ASX Guidance Note

In preparing this disclosure, entities may wish to refer to ASX Guidance Note 10 'Review of Operations and Activities: Listing Rule 4.10' or to the G100's 'Guide to Review of Operations and Financial Condition', which provide general guidance on the form and content of the consolidated entity's review of operations and the results of those operations, together with specific guidance on items which might be appropriately included in such a review.

Recommended contents of the review of operations include:

- (a) overview:
 - i. objectives of the consolidated entity and how they are achieved within the specific operating environment and industry within which the consolidated entity operates;

 - i. operating results of the consolidated entity by main business activity including a comparison to prior periods and any projections published by the company and its controlled entities. Consideration should be given to unusual or infrequent events or transactions, including material acquisitions or disposals, major sources of revenues and expenses, and changes in factors which affect the results; and

If changes are material, describe and cross reference to the relevant notes to the financial statements.

Subsequent events

s.299(1)(d)

There has not been any matter or circumstance, other than that referred to in the financial statements or notes thereto, that has arisen since the end of the financial year, that has significantly affected, or may significantly affect, the operations of the consolidated entity, the results of those operations, or the state of affairs of the consolidated entity in future financial years.

Otherwise describe the matter(s) or circumstance(s), if material, and cross reference to the relevant note(s) to the financial statements.

Future developments

s.299(3)

Disclosure of information regarding likely developments in the operations of the consolidated entity in future financial years and the expected results of those operations is likely to result in unreasonable prejudice to the consolidated entity. Accordingly, this information has not been disclosed in this report.

s.299(1)(e)

Directors must bring likely developments in the operations of the consolidated entity in future financial years and the expected results of those operations to the attention of the users of the financial report. These disclosures are not required where they would result in unreasonable prejudice to the entity.

s.299A(1)(c), (2)

The directors' report for a company or disclosing entity that is a listed public company must also contain information that members of the company would reasonably require to make an informed assessment of the consolidated entity's prospects for future financial years.

Environmental regulations

s.299(1)(f)

If the consolidated entity's operations are subject to any particular and significant environmental regulation under a law of the Commonwealth or of a State or Territory, the directors' report should disclose details of the consolidated entity's performance in relation to the environmental regulation.

ASIC-PN 68

The ASIC has provided the following guidance on completing environmental regulations disclosures:

- prima facie, the requirements would normally apply where an entity is licensed or otherwise subject to conditions for the purposes of environmental legislation or regulation;
- the requirements are not related specifically to financial disclosures (eg. contingent liabilities and capital commitments) but relate to performance in relation to environmental regulation. Hence, accounting concepts of materiality in financial statements are not applicable;
- the information provided in the directors' report cannot be reduced or eliminated because information has been provided to a regulatory authority for the purposes of any environmental legislation; and
- the information provided in the director's report would normally be more general and less technical than information which an entity is required to provide in any compliance reports to an environmental regulator.

Where no dividends have been paid or declared since the start of the financial year, and/or the directors do not recommend the payment of a dividend in respect of the financial year, the directors' report should disclose that fact.

If dividends are declared (i.e. the dividends are appropriately authorised and no longer at the discretion of the entity) after the reporting date but before the financial report is authorised for issue, the dividends are not recognised as a liability at the reporting date because they do not meet the criteria of a present obligation in AASB 137 'Provisions, Contingent Liabilities and Contingent Assets'. Value of options issued to directors and executives

The following table discloses the value of options granted, exercised or lapsed during the year:

s.300A(1)(e)

	Options Granted	Options Exercised	Options Lapsed	Total value of options	Value of options	Percentage of total
	Value at grant date	Value at exercise date	Value at time of lapse	granted, exercised and lapsed ⁽³⁾	included in remuneration for the year ⁽⁴⁾	remuneration for the year that consists of options

T.L. Smith	34,650	-	-	34,650	8,663	8.52

Value of options - basis of calculation

- Options exercised during the year were granted on 31st March 2004.
- Options exercised during the year were granted in the current year.
- The total value of options granted, exercised and lapsed is calculated based on the following:
 - Fair value of the option at grant date multiplied by the number of options granted during the year; plus
 - Fair value of the option at the time it is exercised multiplied by the number of options exercised during the year; plus
 - Fair value of the option at the time of lapse multiplied by the number of options lapsed during the year.
- The total value of options included in remuneration for the year is calculated in accordance with Accounting Standard AASB 1046 'Director and Executive Disclosures by Disclosing Entities', as amended by Accounting Standard AASB 1046A. This requires the following:
 - The value of the options is determined at grant date, and are included in remuneration on a proportionate basis from grant date to vesting date. Where the options immediately vest the full value of the option is recognised in remuneration in the current year.
 - With the exception of options granted to T.L. Smith, all options vest at the date of issue. The options granted to T.L. Smith vest when the share price of DTT Consolidated Limited, as quoted on the Australian Stock Exchange, exceeds \$4.00, which is not expected to occur before 30th September 2006. These options were issued on 30th September 2005, therefore, in accordance with Accounting Standard AASB 1046 'Director and Executive Disclosures by Disclosing Entities', as amended by Accounting Standard AASB 1046A, only a portion of the total fair value of the options at grant date is included in remuneration for the financial year.

Notes to the financial statements for the financial year ended 31 December 2005

1. Basis of preparation

The concise financial report has been prepared in accordance with the Corporations Act 2001 and Accounting Standard AASB 1039 'Concise Financial Reports'. The concise financial report, including the financial statements and specific disclosures included in the concise financial report, has been derived from the full financial report of DTT Consolidated Limited. All amounts are presented in Australian dollars.

AASB1039.6.4(a)

The consolidated entity changed its accounting policies on 1 January 2005 to comply with the Australian equivalents to International Financial Reporting Standards ('A-IFRS'). The transition to A-IFRS is accounted for in accordance with Accounting Standard AASB 1 'First-

time Adoption of Australian Equivalents to International Financial Reporting Standards', with 1 January 2004 as the date of transition. An explanation of how the transition from superseded policies to A-IFRS has affected the consolidated entity's financial position, financial

performance and cash flows is discussed in note 7.

These accounting policies have been applied in preparing the financial statements for the year ended 31 December 2005, the comparative information presented in these financial statements for the year ended 31 December 2004 and in the preparation of the opening A-IFRS balance sheet at 1 January 2004 (as disclosed in note 7), except for the accounting policies in respect of financial instruments. The consolidated entity has not restated comparative information for financial instruments, including derivatives, as permitted under the first-time adoption transitional provisions – instead, adjustments are made to the opening balances of the current financial year to ensure that the opening balances comply with the new accounting policies.

AASB1039.4.1.1

A full description of the accounting policies adopted by the consolidated entity is provided in the 2005 financial statements which form part of the full financial report.

Going concern basis

AASB1039.6.1

When the entity has prepared its financial report on the basis that the entity is not a going concern, or where the going concern basis has become inappropriate after the reporting date, this fact shall be disclosed.

Change in accounting policy

AASB1039.6.4(c)

Where there is a change in accounting policy from those used in the preceding reporting period, which has a material effect in the current reporting period or is expected to have a material effect in a subsequent reporting period, the information required about such a change by the relevant Accounting Standards that are applicable to the current reporting period shall be disclosed.

AASB 1 'First-time Adoption of Australian Equivalents to International Financial Reporting Standards' specifies that entities that do not present comparative information that complies with AASB 132 'Financial Instruments: Disclosure and Presentation' and AASB 139 'Financial Instruments: Recognition and Measurement' shall treat any adjustment between the balance sheet at the comparative period's reporting date and the balance sheet at the start of the first A-IFRS reporting period as arising from a change in accounting policy and give the disclosures required by paragraphs 28(a) to (e) and (f)(i) of AASB 108 'Accounting Policies, Changes in Accounting Estimates and Errors'. These disclosures are illustrated in note 7 to these financial statements.

Basis of preparation (cont'd) 1.

Revision of accounting estimates

AASB1039.6.4(c)

During the financial year the directors reassessed the useful life of certain items of plant and equipment. The financial effect of this reassessment, assuming the assets are held until the end of their estimated useful lives, is to increase consolidated depreciation expense in the current financial year and for the next 4 years, by the following amounts:

	<u>\$'000</u>
2005	9
2006	7
2007	4
2008	2

AASB1039.6.4(c)

Where there is a change in accounting estimate from those used in the preceding reporting period, which has a material effect in the current reporting period or is expected to have a material effect in a subsequent reporting period, the information required about such a change by the relevant Accounting Standards that are applicable to the current reporting period shall be disclosed.

Further guidance concerning the disclosure of revisions in accounting estimates is contained in AASB 108, or refer to the Deloitte Consolidated Model Financial Report.

Effect of A-IFRS on the cash flow statement for the financial year ended 31 December 2004

There are no material differences between the cash flow statement presented under A-IFRS and the cash flow statement presented under the superseded policies.

Notes to the reconciliations of income and equity

(a) Cumulative exchange differences

At the date of transition, the consolidated entity elected to reset the foreign currency translation reserve to zero. An amount of \$10,257 thousand was reclassified from the foreign currency translation reserve to retained earnings. These translation differences will be excluded from the calculation of any gain or loss on a subsequent disposal of the foreign operation.

For the financial year ended 31 December 2004, as the consolidated entity's foreign operations had always been translated through the foreign currency translation reserve, the adjustment required under A-IFRS is the \$10,257 thousand opening adjustment and the recognition of the tax effect of the current year translation recognised under previous GAAP in the foreign currency translation reserve.

(b) Defined benefit superannuation plans

A defined benefit obligation, included in the provision for employee benefits, of \$196 thousand was recognised on 1 January 2004 on transition to A-IFRS. Under superseded policies, contributions to defined benefit superannuation plans were expensed when due and payable and no assets or liabilities were recognised in relation to the plans.

For the financial year ended 31 December 2004, the defined benefit obligation increased by a further \$156 thousand to \$352 thousand. Adjustments were made to recognise actuarial losses of \$226 thousand directly in retained earnings, and to decrease employee benefit expenses by \$70 thousand for the financial year ended 31 December 2004.

(c) Discontinued operations

Under A-IFRS, the consolidated entity recognises revenue and expenses, including tax expenses, attributable to discontinued operations as part of a single line item 'profit from discontinued operations' on the income statement. There was no requirement under previous GAAP to split out revenue and expenses attributable to discontinued operations in this manner, and accordingly, amounts are reclassified from the various line items in which they were recognised under previous GAAP to 'profit from discontinued operations' on adoption of A-IFRS.

(d) Goodwill

The consolidated entity has elected not to restate business combinations that occurred prior to the date of transition to A-IFRS, and accordingly, the carrying amount of goodwill at the date of transition has not changed. In addition, goodwill arising from these business combinations that involved the acquisition of foreign businesses will be treated as an Australian dollar denominated asset.

7. Impacts of the adoption of Australian equivalents to International Financial Reporting Standards (cont'd)

However, goodwill, which was amortised under superseded policies, is not amortised under A-IFRS from the date of transition. The effect of the change is an increase in the carrying amount of goodwill by \$710 thousand and an increase in net profit before tax of \$710 thousand for the financial year ended 31 December 2004. There is no tax effect as deferred taxes are not recognised for temporary differences arising from goodwill for which amortisation is not deductible for tax purposes.

(e) Impairment of assets

An entity that recognises impairment losses (or reversals thereof) on the date of transition, or additional impairment write-downs (or reversals thereof) during the comparative financial year shall disclose an appropriate explanation.

(f) Investment properties

A building of \$112 thousand was reclassified from property, plant and equipment to investment properties at the date of transition. The fair value of the building was deemed to be its cost at that date. The amount in the asset revaluation reserve associated with the building was transferred to retained earnings.

For the financial year ended 31 December 2004, an amount of \$8 thousand being the increase in fair value, was recognised in the profit or loss for the year. This amount was recognised in the asset revaluation reserve under the superseded policies.

(g) Property, plant and equipment

The consolidated entity elected to measure property, plant and equipment other than equipment under finance leases on transition to A-IFRS at fair value and has used that fair value as the item's deemed cost at that date. The effect of the revaluation to fair value for property, plant and equipment previously held at cost is an increase in the carrying amount of property, plant and equipment of \$23 thousand at 1 January 2004 and a reclassification of any amounts in the asset revaluation reserve associated with these items to retained earnings. Additional depreciation expense of \$4 thousand is recognised under A-IFRS for the financial year ended 31 December 2004.

(h) Share-based payments

For the financial year ended 31 December 2004, share-based payments of \$338 thousand (included in 'employee benefit expenses') which were not recognised under the superseded policies were recognised under A-IFRS, with a corresponding increase in the employee equity-settled benefits reserve. These adjustments had no material tax or deferred tax consequences.

(i) Revenue

Under superseded policies, the consolidated entity recognised the gain or loss on disposal of property, plant and equipment on a 'gross' basis by recognising the proceeds from sale as revenue, and the carrying amount of the property, plant and equipment disposed as an expense. Under A-IFRS, the gain or loss on disposal is recognised on a 'net' basis, and is classified as income, rather than revenue. Accordingly, the 'gross' amounts have been reclassified within the income statement for A-IFRS reporting purposes.

^{*} Included in the carrying amount of the property, plant and equipment as at 31 December 2003.

^{*} Excludes the carrying amount of the building reclassified as investment property as at 1 January 2004.

(j) Income tax

Under superseded policies, the consolidated entity adopted tax-effect accounting principles whereby income tax expense was calculated on pre-tax accounting profits after adjustment for permanent differences. The tax-effect of timing differences, which occur when items were included or allowed for income tax purposes in a period different to that for accounting were recognised at current taxation rates as deferred tax assets and deferred tax liabilities, as applicable.

Under A-IFRS, deferred tax is determined using the balance sheet liability method in respect of temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and their corresponding tax bases.

The effect of the above adjustments on the deferred tax balances are as follows:

Consolidated

	1 Jan 2004 \$'000	31 Dec 2004 \$'000
Defined benefit obligation	58	105
Fair value as deemed cost	(492)	(491)
Deferred tax not recognised under previous GAAP	(1,302)	(1,076)
Net increase/(decrease) in deferred tax balances	(1,736)	(1,462)

The effect on consolidated profit for the financial year ended 31 December 2004 was to decrease previously reported income tax expense by \$881 thousand.

(k) Retained earnings

The effect of the above adjustments on retained earnings is as follows:

AASB1039.6.4(c) (I) Comparative information – financial instruments

The consolidated entity has elected not to restate comparative information for financial instruments within the scope of Accounting Standards AASB 132 'Financial Instruments: Disclosure and Presentation' and AASB 139 'Financial Instruments: Recognition and Measurement', as permitted on the first-time adoption of A-IFRS.

The accounting policies applied to accounting for financial instruments in the current financial year are detailed in notes 1(a) to (ae) in the full financial report. The following accounting policies were applied to accounting for financial instruments in the comparative financial year:

7. Impacts of the adoption of Australian equivalents to International Financial Reporting Standards (cont'd)

(a) Accounts payable

Trade payables and other accounts payable are recognised when the consolidated entity becomes obliged to make future payments resulting from the purchase of goods and services.

(b) Derivative financial instruments

Foreign exchange contracts

Exchange differences on forward foreign exchange contracts to hedge the purchase or sale of specific goods and services are deferred and included in the measurement of the purchase or sale.

In the event of the early termination of a foreign currency hedge of an anticipated purchase or sale of goods and services, the deferred gains and losses that arose on the foreign exchange contract prior to its termination are:

- deferred and included in the measurement of the purchase or sale when it takes place, where the anticipated transaction is still expected to occur; or
- recognised in net profit or loss at the date of termination, if the anticipated transaction is no longer expected to occur.

Interest rate contracts

Gains and losses on forward interest rate contracts are deferred and amortised over the term of the underlying borrowing.

Interest rate swaps

Gains and losses on interest rate swaps are included in the determination of interest expense.

(c) Financial instruments issued by the company

Debt and equity instruments

Debt and equity instruments are classified as either liabilities or as equity in accordance with the substance of the contractual arrangement.

Compound instruments

Compound instruments issued before 1 January 1998 are classified as either liabilities or as equity, whichever is the predominant component part, in accordance with the substance of the contractual arrangement.

The component parts of compound instruments issued on or after 1 January 1998 are classified separately as liabilities and equity in accordance with the substance of the contractual arrangement. The liability component initially brought to account is the present value of the future payments of interest and principal. The equity component initially brought to account is determined by deducting the amount of the liability component from the amount of the compound instrument as a whole.

Transaction costs on the issue of equity instruments

Transaction costs arising on the issue of equity instruments are recognised directly in equity as a reduction of the proceeds of the equity instruments to which the costs relate. Transaction costs are the costs that are incurred directly in connection with the issue of those equity instruments and which would not have been incurred had those instruments not been issued.

Interest and dividends

Interest and dividends are classified as expenses or as distributions of profit consistent with the balance sheet classification of the related debt or equity instruments or component parts of compound instruments.

(d) Foreign currency

General hedging transactions

Any costs or gains arising at the inception of a hedge are accounted for separately from the exchange differences on the hedging transactions. The costs or gains are deferred and recognised as assets or liabilities on entering the hedging transactions and amortised in profit or loss over the lives of the hedging transactions.

7. Impacts of the adoption of Australian equivalents to International Financial Reporting Standards (cont'd)

Hedging specific commitments

In relation to transactions intended to hedge specific purchases or sales:

- i. costs or gains arising at the time of entering into the transactions; and
- exchange differences, to the extent that they arise up to the dates of purchase or sale.

are deferred and included in the measurement of the purchases or sales.

(e) Borrowings

Bills of exchange are recorded at an amount equal to the net proceeds received, with the premium or discount amortised over the period until maturity. Interest expense is recognised on an effective yield basis.

Debentures, bank loans and other loans are recorded at an amount equal to the net proceeds received. Interest expense is recognised on an accrual basis.

Ancillary costs incurred in connection with the arrangement of borrowings are deferred and amortised over the period of the borrowing.

(f) Investments

Investments other than investments in subsidiaries, associates and joint venture entities are recorded at cost.

Dividend revenue is recognised on a receivable basis. Interest revenue is recognised on a time proportionate basis that takes into account the effective yield on the financial asset.

(g) Receivables

Trade receivables and other receivables are recorded at amounts due less any allowance for doubtful debts.

Bills of exchange are recorded at amortised cost, with revenue recognised on an effective yield basis.

The following transitional provisions have an effect on future periods:

- (i) the separation of compound financial instruments for which the liability component is no longer outstanding into retained earnings and share capital components has not been performed
- (ii) the effectiveness of hedging relationships are assessed from 1 January 2005; no adjustment is made in relation to hedges under the superseded policies which were not highly effective before 1 January 2005
- (iii) [list other transitional provisions as appropriate, for example, the transitional provisions in relation to 'day 1' gains and losses or to the derecognition of financial assets].

The main adjustments necessary that would make the comparative financial statements comply with AASB 132 and AASB 139 are listed below. Similar adjustments were made at 1 January 2005 to restate the opening financial position of the consolidated entity to a position consistent with the accounting policies applicable to the current financial year:

- the measurement of financial assets designated as held-to-maturity and loans and receivables at amortised cost, rather than at cost or fair value in accordance with the superseded policy
- (ii) the measurement of financial assets designated as fair value through profit or loss or available-for-sale at fair value, with changes in fair value recognised in profit or loss or equity as appropriate, rather than at cost in accordance with the superseded policy
- (iii) the measurement of financial liabilities at amortised cost, rather than at cost in accordance with the superseded policy
- (iv) the recognition and measurement of all derivatives (including any embedded derivatives) at fair value

7. Impacts of the adoption of Australian equivalents to International Financial Reporting Standards (cont'd)

- (v) the recognition in profit or loss of the movement in the fair value of derivatives which did not qualify for hedge accounting or were not designated as hedging instruments
- (vi) the transfer of deferred hedging gains and losses recognised as assets and liabilities arising from a cash flow hedge of a forecast transaction to the hedging reserve
- (vii) the derecognition of other deferred hedging gains and losses recognised as assets and liabilities
- (viii) the deferral in equity of the effective portion of the movement in fair value of derivatives accounted for as a cash flow hedge
- (ix) the recognition in profit or loss of the ineffective portion of the movement in fair value of hedging instruments accounted for as a cash flow hedge
- (x) the recognition in profit or loss of the movement in fair value of derivatives accounted for as a fair value hedge and the fair valuing of hedged items
- (xi) the adjustment to the carrying amount of items that would qualify as a fair value hedge under A-IFRS and were designated as a hedge under previous GAAP for the lower of the cumulative change in fair value of the hedged item for the designated hedge risk and the cumulative change in fair value of the hedging instrument
- (xii) the recognition of any current or deferred taxes in relation to the adjustments described above
- (xiii) [list other adjustments as appropriate].

Where practicable, for the current period and for each prior period presented, the amount of the adjustment for each financial statement line item affected shall be disclosed. Where it is not practicable for entities to disclose these amounts, entities are encouraged to include a statement explaining why, for example:

It is not practicable for the consolidated entity to detail the amounts of the adjustments to profit or loss and to opening retained earnings for the comparative period had the new accounting policies been applied from the beginning of the comparative period. In addition, it is not practicable for the consolidated entity to detail for the current period, the amounts of the adjustments resulting to each financial statement line item as a consequence of applying the accounting policies applicable to the current financial year.

8. Disclosure of additional information
