are mandatorily effective for their 2016 financial year\*:

- Amendments to IFRS 10, IFRS 12 and IAS 28 *Investment Entities: Applying the Consolidation Exception*
- Amendments to IFRS 11 *Accounting for Acquisitions of Interests in Joint Operations*
- Amendments to IAS 1 *Disclosure Initiative*
- Amendments to IAS 16 and IAS 38 *Clarification of Acceptable Methods of Depreciation and Amortisation*
- Amendments to IAS 16 and IAS 41 *Agriculture: Bearer Plants*
- Amendments to IAS 27 *Equity Method in Separate Financial Statements*
- Amendments to IFRSs *Annual Improvements to IFRSs 2012-2014 Cycle*

\* IFRS 14 *Regulatory Deferral Accounts* is also effective for an entity's first IFRS financial statements for annual periods beginning on or after 1 January 2016; however, it is not applicable to International GAAP Holdings Limited as the Group is not a first-time adopter of IFRSs.

### ***Amendments to IFRS 10, IFRS 12 and IAS 28 Investment Entities: Applying the Consolidation Exception (Effective for annual periods beginning on or after 1 January 2016)***

The amendments clarify that the exemption from preparing consolidated financial statements is available to a parent entity that is a subsidiary of an investment entity, even if the investment entity measures all its subsidiaries at fair value in accordance with IFRS 10. Consequential amendments have also been made to IAS 28 to clarify that the exemption from applying the equity method is also applicable to an investor in an associate or joint venture if that investor is a subsidiary of an investment entity that measures all its subsidiaries at fair value.

The amendments further clarify that the requirement for an investment entity to consolidate a subsidiary providing services related to the former's investment activities applies only to subsidiaries that are not investment entities themselves.

Moreover, the amendments clarify that in applying the equity method of accounting to an associate or a joint venture that is an investment entity, an investor may retain the fair value measurements that the associate or joint venture used for its subsidiaries.

Lastly, clarification is also made that an investment entity that measures all its subsidiaries at fair value should provide the disclosures required by IFRS 12 *Disclosures of Interests in Other Entities*.

The amendments apply retrospectively.

***Amendments to IFRS 11 Accounting for Acquisitions of Interests in Joint Operations  
(Effective for annual periods beginning on or after 1 January 2016)***

The amendments to IFRS 11 provide guidance on how to account for the acquisition of an interest in a joint operation in which the activities constitute a business as defined in IFRS 3 *Business Combinations*. Specifically, the amendments state that the relevant principles on accounting for business combinations in IFRS 3 and other standards (e.g. IAS 12 *Income Taxes* regarding recognition of deferred taxes at the time of acquisition and IAS 36 *Impairment of Assets* regarding impairment testing of a cash generating unit to which goodwill on acquisition of a joint operation has been allocated) should be applied. The same requirements should be applied to the formation of a joint operation if and only if an existing business is contributed to the joint operation by one of the parties that participate in the joint operation.

A joint operator is also required to disclose the relevant information required by IFRS 3 and other standards for business combinations.

The amendments apply prospectively to acquisitions of interests in joint operations (in which the activities of the joint operations constitute businesses as defined in IFRS 3) occurring from the beginning of annual periods beginning on or after 1 January 2016.

***Amendments to IAS 1 Disclosure Initiative  
(Effective for annual periods beginning on or after 1 January 2016)***

The amendments were a response to comments that there were difficulties in applying the concept of materiality in practice as the wording of some of the requirements in IAS 1 had in some cases been read to prevent the use of judgement. Certain key highlights in the amendments are as follows:

- An entity should not reduce the understandability of its financial statements by obscuring material information with immaterial information or by aggregating material items that have different natures or functions.
- An entity need not provide a specific disclosure required by an IFRS if the information resulting from that disclosure is not material.
- In the other comprehensive income section of a statement of profit or loss and other comprehensive income, the amendments require separate disclosures for the following items:
  - the share of other comprehensive income of associates and joint ventures accounted for using the equity method *that will not be reclassified subsequently to profit or loss*; and
  - the share of other comprehensive income of associates and joint ventures accounted for using the equity method *that will be reclassified subsequently to profit or loss*.

**Commentary:**

*As this is a set of illustrative financial statements which is not intended to cater for the specific operations and circumstances of all entities, no specific changes have been made to the grouping and/or ordering of the notes to take the above amendments into account. Furthermore, items that are immaterial or with nil amounts have continued to be disclosed solely for illustrative purposes. Nevertheless, entities should exercise judgement when considering how to apply the disclosure initiative amendments to IAS 1 in order to provide relevant information to users and to enhance the understandability and comparability of its financial statements, taking into account jurisdictional regulatory requirements where appropriate.*

*In addition, the IASB issued the exposure draft of IFRS Practice Statement: Application of Materiality to Financial Statements in October 2015 which is intended to provide additional guidance on the application of materiality to financial statements, and to aid entities exercise judgement in this regard. This final version of this non-authoritative guidance is not yet published at the time of writing.*

***Amendments to IAS 16 and IAS 38 Clarification of Acceptable Methods of Depreciation and Amortisation***  
***(Effective for annual periods beginning on or after 1 January 2016)***

The amendments to IAS 16 prohibit entities from using a revenue-based depreciation method for items of property, plant and equipment. The amendments to IAS 38 introduce a rebuttable presumption that revenue is not an appropriate basis for amortisation of an intangible asset. This presumption can only be rebutted in the following two limited circumstances:

- a) when the intangible asset is expressed as a measure of revenue. For example, an entity could acquire a concession to explore and extract gold from a gold mine. The expiry of the contract might be based on a fixed amount of total revenue to be generated from the extraction (for example, a contract may allow the extraction of gold from the mine until total cumulative revenue from the sale of gold reaches CU2 billion) and not be based on time or on the amount of gold extracted. Provided that the contract specifies a fixed total amount of revenue to be generated on which amortisation is to be determined, the revenue that is to be generated might be an appropriate basis for amortising the intangible asset; or
- b) when it can be demonstrated that revenue and the consumption of the economic benefits of the intangible asset are highly correlated.

The amendments apply prospectively.

***Amendments to IAS 16 and IAS 41 Agriculture: Bearer Plants***  
***(Effective for annual periods beginning on or after 1 January 2016)***

The amendments to IAS 16 *Property, Plant and Equipment* and IAS 41 *Agriculture* define a bearer plant and require biological assets that meet the definition of a bearer plant to be accounted for as property, plant and equipment in accordance with IAS 16, instead of IAS 41. In terms of the amendments, bearer plants can be measured using either the cost model or the revaluation model set out in IAS 16.

The produce growing on bearer plants continues to be accounted for in accordance with IAS 41.

As a transition provision on initial application, entities need not disclose the quantitative information required by paragraph 28(f) of IAS 8 for the current period. However, quantitative information for each prior period presented is still required. Also, on the initial application of the amendments, entities are permitted to use the fair value of items of bearer plant as their deemed cost as at the beginning of the earliest period presented. Any difference between the previous carrying amount and fair value should be recognised in opening retained earnings at the beginning of the earliest period presented.

***Amendments to IAS 27 Equity Method in Separate Financial Statements***  
***(Effective for annual periods beginning on or after 1 January 2016)***

The amendments focus on separate financial statements and allow the use of the equity method in such statements. Specifically, the amendments allow an entity to account for investments in subsidiaries, joint ventures and associates in its separate financial statements:

- at cost,
- in accordance with IFRS 9 (or IAS 39 for entities that have not yet adopted IFRS 9), or
- using the equity method as described in IAS 28 Investments in Associates and Joint Ventures.

The same accounting must be applied to each category of investments.

The amendments also clarify that when a parent ceases to be an investment entity, or becomes an investment entity, it should account for the change from the date when the change in status occurs.

*Annual Improvements to IFRSs 2012 – 2014 Cycle*  
(Effective for annual periods beginning on or after 1 January 2016)

The Annual Improvements include amendments to a number of IFRSs, which have been summarised below.

Standard	Subject of amendment	Details
IFRS 5 <i>Non-current Assets Held for Sale and Discontinued Operations</i>	Changes in methods of disposal	The amendments introduce specific guidance in IFRS 5 for when an entity reclassifies an asset (or disposal group) from held for sale to held for distribution to owners (or vice versa), or when held for distribution accounting is discontinued.
IFRS 7 <i>Financial Instruments: Disclosures</i> (with consequential amendments to IFRS 1)	Servicing contracts  Applicability of the amendments to IFRS 7 on offsetting disclosure to condensed interim financial statements	The amendments (i) provide additional guidance to clarify whether a servicing contract is continuing involvement in a transferred asset for the purpose of the disclosures required in relation to transferred assets; and (ii) clarify that the offsetting disclosures are not explicitly required for all interim periods. However, the disclosures may need to be included in the condensed interim financial statements to company with IAS 34 <i>Interim Financial Reporting</i> .
IAS 19 <i>Employee Benefits</i>	Discount rate: regional market issue	The amendments clarify that the high quality corporate bonds used to estimate the discount rate for post-employment benefits should be issued in the same currency as the benefits to be paid. These amendments would result in the depth of the market for high quality corporate bonds being assessed at currency level.
IAS 34 <i>Interim Financial Reporting</i>	Disclosure of information included 'elsewhere in the interim financial report'	The amendments clarify the requirements relating to information required by IAS 34 that is presented elsewhere within the interim financial report but outside the interim financial statements. The amendments require that such information be incorporated by way of a cross-reference from the interim financial statements to the other part of the interim financial report that is available to users on the same terms and at the same time as the interim financial statements.

*IFRS 14 Regulatory Deferral Accounts*  
(Effective for first annual IFRS financial statements with annual periods beginning on or after 1 January 2016)

IFRS 14 specifies the accounting for regulatory deferral account balances that arise from rate-regulated activities. The Standard is available only to first-time adopters of IFRSs who recognised regulatory deferral account balances under their previous GAAP. IFRS 14 permits eligible first-time adopters of IFRSs to continue their previous GAAP rate-regulated accounting policies, with limited changes, and requires separate presentation of regulatory deferral account balances in the statement of financial position and statement of profit or loss and other comprehensive income. Disclosures are also required to identify the nature of, and risks associated with, the form of rate regulation that has given rise to the recognition of regulatory deferral account balances.

IFRS 14 is effective for an entity's first annual IFRS financial statements for annual periods beginning on or after 1 January 2016.

## Section 1B: New and revised IFRSs that are not mandatorily effective (but allow early application) for the year ending 31 December 2016

Below is a list of new and revised IFRSs that are not yet mandatorily effective (but allow early application) for the year ending 31 December 2016:

- IFRS 9 *Financial Instruments*;
- IFRS 15 *Revenue from Contracts with Customers* and the related *Clarifications*;
- IFRS 16 *Leases*;
- Amendments to IFRS 2 *Classification and Measurement of Share-based Payment Transactions*;
- Amendments to IFRS 10 and IAS 28 *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*;
- Amendments to IAS 7 *Disclosure Initiative*; and
- Amendments to IAS 12 *Recognition of Deferred Tax Assets for Unrealised Losses*.

### *IFRS 9 Financial Instruments (as revised in 2014)* *(Effective for annual periods beginning on or after 1 January 2018)*

In July 2014, the IASB finalised the reform of financial instruments accounting and issued IFRS 9 (as revised in 2014), which contains the requirements for a) the classification and measurement of financial assets and financial liabilities, b) impairment methodology, and c) general hedge accounting. IFRS 9 (as revised in 2014) will supersede IAS 39 *Financial Instruments: Recognition and Measurement* upon its effective date.

#### **Phase 1: Classification and measurement of financial assets and financial liabilities**

With respect to the classification and measurement, the number of categories of financial assets under IFRS 9 has been reduced; all recognised financial assets that are currently within the scope of IAS 39 will be subsequently measured at either amortised cost or fair value under IFRS 9. Specifically:

- a debt instrument that (i) is held within a business model whose objective is to collect the contractual cash flows and (ii) has contractual cash flows that are solely payments of principal and interest on the principal amount outstanding must be measured at amortised cost (net of any write down for impairment), unless the asset is designated at fair value through profit or loss (FVTPL) under the fair value option.
- a debt instrument that (i) is held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets and (ii) has contractual terms that give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, must be measured at FVTOCI, unless the asset is designated at FVTPL under the fair value option.
- all other debt instruments must be measured at FVTPL.
- all equity investments are to be measured in the statement of financial position at fair value, with gains and losses recognised in profit or loss except that if an equity investment is not held for trading, nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 applies, an irrevocable election can be made at initial recognition to measure the investment at FVTOCI, with dividend income recognised in profit or loss.

IFRS 9 also contains requirements for the classification and measurement of financial liabilities and derecognition requirements. One major change from IAS 39 relates to the presentation of changes in the fair value of a financial liability designated as at FVTPL attributable to changes in the credit risk of that liability. Under IFRS 9, such changes are presented in other comprehensive income, unless the presentation of the effect of the change in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to profit or loss. Under IAS 39, the entire amount of the change in the fair value of the financial liability designated as FVTPL is presented in profit or loss.

## Phase 2: Impairment of financial assets

The impairment model under IFRS 9 reflects expected credit losses, as opposed to incurred credit losses under IAS 39. Under the impairment approach in IFRS 9, it is no longer necessary for a credit event to have occurred before credit losses are recognised. Instead, an entity always accounts for expected credit losses and changes in those expected credit losses. The amount of expected credit losses should be updated at each reporting date to reflect changes in credit risk since initial recognition.

## Phase 3: Hedge accounting

The general hedge accounting requirements of IFRS 9 retain the three types of hedge accounting mechanisms in IAS 39. However, greater flexibility has been introduced to the types of transactions eligible for hedge accounting, specifically broadening the types of instruments that qualify as hedging instruments and the types of risk components of non-financial items that are eligible for hedge accounting. In addition, the effectiveness test has been overhauled and replaced with the principle of an 'economic relationship'. Retrospective assessment of hedge effectiveness is no longer required. Far more disclosure requirements about an entity's risk management activities have been introduced.

The work on macro hedging by the IASB is still at a preliminary stage – a discussion paper was issued in April 2014 to gather preliminary views and direction from constituents with a comment period which ended in October 2014. The project is still under analysis at the time of writing.

## Transitional provisions

IFRS 9 (as revised in 2014) is effective for annual periods beginning on or after 1 January 2018 with earlier application permitted. If an entity elects to apply IFRS 9 early, it must apply all of the requirements in IFRS 9 at the same time, except for those relating to:

1. the presentation of fair value gains and losses attributable to changes in the credit risk of financial liabilities designated as at FVTPL, the requirements for which an entity may early apply without applying the other requirements in IFRS 9; and
2. hedge accounting, for which an entity may choose to continue to apply the hedge accounting requirements of IAS 39 instead of the requirements of IFRS 9.

IFRS 9 contains specific transitional provisions for i) classification and measurement of financial assets; ii) impairment of financial assets; and iii) hedge accounting. Please see IFRS 9 for details.

## *IFRS 15 Revenue from Contracts with Customers (Effective for annual periods beginning on or after 1 January 2018)*

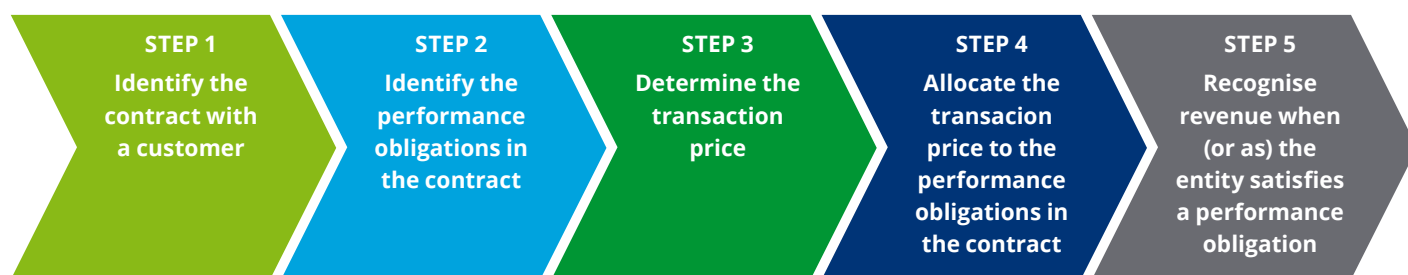

IFRS 15 establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. It will supersede the following revenue Standards and Interpretations upon its effective date:

- IAS 18 *Revenue*;
- IAS 11 *Construction Contracts*;
- IFRIC 13 *Customer Loyalty Programmes*;
- IFRIC 15 *Agreements for the Construction of Real Estate*;
- IFRIC 18 *Transfers of Assets from Customers*; and
- SIC 31 *Revenue-Barter Transactions Involving Advertising Services*.

As suggested by the title of the new Revenue Standard, IFRS 15 will only cover revenue arising from contracts with customers. Under IFRS 15, a customer of an entity is a party that has contracted with the entity to obtain goods or services that are an output of the entity's ordinary activities in exchange for consideration. Unlike the scope of IAS 18, the recognition and measurement of interest income and dividend income from debt and equity investments are no longer within the scope of IFRS 15. Instead, they are within the scope of IAS 39 (or IFRS 9 if it is early adopted).

As mentioned above, the new Revenue Standard has a single model to deal with revenue from contracts with customers. Its core principle is that an entity should recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

The new Revenue Standard introduces a 5-step approach to revenue recognition and measurement:

Far more prescriptive guidance has been introduced by the new Revenue Standard:

- Whether or not a contract (or a combination of contracts) contains more than one promised good or service, and if so, when and how the promised goods or services should be unbundled.
- Whether the transaction price allocated to each performance obligation should be recognised as revenue over time or at a point in time. Under IFRS 15, an entity recognises revenue when a performance obligation is satisfied, which is when 'control' of the goods or services underlying the particular performance obligation is transferred to the customer. Unlike IAS 18, the new Standard does not include separate guidance for 'sales of goods' and 'provision of services'; rather, the new Standard requires entities to assess whether revenue should be recognised over time or at a particular point in time regardless of whether revenue relates to 'sales of goods' or 'provision of services'.
- When the transaction price includes a variable consideration element, how it will affect the amount and timing of revenue to be recognised. The concept of variable consideration is broad; a transaction price is considered variable due to discounts, rebates, refunds, credits, price concessions, incentives, performance bonuses, penalties and contingency arrangements. The new Standard introduces a high hurdle for variable consideration to be recognised as revenue – that is, only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is subsequently resolved.
- When costs incurred to obtain a contract and costs to fulfil a contract can be recognised as an asset.

Extensive disclosures are also required by the new Standard.

In April 2016, the IASB issued *Clarifications to IFRS 15* in response to feedback received by the IASB|FASB Joint Transition Resource Group for Revenue Recognition, which was formed to address potential issues associated with the implementation of IFRS 15 and the US GAAP equivalent, ASC topic 606. The *Clarifications to IFRS 15* clarified the following areas:

- Identifying performance obligations: by providing illustrative factors for consideration in assessing whether the promised goods or services are distinct;
- Principal versus agent considerations: by clarifying that an entity should assess whether it is a principal or agent for each distinct good or service promised to the customer, and by amending and reframing the indicators to assess whether an entity is a principal or agent; and
- Licensing application guidance: in determining whether the licence grants customers a right to use the underlying intellectual property ('IP') (which would result in point in time revenue recognition) or a right to access the IP (which would result in revenue recognition over time), an entity is required to determine whether (i) its ongoing activities are expected to significantly change the form or the functionality of the IP or (ii) the ability of the customer to obtain benefit from the IP is substantially derived from or dependent upon those activities.

Many entities across different industries will likely be affected by IFRS 15 (at least to a certain extent). In some cases, the changes may be substantial and may require changes to the existing IT systems and internal controls. Entities should consider the nature and extent of these changes.

For additional information, please refer to the Deloitte publications *IFRS in Focus* and *IFRS Industry Insights* which highlight the practical implications of IFRS 15 to various industries. These publications can be downloaded at <http://www.iasplus.com/en/tag-types/global>. More information regarding the *Clarifications to IFRS 15* can be found in the Deloitte *IFRS in Focus* publication at <http://www.iasplus.com/en/publications/global/ifrs-in-focus/2016/ifrs-15-clarifications>.

IFRS 15, together with the clarifications thereto issued in April 2016, is effective for reporting periods beginning on or after 1 January 2018 with early application permitted. Entities can choose to apply the Standard retrospectively or to use a modified transition approach, which is to apply the Standard retrospectively only to contracts that are not completed contracts at the date of initial application (for example, 1 January 2018 for an entity with a 31 December year-end). The *Clarifications to IFRS 15* also introduces additional practical expedients for entities transitioning to IFRS 15 on (i) contract modifications that occurred prior to the beginning of the earliest period presented and (ii) contracts that were completed at the beginning of the earliest period presented.

### **IFRS 16 Leases**

*(Effective for annual periods beginning on or after 1 January 2019)*

IFRS 16 provides a comprehensive model for the identification of lease arrangements and their treatment in the financial statements of both lessees and lessors. It will supersede the following lease Standard and Interpretations upon its effective date:

- IAS 17 *Leases*;
- IFRIC 4 *Determining whether an Arrangement contains a Lease*;
- SIC-15 *Operating Leases – Incentives*; and
- SIC-27 *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*.

### **Identification of a lease**

IFRS 16 applies a control model to the identification of leases, distinguishing between leases and service contracts on the basis of whether there is an identified asset controlled by the customer. Control is considered to exist if the customer has:

- a) the right to obtain substantially all of the economic benefits from the use of an identified asset; and
- b) the right to direct the use of that asset.

The Standard provides detailed guidance to determine whether those conditions are met, including instances where the supplier has substantive substitution rights, and where the relevant decisions about how and for what purpose the asset is used are predetermined.

### **Lessee accounting**

IFRS 16 introduces significant changes to lessee accounting: it removes the distinction between operating and finance leases under IAS 17 and requires a lessee to recognise a right-of-use asset and a lease liability at lease commencement for all leases, except for short-term leases and leases of low value assets.

The right-of-use asset is initially measured at cost and subsequently measured at cost (subject to certain exceptions) less accumulated depreciation and impairment losses, adjusted for any remeasurement of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at that date. Subsequently, the lease liability is adjusted for interest and lease payments, as well as the impact of lease modifications, amongst others.

If a lessee elects not to apply the general requirements of IFRS 16 to short-term leases (i.e. one that does not include a purchase option and has a lease term at commencement date of 12 months or less) and leases of low value assets, the lessee should recognise the lease payments associated with those leases as an expense on either a straight-line basis over the lease term or another systematic basis, similar to the current accounting for operating leases.

## Lessor accounting

In contrast to lessee accounting, the IFRS 16 lessor accounting requirements remain largely unchanged from IAS 17, which continue to require a lessor to classify a lease either as an operating lease or a finance lease.

In addition, IFRS 16 also provides guidance on the accounting for sale and leaseback transactions. Extensive disclosures are also required by the new Standard.

Due to the prominence of leasing transactions in the economy, many entities across different industries will be affected by IFRS 16. In some cases, the changes may be substantial and may require changes to the existing IT systems and internal controls. Entities should consider the nature and extent of these changes.

For additional information, please refer to the Deloitte publications *IFRS in Focus* and *IFRS Industry Insights* which highlight the practical implications of IFRS 16 to various industries. These publications can be downloaded at <http://www.iasplus.com/en/tag-types/global/newsletters/ifrs-industry-insights>.

IFRS 16 is effective for reporting periods beginning on or after 1 January 2019 with early application permitted for entities that apply IFRS 15 at or before the date of initial application of IFRS 16. A lessee can apply IFRS 16 either by a full retrospective approach or a modified retrospective approach. If the latter approach is selected, an entity is not required to restate the comparative information and the cumulative effect of initially applying IFRS 16 must be presented as an adjustment to opening retained earnings (or other component of equity as appropriate).

## *Amendments to IFRS 2 Classification and Measurement of Share-based Payment Transactions (Effective for annual periods beginning on or after 1 January 2018)*

The amendments clarify the following:

1. In estimating the fair value of a cash-settled share-based payment, the accounting for the effects of vesting and non-vesting conditions should follow the same approach as for equity-settled share-based payments.
2. Where tax law or regulation requires an entity to withhold a specified number of equity instruments equal to the monetary value of the employee's tax obligation to meet the employee's tax liability which is then remitted to the tax authority (typically in cash), i.e. the share-based payment arrangement has a 'net settlement feature', such an arrangement should be classified as equity-settled in its entirety, provided that the share-based payment would have been classified as equity-settled had it not included the net settlement feature.
3. A modification of a share-based payment that changes the transaction from cash-settled to equity-settled should be accounted for as follows:
  - (i) the original liability is derecognised;
  - (ii) the equity-settled share-based payment is recognised at the modification date fair value of the equity instrument granted to the extent that services have been rendered up to the modification date; and
  - (iii) any difference between the carrying amount of the liability at the modification date and the amount recognised in equity should be recognised in profit or loss immediately.

The amendments are effective for annual reporting periods beginning on or after 1 January 2018 with earlier application permitted. Specific transition provisions apply.

*Amendments to IFRS 10 and IAS 28 Sale or Contribution of Assets between an Investor and its Associate or Joint Venture  
(Effective for annual periods beginning on or after a date to be determined)*

The amendments deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. IAS 28 and IFRS 10 are amended, as follows:

IAS 28 has been amended to reflect the following:

- Gains and losses resulting from transactions involving assets that do not constitute a business between an investor and its associate or joint venture are recognised to the extent of unrelated investors' interests in the associate or joint venture.
- Gains or losses from downstream transactions involving assets that constitute a business between an investor and its associate or joint venture should be recognised in full in the investor's financial statements.

IFRS 10 has been amended to reflect the following:

- Gains or losses resulting from the loss of control of a subsidiary that does not contain a business in a transaction with an associate or a joint venture that is accounted for using the equity method, are recognised in the parent's profit or loss only to the extent of the unrelated investors' interests in that associate or joint venture. Similarly, gains and losses resulting from the remeasurement of investments retained in any former subsidiary (that has become an associate or a joint venture that is accounted for using the equity method) to fair value are recognised in the former parent's profit or loss only to the extent of the unrelated investors' interests in the new associate or joint venture.

In December 2015, the IASB postponed the effective date of this amendment indefinitely pending the outcome of its research project on the equity method of accounting. Earlier application of these amendments is still permitted.

*Amendments to IAS 7 Disclosure Initiative  
(Effective for annual periods beginning on or after 1 January 2017)*

The amendments require an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. The amendments do not prescribe a specific format to disclose financing activities; however, an entity may fulfil the disclosure objective by providing a reconciliation between the opening and closing balances in the statement of financial position for liabilities arising from financing activities.

The amendments apply prospectively for annual periods beginning on or after 1 January 2017 with earlier application permitted. Entities are not required to present comparative information for earlier periods.

*Amendments to IAS 12 Recognition of Deferred Tax Assets for Unrealised Losses  
(Effective for annual periods beginning on or after 1 January 2017)*

The amendments clarify the following:

1. Decreases below cost in the carrying amount of a fixed-rate debt instrument measured at fair value for which the tax base remains at cost give rise to a deductible temporary difference, irrespective of whether the debt instrument's holder expects to recover the carrying amount of the debt instrument by sale or by use, or whether it is probable that the issuer will pay all the contractual cash flows;
2. When an entity assesses whether taxable profits will be available against which it can utilise a deductible temporary difference, and the tax law restricts the utilisation of losses to deduction against income of a specific type (e.g. capital losses can only be set off against capital gains), an entity assesses a deductible temporary difference in combination with other deductible temporary differences of that type, but separately from other types of deductible temporary differences;
3. The estimate of probable future taxable profit may include the recovery of some of an entity's assets for more than their carrying amount if there is sufficient evidence that it is probable that the entity will achieve this; and
4. In evaluating whether sufficient future taxable profits are available, an entity should compare the deductible temporary differences with future taxable profits excluding tax deductions resulting from the reversal of those deductible temporary differences.

The amendments apply retrospectively for annual periods beginning on or after 1 January 2017 with earlier application permitted.

# Section 2 – Model financial statements for the year ended 31 December 2016

## International GAAP Holdings Limited

The model financial statements of International GAAP Holdings Limited for the year ended 31 December 2016 are intended to illustrate the presentation and disclosure requirements of International Financial Reporting Standards (IFRSs). They also contain additional disclosures that are considered to be best practice, particularly where such disclosures are included in illustrative examples provided within a specific Standard.

International GAAP Holdings Limited is assumed to have presented financial statements in accordance with IFRSs for a number of years. Therefore, it is not a first-time adopter of IFRSs. Readers should refer to IFRS 1 *First-time Adoption of International Financial Reporting Standards* for specific requirements regarding an entity's first IFRS financial statements. It is further assumed that International GAAP Holdings Limited does not qualify as an investment entity as defined in IFRS 10.

The model financial statements illustrate the impact of the application of the amendments to IFRSs that were issued on or before 31 August 2016 and are mandatorily effective for the annual period beginning on 1 January 2016. Accordingly, the model financial statements do not illustrate the impact of the application of new and revised IFRSs that are not yet mandatorily effective on 1 January 2016.

The model financial statements do not include separate financial statements for the parent, which may be required by local laws or regulations, or may be prepared voluntarily. Where an entity presents separate financial statements that comply with IFRSs, the requirements of IAS 27 *Separate Financial Statements* (as revised in 2011) will apply. Separate statements of profit or loss and other comprehensive income, financial position, changes in equity and cash flows for the parent will generally be required, together with supporting notes. In addition, the model financial statements have been presented without regard to local laws or regulations. Preparers of financial statements will need to ensure that the options selected under IFRSs do not conflict with such sources of regulation (e.g. the revaluation of assets is not permitted under certain reporting regimes – but these financial statements illustrate the presentation and disclosures required when an entity adopts the revaluation model under IAS 16 *Property, Plant and Equipment*). In addition, local laws or securities regulations may specify disclosures in addition to those required by IFRSs (e.g. in relation to directors' remuneration). Preparers of financial statements will consequently need to adapt the model financial statements to comply with such additional local requirements.

Suggested disclosures are cross-referenced to the underlying requirements in the texts of the relevant Standards and Interpretations.

For the purposes of presenting the statements of profit or loss and other comprehensive income and cash flows, the alternatives allowed under IFRSs for those statements have been illustrated. Preparers should select the alternatives most appropriate to their circumstances and apply the chosen presentation method consistently.

Note that in these model financial statements, we have frequently included line items for which a nil amount is shown, so as to illustrate items that, although not applicable to International GAAP Holdings Limited, are commonly encountered in practice. This does not mean that we have illustrated all possible disclosures. Nor should it be taken to mean that entities are required to display line items for such 'nil' amounts in practice, especially in light of the amendments to IAS 1 *Disclosure Initiatives* which are effective for annual periods beginning on or after 1 January 2016.

<i>The above illustrates the indirect method of reporting cash flows from operating activities.</i>				

Source	International GAAP Holdings Limited
IAS 1.10(e), (ea), 51(b),(c)	<b>Notes to the consolidated financial statements for the year ended 31 December 2016</b>
IAS 1.138(a), (c) IAS 24.13	<p><b>1. General information</b></p> <p>International GAAP Holdings Limited (the Company) is a limited company incorporated in A Land. Its parent and ultimate holding company is International Group Holdings Limited. Its ultimate controlling party is Mr. John Banks. The addresses of its registered office and principal place of business are disclosed in the introduction to the annual report. The principal activities of the Company and its subsidiaries (the Group) are described in note 6.</p> <p><b>2. Application of new and revised International Financial Reporting Standards (IFRSs)</b></p> <p><b>2.1 Amendments to IFRSs that are mandatorily effective for the current year</b></p> <p>In the current year, the Group has applied a number of amendments to IFRSs issued by the International Accounting Standards Board (IASB) that are mandatorily effective for an accounting period that begins on or after 1 January 2016.</p> <p><b>Amendments to IFRS 10, IFRS 12 and IAS 28 Investment Entities: Applying the Consolidation Exception</b></p> <p>The Group has applied these amendments for the first time in the current year. The amendments clarify that the exemption from preparing consolidated financial statements is available to a parent entity that is a subsidiary of an investment entity, even if the investment entity measures all its subsidiaries at fair value in accordance with IFRS 10. The amendments also clarify that the requirement for an investment entity to consolidate a subsidiary providing services related to the former's investment activities applies only to subsidiaries that are not investment entities themselves.</p> <p>The application of these amendments has had no impact on the Group's consolidated financial statements as the Group is not an investment entity and does not have any holding company, subsidiary, associate or joint venture that qualifies as an investment entity.</p> <p><b>Amendments to IFRS 11 Accounting for Acquisitions of Interests in Joint Operations</b></p> <p>The Group has applied these amendments for the first time in the current year. The amendments provide guidance on how to account for the acquisition of a joint operation that constitutes a business as defined in IFRS 3 <i>Business Combinations</i>. Specifically, the amendments state that the relevant principles on accounting for business combinations in IFRS 3 and other standards should be applied. The same requirements should be applied to the formation of a joint operation if and only if an existing business is contributed to the joint operation by one of the parties that participate in the joint operation.</p> <p>A joint operator is also required to disclose the relevant information required by IFRS 3 and other standards for business combinations.</p> <p>The application of these amendments has had no impact on the Group's consolidated financial statements as the Group did not have any such transactions in the current year.</p> <p><b>Amendments to IAS 1 Disclosure Initiative</b></p> <p>The Group has applied these amendments for the first time in the current year. The amendments clarify that an entity need not provide a specific disclosure required by an IFRS if the information resulting from that disclosure is not material, and give guidance on the bases of aggregating and disaggregating information for disclosure purposes. However, the amendments reiterate that an entity should consider providing additional disclosures when compliance with the specific requirements in IFRS is insufficient to enable users of financial statements to understand the impact of particular transactions, events and conditions on the entity's financial position and financial performance.</p> <p>In addition, the amendments clarify that an entity's share of the other comprehensive income of associates and joint ventures accounted for using the equity method should be presented separately from those arising from the Group, and should be separated into the share of items that, in accordance with other IFRSs: (i) will not be reclassified subsequently to profit or loss; and (ii) will be reclassified subsequently to profit or loss when specific conditions are met.</p> <p>As regards the structure of the financial statements, the amendments provide examples of systematic ordering or grouping of the notes.</p> <p>The application of these amendments has not resulted in any impact on the financial performance or financial position of the Group.</p>

	<p><b>IFRS 9 Financial Instruments</b></p> <p>IFRS 9 issued in November 2009 introduced new requirements for the classification and measurement of financial assets. IFRS 9 was subsequently amended in October 2010 to include requirements for the classification and measurement of financial liabilities and for derecognition, and in November 2013 to include the new requirements for general hedge accounting. Another revised version of IFRS 9 was issued in July 2014 mainly to include a) impairment requirements for financial assets and b) limited amendments to the classification and measurement requirements by introducing a 'fair value through other comprehensive income' (FVTOCI) measurement category for certain simple debt instruments.</p> <p>Key requirements of IFRS 9:</p> <ul style="list-style-type: none"> <li>all recognised financial assets that are within the scope of IFRS 9 are required to be subsequently measured at amortised cost or fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortised cost at the end of subsequent accounting periods. Debt instruments that are held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets, and that have contractual terms that give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, are generally measured at FVTOCI. All other debt investments and equity investments are measured at their fair value at the end of subsequent accounting periods. In addition, under IFRS 9, entities may make an irrevocable election to present subsequent changes in the fair value of an equity investment (that is not held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 applies) in other comprehensive income, with only dividend income generally recognised in profit or loss.</li> </ul>

## International GAAP Holdings Limited

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued**

- with regard to the measurement of financial liabilities designated as at fair value through profit or loss, IFRS 9 requires that the amount of change in the fair value of a financial liability that is attributable to changes in the credit risk of that liability is presented in other comprehensive income, unless the recognition of such changes in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to profit or loss. Under IAS 39, the entire amount of the change in the fair value of the financial liability designated as fair value through profit or loss is presented in profit or loss.
- in relation to the impairment of financial assets, IFRS 9 requires an expected credit loss model, as opposed to an incurred credit loss model under IAS 39. The expected credit loss model requires an entity to account for expected credit losses and changes in those expected credit losses at each reporting date to reflect changes in credit risk since initial recognition. In other words, it is no longer necessary for a credit event to have occurred before credit losses are recognised.
- the new general hedge accounting requirements retain the three types of hedge accounting mechanisms currently available in IAS 39. Under IFRS 9, greater flexibility has been introduced to the types of transactions eligible for hedge accounting, specifically broadening the types of instruments that qualify for hedging instruments and the types of risk components of non-financial items that are eligible for hedge accounting. In addition, the effectiveness test has been overhauled and replaced with the principle of an 'economic relationship'. Retrospective assessment of hedge effectiveness is also no longer required. Enhanced disclosure requirements about an entity's risk management activities have also been introduced.

Based on an analysis of the Group's financial assets and financial liabilities as at 31 December 2016 on the basis of the facts and circumstances that exist at that date, the directors of the Company have performed a preliminary assessment of the impact of IFRS 9 to the Group's consolidated financial statements as follows:

**Classification and measurement**

- Bills of exchange and debentures classified as held-to-maturity investments and loans carried at amortised cost as disclosed in note 22: these are held within a business model whose objective is to collect the contractual cash flows that are solely payments of principal and interest on the principal outstanding. Accordingly, these financial assets will continue to be subsequently measured at amortised cost upon the application of IFRS 9;
- Listed redeemable notes classified as available-for-sale investments carried at fair value as disclosed in note 22: these are held within a business model whose objective is achieved both by collecting contractual cash flows and selling the notes in the open market, and the notes' contractual terms give rise to cash flows on specified dates that are solely payments of principal and interest on the principal outstanding. Accordingly, the listed redeemable notes will continue to be subsequently measured at FVTOCI upon the application of IFRS 9, and the fair value gains or losses accumulated in the investment revaluation reserve will continue to be subsequently reclassified to profit or loss when the listed redeemable notes are derecognised or reclassified;
- Unlisted shares classified as available-for-sale investments carried at fair value as disclosed in note 22: these shares qualify for designation as measured at FVTOCI under IFRS 9; however, the fair value gains or losses accumulated in the investment revaluation reserve will no longer be subsequently reclassified to profit or loss under IFRS 9, which is different from the current treatment. This will affect the amounts recognised in the Group's profit or loss and other comprehensive income but will not affect total comprehensive income;
- Redeemable cumulative preference shares issued by the Group designated as at FVTPL as disclosed in note 34: these financial liabilities qualify for designation as measured at FVTPL under IFRS 9; however, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability will be recognised in other comprehensive income with the remaining fair value change recognised in profit or loss. This is different from the current accounting treatment in terms of which the entire change in fair value of the financial liability is recognised in profit or loss. The change in fair value attributed to a change in credit risk of these financial liabilities amounting to approximately CU20,000 during the current year (2015: CU nil) would be recognised in other comprehensive income under IFRS 9;
- All other financial assets and financial liabilities will continue to be measured on the same bases as is currently adopted under IAS 39.

## International GAAP Holdings Limited

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued****Impairment**

Financial assets measured at amortised cost, listed redeemable notes that will be carried at FVTOCI under IFRS 9 (note 22) (see classification and measurement section above), finance lease receivables (note 26), amounts due from customer under construction contracts (note 27), and financial guarantee contracts (note 34) will be subject to the impairment provisions of IFRS 9.

The Group expects to apply the simplified approach to recognise lifetime expected credit losses for its trade receivables, finance lease receivables and amounts due from customer under construction contracts as required or permitted by IFRS 15. As regards the listed redeemable notes, bills of exchange and debentures as disclosed in note 22, the directors of the Company consider that they have low credit risk given their strong external credit rating and hence expect to recognise 12-month expected credit losses for these items. In relation to the loans to related parties (note 22) and financial guarantee contracts, whether lifetime or 12-month expected credit losses should be recognised would depend on whether there has been a significant increase in credit risk of these items from initial recognition to the date of initial application of IFRS 9. The directors are currently assessing the extent of this impact.

In general, the directors anticipate that the application of the expected credit loss model of IFRS 9 will result in earlier recognition of credit losses for the respective items and are currently assessing the potential impact.

**Hedge accounting**

As the new hedge accounting requirements will align more closely with the Group's risk management policies, with generally more qualifying hedging instruments and hedged items, a preliminary assessment of the Group's current hedging relationships indicate that they will qualify as continuing hedging relationships upon application of IFRS 9. Similar to the Group's current hedge accounting policy, the directors do not intend to exclude the forward element of foreign currency forward contracts from designated hedging relationships. Moreover, the Group has already elected to basis adjust non-financial hedged items with gains/losses arising from effective cash flow hedges under IAS 39, which is mandatory under IFRS 9.

Nevertheless, under IFRS 9, basis adjustments are not considered a reclassification adjustment and therefore they would not affect other comprehensive income. Currently, gains/losses arising from effective cash flow hedges that are subject to basis adjustments are presented in other comprehensive income as amounts that may be subsequently reclassified to profit or loss. The corresponding amount in the current year of CU49,000 (CU70,000 net of tax of CU21,000) (see note 40.6.2) will be presented as 'will not be subsequently reclassified to profit or loss' upon the application of IFRS 9, which has no overall impact on the Group's profit or loss, other comprehensive income or total comprehensive income. However, in respect of the actual basis adjustment of CU180,000 (CU257,000 net of tax of CU77,000) in the current year (see note 29.5) which affected other comprehensive income, such basis adjustment will no longer affect other comprehensive income upon the application of IFRS 9, resulting in an increase in other comprehensive income and total comprehensive income of the same amount.

Apart from the above, the directors do not anticipate that the application of the IFRS 9 hedge accounting requirements will have a material impact on the Group's consolidated financial statements.

It should be noted that the above assessments were made based on an analysis of the Group's financial assets and financial liabilities as at 31 December 2016 on the basis of the facts and circumstances that existed at that date. As facts and circumstances may change during the period leading up to the initial date of application of IFRS 9, which is expected to be 1 January 2018 as the Group does not intend to early apply the standard, the assessment of the potential impact is subject to change.

**Commentary:**

*IAS 8.30 requires entities to give known or reasonably estimable information relevant to assessing the possible impact that application of any new or revised IFRS will have on the entity's financial statements in the period of initial application. The regulatory requirements in the various jurisdictions may differ as to how detailed the disclosures need to be; some regulators may require both qualitative and quantitative information to be disclosed whereas others may consider that qualitative information (e.g. key areas that may be affected by the new or revised IFRS) suffices in many circumstances. For this reason, relevant regulatory guidance should also be taken into account in preparing the disclosure.*

*This applies to all new or revised IFRSs that have been issued but are not yet effective.*

## International GAAP Holdings Limited

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued****IFRS 15 Revenue from Contracts with Customers**

IFRS 15 establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. IFRS 15 will supersede the current revenue recognition guidance including IAS 18 *Revenue*, IAS 11 *Construction Contracts* and the related Interpretations when it becomes effective.

The core principle of IFRS 15 is that an entity should recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Specifically, the Standard introduces a 5-step approach to revenue recognition:

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligations in the contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation

Under IFRS 15, an entity recognises revenue when (or as) a performance obligation is satisfied, i.e. when 'control' of the goods or services underlying the particular performance obligation is transferred to the customer.

Far more prescriptive guidance has been added in IFRS 15 to deal with specific scenarios. Furthermore, extensive disclosures are required by IFRS 15.

In April 2016, the IASB issued *Clarifications to IFRS 15* in relation to the identification of performance obligations, principal versus agent considerations, as well as licensing application guidance.

The Group recognises revenue from the following major sources:

- Sale of leisure goods and electronic equipment, including the related loyalty programme 'Maxi-Points Scheme' as disclosed in note 41, servicing fees included in the price of products sold, as well as warranties granted under local legislation as disclosed in note 35;
- Installation of computer software for specialised business applications; and
- Construction of residential properties.

The directors of the Company have preliminarily assessed that the Maxi-Points Scheme and the after-sale services represent two separate performance obligations from the sale of the leisure goods and electronic equipment and accordingly, revenue will be recognised for each of these performance obligations when control over the corresponding goods and services is transferred to the customer. This is similar to the current identification of separate revenue components under IAS 18. Furthermore, even though IFRS 15 requires the transaction price to be allocated to the different performance obligations on a relative stand-alone selling price basis, the directors do not expect that the allocation of revenue to the Maxi-Points, the after-sale services and the leisure goods and electronic equipment sold will be significantly different from that currently determined. The timing of revenue recognition of each of these three performance obligations (i.e. upon redemption of the Maxi-Points taking breakage into account, at a point in time for sale of goods when the goods are delivered to the customer, and over the period the after-sale services are performed) are also expected to be consistent with current practice.

The sales-related warranties cannot be purchased separately and they serve as an assurance that the products sold comply with agreed-upon specifications. Accordingly, the Group will continue to account for the warranty in accordance with IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* consistent with its current accounting treatment.

As regards the construction of residential properties, the directors have specifically considered IFRS 15's guidance on contract combinations, contract modifications arising from variation orders, variable consideration, and the assessment of whether there is a significant financing component in the contracts, particularly taking into account the reason for the difference in timing between the transfer of control of goods and services to the customer and the timing of the related payments. The directors have preliminarily assessed that revenue from these construction contracts should be recognised over time as the customer controls the properties during the course of construction by the Group. Furthermore, the directors consider that the input method currently used to measure the progress towards complete satisfaction of these performance obligations will continue to be appropriate under IFRS 15.

## Source

## International GAAP Holdings Limited

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued**

As regards the installation of software services, the directors have preliminarily assessed that these performance obligations are satisfied over time and that the method currently used to measure the progress towards complete satisfaction of these performance obligations will continue to be appropriate under IFRS 15.

The directors are still in the process of assessing the full impact of the application of IFRS 15 on the Group's financial statements and it is not practicable to provide a reasonable financial estimate of the effect until the directors complete the detailed review. As a result, the above preliminary assessment is subject to change. The directors do not intend to early apply the standard and intend to use the full retrospective method upon adoption.

**IFRS 16 Leases**

IFRS 16 introduces a comprehensive model for the identification of lease arrangements and accounting treatments for both lessors and lessees. IFRS 16 will supersede the current lease guidance including IAS 17 Leases and the related interpretations when it becomes effective.

IFRS 16 distinguishes leases and service contracts on the basis of whether an identified asset is controlled by a customer. Distinctions of operating leases (off balance sheet) and finance leases (on balance sheet) are removed for lessee accounting, and is replaced by a model where a right-of-use asset and a corresponding liability have to be recognised for all leases by lessees (i.e. all on balance sheet) except for short-term leases and leases of low value assets.

The right-of-use asset is initially measured at cost and subsequently measured at cost (subject to certain exceptions) less accumulated depreciation and impairment losses, adjusted for any remeasurement of the lease liability. The lease liability is initially measured at the present value of the lease payments that are not paid at that date. Subsequently, the lease liability is adjusted for interest and lease payments, as well as the impact of lease modifications, amongst others. Furthermore, the classification of cash flows will also be affected as operating lease payments under IAS 17 are presented as operating cash flows; whereas under the IFRS 16 model, the lease payments will be split into a principal and an interest portion which will be presented as financing and operating cash flows respectively.

In contrast to lessee accounting, IFRS 16 substantially carries forward the lessor accounting requirements in IAS 17, and continues to require a lessor to classify a lease either as an operating lease or a finance lease.

Furthermore, extensive disclosures are required by IFRS 16.

As at 31 December 2016, the Group has non-cancellable operating lease commitments of CU9.92 million. IAS 17 does not require the recognition of any right-of-use asset or liability for future payments for these leases; instead, certain information is disclosed as operating lease commitments in note 48. A preliminary assessment indicates that these arrangements will meet the definition of a lease under IFRS 16, and hence the Group will recognise a right-of-use asset and a corresponding liability in respect of all these leases unless they qualify for low value or short-term leases upon the application of IFRS 16. The new requirement to recognise a right-of-use asset and a related lease liability is expected to have a significant impact on the amounts recognised in the Group's consolidated financial statements and the directors are currently assessing its potential impact. It is not practicable to provide a reasonable estimate of the financial effect until the directors complete the review.

In contrast, for finance leases where the Group is a lessee, as the Group has already recognised an asset and a related finance lease liability for the lease arrangement, and in cases where the Group is a lessor (for both operating and finance leases), the directors of the Company do not anticipate that the application of IFRS 16 will have a significant impact on the amounts recognised in the Group's consolidated financial statements.

## International GAAP Holdings Limited

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued****Amendments to IFRS 2 *Classification and Measurement of Share-based Payment Transactions***

The amendments clarify the following:

1. In estimating the fair value of a cash-settled share-based payment, the accounting for the effects of vesting and non-vesting conditions should follow the same approach as for equity-settled share-based payments.
2. Where tax law or regulation requires an entity to withhold a specified number of equity instruments equal to the monetary value of the employee's tax obligation to meet the employee's tax liability which is then remitted to the tax authority, i.e. the share-based payment arrangement has a 'net settlement feature', such an arrangement should be classified as equity-settled in its entirety, provided that the share-based payment would have been classified as equity-settled had it not included the net settlement feature.
3. A modification of a share-based payment that changes the transaction from cash-settled to equity-settled should be accounted for as follows:
  - i) the original liability is derecognised;
  - ii) the equity-settled share-based payment is recognised at the modification date fair value of the equity instrument granted to the extent that services have been rendered up to the modification date; and
  - iii) any difference between the carrying amount of the liability at the modification date and the amount recognised in equity should be recognised in profit or loss immediately.

The amendments are effective for annual reporting periods beginning on or after 1 January 2018 with earlier application permitted. Specific transition provisions apply. The directors of the Company do not anticipate that the application of the amendments in the future will have a significant impact on the Group's consolidated financial statements as the Group does not have any cash-settled share-based payment arrangements or any withholding tax arrangements with tax authorities in relation to share-based payments.

**Amendments to IFRS 10 and IAS 28 *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture***

The amendments to IFRS 10 and IAS 28 deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. Specifically, the amendments state that gains or losses resulting from the loss of control of a subsidiary that does not contain a business in a transaction with an associate or a joint venture that is accounted for using the equity method, are recognised in the parent's profit or loss only to the extent of the unrelated investors' interests in that associate or joint venture. Similarly, gains and losses resulting from the remeasurement of investments retained in any former subsidiary (that has become an associate or a joint venture that is accounted for using the equity method) to fair value are recognised in the former parent's profit or loss only to the extent of the unrelated investors' interests in the new associate or joint venture.

The effective date of the amendments has yet to be set by the IASB; however, earlier application of the amendments is permitted. The directors of the Company anticipate that the application of these amendments may have an impact on the Group's consolidated financial statements in future periods should such transactions arise.

**Amendments to IAS 7 *Disclosure Initiative***

The amendments require an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities.

The amendments apply prospectively for annual periods beginning on or after 1 January 2017 with earlier application permitted. The directors of the Company do not anticipate that the application of these amendments will have a material impact on the Group's consolidated financial statements.

IAS 1.17(b), 112(a), 117(a)	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
	<p>The principal accounting policies are set out below.</p> <p><b>3.3 Basis of consolidation</b></p> <p>The consolidated financial statements incorporate the financial statements of the Company and entities (including structured entities) controlled by the Company and its subsidiaries. Control is achieved when the Company:</p> <ul style="list-style-type: none"> <li>• has power over the investee;</li> <li>• is exposed, or has rights, to variable returns from its involvement with the investee; and</li> <li>• has the ability to use its power to affect its returns.</li> </ul> <p>The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.</p> <p>When the Company has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:</p> <ul style="list-style-type: none"> <li>• the size of the Company's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;</li> <li>• potential voting rights held by the Company, other vote holders or other parties;</li> <li>• rights arising from other contractual arrangements; and</li> <li>• any additional facts and circumstances that indicate that the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.</li> </ul> <p>Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Company gains control until the date when the Company ceases to control the subsidiary.</p> <p>Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.</p> <p>When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.</p> <p>All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.</p> <p><b>3.3.1 Changes in the Group's ownership interests in existing subsidiaries</b></p> <p>Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Company.</p> <p>When the Group loses control of a subsidiary, a gain or loss is recognised in profit or loss and is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interests. All amounts previously recognised in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as specified/permitted by applicable IFRSs). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under IAS 39, when applicable, the cost on initial recognition of an investment in an associate or a joint venture.</p>

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued****3.4 Business combinations**

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value, except that:

- deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with IAS 12 Income Taxes and IAS 19 respectively;
- liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with IFRS 2 at the acquisition date (see note 3.16.2); and
- assets (or disposal groups) that are classified as held for sale in accordance with IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations* are measured in accordance with that Standard.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation may be initially measured either at fair value or at the non-controlling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets. The choice of measurement basis is made on a transaction-by-transaction basis. Other types of non-controlling interests are measured at fair value or, when applicable, on the basis specified in another IFRS.

When the consideration transferred by the Group in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination. Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the 'measurement period' (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Contingent consideration that is classified as an asset or a liability is remeasured at subsequent reporting dates in accordance with IAS 39, or IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*, as appropriate, with the corresponding gain or loss being recognised in profit or loss.

When a business combination is achieved in stages, the Group's previously held equity interest in the acquiree is remeasured to its acquisition-date fair value and the resulting gain or loss, if any, is recognised in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are reclassified to profit or loss where such treatment would be appropriate if that interest were disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognised at that date.

Source	International GAAP Holdings Limited
	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p><b>3.5 Goodwill</b></p> <p>Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business (see note 3.4 above) less accumulated impairment losses, if any.</p> <p>For the purposes of impairment testing, goodwill is allocated to each of the Group's cash-generating units (or groups of cash-generating units) that is expected to benefit from the synergies of the combination.</p> <p>A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.</p> <p>On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.</p> <p>The Group's policy for goodwill arising on the acquisition of an associate and a joint venture is described at note 3.6 below.</p> <p><b>3.6 Investments in associates and joint ventures</b></p> <p>An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.</p> <p>A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.</p> <p>The results and assets and liabilities of associates or joint ventures are incorporated in these consolidated financial statements using the equity method of accounting, except when the investment, or a portion thereof, is classified as held for sale, in which case it is accounted for in accordance with IFRS 5. Under the equity method, an investment in an associate or a joint venture is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the associate or joint venture. When the Group's share of losses of an associate or a joint venture exceeds the Group's interest in that associate or joint venture (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate or joint venture), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture.</p> <p>An investment in an associate or a joint venture is accounted for using the equity method from the date on which the investee becomes an associate or a joint venture. On acquisition of the investment in an associate or a joint venture, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.</p> <p>The requirements of IAS 39 are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group's investment in an associate or a joint venture. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 Impairment of Assets as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognised forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.</p>

## Source

## International GAAP Holdings Limited

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued**

The Group discontinues the use of the equity method from the date when the investment ceases to be an associate or a joint venture, or when the investment is classified as held for sale. When the Group retains an interest in the former associate or joint venture and the retained interest is a financial asset, the Group measures the retained interest at fair value at that date and the fair value is regarded as its fair value on initial recognition in accordance with IAS 39. The difference between the carrying amount of the associate or joint venture at the date the equity method was discontinued, and the fair value of any retained interest and any proceeds from disposing of a part interest in the associate or joint venture is included in the determination of the gain or loss on disposal of the associate or joint venture. In addition, the Group accounts for all amounts previously recognised in other comprehensive income in relation to that associate or joint venture on the same basis as would be required if that associate or joint venture had directly disposed of the related assets or liabilities. Therefore, if a gain or loss previously recognised in other comprehensive income by that associate or joint venture would be reclassified to profit or loss on the disposal of the related assets or liabilities, the Group reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustment) when the equity method is discontinued.

The Group continues to use the equity method when an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate. There is no remeasurement to fair value upon such changes in ownership interests.

When the Group reduces its ownership interest in an associate or a joint venture but the Group continues to use the equity method, the Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

When a group entity transacts with an associate or a joint venture of the Group, profits and losses resulting from the transactions with the associate or joint venture are recognised in the Group's consolidated financial statements only to the extent of interests in the associate or joint venture that are not related to the Group.

**3.7 Interests in joint operations**

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

When a group entity undertakes its activities under joint operations, the Group as a joint operator recognises in relation to its interest in a joint operation:

- its assets, including its share of any assets held jointly;
- its liabilities, including its share of any liabilities incurred jointly;
- its revenue from the sale of its share of the output arising from the joint operation;
- its share of the revenue from the sale of the output by the joint operation; and
- its expenses, including its share of any expenses incurred jointly.

The Group accounts for the assets, liabilities, revenues and expenses relating to its interest in a joint operation in accordance with the IFRSs applicable to the particular assets, liabilities, revenues and expenses.

When a group entity transacts with a joint operation in which a group entity is a joint operator (such as a sale or contribution of assets), the Group is considered to be conducting the transaction with the other parties to the joint operation, and gains and losses resulting from the transactions are recognised in the Group's consolidated financial statements only to the extent of other parties' interests in the joint operation.

When a group entity transacts with a joint operation in which a group entity is a joint operator (such as a purchase of assets), the Group does not recognise its share of the gains and losses until it resells those assets to a third party.

## International GAAP Holdings Limited

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued****3.9.2 Rendering of services**

Revenue from a contract to provide services is recognised by reference to the stage of completion of the contract. The stage of completion of the contract is determined as follows:

- installation fees are recognised by reference to the stage of completion of the installation, determined as the proportion of the total time expected to install that has elapsed at the end of the reporting period;
- servicing fees included in the price of products sold are recognised by reference to the proportion of the total cost of providing the servicing for the product sold; and
- revenue from time and material contracts is recognised at the contractual rates as labour hours and direct expenses are incurred.

The Group's policy for recognition of revenue from construction contracts is described in note 3.10 below.

**3.9.3 Royalties**

Royalty revenue is recognised on an accrual basis in accordance with the substance of the relevant agreement (provided that it is probable that the economic benefits will flow to the Group and the amount of revenue can be measured reliably). Royalties determined on a time basis are recognised on a straight-line basis over the period of the agreement. Royalty arrangements that are based on production, sales and other measures are recognised by reference to the underlying arrangement.

**3.9.4 Dividend and interest income**

Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably).

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

**3.9.5 Rental income**

The Group's policy for recognition of revenue from operating leases is described in note 3.11.1 below.

IAS 11.39(b),(c)

**3.10 Construction contracts**

When the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the end of the reporting period, measured based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs, except where this would not be representative of the stage of completion. Variations in contract work, claims and incentive payments are included to the extent that the amount can be measured reliably and its receipt is considered probable.

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that it is probable will be recoverable. Contract costs are recognised as expenses in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

When contract costs incurred to date plus recognised profits less recognised losses exceed progress billings, the surplus is shown as amounts due from customers for contract work. For contracts where progress billings exceed contract costs incurred to date plus recognised profits less recognised losses, the surplus is shown as the amounts due to customers for contract work. Amounts received before the related work is performed are included in the consolidated statement of financial position, as a liability, as advances received. Amounts billed for work performed but not yet paid by the customer are included in the consolidated statement of financial position under trade and other receivables.

## International GAAP Holdings Limited

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued**

For the purposes of presenting these consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into Currency Units using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity (and attributed to non-controlling interests as appropriate).

On the disposal of a foreign operation (i.e. a disposal of the Group's entire interest in a foreign operation, a disposal involving loss of control over a subsidiary that includes a foreign operation, or a partial disposal of an interest in a joint arrangement or an associate that includes a foreign operation of which the retained interest becomes a financial asset), all of the exchange differences accumulated in equity in respect of that operation attributable to the owners of the Company are reclassified to profit or loss.

In addition, in relation to a partial disposal of a subsidiary that includes a foreign operation that does not result in the Group losing control over the subsidiary, the proportionate share of accumulated exchange differences are re-attributed to non-controlling interests and are not recognised in profit or loss. For all other partial disposals (i.e. partial disposals of associates or joint arrangements that do not result in the Group losing significant influence or joint control), the proportionate share of the accumulated exchange differences is reclassified to profit or loss.

Goodwill and fair value adjustments to identifiable assets acquired and liabilities assumed through acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the rate of exchange prevailing at the end of each reporting period. Exchange differences arising are recognised in other comprehensive income.

**3.13 Borrowing costs**

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

**3.14 Government grants**

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred revenue in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

IAS 20.39(a)

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued****3.16 Share-based payment arrangements****3.16.1 Share-based payment transactions of the Company**

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in note 42.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each reporting period, the Group revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled employee benefits reserve.

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the service.

For cash-settled share-based payments, a liability is recognised for the goods or services acquired, measured initially at the fair value of the liability. At the end of each reporting period until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in fair value recognised in profit or loss for the year.

**3.16.2 Share-based payment transactions of the acquiree in a business combination**

When the share-based payment awards held by the employees of an acquiree (acquiree awards) are replaced by the Group's share-based payment awards (replacement awards), both the acquiree awards and the replacement awards are measured in accordance with IFRS 2 ("market-based measure") at the acquisition date. The portion of the replacement awards that is included in measuring the consideration transferred in a business combination equals the market-based measure of the acquiree awards multiplied by the ratio of the portion of the vesting period completed to the greater of the total vesting period or the original vesting period of the acquiree award. The excess of the market-based measure of the replacement awards over the market-based measure of the acquiree awards included in measuring the consideration transferred is recognised as remuneration cost for post-combination service.

However, when the acquiree awards expire as a consequence of a business combination and the Group replaces those awards when it does not have an obligation to do so, the replacement awards are measured at their market-based measure in accordance with IFRS 2. All of the market-based measure of the replacement awards is recognised as remuneration cost for post-combination service.

At the acquisition date, when the outstanding equity-settled share-based payment transactions held by the employees of an acquiree are not exchanged by the Group for its share-based payment transactions, the acquiree share-based payment transactions are measured at their market-based measure at the acquisition date. If the share-based payment transactions have vested by the acquisition date, they are included as part of the non-controlling interest in the acquiree. However, if the share-based payment transactions have not vested by the acquisition date, the market-based measure of the unvested share-based payment transactions is allocated to the non-controlling interest in the acquiree based on the ratio of the portion of the vesting period completed to the greater of the total vesting period or the original vesting period of the share-based payment transaction. The balance is recognised as remuneration cost for post-combination service.

**3.17 Taxation**

Income tax expense represents the sum of the tax currently payable and deferred tax.

**3.17.1 Current tax**

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the consolidated [statement of profit or loss and other comprehensive income/statement of profit or loss] because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Source	International GAAP Holdings Limited
IAS 16.73(a),(b)	<p data-bbox="308 230 1409 259"><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p data-bbox="308 280 504 309"><u>3.17.2 Deferred tax</u></p> <p data-bbox="308 324 1492 607">Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.</p> <p data-bbox="308 622 1497 808">Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.</p> <p data-bbox="308 824 1437 913">The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.</p> <p data-bbox="308 929 1492 1019">Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.</p> <p data-bbox="308 1034 1453 1124">The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.</p> <p data-bbox="308 1140 1503 1487">For the purposes of measuring deferred tax liabilities and deferred tax assets for investment properties that are measured using the fair value model, the carrying amounts of such properties are presumed to be recovered entirely through sale, unless the presumption is rebutted. The presumption is rebutted when the investment property is depreciable and is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale. The directors of the Company reviewed the Group's investment property portfolios and concluded that none of the Group's investment properties are held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, the directors have determined that the 'sale' presumption set out in the amendments to IAS 12 is not rebutted. As a result, the Group has not recognised any deferred taxes on changes in fair value of the investment properties as the Group is not subject to any income taxes on the fair value changes of the investment properties on disposal.</p> <p data-bbox="308 1514 751 1543"><u>3.17.3 Current and deferred tax for the year</u></p> <p data-bbox="308 1559 1489 1713">Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.</p> <p data-bbox="308 1740 691 1769"><b>3.18 Property, plant and equipment</b></p> <p data-bbox="308 1787 1492 1944">Land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the consolidated statement of financial position at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are performed with sufficient regularity such that the carrying amounts do not differ materially from those that would be determined using fair values at the end of each reporting period.</p>

Source	International GAAP Holdings Limited
	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p>Any revaluation increase arising on the revaluation of such land and buildings is recognised in other comprehensive income and accumulated in equity, except to the extent that it reverses a revaluation decrease for the same asset previously recognised in profit or loss, in which case the increase is credited to profit or loss to the extent of the decrease previously expensed. A decrease in the carrying amount arising on the revaluation of such land and buildings is recognised in profit or loss to the extent that it exceeds the balance, if any, held in the properties revaluation reserve relating to a previous revaluation of that asset.</p> <p>Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.</p> <p>Depreciation on revalued buildings is recognised in profit or loss. On the subsequent sale or retirement of a revalued property, the attributable revaluation surplus remaining in the properties revaluation reserve is transferred directly to retained earnings.</p> <p>Freehold land is not depreciated.</p> <p>Fixtures and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.</p> <p>Depreciation is recognised so as to write off the cost or valuation of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.</p> <p>Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets. However, when there is no reasonable certainty that ownership will be obtained by the end of the lease term, assets are depreciated over the shorter of the lease term and their useful lives.</p> <p>An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.</p>
IAS 40.75(a)	<p><b>3.19 Investment property</b></p> <p>Investment properties are properties held to earn rentals and/or for capital appreciation (including property under construction for such purposes). Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at fair value. All of the Group's property interests held under operating leases to earn rentals or for capital appreciation purposes are accounted for as investment properties and are measured using the fair value model. Gains and losses arising from changes in the fair value of investment properties are included in profit or loss in the period in which they arise.</p> <p>An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is derecognised.</p>
IAS 38.118(b)	<p><b>3.20 Intangible assets</b></p> <p><b>3.20.1 Intangible assets acquired separately</b></p> <p>Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.</p>

Source	International GAAP Holdings Limited
	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p><a href="#">3.20.2 Internally-generated intangible assets – research and development expenditure</a></p> <p>Expenditure on research activities is recognised as an expense in the period in which it is incurred.</p> <p>An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:</p> <ul style="list-style-type: none"> <li>• the technical feasibility of completing the intangible asset so that it will be available for use or sale;</li> <li>• the intention to complete the intangible asset and use or sell it;</li> <li>• the ability to use or sell the intangible asset;</li> <li>• how the intangible asset will generate probable future economic benefits;</li> <li>• the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and</li> <li>• the ability to measure reliably the expenditure attributable to the intangible asset during its development.</li> </ul> <p>The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.</p> <p>IAS 38.118(b) Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.</p> <p><a href="#">3.20.3 Intangible assets acquired in a business combination</a></p> <p>Intangible assets acquired in a business combination and recognised separately from goodwill are initially recognised at their fair value at the acquisition date (which is regarded as their cost).</p> <p>IAS 38.118(b) Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.</p> <p><a href="#">3.20.4 Derecognition of intangible assets</a></p> <p>An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.</p> <p><b>3.21 Impairment of tangible and intangible assets other than goodwill</b></p> <p>At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.</p> <p>Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.</p> <p>Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.</p>

IFRS 7.21	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p><b>3.24 Financial instruments</b></p>
	<p>Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instruments.</p> <p>Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.</p>
IFRS 7.21	<p><b>3.25 Financial assets</b></p>
IFRS 7.B5(e)	<p>Financial assets are classified into the following specified categories: financial assets 'at fair value through profit or loss' (FVTPL), 'held-to-maturity' investments, 'available-for-sale' (AFS) financial assets and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.</p> <p><u>3.25.1 Effective interest method</u></p> <p>The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.</p>
	<p>Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL.</p>
	<p><u>3.25.2 Financial assets at FVTPL</u></p> <p>Financial assets are classified as at FVTPL when the financial asset is (i) contingent consideration that may be paid by an acquirer as part of a business combination to which IFRS 3 applies, (ii) held for trading, or (iii) it is designated as at FVTPL.</p> <p>A financial asset is classified as held for trading if:</p> <ul style="list-style-type: none"> <li>• it has been acquired principally for the purpose of selling it in the near term; or</li> <li>• on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or</li> <li>• it is a derivative that is not designated and effective as a hedging instrument.</li> </ul> <p>A financial asset other than a financial asset held for trading or contingent consideration that may be paid by an acquirer as part of a business combination may be designated as at FVTPL upon initial recognition if:</p> <ul style="list-style-type: none"> <li>• such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or</li> <li>• the financial asset forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or</li> <li>• it forms part of a contract containing one or more embedded derivatives, and IAS 39 permits the entire combined contract to be designated as at FVTPL.</li> </ul>
IFRS 7.B5(e)	<p>Financial assets at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the 'other gains and losses' line item. Fair value is determined in the manner described in note 40.</p>

IFRS 7.B5(f), 37(b)	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p><a href="#">3.25.3 Held-to-maturity investments</a></p> <p>Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity dates that the Group has the positive intent and ability to hold to maturity. Subsequent to initial recognition, held-to-maturity investments are measured at amortised cost using the effective interest method less any impairment.</p> <p><a href="#">3.25.4 Loans and receivables</a></p> <p>Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables (including trade and other receivables, bank balances and cash, and others [describe]) are measured at amortised cost using the effective interest method, less any impairment.</p> <p>Interest income is recognised by applying the effective interest rate, except for short-term receivables when the effect of discounting is immaterial.</p> <p><a href="#">3.25.5 Available-for-sale financial assets (AFS financial assets)</a></p> <p>AFS financial assets are non-derivatives that are either designated as AFS or are not classified as (a) loans and receivables, (b) held-to-maturity investments or (c) financial assets at fair value through profit or loss.</p> <p>Listed redeemable notes held by the Group that are traded in an active market are classified as AFS and are stated at fair value at the end of each reporting period. The Group also has investments in unlisted shares that are not traded in an active market but that are also classified as AFS financial assets and stated at fair value at the end of each reporting period (because the directors consider that fair value can be reliably measured). Fair value is determined in the manner described in note 40. Changes in the carrying amount of AFS monetary financial assets relating to changes in foreign currency rates (see below), interest income calculated using the effective interest method and dividends on AFS equity investments are recognised in profit or loss. Other changes in the carrying amount of available-for-sale financial assets are recognised in other comprehensive income and accumulated under the heading of investments revaluation reserve. When the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss.</p> <p>Dividends on AFS equity instruments are recognised in profit or loss when the Group's right to receive the dividends is established.</p> <p>The fair value of AFS monetary financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate prevailing at the end of the reporting period. The foreign exchange gains and losses that are recognised in profit or loss are determined based on the amortised cost of the monetary asset. Other foreign exchange gains and losses are recognised in other comprehensive income.</p> <p>AFS equity investments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured and derivatives that are linked to and must be settled by delivery of such unquoted equity investments are measured at cost less any identified impairment losses at the end of each reporting period.</p> <p><a href="#">3.25.6 Impairment of financial assets</a></p> <p>Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.</p> <p>For AFS equity investments, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.</p> <p>For all other financial assets, objective evidence of impairment could include:</p> <ul style="list-style-type: none"> <li>• significant financial difficulty of the issuer or counterparty; or</li> <li>• breach of contract, such as a default or delinquency in interest or principal payments; or</li> <li>• it becoming probable that the borrower will enter bankruptcy or financial re-organisation; or</li> <li>• the disappearance of an active market for that financial asset because of financial difficulties.</li> </ul>

IFRS 7.21	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
	<p><b>3.28 Hedge accounting</b></p> <p>The Group designates certain hedging instruments, which include derivatives, embedded derivatives and non-derivatives in respect of foreign currency risk, as either fair value hedges, cash flow hedges, or hedges of net investments in foreign operations. Hedges of foreign exchange risk on firm commitments are accounted for as cash flow hedges.</p> <p>At the inception of the hedge relationship, the entity documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk.</p> <p>Note 40 sets out details of the fair values of the derivative instruments used for hedging purposes.</p> <p><a href="#">3.28.1 Fair value hedges</a></p> <p>Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recognised in profit or loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The change in the fair value of the hedging instrument and the change in the hedged item attributable to the hedged risk are recognised in profit or loss in the line item relating to the hedged item.</p> <p>Hedge accounting is discontinued when the Group revokes the hedging relationship, when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. The fair value adjustment to the carrying amount of the hedged item arising from the hedged risk is amortised to profit or loss from that date.</p> <p><a href="#">3.28.2 Cash flow hedges</a></p> <p>The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income and accumulated under the heading of cash flow hedging reserve. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, and is included in the 'other gains and losses' line item.</p> <p>Amounts previously recognised in other comprehensive income and accumulated in equity are reclassified to profit or loss in the periods when the hedged item affects profit or loss, in the same line as the recognised hedged item. However, when the hedged forecast transaction results in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously recognised in other comprehensive income and accumulated in equity are transferred from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability.</p> <p>Hedge accounting is discontinued when the Group revokes the hedging relationship, when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. Any gain or loss recognised in other comprehensive income and accumulated in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in profit or loss. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognised immediately in profit or loss.</p> <p><a href="#">3.28.3 Hedges of net investments in foreign operations</a></p> <p>Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. Any gain or loss on the hedging instrument relating to the effective portion of the hedge is recognised in other comprehensive income and accumulated under the heading of foreign currency translation reserve. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, and is included in the 'other gains and losses' line item.</p> <p>Gains and losses on the hedging instrument relating to the effective portion of the hedge accumulated in the foreign currency translation reserve are reclassified to profit or loss on the disposal of the foreign operation.</p>

Critical accounting judgements and key sources of estimation uncertainty</b></p> <p data-bbox="308 331 456 360"><b>Commentary:</b></p> <p data-bbox="308 371 1465 528"><i>The following are examples of the types of disclosures that might be required in this area. The matters disclosed will be dictated by the circumstances of the individual entity, and by the significance of judgements and estimates made to the performance and financial position of the entity. Instead of disclosing this information in a separate note, it may be more appropriate to include such disclosures in the relevant asset and liability notes, or as part of the relevant accounting policy disclosures.</i></p> <p data-bbox="308 546 1465 672"><i>IFRS 12.7 requires entities to disclose information about significant judgements and assumptions they have made in determining (i) whether they have control of another entity, (ii) whether they have joint control of an arrangement or significant influence over another entity, and (iii) the type of joint arrangement when the arrangement has been structured through a separate vehicle.</i></p> <p data-bbox="308 728 1497 853">In the application of the Group's accounting policies, which are described in note 3, the directors of the Company are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.</p> <p data-bbox="308 871 1477 965">The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.</p> <p data-bbox="308 992 893 1021"><b>4.1 Critical judgements in applying accounting policies</b></p> <p data-bbox="308 1032 1465 1126">The following are the critical judgements, apart from those involving estimations (see note 4.2 below), that the directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the consolidated financial statements.</p> <p data-bbox="308 1144 571 1173"><b>4.1.1 Revenue recognition</b></p> <p data-bbox="308 1191 1490 1413">Note 13.6 describes the expenditure required in the year for rectification work carried out on goods supplied to one of the Group's major customers. These goods were delivered to the customer in the months of January to July 2016, and shortly thereafter the defects were identified by the customer. Following negotiations, a schedule of works was agreed, which will involve expenditure by the Group until 2017. In the light of the problems identified, the directors were required to consider whether it was appropriate to recognise the revenue from these transactions of CU19 million in the current year, in line with the Group's general policy of recognising revenue when goods are delivered, or whether it was more appropriate to defer recognition until the rectification work was complete.</p> <p data-bbox="308 1431 1481 1653">In making their judgement, the directors considered the detailed criteria for the recognition of revenue from the sale of goods set out in IAS 18 and, in particular, whether the Group had transferred to the buyer the significant risks and rewards of ownership of the goods. Following the detailed quantification of the Group's liability in respect of rectification work, and the agreed limitation on the customer's ability to require further work or to require replacement of the goods, the directors are satisfied that the significant risks and rewards have been transferred and that recognition of the revenue in the current year is appropriate, in conjunction with the recognition of an appropriate provision for the rectification costs.</p> <p data-bbox="308 1686 695 1715"><b>4.1.2 Held-to-maturity financial assets</b></p> <p data-bbox="308 1733 1497 1859">The directors have reviewed the Group's held-to-maturity financial assets in the light of its capital maintenance and liquidity requirements and have confirmed the Group's positive intention and ability to hold those assets to maturity. The carrying amount of the held-to-maturity financial assets is CU5.905 million (31 December 2015: CU4.015 million). Details of these assets are set out in note 22.</p>

Source	International GAAP Holdings Limited
	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
	<a href="#">4.1.3 Deferred taxation on investment properties</a>
	<p>For the purposes of measuring deferred tax liabilities or deferred tax assets arising from investment properties that are measured using the fair value model, the directors have reviewed the Group's investment property portfolios and concluded that the Group's investment properties are not held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, in determining the Group's deferred taxation on investment properties, the directors have determined that the presumption that the carrying amounts of investment properties measured using the fair value model are recovered entirely through sale is not rebutted. As a result, the Group has not recognised any deferred taxes on changes in fair value of investment properties as the Group is not subject to any income taxes on the fair value changes of the investment properties on disposal.</p>
IFRS 12.7(a)	<a href="#">4.1.4 Control over C Plus Limited</a>
IFRS 12.9(b)	<p>Note 19 describes that C Plus Limited is a subsidiary of the Group even though the Group has only a 45% ownership interest and has only 45% of the voting rights in C Plus Limited. C Plus Limited is listed on the stock exchange of A Land. The Group has held its 45% ownership since June 2013 and the remaining 55% of the ownership interests are held by thousands of shareholders that are unrelated to the Group.</p>
	<p>The directors of the Company assessed whether or not the Group has control over C Plus Limited based on whether the Group has the practical ability to direct the relevant activities of C Plus Limited unilaterally. In making their judgement, the directors considered the Group's absolute size of holding in C Plus Limited and the relative size of and dispersion of the shareholdings owned by the other shareholders. After assessment, the directors concluded that the Group has a sufficiently dominant voting interest to direct the relevant activities of C Plus Limited and therefore the Group has control over C Plus Limited.</p>
IFRS 12.7(a)	<a href="#">4.1.5 Control over Subtwo Limited</a>
IFRS 12.9(b)	<p>Note 19 describes that Subtwo Limited is a subsidiary of the Group although the Group only owns a 45% ownership interest in Subtwo Limited. Based on the contractual arrangements between the Group and other investors, the Group has the power to appoint and remove the majority of the board of directors of Subtwo Limited that has the power to direct the relevant activities of Subtwo Limited. Therefore, the directors of the Company concluded that the Group has the practical ability to direct the relevant activities of Subtwo Limited unilaterally and hence the Group has control over Subtwo Limited.</p>
IFRS 12.7(b)	<a href="#">4.1.6 Significant influence over B Plus Limited</a>
IFRS 12.9(e)	<p>Note 20 describes that B Plus Limited is an associate of the Group although the Group only owns a 17% ownership interest in B Plus Limited. The Group has significant influence over B Plus Limited by virtue of its contractual right to appoint two out of seven directors to the board of directors of that company.</p>
IFRS 12.7(b), (c)	<a href="#">4.1.7 Classification of JV Electronics Limited as a joint venture</a>
	<p>JV Electronics Limited is a limited liability company whose legal form confers separation between the parties to the joint arrangement and the company itself. Furthermore, there is no contractual arrangement or any other facts and circumstances that indicate that the parties to the joint arrangement have rights to the assets and obligations for the liabilities of the joint arrangement. Accordingly, JV Electronics Limited is classified as a joint venture of the Group. See note 20A for details.</p>
	<a href="#">4.1.8 Discount rate used to determine the carrying amount of the Group's defined benefit obligation</a>
	<p>The Group's defined benefit obligation is discounted at a rate set by reference to market yields at the end of the reporting period on high quality corporate bonds. Significant judgement is required when setting the criteria for bonds to be included in the population from which the yield curve is derived. The most significant criteria considered for the selection of bonds include the issue size of the corporate bonds, quality of the bonds and the identification of outliers which are excluded.</p>

IAS 1.125, 129	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
	<b>4.2 Key sources of estimation uncertainty</b>
	The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.
	<u>4.2.1 Recoverability of internally generated intangible asset</u>
	During the year, the directors considered the recoverability of the Group's internally generated intangible asset arising from its e-business development, which is included in the consolidated statement of financial position at 31 December 2016 with a carrying amount of CU0.5 million (31 December 2015: CU0.5 million).
	The project continues to progress in a satisfactory manner, and customer reaction has reconfirmed the directors' previous estimates of anticipated revenues from the project. However, increased competitor activity has caused the directors to reconsider their assumptions and anticipated margins on these products. Detailed sensitivity analysis has been carried out and the directors are confident that the carrying amount of the asset will be recovered in full, even if returns are reduced. This situation will be closely monitored, and adjustments made in future periods if future market activity indicates that such adjustments are appropriate.
	<u>4.2.2 Impairment of goodwill</u>
	Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value. Where the actual future cash flows are less than expected, a material impairment loss may arise.
	The carrying amount of goodwill at 31 December 2016 was CU20.5 million (31 December 2015: CU24.3 million) after an impairment loss of CU235,000 was recognised during 2016 (2015: nil). Details of the impairment loss calculation are set out in note 17.
	<u>4.2.3 Useful lives of property, plant and equipment</u>
As described at 3.18 above, the Group reviews the estimated useful lives of property, plant and equipment at the end of each reporting period. During the current year, the directors determined that the useful lives of certain items of equipment should be shortened, due to developments in technology.	
The financial effect of this reassessment, assuming the assets are held until the end of their estimated useful lives, is to increase the depreciation expense in the current financial year and for the next 3 years, by the following amounts:

	<b>5. Revenue</b>		
IAS 18.35(b)	The following is an analysis of the Group's revenue for the year from continuing operations (excluding investment income – see note 7).		
		Year ended 31/12/16	Year ended 31/12/15
		CU'000	CU'000
IAS 18.35(b)	Revenue from the sale of goods	119,248	129,087
IAS 18.35(b)	Revenue from the rendering of services	16,388	18,215
IAS 11.39(a)	Construction contract revenue	5,298	4,773
		140,934	152,075
	<b>6. Segment information</b>		
	<b>Commentary:</b>		
	<b>When are entities required to present segment information?</b>		
	<i>The following segment information is required by IFRS 8 Operating Segments to be presented in the consolidated financial statements of a group with a parent (and in the separate or individual financial statements of an entity):</i>		
	<ul style="list-style-type: none"> <li>• whose debt or equity instruments are traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets); or</li> <li>• that files, or is in the process of filing, its (consolidated) financial statements with a securities commission or other regulatory organisation for the purpose of issuing any class of instruments in a public market.</li> </ul>		
	<b>What needs to be disclosed when entities aggregate operating segments into a single operating segment?</b>		
	<i>IFRS 8.22 requires entities to give a brief description of the operating segments that have been aggregated and the economic indicators that have been assessed in determining the aggregated operating segments share similar economic characteristics.</i>		
	<i>According to IFRS 8.12, two or more operating segments may be aggregated into a single operating segment if the segments have similar economic characteristics and the segments are similar in each of the following respects:</i>		
	<ul style="list-style-type: none"> <li>• the nature of the products and services;</li> <li>• the nature of the production processes;</li> <li>• the type or class of customer for their products and services;</li> <li>• the methods used to distribute their products or provide their services; and</li> <li>• if applicable, the nature of the regulatory environment, for example, banking, insurance or public utilities.</li> </ul>

	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p><b>6.1 Products and services from which reportable segments derive their revenues</b></p> <p>Information reported to the chief operating decision maker (CODM) for the purposes of resource allocation and assessment of segment performance focuses on the types of goods or services delivered or provided, and in respect of the ‘electronic equipment’ and ‘leisure goods’ operations, the information is further analysed based on the different classes of customers. The directors of the Company have chosen to organise the Group around differences in products and services. No operating segments have been aggregated in arriving at the reportable segments of the Group.</p> <p>Specifically, the Group's reportable segments under IFRS 8 are as follows:</p> <table><tr><td>Electronic equipment</td><td>Leisure goods</td><td>– direct sales</td></tr><tr><td></td><td></td><td>– wholesalers</td></tr><tr><td></td><td></td><td>– internet sales</td></tr><tr><td>Leisure goods</td><td></td><td>– wholesalers</td></tr><tr><td></td><td></td><td>– retail outlets</td></tr></table> <p>Computer software – Installation of computer software for specialised business applications</p> <p>Construction – Construction of residential properties.</p> <p>The leisure goods segments supply sports shoes and equipment, as well as outdoor play equipment.</p>	Electronic equipment	Leisure goods	– direct sales			– wholesalers			– internet sales	Leisure goods		– wholesalers			– retail outlets
Electronic equipment	Leisure goods	– direct sales														
		– wholesalers														
		– internet sales														
Leisure goods		– wholesalers														
		– retail outlets														
IFRS 8.22																
IFRS 8.22(aa)	<p>The electronic equipment (direct sales) segment includes a number of direct sales operations in various cities within Country A each of which is considered as a separate operating segment by the CODM. For financial statements presentation purposes, these individual operating segments have been aggregated into a single operating segment taking into account the following factors:</p> <ul style="list-style-type: none"><li>• these operating segments have similar long-term gross profit margins;</li><li>• the nature of the products and production processes are similar; and</li><li>• the methods used to distribute the products to the customers are the same.</li><li>• [Other factors, please specify]</li></ul> <p>Two operations (the manufacture and sale of toys and bicycles) were discontinued in the current year. The segment information reported on the next pages does not include any amounts for these discontinued operations, which are described in more detail in note 11.</p>

	<b>6.2 Segment revenues and results</b>			
IFRS 8.23, 23(a)	The following is an analysis of the Group's revenue and results from continuing operations by reportable segment.			
		Segment revenue		Segment profit
		Year ended 31/12/16	Year ended 31/12/15	Year ended 31/12/16
		CU'000	CU'000	CU'000
	Electronic equipment			
	– direct sales	37,525	39,876	6,621
	– wholesalers	20,194	22,534	6,618
	– internet sales	27,563	29,699	6,604
	Leisure goods			
	– wholesalers	13,514	18,332	3,252
	– retail outlets	20,452	18,646	4,921
	Computer software	16,388	18,215	3,201
	Construction	5,298	4,773	389
IFRS 8.28(a)	Total for continuing operations	140,934	152,075	31,606
	Share of profit of associates			866
	Share of profit of a joint venture			337
	Gain recognised on disposal of interest in former associate			581
	Investment income			3,633
	Other gains and losses			647
	Central administration costs and directors' salaries			(2,933)
	Finance costs			(4,420)
IFRS 8.28(b)	Profit before tax (continuing operations)			30,317
IFRS 8.23(b)	Segment revenue reported above represents revenue generated from external customers. There were no inter-segment sales in the current year (2015: nil).			
IFRS 8.27	The accounting policies of the reportable segments are the same as the Group's accounting policies described in note 3. Segment profit represents the profit before tax earned by each segment without allocation of central administration costs and directors' salaries, share of profit of associates, share of profit of a joint venture, gain recognised on disposal of interest in former associate, investment income, other gains and losses, as well as finance costs. This is the measure reported to the chief operating decision maker for the purposes of resource allocation and assessment of segment performance.

	<b>11. Discontinued operations</b>							
	<b>11.1 Disposal of toy manufacturing operations</b>							
IFRS 5.30 IFRS 5.41	On 28 September 2016, the Company entered into a sale agreement to dispose of Subzero Limited, which carried out all of the Group's toy manufacturing operations. The proceeds of sale substantially exceeded the carrying amount of the related net assets and, accordingly, no impairment losses were recognised on the reclassification of these operations as held for sale. The disposal of the toy manufacturing operations is consistent with the Group's long-term policy to focus its activities in the electronic equipment and other leisure goods markets. The disposal was completed on 30 November 2016, on which date control of the toy manufacturing operations passed to the acquirer. Details of the assets and liabilities disposed of, and the calculation of the profit or loss on disposal, are disclosed in note 45.							
	<b>11.2 Plan to dispose of the bicycle business</b>							
IFRS 5.30 IFRS 5.41	On 30 November 2016, the directors announced a plan to dispose of the Group's bicycle business. The disposal is consistent with the Group's long-term policy to focus its activities on the electronic equipment and other leisure goods markets. The Group is actively seeking a buyer for its bicycle business and expects to complete the sale by 31 July 2017. The Group has not recognised any impairment losses in respect of the bicycle business, neither when the assets and liabilities of the operation were reclassified as held for sale nor at the end of the reporting period (see note 12).

	The bicycle business has been classified and accounted for at 31 December 2016 as a disposal group held for sale (see note 12).							

Source	International GAAP Holdings Limited		
	Notes to the consolidated financial statements for the year ended 31 December 2016 – continued		
	12. Assets classified as held for sale		
		31/12/16	31/12/15
		CU'000	CU'000
	Freehold land held for sale (i)	1,260	–
	Assets related to bicycle business (ii)	21,076	–
		22,336	–
	Liabilities associated with assets held for sale (ii)	3,684	–
IFRS 5.41	(i) The Group intends to dispose of a parcel of freehold land it no longer utilises in the next 12 months. The property located on the freehold land was previously used in the Group's toy operations and has been fully depreciated. A search is underway for a buyer. No impairment loss was recognised on reclassification of the land as held for sale nor as at 31 December 2016 as the directors of the Company expect that the fair value (estimated based on the recent market prices of similar properties in similar locations) less costs to sell is higher than the carrying amount.		
IFRS 5.41 IFRS 5.38	(ii) As described in note 11, the Group plans to dispose of its bicycle business and anticipates that the disposal will be completed by 31 July 2017. The Group is currently in negotiation with some potential buyers and the directors of the Company expect that the fair value less costs to sell of the business will be higher than the aggregate carrying amount of the related assets and liabilities. Therefore, no impairment loss was recognised on reclassification of the assets and liabilities as held for sale nor as at 31 December 2016. The major classes of assets and liabilities of the bicycle business at the end of the reporting period are as follows:		
		31/12/16	
		CU'000

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>					
IAS 33.70(b)	The weighted average number of ordinary shares for the purpose of diluted earnings per share reconciles to the weighted average number of ordinary shares used in the calculation of basic earnings per share as follows.					
				Year ended 31/12/16	Year ended 31/12/15	
				'000	'000	
	Weighted average number of ordinary shares used in the calculation of basic earnings per share			17,432	20,130	
	Shares deemed to be issued for no consideration in respect of:					
	– employee options			161	85	
	– partly paid ordinary shares			1,073	900	
	– convertible notes			1,350	–	
	– others [describe]			–	–	
	Weighted average number of ordinary shares used in the calculation of diluted earnings per share			20,016	21,115	
IAS 33.70(c)	The following potential ordinary shares are anti-dilutive and are therefore excluded from the weighted average number of ordinary shares for the purpose of diluted earnings per share.					
				Year ended 31/12/16	Year ended 31/12/15	
				'000	'000	
	[Describe]			–	–	
	<b>14.3 Impact of changes in accounting policies</b>					
IAS 8.28(f)	Changes in the Group's accounting policies during the year are described in detail in note 2.1. The changes in accounting policies affected only the Group's results from continuing operations. To the extent that those changes have had an impact on results reported for 2016 and 2015, they have had an impact on the amounts reported for earnings per share.					
	The following table summarises that effect on both basic and diluted earnings per share.					
	<b>Commentary:</b>					
	<i>In this model, despite the fact that the application of the amendments to IFRSs has not resulted in any retrospective restatement or reclassification of items in the Group's consolidated financial statements (see note 2.1), this note 14.3 has been presented for illustrative purposes only.</i>

	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p><b>15.1 Fair value measurement of the Group's freehold land and buildings</b></p> <p>IAS 16.77(a) &amp; (b) IFRS 13.91(a), 93(d), 93(h)(i)</p> <p>The Group's freehold land and buildings are stated at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. The fair value measurements of the Group's freehold land and buildings as at 31 December 2016 and 31 December 2015 were performed by Messrs R &amp; P Trent, independent valuers not related to the Group. Messrs R &amp; P Trent are members of the Institute of Valuers of A Land, and they have appropriate qualifications and recent experience in the fair value measurement of properties in the relevant locations.</p> <p>The fair value of the freehold land was determined [based on the market comparable approach that reflects recent transaction prices for similar properties/other methods (describe)].</p> <p>The fair value of the buildings was determined using [the cost approach that reflects the cost to a market participant to construct assets of comparable utility and age, adjusted for obsolescence/other methods (describe)]. The significant inputs include the estimated construction costs and other ancillary expenditure of approximately CU14.7 million (31 December 2015: approximately CU18.1 million), and a depreciation factor applied to the estimated construction cost of approximately 25% (31 December 2015: approximately 23%). A slight increase in the depreciation factor would result in a significant decrease in the fair value of the buildings, and a slight increase in the estimated construction costs would result in a significant increase in the fair value of the buildings, and vice versa.</p> <p>There has been no change to the valuation technique during the year.</p> <p>IFRS 13.93(a),(b)</p> <p>Details of the Group's freehold land and buildings and information about the fair value hierarchy as at the end of the reporting period are as follows:</p> <table><thead><tr><th></th><th>Level 2</th><th>Level 3</th><th>Fair value as at 31/12/16</th></tr><tr><th></th><th>CU'000</th><th>CU'000</th><th>CU'000</th></tr></thead><tbody><tr><td>A manufacturing plant in A land that contains:</td><td></td><td></td><td></td></tr><tr><td>– freehold land</td><td>13,868</td><td>–</td><td>13,868</td></tr><tr><td>– buildings</td><td>–</td><td>11,147</td><td>11,147</td></tr></tbody></table> <table><thead><tr><th></th><th>Level 2</th><th>Level 3</th><th>Fair value as at 31/12/15</th></tr><tr><th></th><th>CU'000</th><th>CU'000</th><th>CU'000</th></tr></thead><tbody><tr><td>A manufacturing plant in A land that contains:</td><td></td><td></td><td></td></tr><tr><td>– freehold land</td><td>15,050</td><td>–</td><td>15,050</td></tr><tr><td>– buildings</td><td>–</td><td>13,667</td><td>13,667</td></tr></tbody></table>		Level 2	Level 3	Fair value as at 31/12/16		CU'000	CU'000	CU'000	A manufacturing plant in A land that contains:				– freehold land	13,868	–	13,868	– buildings	–	11,147	11,147		Level 2	Level 3	Fair value as at 31/12/15		CU'000	CU'000	CU'000	A manufacturing plant in A land that contains:				– freehold land	15,050	–	15,050	– buildings	–	13,667	13,667

	<p><b>Commentary:</b></p> <p>The categorisation of fair value measurements into the different levels of the fair value hierarchy depends on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement. The above categorisations are for illustrative purpose only. It is worth noting the following points:</p> <ul style="list-style-type: none"><li>• The classification into the 3-level hierarchy is not an accounting policy choice. For land and buildings, given their unique nature, it is extremely rare that the fair value measurement would be identified as a Level 1 measurement. Whether the fair value measurement in its entirety should be classified into Level 2 or Level 3 would depend on the extent to which the inputs and assumptions used in arriving at the fair value are observable. In many situations where valuation techniques (with significant unobservable inputs) are used in estimating the fair value of the real estate properties, the fair value measurement as a whole would be classified as Level 3.</li><li>• The level within which the fair value measurement is categorised bears no relation to the quality of the valuation. For example, the fact that a real estate property is classified as a Level 3 fair value measurement does not mean that the property valuation is not reliable – it merely indicates that significant unobservable inputs have been used and significant judgement was required in arriving at the fair value.</li></ul>

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>												
IFRS 13.93(c)	There were no transfers between Level 1 and Level 2 during the year.												
IFRS 13.95	[Where there had been a transfer between different levels of the fair value hierarchy, the Group should disclose the reasons for the transfer and the Group's policy for determining when transfers between levels are deemed to have occurred (for example, at the beginning or end of the reporting period or at the date of the event that caused the transfer).]												
IAS 16.77(e)	<p>Had the Group's freehold and buildings (other than land and buildings classified as held for sale or included in a disposal group) been measured on a historical cost basis, their carrying amount would have been as follows.</p> <table><tr><td></td><td>31/12/16</td><td>31/12/15</td></tr><tr><td></td><td>CU'000</td><td>CU'000</td></tr><tr><td>Freehold land</td><td>11,957</td><td>13,104</td></tr><tr><td>Buildings</td><td>7,268</td><td>10,340</td></tr></table>		31/12/16	31/12/15		CU'000	CU'000	Freehold land	11,957	13,104	Buildings	7,268	10,340
	31/12/16	31/12/15											
	CU'000	CU'000											
Freehold land	11,957	13,104											
Buildings	7,268	10,340											
IAS 36.130(a) to (g)	<p><b>15.2 Impairment losses recognised in the year</b></p> <p>During the year, as the result of the unexpected poor performance of a manufacturing plant, the Group carried out a review of the recoverable amount of that manufacturing plant and the related equipment. These assets are used in the Group's electronic equipment reportable segment. The review led to the recognition of an impairment loss of CU1.09 million, which has been recognised in profit or loss. The Group also estimated the fair value less costs of disposal of the manufacturing plant and the related equipment, which is based on the recent market prices of assets with similar age and obsolescence. The fair value less costs of disposal is less than the value in use and hence the recoverable amount of the relevant assets has been determined on the basis of their value in use, which amounted to CU15 million as at 31 December 2016. The discount rate used in measuring value in use was 9% per annum. No impairment assessment was performed in 2015 as there was no indication of impairment.</p>												
IAS 36.131	Additional impairment losses recognised in respect of property, plant and equipment in the year amounted to CU0.114 million. These losses are attributable to greater than anticipated wear and tear. Those assets have been impaired in full and they belonged to the Group's electronic equipment reportable segment.												
IAS 36.126(a)	The impairment losses have been included in profit or loss in the [other expenses/cost of sales] line item.												
IAS 16.74(a)	<p><b>15.3 Assets pledged as security</b></p> <p>Freehold land and buildings with a carrying amount of approximately CU22 million (31 December 2015: approximately CU26.2 million) have been pledged to secure borrowings of the Group (see note 32). The freehold land and buildings have been pledged as security for bank loans under a mortgage. The Group is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.</p> <p>In addition, the Group's obligations under finance leases (see note 38) are secured by the lessors' title to the leased assets, which have a carrying amount of CU28,000 (31 December 2015: CU162,000).</p>

	<b>16.1 Fair value measurement of the Group's investment properties</b>		
IAS 40.75(e) IFRS 13.91(a), 93(d)	The fair value of the Group's investment property as at 31 December 2016 and 31 December 2015 has been arrived at on the basis of a valuation carried out on the respective dates by Messrs R & P Trent, independent valuers not related to the Group. Messrs R & P Trent are members of the Institute of Valuers of A Land, and they have appropriate qualifications and recent experience in the valuation of properties in the relevant locations. The fair value was determined [based on the market comparable approach that reflects recent transaction prices for similar properties/capitalisation of net income method, where the market rentals of all lettable units of the properties are assessed by reference to the rentals achieved in the lettable units as well as other lettings of similar properties in the neighbourhood. The capitalisation rate adopted is made by reference to the yield rates observed by the valuers for similar properties in the locality and adjusted based on the valuers' knowledge of the factors specific to the respective properties/other methods (describe)].		
	There has been no change to the valuation technique during the year.		
	In estimating the fair value of the properties, the highest and best use of the properties is their current use.		

Source	International GAAP Holdings Limited			
IFRS 13.93(a),(b)	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>			
	Details of the Group's investment properties and information about the fair value hierarchy as at the end of the reporting period are as follows:			
		Level 2	Level 3	Fair value as at 31/12/16
		CU'000	CU'000	CU'000
	Commercial units located in A Land – BB City	–	1,020	1,020
	Office units located in A Land – CC City	–	1,984	1,984
	Residential units located in A Land – DD City	1,964	–	1,964
	Total			4,968
		Level 2	Level 3	Fair value as at 31/12/15
		CU'000	CU'000	CU'000
	Commercial units located in A Land – BB City	–	1,123	1,123
	Office units located in A Land – CC City	–	1,964	1,964
	Residential units located in A Land – DD City	1,854	–	1,854
	Total			4,941
	For the residential units located in DD City, A Land, the fair value was derived using the market comparable approach based on recent market prices without any significant adjustments being made to the market observable data.			
For investment properties categorised into Level 3 of the fair value hierarchy, the following information is relevant:				
IFRS 13.93(d) IFRS 13.93(h)(i)		<b>Valuation technique(s)</b>	<b>Significant unobservable input(s)</b>	<b>Sensitivity</b>
	Office units located in A Land – CC City	Income Capitalisation Approach	Capitalisation rate, taking into account the capitalisation of rental income potential, nature of the property, and prevailing market condition, of x% – x% (2015: x% – x%).	A slight increase in the capitalisation rate used would result in a significant decrease in fair value, and vice versa.
			Monthly market rent, taking into account the differences in location, and individual factors, such as frontage and size, between the comparables and the property, at an average of CU[X] (2015: CU[X]) per square metre (“sqm”) per month.	A significant increase in the market rent used would result in a significant increase in fair value, and vice versa.
	Commercial units located in A Land – BB City	Income Capitalisation Approach	Capitalisation rate, taking into account the capitalisation of rental income potential, nature of the property, and prevailing market condition, of x% – x% (2015: x% – x%).	A slight increase in the capitalisation rate used would result in a significant decrease in fair value, and vice versa.
			Monthly market rent, taking into account the differences in location, and individual factors, such as frontage and size, between the comparables and the property, at an average of CU[X] (2015: CU[X]) per sqm per month.	A significant increase in the market rent used would result in a significant increase in fair value, and vice versa.

The cash flows beyond that five-year period have been extrapolated using a steady 5% (2015: 5%) per annum growth rate which is the projected long-term average growth rate for the international leisure goods market. The directors believe that any reasonably possible change in the key assumptions on which recoverable amount is based would not cause the aggregate carrying amount to exceed the aggregate recoverable amount of the cash-generating unit.</p> <p><a href="#">Electronic equipment – internet sales</a></p> <p>The recoverable amount of the 'electronic equipment – internet sales' segment as a cash-generating unit is determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period, and a discount rate of 9% per annum (2015: 8% per annum). Cash flows beyond that five-year period have been extrapolated using a steady 11% (2015: 10%) per annum growth rate. This growth rate exceeds by 0.5 percentage points the long-term average growth rate for the international electronic equipment market. However, among other factors, the internet sales cash-generating unit benefits from the protection of a 20-year patent on the Series Z electronic equipment, granted in 2011, which is still acknowledged as one of the top models in the market. The steady growth rate of 11% is estimated by the directors of the Company based on past performance of the cash-generating unit and their expectations of market development. The directors estimate that a decrease in growth rate by 1 to 5% would result in the aggregate carrying amount of the cash-generating unit exceeding the recoverable amount of the cash-generating unit by approximately CU 1 to 5 million. The directors believe that any reasonably possible change in the other key assumptions on which recoverable amount is based would not cause the 'electronic equipment – internet sales' carrying amount to exceed its recoverable amount.</p>		31/12/16	31/12/15		CU'000	CU'000	Leisure goods – retail outlets	10,262	9,720	Electronic equipment – internet sales	8,723	8,578	Construction operations – Murphy Construction	235	235	Construction operations – other	1,500	1,500		<u>20,720</u>	<u>20,033</u>

IAS 36.130	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>					
	<a href="#">Construction operations – Murphy Construction</a>					
	<p>The goodwill associated with Murphy Construction arose when that business was acquired by the Group in 2010. The business has continued to operate on a satisfactory basis, but without achieving any significant increase in market share. During the year, the government of A Land introduced new regulations requiring registration and certification of builders for government contracts. In the light of the decision to focus the Group's construction activities through the other operating units in Subthree Limited, the directors have decided not to register Murphy Construction for this purpose, which means that it has no prospects of obtaining future contracts. The directors have consequently determined to write off the goodwill directly related to Murphy Construction amounting to CU235,000. No other write-down of the assets of Murphy Construction is considered necessary. Contracts in progress at the end of the year will be completed without loss to the Group. The recoverable amount of the Murphy Construction cash-generating unit amounted to CU8,700 as at 31 December 2016.</p> <p>The impairment loss has been included in profit or loss in the 'other expenses' line item.</p>					
	<a href="#">Construction operations – other</a>					
	<p>The recoverable amount of the Group's remaining construction operations has been determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period, and a discount rate of 9% per annum (2015: 8% per annum). Cash flows beyond that five-year period have been extrapolated using a steady 8% (2015: 8%) per annum growth rate. This growth rate does not exceed the long-term average growth rate for the construction market in A Land. The directors believe that any reasonably possible further change in the key assumptions on which recoverable amount is based would not cause the construction operations carrying amount to exceed its recoverable amount.</p> <p>The key assumptions used in the value in use calculations for the leisure goods and electronic equipment cash-generating units are as follows.</p> <table border="0"> <tr> <td data-bbox="308 1104 598 1126">Budgeted market share</td><td data-bbox="630 1104 1500 1261">Average market share in the period immediately before the budget period, plus a growth of 1-2% of market share per year. The values assigned to the assumption reflect past experience and are consistent with the directors' plans for focusing operations in these markets. The directors believe that the planned market share growth per year for the next five years is reasonably achievable.</td></tr> <tr> <td data-bbox="308 1294 598 1317">Budgeted gross margin</td><td data-bbox="630 1294 1500 1417">Average gross margins achieved in the period immediately before the budget period, increased for expected efficiency improvements. This reflects past experience, except for efficiency improvements. The directors expect efficiency improvements of 3 – 5% per year to be reasonably achievable.</td></tr> <tr> <td data-bbox="308 1451 598 1473">Raw materials price inflation</td><td data-bbox="630 1451 1500 1541">Forecast consumer price indices during the budget period for the countries from which raw materials are purchased. The values assigned to the key assumption are consistent with external sources of information.</td></tr> </table>	Budgeted market share	Average market share in the period immediately before the budget period, plus a growth of 1-2% of market share per year. The values assigned to the assumption reflect past experience and are consistent with the directors' plans for focusing operations in these markets. The directors believe that the planned market share growth per year for the next five years is reasonably achievable.	Budgeted gross margin	Average gross margins achieved in the period immediately before the budget period, increased for expected efficiency improvements. This reflects past experience, except for efficiency improvements. The directors expect efficiency improvements of 3 – 5% per year to be reasonably achievable.	Raw materials price inflation
Budgeted market share	Average market share in the period immediately before the budget period, plus a growth of 1-2% of market share per year. The values assigned to the assumption reflect past experience and are consistent with the directors' plans for focusing operations in these markets. The directors believe that the planned market share growth per year for the next five years is reasonably achievable.					
Budgeted gross margin	Average gross margins achieved in the period immediately before the budget period, increased for expected efficiency improvements. This reflects past experience, except for efficiency improvements. The directors expect efficiency improvements of 3 – 5% per year to be reasonably achievable.					
Raw materials price inflation	Forecast consumer price indices during the budget period for the countries from which raw materials are purchased. The values assigned to the key assumption are consistent with external sources of information.

IFRS 12.9(b)	<p>(i) The Group owns 45% equity shares of Subtwo Limited. However, based on the contractual arrangements between the Group and other investors, the Group has the power to appoint and remove the majority of the board of directors of Subtwo Limited. The relevant activities of Subtwo Limited are determined by the board of directors of Subtwo Limited based on simple majority votes. Therefore, the directors of the Group concluded that the Group has control over Subtwo Limited and Subtwo Limited is consolidated in these financial statements.</p> <p>(ii) C Plus Limited is listed on the stock exchange of A Land. Although the Group has only 45% ownership in C Plus Limited, the directors concluded that the Group has a sufficiently dominant voting interest to direct the relevant activities of C Plus Limited on the basis of the Group's absolute size of shareholding and the relative size of and dispersion of the shareholdings owned by other shareholders. The 55% ownership interests in C Plus Limited are owned by thousands of shareholders that are unrelated to the Group, none individually holding more than 2%.</p>

IAS 28.22	<b>20.2 Change in the Group's ownership interest in an associate</b>		
	In the prior year, the Group held a 40% interest in E Plus Limited and accounted for the investment as an associate. In December 2016, the Group disposed of a 30% interest in E Plus Limited to a third party for proceeds of CU1.245 million (received in January 2017). The Group has accounted for the remaining 10% interest as an available-for-sale investment whose fair value at the date of disposal was CU360,000, which was determined using a discounted cash flow model (please describe key factors and assumptions used in determining the fair value). This transaction has resulted in the recognition of a gain in profit or loss, calculated as follows.		
			CU'000
	Proceeds of disposal		1,245
	Plus: fair value of investment retained (10%)		360
	Less: carrying amount of investment on the date of loss of significant influence		(1,024)
	Gain recognised		581
	The gain recognised in the current year comprises a realised profit of CU477,000 (being the proceeds of CU1.245 million less CU768,000 carrying amount of the interest disposed of) and an unrealised profit of CU104,000 (being the fair value less the carrying amount of the 10% interest retained). A current tax expense of CU143,000 arose on the gain realised in the current year, and a deferred tax expense of CU32,000 has been recognised in respect of the portion of the profit recognised that is not taxable until the remaining interest is disposed of.

	<b>25.1 Trade receivables</b>																																		
IFRS 7.33(b)	The average credit period on sales of goods is 60 days. No interest is charged on trade receivables for the first 60 days from the date of the invoice. Thereafter, interest is charged at 2% per annum on the outstanding balance. The Group has recognised an allowance for doubtful debts of 100% against all receivables over 120 days because historical experience has been that receivables that are past due beyond 120 days are not recoverable. Allowances for doubtful debts are recognised against trade receivables between 60 days and 120 days based on estimated irrecoverable amounts determined by reference to past default experience of the counterparty and an analysis of the counterparty's current financial position.																																		
IFRS 7.34(c), 36(c)	Before accepting any new customer, the Group uses an external credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. Limits and scoring attributed to customers are reviewed twice a year. 80% of the trade receivables that are neither past due nor impaired have the best credit scoring attributable under the external credit scoring system used by the Group. Of the trade receivables balance at the end of the year, CU6.9 million (31 December 2015: CU5.9 million) is due from Company A, the Group's largest customer (see notes 6.7 and 40.9). There are no other customers who represent more than 5% of the total balance of trade receivables.																																		
IFRS 7.37	Trade receivables disclosed above include amounts (see below for aged analysis) that are past due at the end of the reporting period for which the Group has not recognised an allowance for doubtful debts because there has not been a significant change in credit quality and the amounts (which include interest accrued after the receivable is more than 60 days outstanding) are still considered recoverable.

	Unwind of discount	–	–
	Balance at end of the year	798	838
IFRS 7.33(a),(b)	In determining the recoverability of a trade receivable, the Group considers any change in the credit quality of the trade receivable from the date credit was initially granted up to the end of the reporting period. The concentration of credit risk is limited due to the fact that the customer base is large and unrelated.		
IFRS 7.37(b)	Included in the allowance for doubtful debts are individually impaired trade receivables amounting to CU63,000 (31 December 2015: CU430,000) which have been placed under liquidation. The impairment recognised represents the difference between the carrying amount of these trade receivables and the present value of the expected liquidation proceeds. The Group does not hold any collateral over these balances.		
IFRS 7.37(b)	<u>Age of impaired trade receivables</u>		
		31/12/16	31/12/15
		CU'000	CU'000
	60-90 days	353	320
	91-120 days	191	101
	121+ days	654	717
	Total	1,198	1,138
	<b>25.2 Transfer of financial assets</b>		
IFRS 7.14(a), 42D(a), (b), (c), (f)	During the year, the Group discounted trade receivables with an aggregate carrying amount of CU1.052 million to a bank for cash proceeds of CU1 million. If the trade receivables are not paid at maturity, the bank has the right to request the Group to pay the unsettled balance. As the Group has not transferred the significant risks and rewards relating to these trade receivables, it continues to recognise the full carrying amount of the receivables and has recognised the cash received on the transfer as a secured borrowing (see note 32).		
IFRS 7.42D(e)	At the end of the reporting period, the carrying amount of the trade receivables that have been transferred but have not been derecognised amounted to CU0.946 million and the carrying amount of the associated liability is CU0.923 million.

IAS 11.42(b)	– to customers under construction contracts	(36) (15)
		204 215
IAS 11.40(b),(c)	At 31 December 2016, retentions held by customers for contract work amounted to CU75,000 (31 December 2015: CU69,000). Advances received from customers for contract work amounted to CU14,000 (31 December 2015: nil).	
	<p><b>Commentary:</b></p> <p>Notes 28 to 31 below set out detailed descriptions and reconciliations for each class of share capital and each component of equity, as required by IAS 1.79, IAS 1.106 and IAS 1.106A. IAS 1 permits some flexibility regarding the level of detail presented in the statement of changes in equity and these supporting notes. IAS 1 allows an analysis of other comprehensive income by item for each component of equity to be presented either in the statement of changes in equity or in the notes. For the purposes of the preparation of this model, the Group has elected to present the analysis of other comprehensive income in the notes.</p> <p>IAS 1 also allows that some of the details regarding items of other comprehensive income (income tax and reclassification adjustments) may be disclosed in the notes rather than in the statement of profit or loss and other comprehensive income. Entities will determine the most appropriate presentation for their circumstances – electing to present much of the detail in the notes (as we have done in these model financial statements) ensures that the primary financial statements are not cluttered by unnecessary detail, but it does result in very detailed supporting notes.</p> <p>Whichever presentation is selected, entities will need to ensure that the following requirements are met:</p> <ul style="list-style-type: none"> <li>• detailed reconciliations are required for each class of share capital (in the statement of changes in equity or in the notes);</li> <li>• detailed reconciliations are required for each component of equity – separately disclosing the impact on each such component of (i) profit or loss, (ii) each item of other comprehensive income, and (iii) transactions with owners in their capacity as owners (in the statement of changes in equity or in the notes);</li> <li>• the amount of income tax relating to each item of other comprehensive income should be disclosed (in the statement of profit or loss and other comprehensive income or in the notes); and</li> <li>• reclassification adjustments should be presented separately from the related item of other comprehensive income (in the statement of profit or loss and other comprehensive income or in the notes).</li> </ul>

	Others [describe]	– –
	Balance at end of year	1,198 51
IAS 1.79(b)	The properties revaluation reserve arises on the revaluation of land and buildings. When revalued land or buildings are sold, the portion of the properties revaluation reserve that relates to that asset is transferred directly to retained earnings. Items of other comprehensive income included in the properties revaluation reserve will not be reclassified subsequently to profit or loss.	
IAS 1.82A		
IAS 16.77(f)	Distributions from the properties revaluation reserve can be made where they are in accordance with the requirements of the Company's constitution, the Corporations Act and relevant case law. Amounts may also be effectively distributed out of the properties revaluation reserve as part of a share buy-back. Generally, there is no restriction on the payment of 'bonus shares' out of the properties revaluation reserve. However, the payment of cash distributions out of the reserve is restricted by the terms of the Company's constitution. These restrictions do not apply to any amounts transferred to retained profits. The directors do not currently intend to make any distribution from the properties revaluation reserve.

IAS 1.107	On 23 May 2016, a dividend of 32.1 cents per share (total dividend CU6.515 million) was paid to holders of fully paid ordinary shares. In May 2015, the dividend paid was 31.64 cents per share (total dividend CU6.369 million).  Dividends of 10 cents per share were paid on convertible non-participating preference shares during the year (2015: 10 cents per share) amounting to a total dividend of CU0.12 million (2015: CU0.11 million).		
IAS 1.137(a) IAS 10.13	In respect of the current year, the directors propose that a dividend of 26.31 cents per share be paid to shareholders on 25 May 2017. This dividend is subject to approval by shareholders at the Annual General Meeting and has not been included as a liability in these consolidated financial statements. The proposed dividend is payable to all shareholders on the Register of Members on 21 April 2017. The total estimated dividend to be paid is CU3.905 million. The payment of this dividend will not have any tax consequences for the Group.

Non-controlling interest relating to outstanding vested share options held by the employees of Subsix Limited (i)	5	–																																																																											
Balance at end of year	26,761	22,058																																																																											
	<p>(i) As at 31 December 2016, executives and senior employees of Subsix Limited held options over 5,000 ordinary shares of Subsix Limited, of which 2,000 will expire on 12 March 2018 and 3,000 will expire on 17 September 2018. These share options were issued by Subsix Limited before it was acquired by the Group in the current year. All of the outstanding share options had vested by the acquisition date of Subsix Limited. CU5,000 represents the market-based measure of these share options measured in accordance with IFRS 2 at the acquisition date. Further details of the employee share option plan are provided in note 42.2.</p>

IFRS 7.7	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p><b>32.1 Summary of borrowing arrangements</b></p> <p>(i) Bills of exchange with a variable interest rate were issued in 2009. The current weighted average effective interest rate on the bills is 6.8% per annum (31 December 2015: 6.8% per annum).</p> <p>(ii) Amounts repayable to related parties of the Group. Interest of 8.0% – 8.2% per annum is charged on the outstanding loan balances (31 December 2015: 8.0% – 8.2% per annum).</p> <p>(iii) Fixed rate loans with a finance company with remaining maturity periods not exceeding 3 years (31 December 2015: 4 years). The weighted average effective interest rate on the loans is 8.15% per annum (31 December 2015: 8.10% per annum). The Group hedges a portion of the loans for interest rate risk via an interest rate swap exchanging fixed rate interest for variable rate interest. The outstanding balance is adjusted for fair value movements in the hedged risk, being movements in the inter-bank rate in A Land.</p> <p>(iv) On 17 December 2015, the Group received an interest-free loan of CU3 million from the government of A Land to finance staff training over a two-year period. The loan is repayable in full at the end of that two-year period. Using prevailing market interest rates for an equivalent loan of 7.2%, the fair value of the loan is estimated at CU2.61 million. The difference of CU390,000 between the gross proceeds and the fair value of the loan is the benefit derived from the interest-free loan and is recognised as deferred revenue (see note 41). Interest expenses CU188,000 were recognised on this loan in 2016 and CU202,000 will be recognised in 2017 (see note 9).</p> <p>(v) 2,500 perpetual notes with a coupon rate of 6% per annum were issued on 27 August 2016 at CU2.5 million principal value. Issue costs of CU0.595 million were incurred.</p> <p>(vi) Secured by a mortgage over the Group's freehold land and buildings (see note 15). The weighted average effective interest rate on the bank loans is 8.30% per annum (31 December 2015: 8.32% per annum).</p> <p>(vii) Secured by a charge over certain of the Group's trade receivables (see note 25.2).</p> <p>(viii) Secured by the assets leased. The borrowings are a mix of variable and fixed interest rate debt with repayment periods not exceeding 5 years (see note 38.2).</p>
	<p><b>32.2 Breach of loan agreement</b></p> <p>During the current year, the Group was late in paying interest for the first quarter on one of its loans with a carrying amount of CU5.00 million. The delay arose because of a temporary lack of funds on the date when interest was payable due to a technical problem on settlement. The interest payment outstanding of CU107,500 was repaid in full a week later, including the additional interest and penalty. The lender did not request accelerated repayment of the loan and the terms of the loan were not changed. Management has reviewed the Group's settlement procedures to ensure that such circumstances do not recur.</p>

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>																						
IFRS 7.7	<p><b>33. Convertible notes</b></p> <p>On 13 September 2016, the Company issued 4.5 million 5.5% CU denominated convertible notes with an aggregate principal amount of CU4.5 million. Each note entitles the holder to convert to ordinary shares at a conversion price of CU1.00.</p> <p>Conversion may occur at any time between 13 July 2017 and 12 September 2019. If the notes have not been converted, they will be redeemed on 13 September 2019 at CU1 each. Interest of 5.5% per annum will be paid quarterly up until the notes are converted or redeemed.</p>																						
IAS 32.28	<p>The convertible notes contain two components: liability and equity elements. The equity element is presented in equity under the heading of "option premium on convertible notes". The effective interest rate of the liability element on initial recognition is 8.2% per annum.</p>

IFRS 7.7	<p>(i) 3,000,000 redeemable cumulative preference shares with a coupon rate of 7% per annum were issued on 1 June 2016 at an issue price of CU5 per share. The shares are redeemable on 31 May 2018 at CU5 per share. The shares are unsecured borrowings of the Group and are designated as at FVTPL (see below).</p> <p>These redeemable cumulative preference shares do not contain any equity component and are classified as financial liabilities in their entirety. In addition, the Group has designated these preference shares as financial liabilities at FVTPL as permitted by IAS 39. The preference shares have fixed interest payments and mature on 31 May 2018.</p> <p>To reduce the fair value risk of changing interest rates, the Group has entered into a pay-floating receive-fixed interest rate swap. The swap's notional principal is CU15 million and matches the principal of the cumulative redeemable preference shares. The swap matures on 31 May 2018. The designation of preference shares as at FVTPL eliminates the accounting mismatch arising on measuring the liability at amortised cost and measuring the derivative at FVTPL.</p> <p>Dividends of CU613,000 (2015: nil) were paid on redeemable cumulative preference shares and are included in profit or loss in the "other gains and losses" line item.</p> <p>(ii) A pay-floating receive-fixed interest rate swap economically hedges fair value interest rate risk of redeemable cumulative preference shares.</p> <p>(iii) Other financial liabilities include CU75,000 representing the estimated fair value of the contingent consideration relating to the acquisition of Subsix Limited (see note 44.2). There has been no change in the fair value of the contingent consideration since the acquisition date.</p>

IAS 37.84(a)	Balance at 31 December 2016	3,058	528	730	4,316
IFRS 3.B64(j) IAS 37.85(a),(b)	(i) The provision for employee benefits represents annual leave and vested long service leave entitlements accrued and compensation claims made by employees. On the acquisition of Subsix Limited, the Group recognised an additional contingent liability of CU45,000 in respect of employees' compensation claims outstanding against that company, which was settled in February 2017. The decrease in the carrying amount of the provision for the current year results from benefits being paid in the current year.				
IAS 37.85(a),(b)	(ii) The provision for rectification work relates to the estimated cost of work agreed to be carried out for the rectification of goods supplied to one of the Group's major customers (see note 13.6). Anticipated expenditure for 2017 is CU1.94 million, and for 2018 is CU1.118 million. These amounts have not been discounted for the purposes of measuring the provision for rectification work, because the effect is not material.				
IAS 37.85(a),(b)	(iii) The provision for warranty claims represents the present value of the directors' best estimate of the future outflow of economic benefits that will be required under the Group's obligations for warranties under local sale of goods legislation. The estimate has been made on the basis of historical warranty trends and may vary as a result of new materials, altered manufacturing processes or other events affecting product quality.				
IAS 37.85(a),(b)	(iv) The provision for onerous lease contracts represents the present value of the future lease payments that the Group is presently obligated to make under non-cancellable onerous operating lease contracts, less revenue expected to be earned on the lease, including estimated future sub-lease revenue, where applicable. The estimate may vary as a result of changes in the utilisation of the leased premises and sub-lease arrangements where applicable. The unexpired terms of the leases range from 3 to 5 years.

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
	<b>39. Retirement benefit plans</b>
	<b>39.1 Defined contribution plans</b>
	<p>The Group operates defined contribution retirement benefit plans for all qualifying employees of its subsidiary in C Land. The assets of the plans are held separately from those of the Group in funds under the control of trustees. Where employees leave the plans prior to full vesting of the contributions, the contributions payable by the Group are reduced by the amount of forfeited contributions.</p>
IAS 19.43	<p>The employees of the Group's subsidiary in B Land are members of a state-managed retirement benefit plan operated by the government of B Land. The subsidiary is required to contribute a specified percentage of payroll costs to the retirement benefit scheme to fund the benefits. The only obligation of the Group with respect to the retirement benefit plan is to make the specified contributions.</p>
IAS 19.53	<p>The total expense recognised in profit or loss of CU160,000 (2015: CU148,000) represents contributions payable to these plans by the Group at rates specified in the rules of the plans. As at 31 December 2016, contributions of CU8,000 (2015: CU8,000) due in respect of the 2016 (2015) reporting period had not been paid over to the plans. The amounts were paid subsequent to the end of the reporting period.</p>
	<b>39.2 Defined benefit plans</b>
IAS 19.139	<p>The Group sponsors funded defined benefit plans for qualifying employees of its subsidiaries in A Land. The defined benefit plans are administered by a separate Fund that is legally separated from the entity. The board of the pension fund is composed of an equal number of representatives from both employers and (former) employees. The board of the pension fund is required by law and by its articles of association to act in the interest of the fund and of all relevant stakeholders in the scheme, i.e. active employees, inactive employees, retirees, employers. The board of the pension fund is responsible for the investment policy with regard to the assets of the fund.</p> <p>Under the plans, the employees are entitled to post-retirement yearly instalments amounting to 1.75% of final salary for each year of service until the retirement age of 65. The pensionable salary is limited to CU20,000. The pensionable salary is the difference between the current salary of the employee and the state retirement benefit. In addition, the service period is limited to 40 years resulting in a maximum yearly entitlement (life-long annuity) of 70% of final salary.</p> <p>The defined benefit plans requires contributions from employees. Contributions are in the following two forms; one is based on the number of years of service and the other one is based on a fixed percentage of salary of the employees. Employees can also make discretionary contributions to the plans. Note 2.1 describes change in accounting in the current year following the adoption of the amendments to IAS 19.</p>

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
IAS 19.142	<p>The fair values of the above equity and debt instruments are determined based on quoted market prices in active markets whereas the fair values of properties and derivatives are not based on quoted market prices in active markets. It is the policy of the fund to use interest rate swaps to hedge its exposure to interest rate risk. This policy has been implemented during the current and prior years. Foreign currency exposures are fully hedged by the use of the forward foreign exchange contracts.</p>
	<p>The actual return on plan assets was CU0.743 million (2015: CU0.349 million).</p>
IAS 19.143	<p>The plan assets include ordinary shares of the Company with an aggregate fair value of CU0.38 million (31 December 2015: CU0.252 million) and a property occupied by a subsidiary of the Company with fair value of CU0.62 million (31 December 2015: CU0.62 million).</p>
IAS 19.145(a)	<p>Significant actuarial assumptions for the determination of the defined obligation are discount rate, expected salary increase and mortality. The sensitivity analyses below have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.</p>
	<ul style="list-style-type: none"> <li>• If the discount rate is 100 basis points higher (lower), the defined benefit obligation would decrease by CU744,000 (increase by CU740,000) (2015: decrease by CU734,000 (increase by CU730,000)).</li> <li>• If the expected salary growth increases (decreases) by 1%, the defined benefit obligation would increase by CU120,000 (decrease by CU122,000) (2015: increase by CU102,000 (decrease by CU105,000)).</li> </ul>
IAS 19.145(b)	<ul style="list-style-type: none"> <li>• If the life expectancy increases (decreases) by one year for both men and women, the defined benefit obligation would increase by CU150,000 (decrease by CU156,000) (2015: increase by CU143,000 (decrease by CU149,000)).</li> </ul>
IAS 19.145(b)	<p>The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.</p>
	<p>Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation liability recognised in the statement of financial position.</p>
IAS 19.145(c)	<p>There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years.</p>
IAS 19.146	<p>Each year an Asset-Liability-Matching study is performed in which the consequences of the strategic investment policies are analysed in terms of risk-and-return profiles. Investment and contribution policies are integrated within this study. Main strategic choices that are formulated in the actuarial and technical policy document of the Fund are:</p> <ul style="list-style-type: none"> <li>• Asset mix based on 25% equity instruments, 50% debt instruments and 25% investment property;</li> <li>• Interest rate sensitivity caused by the duration of the defined benefit obligation should be reduced by 30% by the use of debt instruments in combination with interest rate swaps;</li> <li>• Maintaining an equity buffer that gives a 97.5% assurance that assets are sufficient within the next 12 months.</li> </ul>
	<p>There has been no change in the process used by the Group to manage its risks from prior periods.</p>
IAS 19.147	<p>The Group's subsidiaries fund the cost of the entitlements expected to be earned on a yearly basis. Employees pay a fixed 5% percentage of pensionable salary. The residual contribution (including back service payments) is paid by the entities of the Group. The funding requirements are based on the local actuarial measurement framework. In this framework the discount rate is set on a risk free rate. Furthermore, premiums are determined on a current salary base. Additional liabilities stemming from past service due to salary increases (back-service liabilities) are paid immediately to the Fund. Apart from paying the costs of the entitlements, the Group's subsidiaries are not liable to pay additional contributions in case the Fund does not hold sufficient assets. In that case, the Fund would take other measures to restore its solvency, such as a reduction of the entitlements of the plan members.</p> <p>The average duration of the benefit obligation at 31 December 2016 is 16.5 years (2015: 15.6 years). This number can be analysed as follows:</p> <ul style="list-style-type: none"> <li>• active members: 19.4 years (2015: 18.4 years);</li> <li>• deferred members: 22.6 years (2015: 21.5 years); and</li> <li>• retired members: 9.3 years (2015: 8.5 years).</li> </ul> <p>The Group expects to make a contribution of CU0.95 million (2015: CU0.91 million) to the defined benefit plans during the next financial year.</p>

		Year ended 31/12/16	Year ended 31/12/15
		CU'000	CU'000
IFRS 7.10(a)	Changes in fair value attributable to changes in credit risk recognised during the year (i)	(20)	
		31/12/16	31/12/15
		CU'000	CU'000
IFRS 7.10(a)	Cumulative changes in fair value attributable to changes in credit risk (i)	(20)	–
IFRS 7.10(b)	Difference between carrying amount and contractual amount at maturity:		
	cumulative preference shares at fair value (note 34)	14,875	–
	amount payable at maturity	(15,000)	–
		(125)	–
IFRS 7.11	iii. The change in fair value attributable to change in credit risk is calculated as the difference between total change in fair value of cumulative preference shares (CU125,000) and the change in fair value of cumulative redeemable preference shares due to change in market risk factors alone (CU105,000). The change in fair value due to market risk factors was calculated using benchmark interest yield curves as at the end of the reporting period holding credit risk margin constant. The fair value of cumulative redeemable preference shares was estimated by discounting future cash flows using quoted benchmark interest yield curves as at the end of the reporting period and by obtaining lender quotes for borrowings of similar maturity to estimate credit risk margin.		
IFRS 7.31	<b>40.3 Financial risk management objectives</b>  The Group's Corporate Treasury function provides services to the business, co-ordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports which analyse exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk.  The Group seeks to minimise the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives is governed by the Group's policies approved by the board of directors, which provide written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by the internal auditors on a continuous basis. The Group does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.  The Corporate Treasury function reports quarterly to the Group's risk management committee, an independent body that monitors risks and policies implemented to mitigate risk exposures.		
	<b>40.4 Market risk</b>  The Group's activities expose it primarily to the financial risks of changes in foreign currency exchange rates (see note 40.6 below) and interest rates (see note 40.7 below). The Group enters into a variety of derivative financial instruments to manage its exposure to foreign currency risk and interest rate risk, including:		
IFRS 7.33	<ul style="list-style-type: none"><li>• forward foreign exchange contracts to hedge the exchange rate risk arising on the export of electronic equipment to B Land and C Land;</li><li>• interest rate swaps to mitigate the risk of rising interest rates; and</li><li>• forward foreign exchange contracts to hedge the exchange rate risk arising on translation of the Group's investment in a foreign operation, Subfour Limited, which has B Currency as its functional currency.</li></ul>		

Source	International GAAP Holdings Limited																																																																																									
	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p>Market risk exposures are measured using value-at-risk (VaR) supplemented by sensitivity analysis.</p> <p>There has been no change to the Group's exposure to market risks or the manner in which these risks are managed and measured.</p> <p><b>40.5 Value at Risk (VaR) analysis</b></p> <p>The VaR measure estimates the potential loss in pre-taxation profit over a given holding period for a specified confidence level. The VaR methodology is a statistically defined, probability-based approach that takes into account market volatilities as well as risk diversification by recognising offsetting positions and correlations between products and markets. Risks can be measured consistently across all markets and products, and risk measures can be aggregated to arrive at a single risk number. The one-day 99% VaR number used by the Group reflects the 99% probability that the daily loss will not exceed the reported VaR.</p> <p>VaR methodologies employed to calculate daily risk numbers include the historical and variance-covariance approaches. In addition to these two methodologies, Monte Carlo simulations are applied to the various portfolios on a monthly basis to determine potential future exposure.</p> <table><tr><th rowspan="3">Historical VaR (99%, one-day) by risk type</th><th colspan="2">Average</th><th colspan="2">Minimum</th><th colspan="2">Maximum</th><th colspan="2">Year ended</th></tr><tr><th>2016</th><th>2015</th><th>2016</th><th>2015</th><th>2016</th><th>2015</th><th>31/12/16</th><th>31/12/15</th></tr><tr><th>CU'000</th><th>CU'000</th><th>CU'000</th><th>CU'000</th><th>CU'000</th><th>CU'000</th><th>CU'000</th><th>CU'000</th></tr><tr><td>Foreign exchange</td><td>980</td><td>1,340</td><td>546</td><td>943</td><td>1,200</td><td>1,600</td><td>980</td><td>1,350</td></tr><tr><td>Interest rate</td><td>115</td><td>60</td><td>85</td><td>45</td><td>150</td><td>95</td><td>105</td><td>55</td></tr><tr><td>Diversification</td><td>(45)</td><td>(40)</td><td>–</td><td>–</td><td>–</td><td>–</td><td>(55)</td><td>(50)</td></tr><tr><td>Total VaR exposure</td><td>1,050</td><td>1,360</td><td></td><td></td><td></td><td></td><td>1,030</td><td>1,355</td></tr></table> <p>While VaR captures the Group's daily exposure to currency and interest rate risk, sensitivity analysis evaluates the impact of a reasonably possible change in interest or foreign currency rates over a year. The longer time frame of sensitivity analysis complements VaR and helps the Group to assess its market risk exposures. Details of sensitivity analysis for foreign currency risk are set out in note 40.6 below and for interest rate risk in note 40.7 below.</p> <p><b>40.6 Foreign currency risk management</b></p> <p>The Group undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters utilising forward foreign exchange contracts.</p> <p>The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows.</p> <table><tr><th rowspan="3"></th><th colspan="2">Liabilities</th><th colspan="2">Assets</th></tr><tr><th>31/12/16</th><th>31/12/15</th><th>31/12/16</th><th>31/12/15</th></tr><tr><th>CU'000</th><th>CU'000</th><th>CU'000</th><th>CU'000</th></tr><tr><td>Currency of B Land</td><td>6,297</td><td>7,469</td><td>1,574</td><td>1,671</td></tr><tr><td>Currency of C Land</td><td>186</td><td>135</td><td>–</td><td>–</td></tr><tr><td>Others</td><td>–</td><td>–</td><td>–</td><td>–</td></tr></table>	Historical VaR (99%, one-day) by risk type	Average		Minimum		Maximum		Year ended		2016	2015	2016	2015	2016	2015	31/12/16	31/12/15	CU'000	CU'000	CU'000	CU'000	CU'000	CU'000	CU'000	CU'000	Foreign exchange	980	1,340	546	943	1,200	1,600	980	1,350	Interest rate	115	60	85	45	150	95	105	55	Diversification	(45)	(40)	–	–	–	–	(55)	(50)	Total VaR exposure	1,050	1,360					1,030	1,355		Liabilities		Assets		31/12/16	31/12/15	31/12/16	31/12/15	CU'000	CU'000	CU'000	CU'000	Currency of B Land	6,297	7,469	1,574	1,671	Currency of C Land	186	135	–	–	Others	–	–	–	–

## International GAAP Holdings Limited

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued**

In the current year, the Group has designated certain forward contracts as a hedge of its net investment in Subfour Limited, which has B Currency as its functional currency. The Group's policy has been reviewed and, due to the increased volatility in B Currency, it was decided to hedge up to 50% of the net assets of the Subfour Limited for forward foreign currency risk arising on translation of the foreign operation. The Group utilises a rollover hedging strategy, using contracts with terms of up to 6 months. Upon the maturity of a forward contract, the Group enters into a new contract designated as a separate hedging relationship.

The following table details the forward foreign currency (FC) contracts outstanding at the end of the reporting period:

Outstanding contracts	Average exchange rate		Foreign currency		Notional value		Fair value assets (liabilities)	
	31/12/16	31/12/15	31/12/16	31/12/15	31/12/16	31/12/15	31/12/16	31/12/15

**Commentary:**

The table above provides an *example* of summary quantitative data about exposure to foreign exchange risks at the end of the reporting period that an entity may provide internally to key management personnel.

The Group has entered into contracts to supply electronic equipment to customers in B Land. The Group has entered into forward foreign exchange contracts (for terms not exceeding 3 months) to hedge the exchange rate risk arising from these anticipated future transactions, which are designated as cash flow hedges.

At 31 December 2016, the aggregate amount of losses under forward foreign exchange contracts recognised in other comprehensive income and accumulated in the cash flow hedging reserve relating to the exposure on these anticipated future transactions is CU70,000 (2015: gains of CU26,000). It is anticipated that the sales will take place during the first 3 months of the next financial year, at which time the amount deferred in equity will be reclassified to profit or loss.

The Group has entered into contracts to purchase raw materials from suppliers in B Land and C Land. The Group has entered into forward foreign exchange contracts (for terms not exceeding 6 months) to hedge the exchange rate risk arising from these anticipated future purchases, which are designated into cash flow hedges.

IFRS 7.23(a)

Source	International GAAP Holdings Limited
	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
IFRS 7.23(a)	At 31 December 2016, the aggregate amount of gains under forward foreign exchange contracts recognised in other comprehensive income and accumulated in the cash flow hedging reserve relating to these anticipated future purchase transactions is CU239,000 (2015: unrealised gains of CU194,000). It is anticipated that the purchases will take place during the first 6 months of the next financial year at which time the amount deferred in equity will be included in the carrying amount of the raw materials. It is anticipated that the raw materials will be converted into inventory and sold within 12 months after purchase, at which time the amount deferred in equity will be reclassified to profit or loss.
IFRS 7.23(b)	At the start of the third quarter of 2016, the Group reduced its forecasts on sales of electronic equipment to B Land due to increased local competition and higher shipping costs. The Group had previously hedged CU1.079 million of future sales of which CU97,000 are no longer expected to occur, and CU982,000 remain highly probable. Accordingly, the Group has reclassified CU3,000 of gains on foreign currency forward contracts relating to forecast transactions that are no longer expected to occur from the cash flow hedging reserve to profit or loss.
IFRS 7.24(c)	At 31 December 2016, no ineffectiveness has been recognised in profit or loss arising from hedging the net investment in Subfour Limited.
IFRS 7.33, 34	<p><b>40.7 Interest rate risk management</b></p> <p>The Group is exposed to interest rate risk because entities in the Group borrow funds at both fixed and floating interest rates. The risk is managed by the Group by maintaining an appropriate mix between fixed and floating rate borrowings, and by the use of interest rate swap contracts and forward interest rate contracts. Hedging activities are evaluated regularly to align with interest rate views and defined risk appetite, ensuring the most cost-effective hedging strategies are applied.</p> <p>The Group's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note.</p>
	<u>40.7.1 Interest rate sensitivity analysis</u>
IFRS 7.40(b)	The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.
IFRS 7.40(a)	<p>If interest rates had been 50 basis points higher/lower and all other variables were held constant, the Group's:</p> <ul style="list-style-type: none"> <li>• profit for the year ended 31 December 2016 would decrease/increase by CU43,000 (2015: decrease/increase by CU93,000). This is mainly attributable to the Group's exposure to interest rates on its variable rate borrowings; and</li> <li>• other comprehensive income for the year ended 31 December 2016 would decrease/increase by CU19,000 (2015: decrease/increase by CU12,000), mainly as a result of the changes in the fair value of available-for-sale fixed rate instruments.</li> </ul>
IFRS 7.33(c)	The Group's sensitivity to interest rates has decreased during the current year mainly due to the reduction in variable rate debt instruments and the increase in interest rate swaps to swap floating rate debt to fixed rate debt.
	<u>40.7.2 Interest rate swap contracts</u>
IFRS 7.22, 33, 34	Under interest rate swap contracts, the Group agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Such contracts enable the Group to mitigate the risk of changing interest rates on the fair value of issued fixed rate debt and the cash flow exposures on the issued variable rate debt. The fair value of interest rate swaps at the end of the reporting period is determined by discounting the future cash flows using the curves at the end of the reporting period and the credit risk inherent in the contract, and is disclosed below. The average interest rate is based on the outstanding balances at the end of the reporting period.

<b>Commentary:</b>						
<i>The table above provides an example of summary quantitative data about exposure to interest rate risks at the end of the reporting period that an entity may provide internally to key management personnel.</i>						
IFRS 7.22, 23(a)	The interest rate swaps settle on a quarterly basis. The floating rate on the interest rate swaps is the local interbank rate of A Land. The Group will settle the difference between the fixed and floating interest rate on a net basis.					
	All interest rate swap contracts exchanging floating rate interest amounts for fixed rate interest amounts are designated as cash flow hedges in order to reduce the Group's cash flow exposure resulting from variable interest rates on borrowings. The interest rate swaps and the interest payments on the loan occur simultaneously and the amount accumulated in equity is reclassified to profit or loss over the period that the floating rate interest payments on debt affect profit or loss.

<i>The table above provides an example of summary quantitative data about exposure to interest rate risks at the end of the reporting period that an entity may provide internally to key management personnel.</i>						

Source	International GAAP Holdings Limited
	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
IFRS 7.24(a)	<p>Interest rate swap contracts exchanging fixed rate interest for floating rate interest are designated and effective as fair value hedges in respect of interest rates. During the year, the hedge was 100% effective in hedging the fair value exposure to interest rate movements and as a result the carrying amount of the loan was adjusted by CU5,000 which was included in profit or loss at the same time that the fair value of the interest rate swap was included in profit or loss.</p> <p><b>40.8 Other price risks</b></p> <p>The Group is exposed to equity price risks arising from equity investments. Certain of the Group's equity investments are held for strategic rather than trading purposes. The Group does not actively trade these investments. The Group also holds other equity investments for trading purposes.</p> <p><b>40.8.1 Equity price sensitivity analysis</b></p>
IFRS 7.40(b)	The sensitivity analyses below have been determined based on the exposure to equity price risks at the end of the reporting period.
IFRS 7.40(a)	<p>If equity prices had been 5% higher/lower:</p> <ul style="list-style-type: none"> <li>• profit for the year ended 31 December 2016 would increase/decrease by CU57,000 (2015: increase/decrease by CU53,000) as a result of the changes in fair value of held-for-trading equity investments; and</li> <li>• other comprehensive income for the year ended 31 December 2016 would increase/decrease by CU286,000 (2015: increase/decrease by CU265,000) as a result of the changes in fair value of available-for-sale shares.</li> </ul>
IFRS 7.40(c)	The Group's sensitivity to equity prices has not changed significantly from the prior year.
IFRS 7.33, 34, B8	<p><b>40.9 Credit risk management</b></p> <p>Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group only transacts with entities that are rated the equivalent of investment grade and above. This information is supplied by independent rating agencies where available and, if not available, the Group uses other publicly available financial information and its own trading records to rate its major customers. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the risk management committee annually.</p> <p>Trade receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable and, where appropriate, credit guarantee insurance cover is purchased.</p> <p>Apart from Company A, the largest customer of the Group (see below and refer to notes 6.7 and 25.1), the Group does not have significant credit risk exposure to any single counterparty. Concentration of credit risk related to Company A did not exceed 20% of gross monetary assets at any time during the year. Concentration of credit risk to any other counterparty did not exceed 5% of gross monetary assets at any time during the year.</p> <p>The credit risk on liquid funds and derivative financial instruments is limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies.</p>
IFRS 7.B10(c)	<p>In addition, the Group is exposed to credit risk in relation to financial guarantees given to banks provided by the Group. The Group's maximum exposure in this respect is the maximum amount the Group could have to pay if the guarantee is called on (see note 40.10.1). As at 31 December 2016, an amount of CU24,000 (31 December 2015: CU18,000) has been recognised in the consolidated financial position as financial liabilities (see note 34).</p> <p><b>40.9.1 Collateral held as security and other credit enhancements</b></p>
IFRS 7.36(b)	The Group does not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets, except that the credit risk associated with the finance lease receivables is mitigated because the finance lease receivables are secured over the leased storage equipment. The carrying amount of the finance lease receivables amounts to CU1.028 million (31 December 2015: CU0.905 million) and the fair value of the leased assets is estimated to be approximately CU1.00 million (31 December 2015: CU0.9 million). The Group is not permitted to sell or repledge the collateral in the absence of default by the lessee.

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
	<b>40.10 Liquidity risk management</b>
IFRS 7.33, 39(c)	<p>Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Group's short-, medium- and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities. Note 40.10.2 below sets out details of additional undrawn facilities that the Group has at its disposal to further reduce liquidity risk.</p>
	<p>40.10.1 <a href="#">Liquidity and interest risk tables</a></p>
IFRS 7.34, 35, 39(a)	<p>The following tables detail the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The tables include both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Group may be required to pay.</p>
	<p><b>Commentary:</b></p> <p><i>The tables below include the weighted average effective interest rate and the carrying amount of the respective financial liabilities as reflected in the consolidated statement of financial position as an <u>example</u> of summary quantitative data about exposure to interest rates at the end of the reporting period that an entity may provide internally to key management personnel.</i></p>

IFRS7.B10(c)	The amounts included above for financial guarantee contracts are the maximum amounts the Group could be forced to settle under the arrangement for the full guaranteed amount if that amount is claimed by the counterparty to the guarantee. Based on expectations at the end of the reporting period, the Group considers that it is more likely than not that such an amount will not be payable under the arrangement. However, this estimate is subject to change depending on the probability of the counterparty claiming under the guarantee which is a function of the likelihood that the financial receivables held by the counterparty which are guaranteed suffer credit losses.							
IFRS 7.34, 35	The following table details the Group's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Group's liquidity risk management as the liquidity is managed on a net asset and liability basis.

IFRS 7.B10A(b)	The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.							
IFRS 7.39(c)	The Group has access to financing facilities as described in note 40.10.2 below, of which CU9.268 million were unused at the end of the reporting period (2015: CU12.617million). The Group expects to meet its other obligations from operating cash flows and proceeds of maturing financial assets.							
IFRS 7.39(b)	The following table details the Group's liquidity analysis for its derivative financial instruments. The table has been drawn up based on the undiscounted contractual net cash inflows and outflows on derivative instruments that settle on a net basis, and the undiscounted gross inflows and outflows on those derivatives that require gross settlement. When the amount payable or receivable is not fixed, the amount disclosed has been determined by reference to the projected interest rates as illustrated by the yield curves at the end of the reporting period.

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued****40.11 Fair value measurements**

This note provides information about how the Group determines fair values of various financial assets and financial liabilities.

40.11.1 Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

Some of the Group's financial assets and financial liabilities are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique(s) and inputs used).

Financial assets/ financial liabilities	Fair value as at		Fair value hierarchy	Valuation technique(s) and key input(s)
	31/12/16	31/12/15		
1) Foreign currency forward contracts (see notes 22 and 34)	Assets – CU 244,000; and Liabilities – CU87,000	Assets – CU220,000	Level 2	Discounted cash flow.  Future cash flows are estimated based on forward exchange rates (from observable forward exchange rates at the end of the reporting period) and contract forward rates, discounted at a rate that reflects the credit risk of various counterparties.
2) Interest rate swaps (see notes 22 and 34)	Assets – CU284,000; Liabilities (designated for hedging) – CU5,000; and Liabilities (not designated for hedging) – CU51,000	Assets – CU177,000	Level 2	Discounted cash flow.  Future cash flows are estimated based on forward interest rates (from observable yield curves at the end of the reporting period) and contract interest rates, discounted at a rate that reflects the credit risk of various counterparties.
3) Held-for-trading non-derivative financial assets (see note 22)	Listed equity securities in Z land: • Real estate industry – CU911,000; and • Oil and gas industry – CU628,000.	Listed equity securities in Z land: • Real estate industry – CU911,000; and • Oil and gas industry – CU728,000.	Level 1	Quoted bid prices in an active market.
4) Listed redeemable notes (see note 22)	Listed debt securities in Y Land – Energy industry – CU2,200,000	Listed debt securities in Y Land – Energy industry – CU2,180,000	Level 1	Quoted bid prices in an active market.
5) Redeemable cumulative preference shares (see note 34)	Liabilities – CU14,875,000	-	Level 2	Discounted cash flow at a discount rate that reflects the issuer's current borrowing rate at the end of the reporting period.

## Notes to the consolidated financial statements for the year ended 31 December 2016 – continued

Financial assets/ financial liabilities	Fair value as at		Fair value hierarchy	Valuation technique(s) and key input(s)	Significant unobservable input(s)	Relationship of unobservable inputs to fair value
	31/12/16	31/12/15				
6) Private equity investments (see note 22)	20 per cent equity investment in Rocket Corp Limited engaged in refining and distribution of fuel products in A land – CU5,359,000; and  10 per cent equity investment in E Plus Limited engaged in Shoe manufacturing in A land – CU360,000	20 per cent equity investment in Rocket Corp Limited engaged in refining and distribution of fuel products in A land – CU5,285,000	Level 3	Income approach – in this approach, the discounted cash flow method was used to capture the present value of the expected future economic benefits to be derived from the ownership of these investees.	Long-term revenue growth rates, taking into account management's experience and knowledge of market conditions of the specific industries, ranging from 4.9 to 5.5 per cent (2015: 4.8 – 5.4 per cent).	A slight increase in the long-term revenue growth rates used in isolation would result in a significant increase in the fair value. (note 1)
					Long-term pre-tax operating margin taking into account management's experience and knowledge of market conditions of the specific industries, ranging from 5– 12 per cent (2015: 5 – 10 per cent).	A significant increase in the long-term pre-tax operating margin used in isolation would result in a significant increase in the fair value.
					Weighted average cost of capital (WACC), determined using a Capital Asset Pricing Model, ranging from 11.9 to 12.5 per cent (2015: 11.2 to 12.1 per cent).	A slight increase in the WACC used in isolation would result in a significant decrease in the fair value. (note 2)
					Discount for lack of marketability, determined by reference to the share price of listed entities in similar industries, ranging from 5 – 20 per cent (2015: 4 – 19 per cent).	A significant increase in the discount for lack of marketability used in isolation would result in a significant decrease in the fair value.

## Notes to the consolidated financial statements for the year ended 31 December 2016 – continued

Financial assets/ financial liabilities	Fair value as at		Fair value hierarchy	Valuation technique(s) and key input(s)	Significant unobservable input(s)	Relationship of unobservable inputs to fair value
	31/12/16	31/12/15				
7) Contingent consideration in a business combination (see note 34)	Liabilities – CU75,000	-	Level 3	Discounted cash flow method was used to capture the present value of the expected future economic benefits that will flow out of the Group arising from the contingent consideration.	Discount rate of 18 per cent, determined using a Capital Asset Pricing Model.  Probability-adjusted revenues and profits, with a range from CU100,000 to CU150,000 and a range from CU 60,000 to 90,000 respectively.	A slight increase in the discount rate used in isolation would result in a significant decrease in the fair value. (note 2)  A slight increase in the probability adjusted revenues and profits used in isolation would result in a significant increase in the fair value. (note 3)

IFRS 13.93(h)(ii)

Note 1: If the long-term revenue growth rates used were 10% higher/lower while all the other variables were held constant, the carrying amount of the shares would increase/decrease by CU7,000 (31 December 2015: increase/decrease by CU8,000).

Note 2: A 5% increase/decrease in the WACC or discount rate used while holding all other variables constant would decrease/increase the carrying amount of the private equity investments and the contingent consideration by CU10,000 and CU3,524 respectively (31 December 2015: CU11,000 and CU3,754 respectively).

Note 3: A 5% increase/decrease in the probability-adjusted revenues and profits while holding all other variables constant would increase/decrease the carrying amount of the contingent consideration by CU5,210 (31 December 2015: CU6,000).

IFRS 13.93(c)

There were no transfers between Level 1 and 2 in the period.

IFRS 13.93(h)(ii)

**Commentary:**

*For financial assets and financial liabilities that are categorised within the Level 3 fair value hierarchy, if changing one or more of the unobservable inputs to reflect reasonably possible alternative assumptions would **significantly** change the fair value determined, an entity should state that fact and disclose the effect of those changes. The entity should also disclose how the effect of a change to reflect a reasonably possible alternative assumption was calculated.*

**Commentary:**

*The categorisation of fair value measurements into the different levels of the fair value hierarchy depends on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement. The above categorisations are for illustrative purpose only.*

IFRS 13.97  
IFRS 13.93(d)

The fair values of the financial assets and financial liabilities included in the level 2 and level 3 categories above have been determined in accordance with generally accepted pricing models based on a discounted cash flow analysis, with the most significant inputs being the discount rate that reflects the credit risk of counterparties.

IFRS 2.46, 47(a)	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>					
	The following share-based payment arrangements were in existence during the current and prior years:					
	Options series	Number	Grant date	Expiry date	Exercise price CU	Fair value at grant date CU
	(1) Granted on 31 March 2015	140,000	31/03/2015	30/03/2016	1.00	1.15
	(2) Granted on 30 September 2015	150,000	30/09/2015	29/09/2016	1.00	1.18
	(3) Granted on 31 March 2016	160,000	31/03/2016	30/03/2017	1.00	0.98
	(4) Granted on 29 September 2016	60,000	29/09/2016	28/09/2017	2.40	0.82
	All options vested on their date of grant and expire within twelve months of their issue, or one month after the resignation of the executive or senior employee, whichever is the earlier.					
	<a href="#">42.1.2 Fair value of share options granted in the year</a>					
	The weighted average fair value of the share options granted during the financial year is CU0.94 (2015: CU1.17). Options were priced using a binomial option pricing model. Where relevant, the expected life used in the model has been adjusted based on management's best estimate for the effects of non-transferability, exercise restrictions (including the probability of meeting market conditions attached to the option), and behavioural considerations. Expected volatility is based on the historical share price volatility over the past 3 years. To allow for the effects of early exercise, it was assumed that executives and senior employees would exercise the options after vesting date when the share price is two and a half times the exercise price.					
	Inputs into the model				Option series	
		Series 1	Series 2	Series 3	Series 4

	<u>42.1.3 Movements in shares options during the year</u>			
IFRS 2.45(b)	The following reconciles the share options outstanding at the beginning and end of the year:			
		2016		2015
		Number of options	Weighted average exercise price	Number of options
			CU	Weighted average exercise price
				CU
	Balance at beginning of year	290,000	1.00	–
	Granted during the year	220,000	1.38	290,000
	Forfeited during the year	–	–	–
	Exercised during the year	(314,000)	1.00	–
	Expired during the year	–	–	–
	Balance at end of year	196,000	1.43	290,000
	All outstanding options are exercisable at the end of the respective reporting period.			
	<u>42.1.4 Share options exercised during the year</u>			
IFRS 2.45(c)	The following share options were exercised during year:			
	Options series	Number exercised	Exercise date	Share price at exercise date
				CU
	(1) Granted on 31 March 2015	30,000	05/01/2016	2.50
	(1) Granted on 31 March 2015	45,000	31/01/2016	2.25
	(1) Granted on 31 March 2015	65,000	15/03/2016	2.75
	(2) Granted on 30 September 2015	65,000	03/07/2016	2.95
	(2) Granted on 30 September 2015	85,000	28/08/2016	3.15
	(3) Granted on 31 March 2016	24,000	20/12/2016	3.50
		314,000		
	<u>42.1.5 Share options outstanding at the end of the year</u>			
IFRS 2.45(d)	The share options outstanding at the end of the year had a weighted average exercise price of CU1.43 (2015: CU1.00), and a weighted average remaining contractual life of 103 days (2015: 184 days).			
	<b>42.2 Employee share option plan of a subsidiary acquired in the current year</b>			
IFRS 2.45(a)	Subsix Limited has a share option scheme for its executives and senior employees. The outstanding share options were not replaced and were still in existence at the date of acquisition of Subsix Limited.			
	Each employee share option of Subsix Limited converts into one ordinary share of Subsix Limited on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry. All outstanding share options granted by Subsix Limited had been vested by the date when the Group acquired Subsix Limited.

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>					
	The following share-based payment arrangements were in existence during the current year:					
	Options series	Number	Grant date	Expiry date	Exercise price CU	Market-based measure at the acquisition date of Subsix Limited CU
	(1) Granted on 13 March 2015	2,000	13/03/2015	12/03/2016	0.2	1.00
	(2) Granted on 18 September 2015	3,000	18/09/2015	17/09/2016	0.2	1.00
	All options vested on their date of grant and expire within three years of their issue.					
	<a href="#">42.2.1 Market-based measure of share options at the acquisition date</a>					
IFRS 2.46, 47(a)	All outstanding vested share options were measured in accordance with IFRS 2 at their market-based measure at the acquisition date. The weighted average market-based measure of the share options determined at the acquisition date of Subsix Limited is CU1.00. Options were priced using a binomial option pricing model. Where relevant, the expected life used in the model has been adjusted based on management's best estimate for the effects of non-transferability, exercise restrictions (including the probability of meeting market conditions attached to the option), and behavioural considerations. Expected volatility is based on the historical share price volatility over the past 5 years. To allow for the effects of early exercise, it was assumed that executives and senior employees would exercise the options after vesting date when the share price reaches three and a half times the exercise price.

	Subseven Limited	Manufacture of leisure goods	30/11/2016	100	687
					1,192
	Subsix Limited and Subseven Limited were acquired so as to continue the expansion of the Group's activities on leisure goods.				
IFRS 3.B66	<b>Commentary:</b> <i>The disclosures illustrated are also required for business combinations after the end of the reporting period but before the financial statements are authorised for issue unless the initial accounting for the acquisition is incomplete at the time the financial statements are authorised for issue. In such circumstances, the entity is required to describe which disclosures could not be made and the reasons why they could not be made.</i>				
IFRS 3.B64(f)	44.2 Consideration transferred				
			Subsix Limited	Subseven Limited	
			CU'000	CU'000	
	Cash		430	247	
	Transfer of land and buildings at fair value at date of acquisition		–	400	
	Contingent consideration arrangement (i)		75	–	
	Plus: effect of settlement of legal claim against Subseven Limited (ii)		–	40	
IAS 7.40(a)	Total		505	687	
IFRS 3.B64(g)	(i) Under the contingent consideration arrangement, the Group is required to pay the vendors an additional CU300,000 if Subsix Limited's profit before interest and tax (PBIT) in each of the years 2017 and 2018 exceeds CU500,000. Subsix's PBIT for the past three years has been CU350,000 on average and the directors do not consider it probable that this payment will be required. CU75,000 represents the estimated fair value of this obligation at the acquisition date.				
IFRS 3.B64(l)	(ii) Prior to the acquisition of Subseven Limited, the Group was pursuing a legal claim against that company in respect of damage to goods in transit to a customer. Although the Group was confident of recovery, this amount had not previously been recognised as an asset. In line with the requirements of IFRS 3, the Group has recognised the effective settlement of this legal claim on the acquisition of Subseven Limited by recognising CU40,000 (being the estimated fair value of the claim) as a gain in profit or loss within the 'other gains and losses' line item. This has resulted in a corresponding increase in the consideration transferred.

IFRS 3.B67(a)	The initial accounting for the acquisition of Subsix Limited has only been provisionally determined at the end of the reporting period. For tax purposes, the tax values of Subsix's assets are required to be reset based on market values of the assets. At the date of finalisation of these consolidated financial statements, the necessary market valuations and other calculations had not been finalised and they have therefore only been provisionally determined based on the directors' best estimate of the likely tax values.																																																								
IFRS 3.B64(h)	The receivables acquired (which principally comprised trade receivables) in these transactions with a fair value of CU87,000 (Subsix Limited) and CU105,000 (Subseven Limited) had gross contractual amounts of CU104,000 and CU120,000 respectively. The best estimate at acquisition date of the contractual cash flows not expected to be collected are CU10,000 (Subsix Limited) and CU8,000 (Subseven Limited).

IAS 7.40(c)	Less: cash and cash equivalent balances acquired	(200)
		477
	<b>44.7 Impact of acquisitions on the results of the Group</b>	
IFRS 3.B64(q)	Included in the profit for the year is CU35,000 attributable to the additional business generated by Subsix Limited, and CU13,000 attributable to Subseven Limited. Revenue for the year includes CU2.3 million in respect of Subsix Limited and CU2.8million in respect of Subseven Limited.	
IFRS 3.B64(q)	Had these business combinations been effected at 1 January 2016, the revenue of the Group from continuing operations would have been CU145 million, and the profit for the year from continuing operations would have been CU19.7 million. The directors consider these 'pro-forma' numbers to represent an approximate measure of the performance of the combined group on an annualised basis and to provide a reference point for comparison in future periods.	
	In determining the 'pro-forma' revenue and profit of the Group had Subsix Limited and Subseven Limited been acquired at the beginning of the current year, the directors have:	
	<ul style="list-style-type: none"> <li>calculated depreciation of plant and equipment acquired on the basis of the fair values arising in the initial accounting for the business combination rather than the carrying amounts recognised in the pre-acquisition financial statements;</li> <li>calculated borrowing costs on the funding levels, credit ratings and debt/equity position of the Group after the business combination; and</li> <li>excluded takeover defence costs of the acquiree as a one-off pre-acquisition transaction.</li> </ul>

## INDEPENDENT AUDITOR'S REPORT

**Commentary:**

*The audit of the financial statements may be conducted in accordance with International Standards on Auditing (ISA) and/or applicable local auditing standards, making reference to local laws, auditing standards or regulations.*

*A number of new and revised ISAs are effective for the audits of financial statements for periods ending on or after 15 December 2016. They include the following:*

- *ISA 570 (Revised) Going Concern;*
- *ISA 700 (Revised) Forming an Opinion and Reporting on Financial Statements;*
- *ISA 701 Communicating Key Audit Matters in the Independent Auditor's Report (new);*
- *ISA 705 (Revised) Modifications to the Opinion in the Independent Auditor's Report;*
- *ISA 706 (Revised) Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report; and*
- *ISA 720 (Revised) The Auditor's Responsibilities Relating to Other Information*

*The most significant changes required by the new and revised ISAs are as follows:*

- *The first section of the auditor's report now includes the auditor's opinion with the heading 'Opinion';*
- *The section headed 'Basis for Opinion' now directly follows the Opinion section, unless law or regulation prescribe otherwise;*
- *The report now includes a statement about the auditor's independence and fulfilment of relevant ethical responsibilities, with disclosures of the jurisdiction of origin of those requirements or reference to the International Ethics Standards Board for Accountant's Code of Ethics for Professional Accountants;*
- *For listed entities, there is a new section to communicate Key Audit Matters in the auditor's report (this can be voluntarily included for unlisted entities);*
- *There is a new section that describes the auditor's responsibilities relating to other information;*
- *Expansion of the description of the auditor's responsibilities, including a specific focus on the responsibilities around consideration of the director's use of the going concern basis of accounting. When a material uncertainty exists, a new section under the heading 'Material Uncertainty related to Going Concern' is now added, rather than an Emphasis of Matter Paragraph; and*
- *For listed entities the name of the engagement partner is to be included in the auditor's report (this can be voluntarily included for unlisted entities).*

*A detailed discussion of the new requirements is beyond the scope of this publication.*

*Due to the increased specificity required by the new and revised ISAs, the wording of the audit report is likely to differ between entities. Moreover, when local auditing standards or regulations apply, the report format will also be affected by those local rules. Accordingly, no illustrative auditor's report has been included in these model financial statements.*

# Appendix 1: Early application of IFRS 9 *Financial Instruments* (as revised in July 2014)

IFRS 9 has been issued in stages. The first instalment was issued in November 2009 and it only dealt with the classification and measurement of financial assets. In October 2010, the Standard was reissued to include the classification and measurement of financial liabilities, recognition and derecognition, and the requirements for separating embedded derivatives. In 2013, IFRS 9 was reissued to include the new general hedge accounting model and in 2014 the Standard was finalised to include impairment as well as amendment to classification and measurement of financial assets.

The finalised version of IFRS 9 issued in 2014 is effective for annual periods beginning on or after 1 January 2018, with early application permitted. That version also supersedes IFRS 9 (2009), IFRS 9 (2010) and IFRS (2013). In spite of this, there are various alternatives available to entities electing to early adopt IFRS 9 which are detailed in Appendix 1A.

The finalised version of IFRS 9 issued in July 2014 is referred to as 'IFRS 9' in the rest of this appendix.

IFRS 9 generally requires retrospective application, subject to various transition provisions. However, entities that adopt the classification and measurement requirements of IFRS 9 (which include the requirements relating to amortised cost measurement for financial assets and impairment) need not restate prior periods in accordance with IFRS 9.7.2.15.

## Commentary:

*On initial application of IFRS 9, in accordance with IFRS 9.7.2.21, an entity can continue to apply the hedge accounting requirements of IAS 39 in their entirety instead of the requirements set out in IFRS 9. This decision applies to all of the entity's hedging relationships. If an entity chooses to continue applying IAS 39 for hedge accounting, it also applies IFRIC 16 Hedges of a Net Investment in a Foreign Operation without the consequential amendments that were made when IFRS 9 was published.*

*Alternatively, an entity can apply the hedge accounting requirements of IFRS 9 except for fair value hedges of interest rate risk on a portfolio of financial assets or financial liabilities where the specific requirements of IAS 39 can be applied instead (IFRS 9.6.1.3). This decision applies to all of an entity's fair value hedges of interest rate risk on a portfolio of financial assets or financial liabilities.*

*Except for some specific transition requirements, the hedge accounting requirements of IFRS 9 should be applied prospectively (IFRS 9.7.2.22).*

## Key assumptions used in the preparation of this appendix

- International GAAP Holdings Limited is assumed to have early applied IFRS 9 in full (i.e. including the IFRS 9 hedge accounting requirements) in the current year in advance of its effective date. The Group has also **elected to restate the comparative information** in accordance with the relevant transition provisions. Therefore, a statement of financial position as at the beginning of the earliest comparative period in accordance with IAS 1.10(f) is included.
- 1 January 2016 is considered to be the date of initial application of IFRS 9 in accordance with IFRS 9.7.2.2, which is the beginning of the reporting period in which the Group first applies IFRS 9. The requirements of IFRS 9 do not apply to financial instruments that have already been derecognised at 1 January 2016 in accordance with IFRS 9.7.2.1.

## Commentary:

*An entity may restate prior periods if it is possible without the use of hindsight. Nevertheless, even if an entity chooses to restate comparatives, IFRS 9 would not apply to items in the comparative period that have been derecognised before the date of initial application. For these items an entity is required to apply IAS 39 in the comparative period; whereas IFRS 9 would apply to all other items not derecognised as at the date of initial application (IFRS 9.7.2.15).*

*This transition relief is a requirement rather than an election. Consequently, an entity choosing to restate comparatives to allow a consistent comparison of its financial performance for the current and prior period(s) would be constrained in respect of items derecognised by the date of initial application. In these circumstances an entity could choose to provide additional disclosures if it wished.*

- This appendix does not include a full set of financial statements; only the statement of financial position, statement of profit or loss and other comprehensive income, statement of changes in equity and notes that are affected by the application of IFRS 9 which are relevant to International GAAP Holdings Limited, a non-financial institution, are included.

**Commentary:**

*If an entity chooses to apply the exemption given in IFRS 9.7.2.15 and hence does not restate comparative information in the year of the initial application, the following points are relevant:*

- *Comparative information for prior periods will not be restated. The classification and measurement requirements previously applied in accordance with IAS 39 and disclosures made in accordance with IFRS 7 will be retained.*
- *The entity should disclose accounting policies for both periods: one applying IFRS 9 (current period) and another for applying IAS 39 (prior periods).*
- *Any difference between the previous carrying amounts and the carrying amounts at the beginning of the annual reporting period that includes the date of initial application will be recognised in the opening retained earnings (or other component of equity, as appropriate).*
- *The entity is not required to present a statement of financial position as at the beginning of the earliest comparative period since the entity chooses not to restate comparative information. The additional statement of financial position may be required due to the application of other new and revised IFRSs but it would not be restated for the effects of IFRS 9.*

### **Summary of the financial impact of application of IFRS 9 to International GAAP Holdings Limited**

<b>Area</b>	<b>Financial impact</b>
<b>Classification and measurement</b>	<p>Reclassification of financial assets into the IFRS 9 categories has had no overall impact on their respective measurement bases. The only impact relates to the presentation of fair value changes on equity investments classified as FVTOCI as 'amounts that will not be subsequently reclassified to profit or loss' whereas under IAS 39 they would be subsequently reclassified to profit or loss.</p> <p>In the current year, the Group has also presented the changes in fair value of financial liabilities at FVTPL attributable to changes in its own credit risk in OCI. As this financial liability was only issued in the current year it has no impact on prior year figures.</p>
<b>Impairment</b>	<p>Additional loss allowance is recognised for financial assets and other items within the impairment scope of IFRS 9. Comparative figures have been restated accordingly.</p>
<b>General hedge accounting</b>	<p>Existing hedging relationships all qualify as continuing hedging relationships and continue to be effective.</p> <p>Cash flow hedging instruments' gains and losses recognised in OCI are now split between i) those that may be subsequently reclassified to profit or loss, and ii) those that will not be subsequently reclassified. The latter relates to those that will be basis adjusted onto the initial carrying amounts of non-financial assets or liabilities. Previously, all such gains and losses were categorised as may be subsequently reclassified to profit or loss.</p> <p>Furthermore, the actual basis adjustment is now transferred directly onto the initial carrying amount of the hedged items and no longer affects OCI. Previously the basis adjustment affected OCI. This affects the amounts that are recognised in OCI and total comprehensive income.</p> <p>These changes all apply prospectively from the date of initial application of IFRS 9 (i.e. 1 January 2016) and thus have no impact on the prior year figures or presentation.</p>

Details of the adjustments are disclosed in note 2 in this appendix.

### **Abbreviations used in this appendix**

12m ECL	12-month expected credit losses
Lifetime ECL	Lifetime expected credit losses

### **General note**

Relatively few entities have early adopted the full version of IFRS 9 and discussions about the application of IFRS 9 and IFRS 7 are ongoing. Market practice has yet to be developed and will no doubt evolve over time. Depending on the specific facts and circumstances of each entity, the nature and extent of the disclosures will vary from those presented in this appendix, which were created based on a set of presumed facts applicable to International GAAP Holdings Limited for illustrative purposes.

	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016</b></p> <p><b>2. Application of new and revised International Financial Reporting Standards (IFRSs)</b></p>
	<p><b>Commentary:</b></p> <p><i>The note below discloses the impact of the application of IFRS 9 only. Regarding the impact of other new and revised Standards, please refer to Section 2 of this publication.</i></p>
	<p><b>New and revised IFRSs affecting the reported financial performance and/or financial position</b></p>
IAS 8.28	<p><b>Impact of application of IFRS 9 <i>Financial Instruments</i></b></p> <p>In the current year, the Group has applied IFRS 9 <i>Financial Instruments</i> (as revised in July 2014) and the related consequential amendments to other IFRSs in advance of their effective dates. IFRS 9 introduces new requirements for 1) the classification and measurement of financial assets and financial liabilities, 2) impairment for financial assets and 3) general hedge accounting. Details of these new requirements as well as their impact on the Group's consolidated financial statements are described below.</p> <p>The Group has applied IFRS 9 in accordance with the transition provisions set out in IFRS 9.</p>
IFRS 9.7.2.1 – 7.2.3	<p><b>2.1 Classification and measurement of financial assets</b></p> <p>The date of initial application (i.e. the date on which the Group has assessed its existing financial assets and financial liabilities in terms of the requirements of IFRS 9) is 1 January 2016. Accordingly, the Group has applied the requirements of IFRS 9 to instruments that have not been derecognised as at 1 January 2016 and has not applied the requirements to instruments that have already been derecognised as at 1 January 2016. Comparative amounts in relation to instruments that have not been derecognised as at 1 January 2016 have been restated where appropriate.</p>
IFRS 9.7.2.3	<p><b>Commentary:</b></p> <p><i>The date of initial application of IFRS 9 is significant because it is the date on which certain conditions for classification and measurement are assessed. On the date of initial application, an entity assesses whether a financial asset meets the business model test for amortised cost and FVTOCI measurement on the basis of the facts and circumstances that exist at that date. The resulting classification is applied retrospectively irrespective of the entity's business model in prior reporting periods.</i></p>
	<p>All recognised financial assets that are within the scope of IFRS 9 are required to be subsequently measured at amortised cost or fair value on the basis of the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets.</p> <p>Specifically:</p> <ul style="list-style-type: none"> <li>• debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding, are subsequently measured at amortised cost;</li> <li>• debt investments that are held within a business model whose objective is both to collect the contractual cash flows and to sell the debt instruments, and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding, are subsequently measured at fair value through other comprehensive income (FVTOCI);</li> <li>• all other debt investments and equity investments are subsequently measured at fair value through profit or loss (FVTPL).</li> </ul> <p>Despite the foregoing, the Group may make the following irrevocable election/designation at initial recognition of a financial asset:</p> <ul style="list-style-type: none"> <li>• the Group may irrevocably elect to present subsequent changes in fair value of an equity investment that is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 applies in other comprehensive income; and</li> <li>• the Group may irrevocably designate a debt investment that meets the amortised cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.</li> </ul>

## Source

## International GAAP Holdings Limited

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued**

In the current year, the Group has not designated any debt investments that meet the amortised cost or FVTOCI criteria as measured at FVTPL.

When a debt investment measured at FVTOCI is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment. In contrast, for an equity investment designated as measured at FVTOCI, the cumulative gain or loss previously recognised in other comprehensive income is not subsequently reclassified to profit or loss.

Debt instruments that are subsequently measured at amortised cost or at FVTOCI are subject to impairment. See note 2.2.

The directors of the Company reviewed and assessed the Group's existing financial assets as at 1 January 2016 based on the facts and circumstances that existed at that date and concluded that the initial application of IFRS 9 has had the following impact on the Group's financial assets as regards their classification and measurement:

- the Group's redeemable notes that were classified as available-for-sale financial assets under IAS 39 have been classified as financial assets at FVTOCI as they are held within a business model whose objective is both to collect the contractual cash flows and to sell the debt instruments, and they have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding. The change in fair value on these redeemable notes continues to be accumulated in the investment revaluation reserve until they are derecognised or reclassified;
- the Group's investments in equity instruments (neither held for trading nor a contingent consideration arising from a business combination) that were previously classified as available-for-sale financial assets and were measured at fair value at each reporting date under IAS 39 have been designated as at FVTOCI. The change in fair value on these equity instruments continues to be accumulated in the investment revaluation reserve;
- financial assets classified as held-to-maturity and loans and receivables under IAS 39 that were measured at amortised cost continue to be measured at amortised cost under IFRS 9 as they are held within a business model to collect contractual cash flows and these cash flows consist solely of payments of principal and interest on the principal amount outstanding;
- financial assets that were measured at FVTPL under IAS 39 continue to be measured as such under IFRS 9.

Note 2.5 tabulates the change in classification of the Group's financial assets upon application of IFRS 9.

The change in classification of the Group's redeemable notes and investments in equity instruments has resulted in the fair value gain on available-for-sale financial assets recognised in other comprehensive income of CU66,000 (2015: CU57,000) that used to be subsequently reclassified to profit or loss to be split into two parts: 1) those arising on equity investments designated as at FVTOCI that will not be subsequently reclassified to profit or loss of CU46,000 (2015: CU47,000), and 2) those arising from debt investments measured at FVTOCI (i.e. the redeemable notes) that may be subsequently reclassified to profit or loss of CU20,000 (2015: CU10,000). Note 2.6 details the adjustments arising from such reclassifications.

None of the other reclassifications of financial assets have had any impact on the Group's financial position, profit or loss, other comprehensive income or total comprehensive income for both years.

## International GAAP Holdings Limited

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued****2.2 Impairment of financial assets**

In relation to the impairment of financial assets, IFRS 9 requires an expected credit loss model as opposed to an incurred credit loss model under IAS 39. The expected credit loss model requires the Group to account for expected credit losses and changes in those expected credit losses at each reporting date to reflect changes in credit risk since initial recognition of the financial assets. In other words, it is no longer necessary for a credit event to have occurred before credit losses are recognised.

Specifically, IFRS 9 requires the Group to recognise a loss allowance for expected credit losses on i) debt investments subsequently measured at amortised cost or at FVTOCI, ii) lease receivables, iii) contract assets and iv) loan commitments and financial guarantee contracts to which the impairment requirements of IFRS 9 apply. In particular, IFRS 9 requires the Group to measure the loss allowance for a financial instrument at an amount equal to the lifetime ECL if the credit risk on that financial instrument has increased significantly since initial recognition, or if the financial instrument is a purchased or originated credit-impaired financial asset. On the other hand, if the credit risk on a financial instrument has not increased significantly since initial recognition (except for a purchased or originated credit-impaired financial asset), the Group is required to measure the loss allowance for that financial instrument at an amount equal to 12m ECL. IFRS 9 also provides a simplified approach for measuring the loss allowance at an amount equal to lifetime ECL for trade receivables, contract assets and lease receivables in certain circumstances.

**Commentary:**

*The references to 'contract assets' above are as used in IFRS 9 and refer to those rights that IFRS 15 specifies are accounted for in accordance with IFRS 9 for the purposes of recognising and measuring impairment gains or losses.*

*Even though the Group has not early adopted IFRS 15 in this appendix, references to the term 'contract asset' as used in IFRS 9 have been included here for completeness' sake.*

As at 1 January 2016, the directors of the Company reviewed and assessed the Group's existing financial assets, amounts due from customers and financial guarantee contracts for impairment using reasonable and supportable information that is available without undue cost or effort in accordance with the requirements of IFRS 9 to determine the credit risk of the respective items at the date they were initially recognised, and compared that to the credit risk as at 1 January 2015 and 1 January 2016. The result of the assessment is as follows:

**Commentary:**

*IFRS 9.7.2.15 allows an entity not to restate comparatives, in which case the cumulative difference in loss allowance to be recognised in terms of IFRS 9 are charged against opening retained earnings in the period in which the entity first applies IFRS 9. Nevertheless, restatement of comparatives is permitted if and only if it is possible without the use of hindsight.*

*In this set of illustrative financial statements, the Group has elected to restate the comparatives. Accordingly, for the purpose of assessing whether there has been a significant increase in credit risk since initial recognition of financial instruments that remain recognised on the date of initial application of IFRS 9 (i.e. 1 January 2016), the directors have compared the credit risk of the respective financial instruments on the date of their initial recognition to their credit risk as at 1 January 2015 and 1 January 2016. The comparison made as at 1 January 2015 determines whether 12m ECL or lifetime ECL should be recognised for the respective financial instruments at that date. The impact of any change in credit risk of these financial instruments from 1 January 2015 to 31 December 2015 would be reflected in the year ended 31 December 2015 as a restatement of the 2015 figures resulting from the application of IFRS 9.*

IFRS 9.7.2.18, 7.2.20, 5.5.10, 5.5.15	Notes to the consolidated financial statements for the year ended 31 December 2016 – continued				
	Items existing as at 01/01/16 that are subject to the impairment provisions of IFRS 9	Note	Credit risk attributes at 01/01/15 and 01/01/16	Cumulative additional loss allowance recognised on:	
				01/01/15	01/01/16
				CU'000	CU'000
	Loans to related parties	22	The directors have concluded that it would require undue cost and effort to determine the credit risk of each loan on their respective dates of initial recognition. These loans are also assessed to have credit risk other than low. Accordingly, the Group recognises lifetime ECL for these loans until they are derecognised.	(250)	(309)
	Bills of exchange (external credit rating: A)	22	These items are assessed to have low credit risk at each reporting date based on their respective external credit ratings.	–	(2)
	Redeemable notes (external credit rating: AA)	22	As such, the Group assumes that the credit risk on these financial instruments has not increased significantly since initial recognition as permitted by IFRS 9 and recognises 12m ECL for these assets.	(1)	(1)
	Trade and other receivables	25	The Group applies the simplified approach and recognises lifetime ECL for these assets.	(500)	(550)
	Finance lease receivables	26		No impairment due to existence of collaterals	
	Amounts due from customers under construction contracts	27		–	(2)
	Cash and bank balances	–	All bank balances are assessed to have low credit risk at each reporting date as they are held with reputable international banking institutions.	–	–
	Financial guarantee contracts	34	All financial guarantee contracts were issued in 2015. There has been no significant increase in the risk of default on the underlying loans since initial recognition up to 1 January 2016. The Group therefore recognises 12m ECL for these contracts.	NA	(2)
			(751)	(866)	
The additional credit loss allowance of CU866,000 as at 1 January 2016 and CU751,000 as at 1 January 2015 has been recognised against retained earnings on the respective dates, net of their related deferred tax impact of CU259,800 and CU225,300 respectively, resulting in a net decrease in retained earnings of CU606,200 and CU525,700 as at 1 January 2016 and 2015 respectively. The additional loss allowance is charged against the respective asset or provision for financial guarantee, except for the investment in redeemable notes which is measured at FVTOCI, the loss allowance for which is recognised against the investment revaluation reserve (see note 29.3). The application of the IFRS 9 impairment requirements has resulted in additional loss allowance of CU228,000 to be recognised in the current year (2015: CU115,000). See notes 2.5 and 2.6 for further financial details of the adjustments.

IFRS 7.42P	<p data-bbox="308 230 1409 259"><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p data-bbox="308 275 1500 398">The reconciliation between the ending provision for impairment in accordance with IAS 39 and the provision in accordance with IAS 37 (for the financial guarantee contracts) to the opening loss allowance determined in accordance with IFRS 9 for the above financial instruments on 1 January 2015 and 1 January 2016 is disclosed in their respective notes.</p> <p data-bbox="308 421 1500 510">The consequential amendments to IFRS 7 have also resulted in more extensive disclosures about the Group's exposure to credit risk in the consolidated financial statements (see notes 22A, 22.1, 25.1, 26.2, 27, 34 and 40.9 for details).</p> <p data-bbox="308 533 930 562"><b>2.3 Classification and measurement of financial liabilities</b></p> <p data-bbox="308 577 1500 667">One major change introduced by IFRS 9 in the classification and measurement of financial liabilities relates to the accounting for changes in the fair value of a financial liability designated as at FVTPL attributable to changes in the credit risk of the issuer.</p> <p data-bbox="308 689 1500 902">Specifically, IFRS 9 requires that the changes in the fair value of the financial liability that is attributable to changes in the credit risk of that liability be presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to profit or loss, but are instead transferred to retained earnings when the financial liability is derecognised. Previously, under IAS 39, the entire amount of the change in the fair value of the financial liability designated as at FVTPL was presented in profit or loss.</p> <p data-bbox="308 925 1500 1115">This change in accounting policy has affected the Group's accounting for changes in the fair value of redeemable cumulative preference shares issued by the Group in the current year that were designated by the Group on initial recognition as financial liabilities at FVTPL. Specifically, the gain arising from changes in the fair value of the redeemable cumulative preference shares attributable to changes in the credit risk of the liabilities of CU20,000 has been presented in other comprehensive income in the current year. The remaining amount of change in the fair value of the liabilities of CU105,000 has been presented in profit or loss.</p> <p data-bbox="308 1137 1500 1261">Accordingly, this aspect of the application of IFRS 9 has resulted in the profit reported for 2016 being decreased by CU14,000 (CU20,000 net of tax of CU6,000), with a corresponding increase in other comprehensive income thus leaving total comprehensive income for 2016 unchanged. Profit and other comprehensive income reported for 2015 have not been affected as the Group did not have any financial liabilities designated as at FVTPL in the prior year.</p> <p data-bbox="308 1283 1500 1339">Apart from the above, the application of IFRS 9 has had no impact on the classification and measurement of the Group's financial liabilities.</p> <p data-bbox="308 1361 1500 1417">Please refer to notes 2.5 and 2.6 for further details regarding the change in classification upon the application of IFRS 9.</p> <p data-bbox="308 1440 627 1469"><b>2.4 General hedge accounting</b></p> <p data-bbox="308 1485 1500 1697">The new general hedge accounting requirements retain the three types of hedge accounting. However, greater flexibility has been introduced to the types of transactions eligible for hedge accounting, specifically broadening the types of instruments that qualify for hedging instruments and the types of risk components of non-financial items that are eligible for hedge accounting. In addition, the effectiveness test has been overhauled and replaced with the principle of an 'economic relationship'. Retrospective assessment of hedge effectiveness is also no longer required. Enhanced disclosure requirements about the Group's risk management activities have also been introduced.</p> <p data-bbox="308 1720 1500 1977">In accordance with IFRS 9's transition provisions for hedge accounting, the Group has applied the IFRS 9 hedge accounting requirements prospectively from the date of initial application on 1 January 2016. The Group's qualifying hedging relationships in place as at 1 January 2016 also qualified for hedge accounting in accordance with IFRS 9 and were therefore regarded as continuing hedging relationships. No rebalancing of any of the hedging relationships was necessary on 1 January 2016. As the critical terms of the hedging instruments match those of their corresponding hedged items, all hedging relationships continue to be effective under IFRS 9's effectiveness assessment requirements. The Group has also not designated any hedging relationships under IFRS 9 that would not have met the qualifying hedge accounting criteria under IAS 39.</p>

Source	International GAAP Holdings Limited
	<p data-bbox="308 230 1410 259"><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p data-bbox="308 275 1495 367">Consistent with prior periods, the Group has continued to designate the change in fair value of the entire forward contract, i.e. including the forward element, as the hedging instrument in the Group's cash flow hedge and fair value hedge relationships.</p> <p data-bbox="308 392 1495 931">In addition, IFRS 9 requires hedging gains and losses to be basis adjusted to the initial carrying amount of non-financial hedged items. Although this is consistent with the Group's existing practice, IFRS 9 states that such transfers are not a reclassification adjustment under IAS 1 and hence they do not affect other comprehensive income. Previously, hedging gains and losses subject to basis adjustments were categorised as amounts that may be subsequently reclassified to profit or loss in other comprehensive income, and the actual basis adjustments were presented as a reclassification adjustment in other comprehensive income. Since the IFRS 9 hedge accounting requirements apply prospectively from the date of initial application (i.e. 1 January 2016), the comparative figures have not been restated. However, the current year fair value gain of CU49,000 (being CU70,000 net of tax of CU21,000) on forward foreign exchange contracts subject to cash flow hedge accounting that will be subsequently basis adjusted onto the initial carrying amount of non-financial hedged items (see note 40.6.2), has been presented as amounts that will not be subsequently reclassified to profit or loss. Furthermore, the current year basis adjustment of CU180,000 (being CU257,000 net of tax of CU77,000) (see note 29.5) has been presented as a direct transfer from equity to the initial carrying amount of the hedged inventories and to the deferred tax account as appropriate, rather than being presented as a reclassification adjustment affecting other comprehensive income. Accordingly, other comprehensive income and total comprehensive income increased by CU180,000 in the current year, with no net impact to the total movement in the cash flow hedging reserve. See note 2.6 for further financial details of the adjustments.</p> <p data-bbox="308 949 1495 1041">Apart from this, the application of the IFRS 9 hedge accounting requirements has had no impact on the results and financial position of the Group for the current and/or prior years. Please refer to note 40 for detailed disclosures regarding the Group's risk management activities.</p>

## 2.5 Disclosures in relation to the initial application of IFRS 9

**Commentary:**

When IFRS 9 was finalised in 2014, consequential amendments were made to IFRS 7 to require certain disclosures when an entity first applies IFRS 9. The disclosures apply regardless of whether an entity restates comparatives.

IFRS 7.42I(a), (b)  
IFRS 7.42J(a)

The table below illustrates the classification and measurement of financial assets and financial liabilities under IFRS 9 and IAS 39 at the date of initial application, 1 January 2016.

		Original measurement category under IAS 39	New measurement category under IFRS 9	Original carrying amount under IAS 39	Additional loss allowance recognised under IFRS 9	New carrying amount under IFRS 9
				CU'000	CU'000	CU'000
1.	Foreign currency forward contracts (note 22)	Derivatives designated as hedging instruments	Derivatives designated as hedging instruments	220	–	220
2.	Interest rate swaps (note 22)	Derivatives designated as hedging instruments	Derivatives designated as hedging instruments	177	–	177
3.	Financial assets designated as at FVTPL (note 22)	Financial assets at FVTPL	Financial assets at FVTPL	–	–	–
4.	Held for trading non-derivative financial assets (note 22)	Financial assets at FVTPL	Financial assets at FVTPL	1,639	–	1,639
5.	Redeemable notes (note 22(ii))	Available-for-sale investments	Financial assets at FVTOCI	2,180	(1)	2,180 (i)
6.	Investments in equity instruments (unlisted shares) (note 22(ii))	Available-for-sale investments	Financial assets at FVTOCI	5,285	–	5,285
7.	Bills of exchange (note 22(iii))	Held-to-maturity investments	Financial assets at amortised cost	4,015	(2)	4,013
8.	Loans to related parties (note 22(v))	Loans and receivables	Financial assets at amortised cost	3,088	(309)	2,779
9.	Trade and other receivables (note 25)	Loans and receivables	Financial assets at amortised cost	13,744	(550)	13,194
10.	Cash and bank balances	Loans and receivables	Financial assets at amortised cost	20,278	–	20,278
11.	Trade and other payables (note 37)	Financial liabilities at amortised cost	Financial liabilities at amortised cost	(20,422)	–	(20,422)
12.	Borrowings (note 32)	Financial liabilities at amortised cost	Financial liabilities at amortised cost	(51,486)	–	(51,486)
13.	Financial liabilities designated as at FVTPL (note 34)	Financial liabilities at FVTPL	Financial liabilities at FVTPL	–	–	–

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>																																																																																				
	(i) The additional loss allowance recognised for the redeemable notes classified as at FVTOCI is recognised against the investment revaluation reserve rather than against the carrying amount as the redeemable notes are already measured at fair value.																																																																																				
IFRS 7.42L, 42P	The additional loss allowance recognised upon the initial application of IFRS 9 as disclosed above resulted entirely from a change in the measurement attribute of the loss allowance relating to each financial asset. The change in measurement category of the different financial assets has had no impact on their respective carrying amounts on initial application.																																																																																				
IFRS 7.42I(c) IFRS 7.42J(b)	There were no financial assets or financial liabilities which the Group had previously designated as at FVTPL under IAS 39 that were subject to reclassification, or which the Group has elected to reclassify upon the application of IFRS 9. There were no financial assets or financial liabilities which the Group has elected to designate as at FVTPL at the date of initial application of IFRS 9.

	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p><b>3. Significant accounting policies</b></p> <p><b>Commentary:</b></p> <p><i>The note below illustrates only the accounting policies relating to financial instruments that are within the scope of IFRS 9.</i></p> <p><i>IFRS 9 generally requires retrospective application, except for the requirements of hedge accounting which generally requires prospective application. Furthermore, IFRS 9 contains detailed transition provisions, a full discussion of which is beyond the scope of this publication. This appendix illustrates the transition provisions that are applicable to International GAAP Holdings Limited. Readers are recommended to seek professional advice on the details of transition to IFRS 9 for individual cases.</i></p> <p><i>In addition, as explained in the introductory section of this appendix, IFRS 9 does not apply to items that have been derecognised before the date of initial application IFRS 9. For these items an entity is required to apply IAS 39 in the comparative period, regardless of whether the company elects to restate comparatives. Accordingly:</i></p> <p><u><i>For entities that elect to restate comparatives</i></u></p> <ul style="list-style-type: none"> <li><i>• These entities should continue to disclose the IAS 39 accounting policies adopted and the related IFRS 7 disclosures in relation to items that have been derecognised in the comparative period;</i></li> <li><i>• The IFRS 9 accounting policies below and the related IFRS 7 disclosures presented in the subsequent notes pertain to items that continued to be recognised as of the date of initial application and those that arise subsequent to the date of initial application.</i></li> </ul> <p><u><i>For entities that elect <b>not</b> to restate comparatives</i></u></p> <ul style="list-style-type: none"> <li><i>• These entities should disclose the accounting policies adopted in terms of IAS 39 and the related IFRS 7 disclosures for the comparative period;</i></li> <li><i>• The IFRS 9 accounting policies below and the related IFRS 7 disclosures presented in the subsequent notes would apply from the date of initial application of IFRS 9.</i></li> </ul> <p><i>The IAS 39 accounting policies adopted by the Group are disclosed in note 3 to section 2 of this publication and have not been reproduced here.</i></p>
IFRS 7.21	<p><b>3.24 Financial instruments</b></p> <p>Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument.</p> <p>Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.</p>
IFRS 7.21 IFRS 7.B5(c)	<p><b>3.25 Financial assets</b></p> <p>All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.</p> <p>All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.</p>

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued***3.25.1.2 Debt instruments classified as at FVTOCI*

Listed redeemable notes held by the Group are classified as at FVTOCI. Fair value is determined in the manner described in note 40.11.1. The listed redeemable notes are initially measured at fair value plus transaction costs. Subsequently, changes in the carrying amount of these listed redeemable notes as a result of foreign exchange gains and losses (see 3.25.2), impairment gains or losses (see 3.25.3), and interest income calculated using the effective interest method (see 3.25.1.1) are recognised in profit or loss. The amounts that are recognised in profit or loss are the same as the amounts that would have been recognised in profit or loss if these listed redeemable notes had been measured at amortised cost. All other changes in the carrying amount of these listed redeemable notes are recognised in other comprehensive income and accumulated under the heading of investments revaluation reserve. When these listed redeemable notes are derecognised, the cumulative gains or losses previously recognised in other comprehensive income are reclassified to profit or loss.

*3.25.1.3 Equity instruments designated as at FVTOCI*

On initial recognition, the Group may make an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognised by an acquirer in a business combination to which IFRS 3 applies.

A financial asset is held for trading if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has evidence of a recent actual pattern of short-term profit-taking; or
- it is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

Investments in equity instruments at FVTOCI are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the investments revaluation reserve. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, instead, they will be transferred to retained earnings.

The Group has designated all investments in equity instruments that are not held for trading as at FVTOCI on initial application of IFRS 9 (see note 22(ii)).

Dividends on these investments in equity instruments are recognised in profit or loss when the Group's right to receive the dividends is established in accordance with IAS 18 *Revenue*, unless the dividends clearly represent a recovery of part of the cost of the investment. Dividends are included in the 'investment income' line item (note 7) in profit or loss.

*3.25.1.4 Financial assets at FVTPL*

Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI (see 3.25.1.1 to 3.25.1.3) are measured at FVTPL. Specifically:

- Investments in equity instruments are classified as at FVTPL, unless the Group designates an equity investment that is neither held for trading nor a contingent consideration arising from a business combination as at FVTOCI on initial recognition (see 3.25.1.3).
- Debt instruments that do not meet the amortised cost criteria or the FVTOCI criteria (see 3.25.1.1 and 3.25.1.2) are classified as at FVTPL. In addition, debt instruments that meet either the amortised cost criteria or the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Group has not designated any debt instruments as at FVTPL.

Source	International GAAP Holdings Limited
IFRS 7.B5(e)	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
	<p>Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss to the extent they are not part of a designated hedging relationship (see 3.28). The net gain or loss recognised in profit or loss includes any dividend or interest earned on the financial asset and is included in the 'other gains and losses' line item (note 8). Fair value is determined in the manner described in note 40.11.1.</p> <p><a href="#">3.25.2 Foreign exchange gains and losses</a></p> <p>The carrying amount of financial assets that are denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period. Specifically,</p> <ul style="list-style-type: none"> <li>• for financial assets measured at amortised cost that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss in the 'other gains and losses' line item;</li> <li>• for debt instruments measured at FVTOCI that are not part of a designated hedging relationship, exchange differences on the amortised cost of the debt instrument are recognised in profit or loss in the 'other gains and losses' line item. Other exchange differences are recognised in other comprehensive income in the investments revaluation reserve;</li> <li>• for financial assets measured at FVTPL that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss in the 'other gains and losses' line item; and</li> <li>• for equity instruments measured at FVTOCI, exchange differences are recognised in other comprehensive income in the investments revaluation reserve.</li> </ul> <p>See note 3.28 regarding the recognition of exchange differences where the foreign currency risk component of a financial asset is designated as a hedging instrument for a hedge of foreign currency risk.</p> <p><a href="#">3.25.3 Impairment of financial assets</a></p> <p>The Group recognises a loss allowance for expected credit losses on investments in debt instruments that are measured at amortised cost or at FVTOCI, lease receivables, amounts due from customers under construction contracts, as well as on loan commitments and financial guarantee contracts. No impairment loss is recognised for investments in equity instruments. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.</p> <p>The Group always recognises lifetime ECL for trade receivables, amounts due from customers under construction contracts and lease receivables. The expected credit losses on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.</p> <p>For all other financial instruments, the Group recognises lifetime ECL when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on the financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12m ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition instead of on evidence of a financial asset being credit-impaired at the reporting date or an actual default occurring.</p> <p>Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12m ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.</p>

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
	<i>3.25.3.1 Significant increase in credit risk</i>
IFRS 7.35F(a) IFRS 7.35G(b)	<p>In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the Group's debtors operate, obtained from economic expert reports, financial analysts, governmental bodies, relevant think-tanks and other similar organisations, as well as consideration of various external sources of actual and forecast economic information that relate to the Group's core operations, namely the leisure goods and electronic equipment market, the residential properties construction industry and the IT software business.</p>
IFRS 7.35F(a) IFRS 7.35G(a)(ii)	<p>In particular, the following information is taken into account when assessing whether credit risk has increased significantly since initial recognition:</p> <ul style="list-style-type: none"> <li>• an actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;</li> <li>• significant deterioration in external market indicators of credit risk for a particular financial instrument, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor, or the length of time or the extent to which the fair value of a financial asset has been less than its amortised cost;</li> <li>• existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;</li> <li>• an actual or expected significant deterioration in the operating results of the debtor;</li> <li>• significant increases in credit risk on other financial instruments of the same debtor;</li> <li>• an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.</li> </ul> <p>Irrespective of the outcome of the above assessment, the Group presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise.</p>
IFRS 7.35F(a)(i)	<p>Despite the foregoing, the Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date. A financial instrument is determined to have low credit risk if i) the financial instrument has a low risk of default, ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term and iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations. The Group considers a financial asset to have low credit risk when it has an internal or external credit rating of 'investment grade' as per globally understood definition.</p> <p>For loan commitments and financial guarantee contracts, the date that the Group becomes a party to the irrevocable commitment is considered to be the date of initial recognition for the purposes of assessing the financial instrument for impairment. In assessing whether there has been a significant increase in the credit risk since initial recognition of a loan commitment, the Group considers changes in the risk of a default occurring on the loan to which a loan commitment relates; for financial guarantee contracts, the Group considers the changes in the risk that the specified debtor will default on the contract.</p> <p>The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.</p>

Source	International GAAP Holdings Limited
	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
	<i>3.25.3.2 Definition of default</i>
IFRS 7.35F(b)	<p>The Group considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that receivables that meet either of the following criteria are generally not recoverable.</p> <ul style="list-style-type: none"> <li>• when there is a breach of financial covenants by the counterparty; or</li> <li>• information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collaterals held by the Group).</li> </ul> <p>Irrespective of the above analysis, the Group considers that default has occurred when a financial asset is more than 90 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.</p>
	<i>3.25.3.3 Credit-impaired financial assets</i>
IFRS 7.35F(d) IFRS 7.35G(a)(iii)	<p>A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:</p> <ol style="list-style-type: none"> <li>a) significant financial difficulty of the issuer or the borrower;</li> <li>b) a breach of contract, such as a default or past due event (see 3.25.3.2);</li> <li>c) the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider;</li> <li>d) it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or</li> <li>e) the disappearance of an active market for that financial asset because of financial difficulties.</li> </ol>
	<i>3.25.3.4 Write-off policy</i>
IFRS 7.35F(e)	<p>The Group writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings, or in the case of trade receivables, when the amounts are over two years past due, whichever occurs sooner. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.</p>
	<i>3.25.3.5 Measurement and recognition of expected credit losses</i>
IFRS 7.35G(a)	<p>The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above. As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date; for loan commitments and financial guarantee contracts, the exposure includes the amount drawn down as at the reporting date, together with any additional amounts expected to be drawn down in the future by default date determined based on historical trend, the Group's understanding of the specific future financing needs of the debtors, and other relevant forward-looking information.</p> <p>For financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the Group in accordance with the contract and all the cash flows that the Group expects to receive, discounted at the original effective interest rate. For a lease receivable, the cash flows used for determining the expected credit losses is consistent with the cash flows used in measuring the lease receivable in accordance with IAS 17 <i>Leases</i>.</p> <p>For a financial guarantee contract, as the Group is required to make payments only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed, the expected loss allowance is the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the Group expects to receive from the holder, the debtor or any other party.</p> <p>For undrawn loan commitments, the expected credit loss is the present value of the difference between the contractual cash flows that are due to the Group if the holder of the loan commitment draws down the loan, and the cash flows that the Group expects to receive if the loan is drawn down.</p>

Source	International GAAP Holdings Limited
IFRS 7.35F(c) IFRS 7.35G(a)	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p>Where lifetime ECL is measured on a collective basis to cater for cases where evidence of significant increases in credit risk at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:</p> <ul style="list-style-type: none"> <li>• Nature of financial instruments (i.e. the Group's trade and other receivables, finance lease receivables and amounts due from customers are each assessed as a separate group. Loans to related parties are assessed for expected credit losses on an individual basis);</li> <li>• Past-due status;</li> <li>• Nature, size and industry of debtors;</li> <li>• Nature of collaterals for finance lease receivables; and</li> <li>• External credit ratings where available.</li> </ul> <p>The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.</p> <p>If the Group has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period, but determines at the current reporting date that the conditions for lifetime ECL are no longer met, the Group measures the loss allowance at an amount equal to 12m ECL at the current reporting date.</p> <p>The Group recognises an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account, except for investments in debt instruments that are measured at FVTOCI, for which the loss allowance is recognised in other comprehensive income and accumulated in the investment revaluation reserve, and does not reduce the carrying amount of the financial asset in the statement of financial position.</p> <p><a href="#">3.25.4 Derecognition of financial assets</a></p> <p>The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.</p> <p>On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss. In addition, on derecognition of an investment in a debt instrument classified as at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss. In contrast, on derecognition of an investment in equity instrument which the Group has elected on initial recognition to measure at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is not reclassified to profit or loss, but is transferred to retained earnings.</p>
IFRS 7.21	<p><b>3.26 Financial liabilities and equity instruments</b></p> <p><a href="#">3.26.1 Classification as debt or equity</a></p> <p>Debt and equity instruments issued by a group entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.</p> <p><a href="#">3.26.2 Equity instruments</a></p> <p>An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a group entity are recognised at the proceeds received, net of direct issue costs.</p> <p>Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.</p>

## International GAAP Holdings Limited

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued****3.26.3 [Compound instruments](#)**

The component parts of compound instruments (convertible notes) issued by the Company are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument.

At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments. This amount is recorded as a liability on an amortised cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date.

A conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to [share premium/other equity [describe]]. Where the conversion option remains unexercised at the maturity date of the convertible note, the balance recognised in equity will be transferred to [retained profits/other equity [describe]]. No gain or loss is recognised in profit or loss upon conversion or expiration of the conversion option.

Transaction costs that relate to the issue of the convertible notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortised over the lives of the convertible notes using the effective interest method.

**3.26.4 [Financial liabilities](#)**

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

However, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies, financial guarantee contracts issued by the Group, and commitments issued by the Group to provide a loan at below-market interest rate are measured in accordance with the specific accounting policies set out below.

**3.26.4.1 [Financial liabilities at FVTPL](#)**

Financial liabilities are classified as at FVTPL when the financial liability is 1) contingent consideration of an acquirer in a business combination to which IFRS 3 applies, 2) held for trading, or 3) it is designated as at FVTPL.

A financial liability is classified as held for trading if:

- it has been acquired principally for the purpose of repurchasing it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative, except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument.

A financial liability other than a financial liability held for trading or contingent consideration of an acquirer in a business combination may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and IFRS 9 permits the entire combined contract to be designated as at FVTPL.

Source	International GAAP Holdings Limited
IFRS 7.B5(e)	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p>Financial liabilities at FVTPL are stated at fair value with any gains or losses arising on changes in fair value recognised in profit or loss to the extent that they are not part of a designated hedging relationship (see 3.28). The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liabilities and is included in the 'other gains and losses' line item (note 8).</p> <p>However, for financial liabilities that are designated as at FVTPL, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is recognised in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. The remaining amount of change in the fair value of liability is recognised in profit or loss. Changes in fair value attributable to a financial liability's credit risk that are recognised in other comprehensive income are not subsequently reclassified to profit or loss; instead, they are transferred to retained earnings upon derecognition of the financial liability.</p> <p>Gains or losses on financial guarantee contracts and loan commitments issued by the Group that are designated by the Group as at fair value through profit or loss are recognised in profit or loss.</p> <p>Fair value is determined in the manner described in note 40.11.1.</p> <p><i>3.26.4.2 Financial liabilities subsequently measured at amortised cost</i></p> <p>Financial liabilities that are not 1) contingent consideration of an acquirer in a business combination, 2) held-for-trading, or 3) designated as at FVTPL, are subsequently measured at amortised cost using the effective interest method.</p> <p>The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.</p> <p><i>3.26.4.3 Financial guarantee contracts</i></p> <p>A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.</p> <p>Financial guarantee contracts issued by a group entity are initially measured at their fair values and, if not designated as at FVTPL and do not arise from a transfer of a financial asset, are subsequently measured at the higher of:</p> <ul style="list-style-type: none"> <li>• the amount of the loss allowance determined in accordance with IFRS 9 (see 3.25.3); and</li> <li>• the amount initially recognised less, where appropriate, cumulative amount of income recognised in accordance with the revenue recognition policies.</li> </ul> <p><i>3.26.4.4 Commitments to provide a loan at a below-market interest rate</i></p> <p>Commitments to provide a loan at a below-market interest rate are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:</p> <ul style="list-style-type: none"> <li>• the amount of the loss allowance determined in accordance with IFRS 9 (see 3.25.3); and</li> <li>• the amount initially recognised less, where appropriate, cumulative amount of income recognised in accordance with the revenue recognition policies.</li> </ul> <p><i>3.26.4.5 Foreign exchange gains and losses</i></p> <p>For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments. These foreign exchange gains and losses are recognised in the 'other gains and losses' line item in profit or loss (note 8) for financial liabilities that are not part of a designated hedging relationship.</p> <p>The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognised in profit or loss for financial liabilities that are not part of a designated hedging relationship.</p> <p>See note 3.28 regarding the recognition of exchange differences where the foreign currency risk component of a financial liability is designated as a hedging instrument for a hedge of foreign currency risk.</p>

Source	International GAAP Holdings Limited
	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p><i>3.26.4.6 Derecognition of financial liabilities</i></p> <p>The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.</p>
IFRS 7.21	<p><b>3.27 Derivative financial instruments</b></p> <p>The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risks, including foreign exchange forward contracts and interest rate swaps. Further details of derivative financial instruments are disclosed in note 40.</p> <p>Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.</p> <p><u>3.27.1 Embedded derivatives</u></p> <p>Derivatives embedded in non-derivative host contracts that are not financial assets within the scope of IFRS 9 (e.g. financial liabilities) are treated as separate derivatives when they meet the definition of a derivative, their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL. Derivatives embedded in hybrid contracts that contain financial asset hosts within the scope of IFRS 9 are not separated. The entire hybrid contract is classified and subsequently measured as either amortised cost or FVTPL as appropriate. See note 3.25.1 for the Group's policy on classification of financial assets.</p>
IFRS 7.21	<p><b>3.28 Hedge accounting</b></p> <p>The Group designates certain derivatives as hedging instruments in respect of foreign currency risk and interest rate risk in fair value hedges, cash flow hedges, or hedges of net investments in foreign operations as appropriate. Hedges of foreign exchange risk on firm commitments are accounted for as cash flow hedges.</p> <p>At the inception of the hedge relationship, the Group documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument is effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk, which is when the hedging relationships meet all of the following hedge effectiveness requirements:</p> <ul style="list-style-type: none"> <li>• there is an economic relationship between the hedged item and the hedging instrument;</li> <li>• the effect of credit risk does not dominate the value changes that result from that economic relationship; and</li> <li>• the hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Group actually hedges and the quantity of the hedging instrument that the entity actually uses to hedge that quantity of hedged item.</li> </ul> <p>If a hedging relationship ceases to meet the hedge effectiveness requirement relating to the hedge ratio but the risk management objective for that designated hedging relationship remains the same, the Group adjusts the hedge ratio of the hedging relationship (i.e. rebalances the hedge) so that it meets the qualifying criteria again.</p> <p>The Group designates the full change in the fair value of a forward contract (i.e. including the forward elements) as the hedging instrument for all of its hedging relationships involving forward contracts.</p> <p>Note 40 sets out details of the fair values of the derivative instruments used for hedging purposes.</p>

## Notes to the consolidated financial statements for the year ended 31 December 2016 – continued

**Commentary:**

Even though the Group has elected to designate the full change in the fair value of a forward contract as the hedging instrument, IFRS 9 allows an entity to exclude the forward element and designate only the change in fair value of the spot element as the hedging instrument. There is a similar exclusion for foreign currency basis spreads of financial instruments. Similarly, IFRS 9 allows an entity to exclude the time value of an option and designate only the intrinsic value as the hedging instrument.

In these cases, the normal hedge accounting mechanics apply to the change in the designated spot element of a forward contract (applied similarly to a financial instrument excluding the foreign currency basis spreads) and intrinsic value of the option depending on the type of designated hedge relationship (i.e. cash flow hedge, fair value hedge or net investment hedge). The accounting for the undesignated forward element of forward contracts, foreign currency basis spreads and time value of options are described below.

**1) Accounting for the time value of options**

The change in time value to the extent it relates to the hedged item is initially recognised in OCI. This is referred to as the aligned time value, which is determined as the value of an option that has critical terms that perfectly match the hedged item (e.g. nominal amount, life and underlying). The aligned time value is recognised in profit or loss depending on whether the hedged item is a:

- a) transaction related item, or
- b) time-period related item.

Any difference between the aligned time value and actual time value of the option is recognised directly in profit or loss.

The accounting of the time value is not affected by the type of hedging relationship.

**a) Transaction related hedged item**

The time value of an option relates to a transaction related hedged item if the nature of the hedged item is a transaction for which the time value has the character of costs of that transaction. An example is a hedged item that results in the recognition of an item whose initial measurement includes transaction costs such as a commodity purchase, hedged for commodity price risk that includes transaction costs in the initial measurement of the inventory.

Amounts accumulated in equity are reclassified to profit or loss in the periods when the hedged item affects profit or loss as follows:

- if the hedged item subsequently results in the recognition of a non-financial asset or a non-financial liability, the deferred aligned time value is included within the initial cost of the asset or liability.
- In all other cases, the accumulated amount is reclassified from equity to profit or loss in the same period during which the hedged expected future cash flows affect profit or loss.
- However, if any of the aligned time value is not expected to be recovered, that amount is immediately reclassified to profit or loss.

**b) Time-period related hedged item**

The time value of an option relates to a time-period related hedged item if the nature of the hedged item is such that the time value has the character of a cost for obtaining protection against a risk over a particular period of time (but the hedged item does not result in a transaction that involves the notion of a transaction cost as described in a) above).

The change in the aligned time value is recognised in OCI and is amortised on a systematic and rational basis over the period during which the hedge adjustment for the option's intrinsic value could affect profit or loss (or OCI, if the hedged item is an equity instrument at FVTOCI). However, if hedge accounting is discontinued the net amount (i.e. including cumulative amortisation) that has been accumulated in the separate component of equity is immediately reclassified into profit or loss.

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
IFRS 9.6.5.16 IFRS 9.B6.5.34- B6.5.39	<p data-bbox="308 320 1345 383"><b>2) Accounting for the forward element of forward contracts and foreign currency basis spreads of financial instruments</b></p> <p data-bbox="308 400 1473 560"><i>When an entity separates the forward element and the spot element of a forward contract and designates as the hedging instrument only the change in the value of the spot element of the forward contract, or when an entity separates the foreign currency basis spread from a financial instrument and excludes it from the designation of that financial instrument as the hedging instrument, there is a choice over how changes in value of the undesignated aligned forward element and foreign currency basis spread are accounted for. The two alternatives are as follows:</i></p> <ul data-bbox="308 577 1401 685" style="list-style-type: none"> <li><i>• Recognise them directly in profit or loss; or</i></li> <li><i>• Recognise them in OCI. The mechanics for recognising these amounts in profit or loss are the same as those described above when only the intrinsic value of an option is designated as a hedging instrument.</i></li> </ul> <p data-bbox="308 703 1481 766"><i>Any difference between the aligned forward element and foreign currency basis spread and their actual counterparts is recognised directly in profit or loss.</i></p> <p data-bbox="308 784 1449 846"><i>The accounting of the undesignated forward element and foreign currency basis spread is not affected by the type of hedging relationship.</i></p> <p data-bbox="308 875 1086 907"><i>Note 29.9 illustrates the disclosures relating to such deferred costs of hedging.</i></p> <p data-bbox="308 963 555 994"><u>3.28.1 Fair value hedges</u></p> <p data-bbox="308 1012 1501 1106">The fair value change on qualifying hedging instruments is recognised in profit or loss except when the hedging instrument hedges an equity instrument designated at FVTOCI in which case it is recognised in other comprehensive income.</p> <p data-bbox="308 1124 1505 1283">The carrying amount of a hedged item not already measured at fair value is adjusted for the fair value change attributable to the hedged risk with a corresponding entry in profit or loss. For debt instruments measured at FVTOCI, the carrying amount is not adjusted as it is already at fair value, but the hedging gain or loss is recognised in profit or loss instead of other comprehensive income. When the hedged item is an equity instrument designated at FVTOCI, the hedging gain or loss remains in other comprehensive income to match that of the hedging instrument.</p> <p data-bbox="308 1301 1469 1364">Where hedging gains or losses are recognised in profit or loss, they are recognised in the same line as the hedged item.</p> <p data-bbox="308 1382 1489 1507">The Group discontinues hedge accounting only when the hedging relationship (or a part thereof) ceases to meet the qualifying criteria (after rebalancing, if applicable). This includes instances when the hedging instrument expires or is sold, terminated or exercised. The discontinuation is accounted for prospectively. The fair value adjustment to the carrying amount of the hedged item arising from the hedged risk is amortised to profit or loss from that date.</p> <p data-bbox="308 1525 560 1556"><u>3.28.2 Cash flow hedges</u></p> <p data-bbox="308 1574 1489 1733">The effective portion of changes in the fair value of derivatives and other qualifying hedging instruments that are designated and qualify as cash flow hedges is recognised in other comprehensive income and accumulated under the heading of cash flow hedging reserve, limited to the cumulative change in fair value of the hedged item from inception of the hedge. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, and is included in the 'other gains and losses' line item.</p> <p data-bbox="308 1751 1489 2002">Amounts previously recognised in other comprehensive income and accumulated in equity are reclassified to profit or loss in the periods when the hedged item affects profit or loss, in the same line as the recognised hedged item. However, when the hedged forecast transaction results in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously recognised in other comprehensive income and accumulated in equity are removed from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability. This transfer does not affect other comprehensive income. Furthermore, if the Group expects that some or all of the loss accumulated in other comprehensive income will not be recovered in the future, that amount is immediately reclassified to profit or loss.</p>

## 14. Earnings per share

## 14.3 Impact of changes in accounting policies

IAS 8.28(f)(ii)

Changes in the Group's accounting policies during the year are described in detail in note 2. The changes in accounting policies affected only the Group's results from continuing operations. To the extent that those changes have had an impact on results reported for 2016 and 2015, they have had an impact on the amounts reported for earnings per share.

The following table summarises that effect on both basic and diluted earnings per share.

	Increase (decrease) in profit for the year attributable to the owners of the Company		Increase (decrease) in basic earnings per share		Increase (decrease) in diluted earnings per share	
	Year ended 31/12/16	Year ended 31/12/15	Year ended 31/12/16	Year ended 31/12/15	Year ended 31/12/16	Year ended 31/12/15
	CU'000	CU'000	Cents per share	Cents per share	Cents per share	Cents per share

	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p><b>22A. Overview of the Group’s exposure to credit risk</b></p> <p>Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. As at 31 December 2016, the Group’s maximum exposure to credit risk without taking into account any collateral held or other credit enhancements, which will cause a financial loss to the Group due to failure to discharge an obligation by the counterparties and financial guarantees provided by the Group arises from:</p> <ul style="list-style-type: none"><li>the carrying amount of the respective recognised financial assets as stated in the consolidated statement of financial position; and</li><li>the maximum amount the entity would have to pay if the financial guarantee is called upon, irrespective of the likelihood of the guarantee being exercised as disclosed in note 40.10.1. The related loss allowance is disclosed in note 34.</li></ul> <p>In order to minimise credit risk, the Group has tasked its credit management committee to develop and maintain the Group’s credit risk gradings to categorise exposures according to their degree of risk of default. The credit rating information is supplied by independent rating agencies where available and, if not available, the credit management committee uses other publicly available financial information and the Group’s own trading records to rate its major customers and other debtors. The Group’s exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties.</p> <p>The Group’s current credit risk grading framework comprises the following categories:</p> <table><tr><th>Category</th><th>Description</th><th>Basis for recognising expected credit losses</th></tr><tr><td>Performing</td><td>The counterparty has a low risk of default and does not have any past-due amounts</td><td>12m ECL</td></tr><tr><td>Doubtful</td><td>Amount is &gt;30 days past due or there has been a significant increase in credit risk since initial recognition</td><td>Lifetime ECL – not credit-impaired</td></tr><tr><td>In default</td><td>Amount is &gt;90 days past due or there is evidence indicating the asset is credit-impaired</td><td>Lifetime ECL – credit-impaired</td></tr><tr><td>Write-off</td><td>There is evidence indicating that the debtor is in severe financial difficulty and the Group has no realistic prospect of recovery</td><td>Amount is written off</td></tr></table>	Category	Description	Basis for recognising expected credit losses	Performing	The counterparty has a low risk of default and does not have any past-due amounts	12m ECL	Doubtful	Amount is >30 days past due or there has been a significant increase in credit risk since initial recognition	Lifetime ECL – not credit-impaired	In default	Amount is >90 days past due or there is evidence indicating the asset is credit-impaired	Lifetime ECL – credit-impaired	Write-off	There is evidence indicating that the debtor is in severe financial difficulty and the Group has no realistic prospect of recovery	Amount is written off
Category	Description	Basis for recognising expected credit losses														
Performing	The counterparty has a low risk of default and does not have any past-due amounts	12m ECL														
Doubtful	Amount is >30 days past due or there has been a significant increase in credit risk since initial recognition	Lifetime ECL – not credit-impaired														
In default	Amount is >90 days past due or there is evidence indicating the asset is credit-impaired	Lifetime ECL – credit-impaired														
Write-off	There is evidence indicating that the debtor is in severe financial difficulty and the Group has no realistic prospect of recovery	Amount is written off

IFRS 7.36(a), (b) IFRS 7.B10(b)	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p>(i) For financial guarantee contracts, the gross carrying amount represents the maximum amount the Group has guaranteed under the respective contracts, and the net carrying amount represents the loss allowance recognised for the contracts.</p> <p>(ii) For trade receivables, finance lease receivables and amounts due from customers under construction contracts, the Group has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. The Group determines the expected credit losses on these items by using a provision matrix, estimated based on historical credit loss experience based on the past due status of the debtors, adjusted as appropriate to reflect current conditions and estimates of future economic conditions. Accordingly, the credit risk profile of these assets is presented based on their past due status in terms of the provision matrix. Notes 25, 26 and 27 include further details on the loss allowance for these assets respectively.</p> <p>(iii) The loss allowance on redeemable notes measured at FVTOCI is recognised against other comprehensive income and accumulated in the investment revaluation reserve. See note 29.3.</p> <p>The carrying amount of the Group's financial assets at FVTPL as disclosed in note 22 best represents their respective maximum exposure to credit risk. The Group holds no collateral over any of these balances.</p>
	<p><b>Commentary:</b></p> <p><i>For all financial instruments within the scope of IFRS 7, but to which the impairment requirements in IFRS 9 are not applied, IFRS 7.36(a) requires an entity to disclose by class of financial instrument the amount that best represents the entity's maximum credit risk exposure at the end of the reporting period, excluding the effect of any collateral and other amounts that do not qualify for offset in accordance with IAS 32. Examples of financial instruments that are within the scope of IFRS 7 but that are not subject to the IFRS 9 impairment requirements include:</i></p> <ul style="list-style-type: none"> <li>• <i>Financial assets and derivatives measured at FVTPL;</i></li> <li>• <i>Financial guarantee contracts issued measured at FVTPL; and</i></li> <li>• <i>Loan commitments issued measured at FVTPL.</i></li> </ul> <p><i>Equity investments, regardless of whether they are measured at FVTPL or FVTOCI, are also in the scope of IFRS 7 but not subject to the IFRS 9 impairment requirements; however, they do not give rise to an exposure to credit risk and therefore are not subject to the IFRS 7 credit risk disclosures.</i></p>
	<p>Note 40.9 details the Group's credit risk management policies.</p>

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
IFRS 9.4.1.2A	(i) The Group holds listed redeemable notes that carry interest at 7% per annum. The notes are redeemable at par value in 2018. The notes are held with a single counterparty with an AA credit rating. The Group holds no collateral over this balance.
IFRS 7.42(a)	These redeemable notes are held by the Group within a business model whose objective is both to collect their contractual cash flows which are solely payments of principal and interest on the principal amount outstanding and to sell these financial assets. Hence the redeemable notes are classified as at FVTOCI. See note 22.1 for impairment assessment.
	(ii) The Group holds 20% of the ordinary share capital of Rocket Corp Limited, a company involved in the refining and distribution of fuel products. The directors of the Company do not consider that the Group is able to exercise significant influence over Rocket Corp Limited as the other 80% of the ordinary share capital is held by one shareholder, who also manages the day-to-day operations of that company.
	At 31 December 2016, the Group also continues to hold a 10% interest in E Plus Limited, a former associate.
IFRS 7.11A(a), (c)	The respective fair value of these investments is disclosed in note 40.11.1.
IFRS 7.11A(b) IFRS 7.42(a)	These investments in equity instruments are not held for trading. Instead, they are held for medium to long-term strategic purposes. Accordingly, the directors of the Company have elected to designate these investments in equity instruments as at FVTOCI as they believe that recognising short-term fluctuations in these investments' fair value in profit or loss would not be consistent with the Group's strategy of holding these investments for long-term purposes and realising their performance potential in the long run.
IFRS 7.11B	Apart from the disposal of 30% of E Plus Limited as disclosed in note 20 [not presented in this appendix] which resulted in the Group's loss of significance influence there-over, no other shares have been disposed of during the current reporting period.
	(iii) The Group holds bills of exchange that carry interest at variable rate. The weighted average interest rate on these securities is 7.10% per annum (2015: 7.0% per annum). The bills have maturity dates ranging between 3 to 18 months from the end of the reporting period. The counterparties have a minimum A credit rating. See note 22.1 for impairment assessment.
	(iv) The debentures carry interest at 6% per annum payable monthly, and mature in March 2017. The counterparties have a minimum BBB- credit rating. See note 22.1 for impairment assessment.
	(v) The Group has provided several of its key management personnel with short-term loans at rates comparable to the average commercial rate of interest. These loans are generally renewed at each maturity date. See note 22.1 for impairment assessment.
	<b>22.1 Impairment of other financial assets</b>
IFRS 7.35G, 35H, 35M	For the purposes of impairment assessment, the investments in redeemable notes, bills of exchange and debentures are considered to have low credit risk as the counterparties to these investments have a minimum BBB- credit rating. Accordingly, for the purpose of impairment assessment for these financial assets, the loss allowance is measured at an amount equal to 12m ECL. As for the loans to key management personnel, as disclosed in note 2.2, lifetime ECL has been provided for them upon initial application of IFRS 9 until these financial assets are derecognised as it was determined on initial application of IFRS 9 that it would require undue cost and effort to determine whether their credit risk has increased significantly since initial recognition to the date of initial application of IFRS 9.
	In determining the expected credit losses for these assets, the directors of the Company have taken into account the historical default experience, the financial position of the counterparties, as well as the future prospects of the industries in which the issuers of the redeemable notes, bills of exchange and debentures operate obtained from economic expert reports, financial analyst reports and considering various external sources of actual and forecast economic information, as appropriate, in estimating the probability of default of each of these financial assets occurring within their respective loss assessment time horizon, as well as the loss upon default in each case.
IFRS 7.35G(c)	There has been no change in the estimation techniques or significant assumptions made during the current reporting period in assessing the loss allowance for these financial assets.
IFRS 7.35M	Note 22A details the gross carrying amount, loss allowance as well as the measurement basis of expected credit losses for each of these financial assets by credit risk rating grades.

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>			
IFRS 7.35H	The following table shows the movement in expected credit losses that has been recognised for the respective financial assets:			
		12m ECL	Lifetime ECL – not credit impaired	
		Bills of exchange	Loans to related parties	Total
		CU'000	CU'000	CU'000
	Balance as at 31 December 2014 under IAS 39	–	NA	–
IFRS 7.42P	Adjustment upon application of IFRS 9	–	250	250
	<b>Balance as at 1 January 2015 – restated</b>	–	250	250
	Net increase in loss allowance arising from new financial assets recognised in current year, net of those derecognised upon settlement	2	59	61
	<b>Balance as at 31 December 2015 – restated</b>	2	309	311
	Original balance under IAS 39	–	–	–
IFRS 7.42P	Adjustment upon application of IFRS 9	2	309	311
	Net increase in loss allowance arising from new financial assets recognised in current year, net of those derecognised upon settlement	1	55	57
	<b>Balance as at 31 December 2016</b>	3	364	368
IFRS 7.35B(b), 35I	The significant increase in loss allowance for loans to related parties arose from the recognition of lifetime ECL for the entire gross carrying amount of these loans on 1 January 2015 and subsequently until the loans are derecognised as upon initial application of IFRS 9, the directors of the Company considered that it would take undue cost and effort to determine whether the credit risk on these loans has increased significantly since initial recognition (see note 2.2). Previously, no provision for impairment had been recognised for these loans as no loss event had occurred up to the respective reporting dates.			
IFRS 9.5.5.2	The loss allowance for the redeemable notes measured at FVTOCI is recognised in other comprehensive income. The movement in loss allowance is disclosed in note 29.3.

	<b>25.1 Trade receivables</b>																																	
	<p>The average credit period on sales of goods is 60 days. No interest is charged on outstanding trade receivables.</p>																																	
IFRS 7.35G	<p>The Group always measures the loss allowance for trade receivables at an amount equal to lifetime ECL. The expected credit losses on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date. The Group has recognised a loss allowance of 100% against all receivables over 120 days past due because historical experience has indicated that these receivables are generally not recoverable.</p>																																	
	<p>There has been no change in the estimation techniques or significant assumptions made during the current reporting period.</p>																																	
IFRS 7.35F(e) IFRS 7.35L	<p>The Group writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings, or when the trade receivables are over two years past due, whichever occurs earlier. None of the trade receivables that have been written off is subject to enforcement activities.</p>

	Unguaranteed residual values of assets leased under finance leases at the end of the reporting period are estimated at CU37,000 (31 December 2015: CU42,000).			
	The interest rate inherent in the leases is fixed at the contract date for the entire lease term. The average effective interest rate contracted is approximately 10.5% (31 December 2015: 11%) per annum.			
IFRS 7.34(a)	The directors of the Company estimate the loss allowance on finance lease receivables at the end of the reporting period at an amount equal to lifetime ECL. None of the finance lease receivables at the end of the reporting period is past due, and taking into account the historical default experience and the future prospects of the industries in which the lessees operate, together with the value of collaterals held over these finance lease receivables (see note 40.9.1), the directors of the Company consider that no finance lease receivables is impaired.			
IFRS 7.35G(c)	There has been no change in the estimation techniques or significant assumptions made during the current reporting period in assessing the loss allowance for finance lease receivables.

	29.9 Deferred cost of hedging reserve		
	Commentary:		
	As the Group has elected to designate the entire fair value change of the forward contracts, that is, including the forward element, as hedging instruments in its qualifying hedging relationships, no 'deferred cost of hedging' arises for the Group. Nevertheless, this note has been included to illustrate how the requirements of IFRS 7.24E and 24F could be fulfilled.

IFRS 7.7	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p><b>32.1 Summary of borrowing arrangements</b></p> <ul style="list-style-type: none"> <li>(i) Bills of exchange with a variable interest rate were issued in 2009. The current weighted average effective interest rate on the bills is 6.8% per annum (31 December 2015: 6.8% per annum).</li> <li>(ii) Amounts repayable to related parties of the Group. Interest of 8.0% – 8.2% per annum is charged on the outstanding loan balances (31 December 2015: 8.0% – 8.2% per annum).</li> <li>(iii) Fixed rate loans with a finance company with remaining maturity periods not exceeding 3 years (31 December 2015: 4 years). The weighted average effective interest rate on the loans is 8.15% per annum (31 December 2015: 8.10% per annum). The Group hedges a portion of the loans for interest rate risk via an interest rate swap exchanging fixed rate interest for variable rate interest. The outstanding balance is adjusted for fair value movements in the hedged risk, being movements in the inter-bank rate in A Land.</li> <li>(iv) On 17 December 2015, the Group received an interest-free loan of CU3 million from the government of A Land to finance staff training over a two-year period. The loan is repayable in full at the end of that two-year period. Using prevailing market interest rates for an equivalent loan of 7.2%, the fair value of the loan is estimated at CU2.61 million. The difference of CU390,000 between the gross proceeds and the fair value of the loan is the benefit derived from the interest-free loan and is recognised as deferred revenue. Interest expenses CU188,000 were recognised on this loan in 2016 and CU202,000 will be recognised in 2017 (see note 9).</li> <li>(v) 2,500 perpetual notes with a coupon rate of 6% per annum were issued on 27 August 2016 at CU2.5 million principal value. Issue costs of CU0.595 million were incurred.</li> <li>(vi) Secured by a mortgage over the Group's freehold land and buildings. The weighted average effective interest rate on the bank loans is 8.30% per annum (31 December 2015: 8.32% per annum).</li> <li>(vii) Secured by a charge over certain of the Group's trade receivables.</li> <li>(viii) Secured by the assets leased. The borrowings are a mix of variable and fixed interest rate debt with repayment periods not exceeding 5 years.</li> </ul>
IFRS 7.18	<p><b>32.2 Breach of loan agreement</b></p> <p>During the current year, the Group was late in paying interest for the first quarter on one of its loans with a carrying amount of CU5.00 million. The delay arose because of a temporary lack of funds on the date when interest was payable due to a technical problem on settlement. The interest payment outstanding of CU107,500 was repaid in full a week later, including the additional interest and penalty. The lender did not request accelerated repayment of the loan and the terms of the loan were not changed. Management has reviewed the Group's settlement procedures to ensure that such circumstances do not recur.</p>

	<b>Balance as at 1 January – restated</b>	20	–
	New financial guarantee contracts issued	5	20
	<b>Balance as at 31 December (restated as at 31 December 2015)</b>	25	20
IFRS 7.35B(b), 35I	The increase in loss allowance in both years was due to new financial guarantee contracts issued in the respective years.		
IFRS 7.7	(ii) 3,000,000 redeemable cumulative preference shares with a coupon rate of 7% per annum were issued on 1 June 2016 at an issue price of CU5 per share. The shares are redeemable on 31 May 2018 at CU5 per share. These redeemable cumulative preference shares do not contain any equity component and are classified as financial liabilities in their entirety. The shares are unsecured borrowings of the Group and are designated as at FVTPL (see below).  To reduce the fair value risk of changing interest rates, the Group has entered into a pay-floating receive-fixed interest rate swap. The swap's notional principal is CU15 million and matches the principal of the cumulative redeemable preference shares. The swap matures on 31 May 2018. The designation of preference shares as at FVTPL eliminates the accounting mismatch arising from measuring the liability at amortised cost and measuring the derivative at FVTPL.  The fair value of the redeemable cumulative preference shares has decreased by CU125,000 since their issuance. The change in fair value includes a gain of CU20,000 attributable to the change in credit risk of the liabilities which is recognised in other comprehensive income.  Dividends of CU613,000 (2015: nil) were paid on redeemable cumulative preference shares and are included in profit or loss in the "other gains and losses" line item (note 8).  (iii) A pay-floating receive-fixed interest rate swap economically hedges fair value interest rate risk of redeemable cumulative preference shares.  (iv) Other financial liabilities include CU75,000 representing the estimated fair value of the contingent consideration relating to the acquisition of Subsix Limited. There has been no change in the fair value of the contingent consideration since the acquisition date.		
	<b>37. Trade and other payables</b>

	Cash-settled share-based payments	–	–
	Others [describe]	–	–
		15,659	20,422
IFRS 7.7	The average credit period on purchases of certain goods from B Land is 4 months. No interest is charged on the trade payables for the first 60 days from the date of the invoice. Thereafter, interest is charged at 2% per annum on the outstanding balance. The Group has financial risk management policies in place to ensure that all payables are paid within the pre-agreed credit terms.

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>		
IFRS 7.11(a), (c)	(i) The change in fair value attributable to change in credit risk is calculated as the difference between total change in fair value of cumulative preference shares (CU125,000) and the change in fair value of cumulative redeemable preference shares due to change in market risk factors alone (CU105,000), and is recognised in other comprehensive income. The change in fair value due to market risk factors was calculated using benchmark interest yield curves as at the end of the reporting period holding credit risk margin constant. The fair value of cumulative redeemable preference shares was estimated by discounting future cash flows using quoted benchmark interest yield curves as at the end of the reporting period and by obtaining lender quotes for borrowings of similar maturity to estimate credit risk margin.		
IFRS 7.11(c)	A qualitative assessment of the terms of the cumulative preference shares and the matching interest rate swap (see note 34(ii)) indicates that the effects of changes in the cumulative preference shares' credit risk are not expected to be offset by changes in the fair value of the interest rate swap. Accordingly, management determines that presenting the effects of changes in the cumulative preference shares' credit risk in other comprehensive income would not create or enlarge an accounting mismatch in profit or loss.

IFRS 7.10A, 11(c)	<p><b>Commentary:</b></p> <p>If an entity has designated a financial liability as at FVTPL and is required to present all changes in the fair value of that liability (including the effects of changes in the credit risk of the liability) in profit or loss (because recognising changes in the credit risk of the liability in other comprehensive income would enlarge an accounting mismatch in profit or loss), it shall disclose:</p> <ul style="list-style-type: none"> <li>the amount of change, during the period and cumulatively, in the fair value of the financial liability that is attributable to changes in the credit risk of that liability (see above);</li> <li>the difference between the financial liability's carrying amount and the amount the entity would be contractually required to pay at maturity to the holder of the obligation (see above); and</li> <li>a detailed description of the methodology(ies) used to determine whether presenting the effects of changes in a liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss, and a detailed description of the economic relationship between the characteristics of the liability and the characteristics of the other financial instrument, when the effects of changes in the liability's credit risk are recognised in profit or loss.</li> </ul>		

Source	International GAAP Holdings Limited
IFRS 7.31	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p><b>40.3 Financial risk management objectives</b></p> <p>The Group's Corporate Treasury function provides services to the business, co-ordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports which analyse exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk.</p> <p>The Group seeks to minimise the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives is governed by the Group's policies approved by the board of directors, which provide written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by the internal auditors on a continuous basis. The Group does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.</p> <p>The Corporate Treasury function reports quarterly to the Group's risk management committee, an independent body that monitors risks and policies implemented to mitigate risk exposures.</p>
IFRS 7.33	<p><b>40.4 Market risk</b></p> <p>The Group's activities expose it primarily to the financial risks of changes in foreign currency exchange rates (see note 40.6 below) and interest rates (see note 40.7 below). The Group enters into a variety of derivative financial instruments to manage its exposure to foreign currency risk and interest rate risk, including:</p> <ul style="list-style-type: none"> <li>• forward foreign exchange contracts to hedge the exchange rate risk arising on the export of electronic equipment to B Land and C Land;</li> <li>• interest rate swaps to mitigate the risk of rising interest rates; and</li> <li>• forward foreign exchange contracts to hedge the exchange rate risk arising on translation of the Group's investment in a foreign operation, Subfour Limited, which has B Currency as its functional currency.</li> </ul> <p>Market risk exposures are measured using value-at-risk (VaR) supplemented by sensitivity analysis.</p>
IFRS 7.33(c)	<p>There has been no change to the Group's exposure to market risks or the manner in which these risks are managed and measured.</p>
IFRS 7.34, 41	<p><b>40.5 Value at Risk (VaR) analysis</b></p> <p>The VaR measure estimates the potential loss in pre-taxation profit over a given holding period for a specified confidence level. The VaR methodology is a statistically defined, probability-based approach that takes into account market volatilities as well as risk diversification by recognising offsetting positions and correlations between products and markets. Risks can be measured consistently across all markets and products, and risk measures can be aggregated to arrive at a single risk number. The one-day 99% VaR number used by the Group reflects the 99% probability that the daily loss will not exceed the reported VaR.</p> <p>VaR methodologies employed to calculate daily risk numbers include the historical and variance-covariance approaches. In addition to these two methodologies, Monte Carlo simulations are applied to the various portfolios on a monthly basis to determine potential future exposure.</p>

								1,355
	While VaR captures the Group's daily exposure to currency and interest rate risk, sensitivity analysis evaluates the impact of a reasonably possible change in interest or foreign currency rates over a year. The longer time frame of sensitivity analysis complements VaR and helps the Group to assess its market risk exposures. Details of sensitivity analysis for foreign currency risk are set out in note 40.6 below and for interest rate risk in note 40.7 below.							
IFRS 7.33, 34	<b>40.6 Foreign currency risk management</b>							
	The Group undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters utilising forward foreign exchange contracts.							
	The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows.							
		Liabilities		Assets

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>																											
	<u>40.6.1 Foreign currency sensitivity analysis</u>																											
	The Group is mainly exposed to the currency of B Land and the currency of C Land.																											
IFRS 7. 34(a), 40(b)	The following table details the Group's sensitivity to a 10% increase and decrease in the CU against the relevant foreign currencies. 10% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 10% change in foreign currency rates. The sensitivity analysis includes external loans as well as loans to foreign operations within the Group where the denomination of the loan is in a currency other than the functional currency of the lender or the borrower. A positive number below indicates an increase in profit or equity where the CU strengthens 10% against the relevant currency. For a 10% weakening of the CU against the relevant currency, there would be a comparable impact on the profit or equity, and the balances below would be negative.																											
	<table><tr><th></th><th colspan="2">Currency B impact</th><th colspan="2">Currency C impact</th></tr><tr><th></th><th>2016</th><th>2015</th><th>2016</th><th>2015</th></tr><tr><th></th><th>CU'000</th><th>CU'000</th><th>CU'000</th><th>CU'000</th></tr><tr><td>IFRS 7.40(a)</td><td>Profit or loss</td><td>472</td><td>579 (i)</td><td>19</td><td>14 (iii)</td></tr><tr><td>IFRS 7.40(a)</td><td>Equity</td><td>96</td><td>122 (ii)</td><td>17</td><td>19 (iv)</td></tr></table>		Currency B impact		Currency C impact			2016	2015	2016	2015		CU'000	CU'000	CU'000	CU'000	IFRS 7.40(a)	Profit or loss	472	579 (i)	19	14 (iii)	IFRS 7.40(a)	Equity	96	122 (ii)	17	19 (iv)
	Currency B impact		Currency C impact																									
	2016	2015	2016	2015																								
	CU'000	CU'000	CU'000	CU'000																								
IFRS 7.40(a)	Profit or loss	472	579 (i)	19	14 (iii)																							
IFRS 7.40(a)	Equity	96	122 (ii)	17	19 (iv)																							
	(i) This is mainly attributable to the exposure outstanding on Currency B receivables and payables in the Group at the end of the reporting period.																											
	(ii) This is as a result of the changes in fair value of derivative instruments designated as hedging instruments in cash flow hedges and net investment hedges.																											
	(iii) This is mainly attributable to the exposure to outstanding Currency C payables at the end of the reporting period.																											
	(iv) This is mainly as a result of the changes in fair value of derivative instruments designated as hedging instruments in cash flow hedges.																											
IFRS 7.33(c)	The Group's sensitivity to foreign currency has decreased during the current year mainly due to the disposal of Currency B investments and the reduction in Currency B sales and purchases in the last quarter of the financial year which has resulted in lower Currency B denominated trade receivables and trade payables.																											
IFRS 7.42	In management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign exchange risk because the exposure at the end of the reporting period does not reflect the exposure during the year. Currency B denominated sales are seasonal, with lower sales volumes in the last quarter of the financial year, resulting in a reduction in Currency B receivables at the end of the reporting period.  In addition, the change in equity due to a 10% change in the CU against all exchange rates for the translation of new investment hedging instruments would be a decrease of CU13,000 (2015: CU9,000). However, there would be no net effect on equity because there would be an offset in the currency translation of the foreign operation.																											
	<u>40.6.2 Forward foreign exchange contracts</u>																											
IFRS 7.22A, 22B, 33, 34	It is the policy of the Group to enter into forward foreign exchange contracts to manage the foreign currency risk associated with anticipated sales and purchase transactions out to 6 months within 40% to 50% of the exposure generated. Basis adjustments are made to the initial carrying amounts of inventories when the anticipated purchases take place.																											

Source	International GAAP Holdings Limited																																																																																																																																																																														
	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>																																																																																																																																																																														
	In the current year, the Group has designated certain forward contracts as a hedge of its net investment in Subfour Limited, which has B Currency as its functional currency. The Group's policy has been reviewed and, due to the increased volatility in B Currency, it was decided to hedge up to 50% of the net assets of the Subfour Limited for forward foreign currency risk arising on translation of the foreign operation. The Group utilises a rollover hedging strategy, using contracts with terms of up to 6 months. Upon the maturity of a forward contract, the Group enters into a new contract designated as a separate hedging relationship.																																																																																																																																																																														
IFRS 7.22B	For the hedges of highly probable forecast sales and purchases, as the critical terms (i.e. the notional amount, life and underlying) of the forward foreign exchange contracts and their corresponding hedged items are the same, the Group performs a qualitative assessment of effectiveness and it is expected that the value of the forward contracts and the value of the corresponding hedged items will systematically change in opposite direction in response to movements in the underlying exchange rates. As for the hedge of the net investment in Subfour Limited, the Group assesses effectiveness by comparing past changes in the fair value of the forward exchange contracts with changes in the fair value of a hypothetical derivative.																																																																																																																																																																														
IFRS 7.23D, 23E	The main source of hedge ineffectiveness in these hedging relationships is the effect of the counterparty and the Group's own credit risk on the fair value of the forward exchange contracts, which is not reflected in the fair value of the hedged item attributable to changes in foreign exchange rates. No other sources of ineffectiveness emerged from these hedging relationships																																																																																																																																																																														
IFRS 7.23B, 24A(b)	The following tables detail the forward foreign currency (FC) contracts outstanding at the end of the reporting period, as well as information regarding their related hedged items. Forward foreign currency contract assets and liabilities are included in the 'other financial assets' and 'other financial liabilities' line items in the consolidated statement of financial position respectively:

IFRS 7.23F

- (i) At the start of the third quarter of 2016, the Group reduced its forecasts on sales of electronic equipment to B Land due to increased local competition and higher shipping costs. The Group had previously hedged CU1.079 million of future sales of which CU97,000 are no longer expected to occur, and CU982,000 remain highly probable. Accordingly, the Group has reclassified CU3,000 of gains on foreign currency forward contracts relating to forecast transactions that are no longer expected to occur from the cash flow hedging reserve to profit or loss.

**Commentary:**

The tables above provide an example of summary quantitative data about exposure to foreign exchange risks at the end of the reporting period that an entity may provide internally to key management personnel. Other presentations may also be appropriate.

	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p><b>40.7 Interest rate risk management</b></p>
IFRS 7.33, 34	<p>The Group is exposed to interest rate risk because entities in the Group borrow funds at both fixed and floating interest rates. The risk is managed by the Group by maintaining an appropriate mix between fixed and floating rate borrowings, and by the use of interest rate swap contracts. Hedging activities are evaluated regularly to align with interest rate views and defined risk appetite, ensuring the most cost-effective hedging strategies are applied.</p> <p>The Group's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note.</p> <p><a href="#">40.7.1 Interest rate sensitivity analysis</a></p>
IFRS 7.40(b)	<p>The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.</p>
IFRS 7.40(a)	<p>If interest rates had been 50 basis points higher/lower and all other variables were held constant, the Group's:</p> <ul style="list-style-type: none"> <li>• profit for the year ended 31 December 2016 would decrease/increase by CU43,000 (2015: decrease/increase by CU93,000). This is mainly attributable to the Group's exposure to interest rates on its variable rate borrowings; and</li> <li>• other comprehensive income for the year ended 31 December 2016 would decrease/increase by CU19,000 (2015: decrease/increase by CU12,000), mainly as a result of the changes in the fair value of fixed-rate investment in debt instruments classified as at FVTOCI.</li> </ul>
IFRS 7.33(c)	<p>The Group's sensitivity to interest rates has decreased during the current year mainly due to the reduction in variable rate debt instruments and the increase in interest rate swaps to swap floating rate debt to fixed rate debt.</p> <p><a href="#">40.7.2 Interest rate swap contracts</a></p>
IFRS 7.22A, 22B, 33, 34	<p>Under interest rate swap contracts, the Group agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Such contracts enable the Group to mitigate the risk of changing interest rates on the fair value of issued fixed rate debt and the cash flow exposures on the issued variable rate debt. The fair value of interest rate swaps at the end of the reporting period is determined by discounting the future cash flows using the curves at the end of the reporting period and the credit risk inherent in the contract, and is disclosed below. The average interest rate is based on the outstanding balances at the end of the reporting period.</p>
IFRS 7.22B	<p>As the critical terms of the interest rate swap contracts and their corresponding hedged items are the same, the Group performs a qualitative assessment of effectiveness and it is expected that the value of the interest rate swap contracts and the value of the corresponding hedged items will systematically change in opposite direction in response to movements in the underlying interest rates. The main source of hedge ineffectiveness in these hedge relationships is the effect of the counterparty and the Group's own credit risk on the fair value of the interest rate swap contracts, which is not reflected in the fair value of the hedged item attributable to the change in interest rates. No other sources of ineffectiveness emerged from these hedging relationships.</p>
IFRS 7.23D, 23E	
IFRS 7.23B, 24A(b)	<p>The following tables detail various information regarding interest rate swap contracts outstanding at the end of the reporting period and their related hedged items. Interest rate swap contract assets and liabilities are included in the 'other financial assets' and 'other financial liabilities' line items in the consolidated statement of financial position respectively.</p>

IFRS 7.22A, 23A	<p>The interest rate swaps settle on a quarterly basis. The floating rate on the interest rate swaps is the local interbank rate of A Land. The Group will settle the difference between the fixed and floating interest rate on a net basis.</p> <p>All interest rate swap contracts exchanging floating rate interest amounts for fixed rate interest amounts are designated as cash flow hedges in order to reduce the Group's cash flow exposure resulting from variable interest rates on borrowings. The interest rate swaps and the interest payments on the loan occur simultaneously and the amount accumulated in equity is reclassified to profit or loss over the period that the floating rate interest payments on debt affect profit or loss.</p>

	The tables above provide an <u>example</u> of summary quantitative data about exposure to interest rate risks at the end of the reporting period that an entity may provide internally to key management personnel. Other presentations may also be appropriate.										
	Interest rate swap contracts exchanging fixed rate interest for floating rate interest are designated and effective as fair value hedges in respect of interest rates. During the year, the hedge was 100% effective in hedging the fair value exposure to interest rate movements and as a result the carrying amount of the loan was adjusted by CU5,000 which was included in profit or loss at the same time that the fair value of the interest rate swap was included in profit or loss.

	<p><b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b></p> <p><b>40.8 Other price risks</b></p>
IFRS 7.33, 34	<p>The Group is exposed to equity price risks arising from equity investments. Equity investments are held for strategic rather than trading purposes. The Group does not actively trade these investments</p> <p><a href="#">40.8.1 Equity price sensitivity analysis</a></p>
IFRS 7.40(b)	<p>The sensitivity analyses below have been determined based on the exposure to equity price risks at the end of the reporting period.</p>
IFRS 7.40(a)	<p>If equity prices had been 5% higher/lower:</p> <ul style="list-style-type: none"> <li>• profit for the year ended 31 December 2016 and 2015 would have been unaffected as the investments in equity instruments are designated as at FVTOCI; and</li> <li>• other comprehensive income for the year ended 31 December 2016 would increase/decrease by CU286,000 (2015: increase/decrease by CU265,000) as a result of the changes in fair value of the investments in equity instruments.</li> </ul>
IFRS 7.40(c)	<p>The methods and assumptions used in preparing the sensitivity analysis above have not changed significantly from the prior year.</p>
IFRS 7.33, 34, 35B	<p><b>40.9 Credit risk management</b></p> <p>Note 22A details the Group's maximum exposure to credit risk and the measurement bases used to determine expected credit losses.</p>
IFRS 7.35F(a)(i)	<p>In order to minimise credit risk, the Group has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group only transacts with entities that are rated the equivalent of investment grade and above and investments in these instruments, including bills of exchange, debentures and redeemable notes as detailed in note 22, where the counterparties have minimum BBB- credit rating, are considered to have low credit risk for the purpose of impairment assessment. The credit rating information is supplied by independent rating agencies where available and, if not available, the Group uses other publicly available financial information and its own trading records to rate its major customers. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties.</p>
IFRS 7.34(c)	<p>Before accepting any new customer, a dedicated team responsible for the determination of credit limits uses an external credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. Limits and scoring attributed to customers are reviewed and approved twice a year by the risk management committee. 80% of the trade receivables have the best credit scoring attributable under the external credit scoring system used by the Group.</p> <p>Credit approvals and other monitoring procedures are also in place to ensure that follow-up action is taken to recover overdue debts. Furthermore, the Group reviews the recoverable amount of each trade debt and debt investment on an individual basis at the end of the reporting period to ensure that adequate loss allowance is made for irrecoverable amounts. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced.</p> <p>Trade receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable and, where appropriate, credit guarantee insurance cover is purchased.</p>
IFRS 7.B8 IFRS 7.34(c), 35B(c)	<p>Of the trade receivables balance at the end of the year, CU6.9 million (31 December 2015: CU5.9 million) is due from Company A, the Group's largest customer. Apart from this, the Group does not have significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The Group defines counterparties as having similar characteristics if they are related entities. Concentration of credit risk related to Company A did not exceed 20% of gross monetary assets at any time during the year. Concentration of credit risk to any other counterparty did not exceed 5% of gross monetary assets at any time during the year. The concentration of credit risk is limited due to the fact that the customer base is large and unrelated</p>
IFRS 7.B10(b)	<p>The credit risk on liquid funds and derivative financial instruments is limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies.</p>

Source	International GAAP Holdings Limited
	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
IFRS 7.B10(c)	<p>In addition, the Group is exposed to credit risk in relation to financial guarantees given to banks. The Group's maximum exposure in this respect is the maximum amount the Group could have to pay if the guarantee is called on (see note 40.10.1). As at 31 December 2016, an amount of CU25,000 (31 December 2015: CU20,000) has been recognised in the consolidated financial position as loss allowance for the financial guarantee contracts (see note 34).</p>
	<p>40.9.1 <u>Collateral held as security and other credit enhancements</u></p>
IFRS 7.35K(b)	<p>The Group does not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets, except that the credit risk associated with finance lease receivables is mitigated because they are secured over the leased storage equipment. The carrying amount of finance lease receivables amounts to CU1.028 million (31 December 2015: CU0.905 million) and the fair value of the leased assets is estimated to be approximately CU1.00 million (31 December 2015: CU0.9 million). The Group is not permitted to sell or repledge the collateral in the absence of default by the lessee. There has not been any significant changes in the quality of the collaterals held for finance lease receivables. The Group has not recognised a loss allowance for the finance lease receivables as a result of these collaterals.</p>
	<p><b>Commentary:</b></p> <p><i>For all financial instruments to which the impairment requirements in IFRS 9 are applied, IFRS 7.35K(b) and (c) specifies that entities should disclose the following:</i></p> <ul style="list-style-type: none"> <li><i>a narrative description of collateral held as security and other credit enhancements, including:</i> <ul style="list-style-type: none"> <li><i>(i) a description of the nature and quality of the collateral held;</i></li> <li><i>(ii) an explanation of any significant changes in the quality of that collateral or credit enhancements as a result of deterioration or changes in the collateral policies of the entity during the reporting period; and</i></li> <li><i>(iii) information about financial instruments for which an entity has not recognised a loss allowance because of the collateral.</i></li> </ul> </li> <li><i>quantitative information about the collateral held as security and other credit enhancements (for example, quantification of the extent to which collateral and other credit enhancements mitigate credit risk) for financial assets that are credit-impaired at the reporting date.</i></li> </ul> <p><i>For all financial instruments within the scope of IFRS 7, but to which the impairment requirements in IFRS 9 are not applied, IFRS 7.36(b) specifies that entities should give a description of collateral held as security and of other credit enhancements, and their financial effect (e.g. a quantification of the extent to which collateral and other credit enhancements mitigate credit risk) in respect of the amount that best represents the maximum exposure to credit risk.</i></p>

	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
	<b>40.10 Liquidity risk management</b>
IFRS 7.33, 39(c)	<p>Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Group's short-, medium- and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities. Note 40.10.2 below sets out details of additional undrawn facilities that the Group has at its disposal to further reduce liquidity risk.</p>
	<a href="#">40.10.1 Liquidity and interest risk tables</a>
IFRS 7.34, 35, 39(a)	<p>The following tables detail the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The tables include both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Group may be required to pay.</p>
	<p><b>Commentary:</b></p> <p><i>The tables below include the weighted average effective interest rate and the carrying amount of the respective financial liabilities as reflected in the consolidated statement of financial position as an <b>example</b> of summary quantitative data about exposure to interest rates at the end of the reporting period that an entity may provide internally to key management personnel.</i></p>

IFRS 7.B10(c)

The amounts included above for financial guarantee contracts are the maximum amounts the Group could be forced to settle under the arrangement for the full guaranteed amount if that amount is claimed by the counterparty to the guarantee. Based on expectations at the end of the reporting period, the Group considers that it is more likely than not that such an amount will not be payable under the arrangement. However, this estimate is subject to change depending on the probability of the counterparty claiming under the guarantee which is a function of the likelihood that the financial receivables held by the counterparty which are guaranteed suffer credit losses.

	The following table details the Group’s expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Group’s liquidity risk management as the liquidity is managed on a net asset and liability basis.

IFRS 7.39(b)	<b>Notes to the consolidated financial statements for the year ended 31 December 2016 – continued</b>
	The following table details the Group’s liquidity analysis for its derivative financial instruments. The table has been drawn up based on the undiscounted contractual net cash inflows and outflows on derivative instruments that settle on a net basis, and the undiscounted gross inflows and outflows on those derivatives that require gross settlement. When the amount payable or receivable is not fixed, the amount disclosed has been determined by reference to the projected interest rates as illustrated by the yield curves at the end of the reporting period.

**Notes to the consolidated financial statements for the year ended 31 December 2016 – continued****40.11 Fair value measurements**

This note provides information about how the Group determines fair values of various financial assets and financial liabilities.

40.11.1 Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

Some of the Group's financial assets and financial liabilities are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique(s) and inputs used).

Financial assets/ financial liabilities	Fair value as at		Fair value hierarchy	Valuation technique(s) and key input(s)
	31/12/16	31/12/15		
1) Foreign currency forward contracts (see notes 22 and 34)	Assets – CU 244,000; and Liabilities – CU87,000	Assets – CU220,000	Level 2	Discounted cash flow.  Future cash flows are estimated based on forward exchange rates (from observable forward exchange rates at the end of the reporting period) and contract forward rates, discounted at a rate that reflects the credit risk of various counterparties.
2) Interest rate swaps (see notes 22 and 34)	Assets – CU284,000; Liabilities (designated for hedging) – CU5,000; and Liabilities (not designated for hedging) – CU51,000	Assets – CU177,000	Level 2	Discounted cash flow.  Future cash flows are estimated based on forward interest rates (from observable yield curves at the end of the reporting period) and contract interest rates, discounted at a rate that reflects the credit risk of various counterparties.
3) Held-for-trading non-derivative financial assets (see note 22)	Listed equity securities in Z land: • Real estate industry – CU911,000; and • Oil and gas industry – CU628,000.	Listed equity securities in Z land: • Real estate industry – CU911,000; and • Oil and gas industry – CU728,000.	Level 1	Quoted bid prices in an active market.
4) Listed redeemable notes (see note 22)	Listed debt securities in Y Land – Energy industry – CU2,200,000	Listed debt securities in Y Land – Energy industry – CU2,180,000	Level 1	Quoted bid prices in an active market.
5) Redeemable cumulative preference shares (see note 34)	Liabilities – CU14,875,000	–	Level 2	Discounted cash flow at a discount rate that reflects the issuer's current borrowing rate at the end of the reporting period.

## Notes to the consolidated financial statements for the year ended 31 December 2016 – continued

Financial assets/ financial liabilities	Fair value as at		Fair value hierarchy	Valuation technique(s) and key input(s)	Significant unobservable input(s)	Relationship of unobservable inputs to fair value
	31/12/16	31/12/15				
6) Private equity investments (see note 22)	20 per cent equity investment in Rocket Corp Limited engaged in refining and distribution of fuel products in A land – CU5,359,000; and 10 per cent equity investment in E Plus Limited engaged in Shoe manufacturing in A land – CU360,000	20 per cent equity investment in Rocket Corp Limited engaged in refining and distribution of fuel products in A land – CU5,285,000	Level 3	Income approach – in this approach, the discounted cash flow method was used to capture the present value of the expected future economic benefits to be derived from the ownership of these investees.	Long-term revenue growth rates, taking into account management's experience and knowledge of market conditions of the specific industries, ranging from 4.9 to 5.5 per cent (2015: 4.8 – 5.4 per cent).	A slight increase in the long-term revenue growth rates used in isolation would result in a significant increase in the fair value. (i)
					Long-term pre-tax operating margin taking into account management's experience and knowledge of market conditions of the specific industries, ranging from 5- 12 per cent (2015: 5 – 10 per cent).	A significant increase in the long-term pre-tax operating margin used in isolation would result in a significant increase in the fair value.
					Weighted average cost of capital (WACC), determined using a Capital Asset Pricing Model, ranging from 11.9 to 12.5 per cent (2015: 11.2 to 12.1 per cent).	A slight increase in the WACC used in isolation would result in a significant decrease in the fair value. (ii)
					Discount for lack of marketability, determined by reference to the share price of listed entities in similar industries, ranging from 5 – 20 per cent (2015: 4 – 19 per cent).	A significant increase in the discount for lack of marketability used in isolation would result in a significant decrease in the fair value.

## Notes to the consolidated financial statements for the year ended 31 December 2016 – continued

Financial assets/ financial liabilities	Fair value as at		Fair value hierarchy	Valuation technique(s) and key input(s)	Significant unobservable input(s)	Relationship of unobservable inputs to fair value
	31/12/16	31/12/15				
7) Contingent consideration in a business combination (see note 34)	Liabilities – CU75,000	–	Level 3	Discounted cash flow method was used to capture the present value of the expected future economic benefits that will flow out of the Group arising from the contingent consideration.	Discount rate of 18 per cent, determined using a Capital Asset Pricing Model.	A slight increase in the discount rate used in isolation would result in a significant decrease in the fair value. (ii)
					Probability-adjusted revenues and profits, with a range from CU100,000 to CU150,000 and a range from CU 60,000 to 90,000 respectively.	A slight increase in the probability adjusted revenues and profits used in isolation would result in a significant increase in the fair value. (iii)

IFRS 13.93(h)(ii)

- (i) If the long-term revenue growth rates used were 10% higher/lower while all the other variables were held constant, the carrying amount of the shares would increase/decrease by CU7,000 (31 December 2015: increase/decrease by CU8,000).
- (ii) A 5% increase/decrease in the WACC or discount rate used while holding all other variables constant would decrease/increase the carrying amount of the private equity investments and the contingent consideration by CU10,000 and CU3,524 respectively (31 December 2015: CU11,000 and CU3,754 respectively).
- (iii) A 5% increase/decrease in the probability-adjusted revenues and profits while holding all other variables constant would increase/decrease the carrying amount of the contingent consideration by CU5,210 (31 December 2015: CU6,000).

IFRS 13.93(c)

There were no transfers between Level 1 and 2 in the period.

IFRS 13.93(h)(ii)

**Commentary:**

*For financial assets and financial liabilities that are categorised within the Level 3 fair value hierarchy, if changing one or more of the unobservable inputs to reflect reasonably possible alternative assumptions would **significantly** change the fair value determined, an entity should state that fact and disclose the effect of those changes. The entity should also disclose how the effect of a change to reflect a reasonably possible alternative assumption was calculated.*

	The only financial liabilities subsequently measured at fair value on Level 3 fair value measurement represent contingent consideration relating to the acquisition of Subsix Limited. No gain or loss for the year relating to this contingent consideration has been recognised in profit or loss.																																																				
IFRS 13.93(f)	The total gains or losses for the year included an unrealised gain of CU72,000 relating to financial assets that are measured at fair value at the end of each reporting period (2015: a gain of CU73,000). Such fair value gains or losses are included in 'other gains and losses' (see note 8).																																																				
IFRS 13.93(e)(ii)	All gains and losses included in other comprehensive income relate to unlisted shares and redeemable notes held at the end of the reporting period and are reported as changes of 'Investment revaluation reserve' (see note 29.3).																																																				

## Appendix 1A – Alternatives available to entities early applying IFRS 9

Entities are required to apply IFRS 9 for annual periods beginning on or after 1 January 2018. Earlier application is permitted. If an entity early applies IFRS 9, it is required to disclose that fact and must apply all of the requirements in IFRS 9 at the same time, except for the requirements for the presentation of fair value changes in own credit risk on financial liabilities designated as at FVTPL in other comprehensive income, which an entity may elect to early apply on its own without applying the other requirements of IFRS 9 (IFRS 9.7.1.2). If this element is early adopted this fact must be disclosed along with ongoing related disclosures set out in IFRS 7:10-11 (IFRS 7.44ZA).

In addition, IFRS 9.7.2.21 allows an entity to choose as its accounting policy to continue to apply the hedge accounting requirements in IAS 39 for all hedge accounting instead of the requirements in IFRS 9 until the IASB's project on the accounting for macro hedging is completed. However, once an entity applies IFRS 9, the entity must apply all the revised disclosure requirements in IFRS 7 relating to hedge accounting, even if the entity has elected to continue to apply IAS 39 for hedge accounting. (IFRS 9.BC6.104)

The following table summarises the various alternatives available to entities early applying IFRS 9 with a date of initial application on or after 1 February 2015, assuming the entity is transitioning from applying IAS 39 in full and the annual period of the entity begins on 1 January.

Alternative	Early adoption	Available post 1 January 2018?	General hedge accounting (excluding macro fair value hedge accounting)	Macro fair value hedge accounting	Fair value changes in own credit risk on financial liabilities designated at FVTPL	Financial assets classification and measurement	Impairment model
<b>Apply IAS 39 in full except early adopt IFRS 9 own credit risk</b> [IFRS 9 (2010):7.1.1A; IFRS 9 (2013):7.1.2; or IFRS 9 (2014):7.1.2]	Early adoption of own credit risk permitted up to IFRS 9 (2014) effective date of 1 January 2018	No	IAS 39	IAS 39	IFRS 9 (fair value gains/losses in OCI)	IAS 39	IAS 39 (incurred loss)
<b>Apply all of IFRS 9 (2014)</b> [IFRS 9 (2014):7.1.1]	Early adoption available until IFRS 9 (2014) effective date of 1 January 2018	Yes	IFRS 9	IFRS 9	IFRS 9 (fair value gains/losses in OCI)	IFRS 9 (2014)	IFRS 9 (expected loss)
<b>Apply all of IFRS 9 (2014) except for all of hedge accounting</b> [IFRS 9 (2014):7.1.1 & 7.2.21]	Early adoption available until IFRS 9 (2014) effective date of 1 January 2018 but only for those transitioning from IAS 39	Yes	IAS 39	IAS 39	IFRS 9 (fair value gains/losses in OCI)	IFRS 9 (2014)	IFRS 9 (expected loss)
<b>Apply all of IFRS 9 (2014) except for macro fair value hedge accounting</b> [IFRS 9 (2014):7.1.1 & 6.1.3]	Available for all adopters of IFRS 9 (2014)	Yes	IFRS 9	IAS 39	IFRS 9 (fair value gains/losses in OCI)	IFRS 9 (2014)	IFRS 9 (expected loss)

# Notes

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee, and its network of member firms, each of which is a legally separate and independent entity. Please see [www.deloitte.com/about](http://www.deloitte.com/about) for a detailed description of the legal structure of Deloitte Touche Tohmatsu Limited and its member firms.

"Deloitte" is the brand under which tens of thousands of dedicated professionals in independent firms throughout the world collaborate to provide audit, consulting, financial advisory, risk management and tax services to selected clients. These firms are members of Deloitte Touche Tohmatsu Limited (DTTL), a UK private company limited by guarantee. Each member firm provides services in a particular geographic area and is subject to the laws and professional regulations of the particular country or countries in which it operates. DTTL does not itself provide services to clients. DTTL and each DTTL member firm are separate and distinct legal entities, which cannot obligate each other. DTTL and each DTTL member firm are liable only for their own acts or omissions and not those of each other. Each DTTL member firm is structured differently in accordance with national laws, regulations, customary practice, and other factors, and may secure the provision of professional services in its territory through subsidiaries, affiliates, and/or other entities.

This publication contains general information only, and none of Deloitte Touche Tohmatsu Limited, its member firms, or their affiliates are, by means of this publication, rendering accounting, business, financial, investment, legal, tax, or other professional advice or services. This publication is not a substitute for such professional advice or services, nor should it be used as a basis for any decision or action that may affect your finances or your business. Before making any decision or taking any action that may affect your finances or your business, you should consult a qualified professional adviser.

None of Deloitte Touche Tohmatsu Limited, its member firms, or its and their respective affiliates shall be responsible for any loss whatsoever sustained by any person who relies on this publication.
