About the model reduced disclosure annual report

Purpose

The AASB has released AASB 1053 'Application of Tiers of Australian Accounting Standards' and AASB 2010-2 'Amendments to Australian Accounting Standards arising from Reduced Disclosure Requirements' to implement its revised differential reporting regime. These Standards were made by the AASB out of session on 30 June 2010 and mandatorily apply to annual financial reporting periods beginning on or after 1 July 2013. This model reduced disclosure annual report has been designed by Deloitte Touche Tohmatsu to assist eligible entities adopting the reduced disclosure requirements.

This model report does not provide guidance on the requirements applicable to not-for-profit entities. Note that at this stage, the AASB is yet to consider reduced disclosure requirements with respect to non-reporting entities currently preparing special purpose financial statements, and as such, this model report does not illustrate the requirements that would be required for such entities. Entities should also note that the AASB has not yet considered the requirements in AASB 4 'Insurance Contracts', AASB 1023 'General Insurance Contracts', AASB 1038 'Life Insurance Contracts' and AAS 25 'Financial Reporting by Superannuation Plans' in formulating the current reduced disclosure requirements, and as a result, additional disclosures may be eliminated at a later date.

RDR Holdings (Australia) Pty Limited is assumed to have transitioned to Australian Accounting Standards in June 2006, and accordingly, is not a first-time adopter of Australian Accounting Standards. On transition to Australian Accounting Standards – Reduced Disclosure Requirements, RDR Holdings (Australia) Pty Limited is not required to apply AASB 1 'First-time Adoption of Australian Accounting Standards'. However, entities moving from full Australian Accounting Standards (Tier 1) to Australian Accounting Standards – Reduced Disclosure Requirements (Tier 2) should carefully consider the need to re-adopt Tier 1 at a later stage (e.g. companies that will become listed in the near future) as they would be required to apply AASB 1 again on transition back to Tier 1. Similarly, where an entity has previously not complied with some or all of the recognition and measurement requirements of Australian Accounting Standards (i.e. some preparers of special purpose financial reports) and adopts the reduced disclosure requirements, that entity will be required to apply AASB 1 in its first Australian-Accounting-Standards-Reduced-Disclosure-Requirements financial statements. Users should refer to AASB 1 for specific requirements regarding an entity's first Australian Accounting Standards compliant financial statements and an entity's first Australian Accounting Standards – Reduced Disclosure Requirements compliant financial statements.

The model financial statements do not include separate financial statements for the parent, which have been historically required of entities preparing financial reports in accordance with the Corporations Act 2001. The Corporations Amendments (Corporate Reporting Reform) Act 2010 (effective from 1 July 2010) amended the Corporations Act 2001 so that parent entity columns are no longer required in consolidated financial statements, instead limited financial information of the parent entity is disclosed by way of note in annual financial statements (see note 56 to the financial statements for details). However, ASIC Class Order 10/654 allows entities to include the parent entity financial statements as part of the consolidated financial statements if they wish to do so. Accordingly, the model financial statements illustrated in this model reduced disclosure annual report do not include the separate financial statements of the parent and only include the limited disclosures required by Reg. 2M.3.01 of the Corporations Regulations 2001.

Where an entity presents separate financial statements that comply with Australian Accounting Standards, the requirements of AASB 127 'Separate Financial Statements' will apply. Separate statements of comprehensive income, financial position, changes in equity and cash flows for the parent will generally be required, together with supporting notes.

In these 2014 model financial statements, we have illustrated the impact of the adoption of a number of new and revised Standards and Interpretations (see note 2 to the financial statements for details).

For the purposes of presenting the statements of profit or loss and other comprehensive income and cash flows, the alternatives allowed under Australian Accounting Standards for those statements have been illustrated. Preparers should select the alternatives most appropriate to their circumstances.

Note that in these model financial statements, we have frequently included line items for which a nil amount is shown, so as to illustrate items that, although not applicable to RDR Holdings (Australia) Pty Limited, are commonly encountered in practice. This does not mean that we have illustrated all possible disclosures. Nor should it be taken to mean that, in practice, entities are required to display line items for such 'nil' amounts.

This illustration is not designed to meet specific needs of specialised industries. Rather, it is intended to meet the needs of the majority of entities in complying with the annual reporting requirements of the Corporations Act 2001. Inquiries regarding specialised industries (e.g. life insurance companies, credit unions, etc.) should be directed to an industry specialist in your nearest Deloitte Touche Tohmatsu office.

Exclusions

This model does not, and cannot be expected to cover all situations that may be encountered in practice. Therefore, knowledge of the disclosure provisions of the Corporations Act 2001, Australian Accounting Standards and Interpretations are pre-requisites for the preparation of annual reports.

Specifically, this illustration does not provide guidance on the 'not-for-profit' disclosure requirements of Australian Accounting Standards, nor the disclosure requirements of the following Australian Accounting Standards and Interpretations:

AASB 1	'First-time Adoption of Australian Accounting Standards'
AASB 4	'Insurance Contracts'
AASB 6	'Exploration for and Evaluation of Mineral Resources' Note: While this illustration does not provide guidance on the disclosure requirements of AASB 6, a number of example accounting policies applicable to mining entities are included in note 3 to the financial statements
AASB 129	'Financial Reporting in Hyperinflationary Economies'
AASB 134	'Interim Financial Reporting' (other than as noted)
AASB 141	'Agriculture'
AASB 1004	'Contributions'
AASB 1023	'General Insurance Contracts'
AASB 1038	'Life Insurance Contracts'
AASB 1049	'Whole of Government and General Government Sector Financial Reporting'
AASB 1050	'Administered Items'
AASB 1051	'Land Under Roads'
AASB 1052	'Disaggregated Disclosures'
AAS 25	'Financial Reporting by Superannuation Plans'
Int 2	'Members' Shares In Co-Operative Entities and Similar Instruments'
Int 7	'Applying the Restatement Approach under AASB 129 *Financial Reporting in Hyperinflationary Economies*'
Int 129	'Service Concession Arrangements: Disclosures'
Int 1019	'The Superannuation Contributions Surcharge'
Int 1038	'Contributions by Owners Made to Wholly-Owned Public sector Entities'
Int 1047	'Professional Indemnity Claims Liabilities in Medical Defence Organisations'

Further, unless otherwise specified, this illustration only includes references to Standards not yet effective (and not early adopted) in the context of illustrating the disclosures specified by AASB 108 'Accounting Policies, Changes in Accounting Estimates and Errors'.

We see this publication as an illustration and strongly encourage preparers of financial statements to ensure that disclosures made are relevant, practical and useful.

Source references

References to the relevant requirements are provided in the left hand column of each page of this illustration. Where doubt exists as to the appropriate treatment, examination of the source of the disclosure requirement is recommended.

Annual report for the financial year ended 30 June 2014

Source	RDR Holdings (Australia) Pty Limited

Directors' report

s.1308(7) Where the directors' report contains information in addition to that required by the Corporations Act 2001, the information will be regarded as part of the directors' report for the purposes of s.1308 'False or misleading statements'.

Transfer of information from the directors' report into another document forming part of the annual report

s.300(2) Information required by s.300 need not be included in the directors' report where such information is disclosed in the financial statements.

ASIC-CO 98/2395 Information required by s.298(1)(c)[1], s.298(1A), s.299 and s.300 (other than s.300(11C) insofar as that section requires certain information to be included in the directors' report or in the financial statements pursuant to s.300(2)) may be transferred to a document attached to the directors' report and financial statements where a clear cross reference to the pages containing the excluded information exists and certain conditions are satisfied. The information required by s.298(1)(c)[1], s.298(1A) and s.299 may not be transferred into the financial statements.
Where information is transferred into the financial statements it will be subject to audit.

The directors of RDR Holdings (Australia) Pty Limited submit herewith the annual report of the company for the financial year ended 30 June 2014. In order to comply with the provisions of the Corporations Act 2001, the directors report as follows:

Information about the directors

s.300(1)(c), s.300(10)(a) The names of the directors of the company during or since the end of the financial year are:

Name

Mr C.J. Chambers
Mr P.H. Taylor
Ms F.R. Ridley
Mr A.K. Black
Mr B.M. Stavrinidis
Mr W.K. Flinders
Ms S.M. Saunders

s.300(1)(c) The above named directors held office during the whole of the financial year and since the end of the financial year except for:

- Mr W.K. Flinders – resigned 20 July 2013
- Ms S.M. Saunders – appointed 1 August 2012, resigned 31 July 2014
- Mr A.K. Black – appointed 21 July 2014

Former partners of the audit firm

s.300(1)(ca) The directors' report must disclose the name of each person who:

- is an officer of the company, registered scheme or disclosing entity at any time during the year;
- was a partner in an audit firm, or a director of an audit company, that is an auditor of the company, disclosing entity or registered scheme for the year; and
- was such a partner or director at a time when the audit firm or the audit company undertook an audit of the company, disclosing entity or registered scheme.

[1] Subsection 298(1)(c) has been removed and relocated to subsections 298(1AA)(c) and 298(1AB)(b) as a result of the Corporations Amendment (Corporate Reporting Reform) Act 2010.

Source	RDR Holdings (Australia) Pty Limited

Share options granted to directors and senior management

s.300(1)(d) The directors' report should include details of options that are:

(a) granted over unissued shares or unissued interests during or since the end of the financial year; and

(b) granted to any of the directors or any of the 5 most highly remunerated officers of the company (other than the directors); and

(c) granted to them as part of their remuneration.

s.300(3) The disclosures required by s.300(1)(d) (refer below), s.300(1)(e) and s.300(1)(f) cover:

(a) options over unissued shares and interests of the company, registered scheme or disclosing entity; and

(b) if consolidated financial statements are required – options over unissued shares and interests of any controlled entity that is a company, registered scheme or disclosing entity.

s.300(5) The details of an option granted during or since the end of the financial year should include:

(a) the identity of the company, registered scheme or disclosing entity granting the option;

(b) the name of the person to whom the option is granted; and

(c) the number and class of shares or interests over which the option is granted.

s.300(1)(d), s.300(3), s.300(5) During and since the end of the financial year, an aggregate 140,870 share options were granted to the following directors and to the five highest remunerated officers of the company and its controlled entities as part of their remuneration:

Directors and senior management	Number of options granted	Issuing entity	Number of ordinary shares under option
P.H. Taylor	88,000	RDR Holdings (Australia) Pty Limited	88,000
T.L. Smith	32,036	RDR Holdings (Australia) Pty Limited	32,036
W.L. Lee	6,250	RDR Holdings (Australia) Pty Limited	6,250
L.J. Jackson	6,250	RDR Holdings (Australia) Pty Limited	6,250
C.P. Daniels	4,167	RDR Holdings (Australia) Pty Limited	4,167
N.W. Wright	4,167	RDR Holdings (Australia) Pty Limited	4,167

Principal activities

s.299(1)(c) The consolidated entity's principal activities in the course of the financial year were the manufacture of electronic equipment and leisure goods, and the construction and renovation of residential properties.

During the financial year the consolidated entity sold its toy business. Details of the sale are contained in note 11 to the financial statements. During the year the board of directors decided to dispose of the bicycle business. Details of the planned disposal are contained in note 11 to the financial statements.

Review of operations

s.299(1)(a) The directors' report must contain a review of the consolidated entity's operations during the financial year and the results of those operations.

Source	RDR Holdings (Australia) Pty Limited
	Non-IFRS financial information

ASIC-RG 230	If the directors consider it appropriate to include non-IFRS financial information in the operating and financial review, the directors' report or another document in the annual report, the guidelines in Section D of Regulatory Guide 230 'Disclosing non-IFRS financial information' should be followed to assist in reducing the risk of non-IFRS financial information being misleading[2].
	Important considerations include that:
	• IFRS financial information should be given equal or greater prominence compared to non-IFRS financial information, in particular IFRS profit;
	• Non-IFRS information should:
	  ○ be explained and reconciled to IFRS financial information;
	  ○ be calculated consistently from period to period; and
	  ○ be unbiased and not used to remove 'bad news'.
	Entities should refer to the complete document when preparing their reports as it provides detailed guidance for presenting non-IFRS financial information.

	Changes in state of affairs
s.299(1)(b)	During the financial year, the consolidated entity disposed of its toy business. The consolidated entity is also seeking to dispose of its bicycle business, in order to focus its operations towards the manufacture and distribution of electronic equipment and leisure goods as proposed and agreed at the company's last Annual General Meeting. Other than the above, there was no significant change in the state of affairs of the consolidated entity during the financial year.
	Subsequent events
s.299(1)(d)	On 18 July 2014, the premises of Subfive Limited were seriously damaged by fire. Insurance claims are in process, but the cost of refurbishment is currently expected to exceed the amount that will be reimbursed by $8.3 million. Other than the above, there has not been any matter or circumstance occurring subsequent to the end of the financial year that has significantly affected, or may significantly affect, the operations of the consolidated entity, the results of those operations, or the state of affairs of the consolidated entity in future financial years.
	Future developments
s.299(1)(e), s.299(3)	Directors must bring likely developments in the operations of the consolidated entity in future financial years and the expected results of those operations to the attention of the users of the annual report. These disclosures are not required where they would result in unreasonable prejudice to the entity.
	Environmental regulations
s.299(1)(f) ASIC-RG 68.74	If the consolidated entity's operations are subject to any particular and significant environmental regulation under a law of the Commonwealth or of a State or Territory, the directors' report should disclose details of the consolidated entity's performance in relation to the environmental regulation. The ASIC has provided the following guidance on completing environmental regulations disclosures: • prima facie, the requirements would normally apply where an entity is licensed or otherwise subject to conditions for the purposes of environmental legislation or regulation; • the requirements are not related specifically to financial disclosures (e.g. contingent liabilities and capital commitments) but relate to performance in relation to environmental regulation. Hence, accounting concepts of materiality in financial statements are not applicable; • the information provided in the directors' report cannot be reduced or eliminated because information has been provided to a regulatory authority for the purposes of any environmental legislation; and • the information provided in the director's report would normally be more general and less technical than information which an entity is required to provide in any compliance reports to an environmental regulator.

[2] Non-IFRS financial information is financial information presented other than in accordance with all relevant accounting standards.

Source	RDR Holdings (Australia) Pty Limited
	Dividends
s.300(1)(a)	In respect of the financial year ended 30 June 2013, as detailed in the directors' report for that financial year, a final dividend of 19.36 cents per share franked to 100% at 30% corporate income tax rate was paid to the holders of fully paid ordinary shares on 12 October 2013.
s.300(1)(a)	In respect of the financial year ended 30 June 2014, an interim dividend of 17.85 cents per share franked to 100% at 30% corporate income tax rate was paid to the holders of fully paid ordinary shares on 5 March 2014.
s.300(1)(a)	In respect of the financial year ended 30 June 2014, a dividend of 10.00 cents per share franked to 100% at 30% corporate income tax rate was paid to the holders of convertible non-participating preference shares on 20 June 2014.
s.300(1)(a)	In respect of the financial year ended 30 June 2014, an interim dividend of 20.33 cents per share franked to 100% at 30% corporate income tax rate was paid to the holders of redeemable cumulative preference shares on 20 June 2014.
s.300(1)(b)	In respect of the financial year ended 30 June 2014, the directors recommend the payment of a final dividend of 26.31 cents per share franked to 100% at 30% corporate income tax rate to the holders of fully paid ordinary shares on 3 October 2014.
	Where no dividends have been paid or declared since the start of the financial year, and/or the directors do not recommend the payment of a dividend in respect of the financial year, the directors' report should disclose that fact.
	Shares under option or issued on exercise of options
	The directors' report should include details of:
s.300(1)(f)	(a) shares or interests issued during or since the end of the financial year as a result of the exercise of an option over unissued shares or interests; and
s.300(1)(e)	(b) unissued shares or interests under option as at the date of the directors' report.
s.300(3)	The disclosures required by s.300(1)(d) , s.300(1)(e) and s.300(1)(f) cover: (a) options over unissued shares and interests of the company, registered scheme or disclosing entity; and (b) if consolidated financial statements are required – options over unissued shares and interests of any controlled entity that is a company, registered scheme or disclosing entity.
s.300(6)	The details of unissued shares or interests under option should include: (a) the company, registered scheme or disclosing entity that will issue shares or interests when the options are exercised; (b) the number and classes of those shares or interests; (c) the issue price, or the method of determining the issue price, of those shares or interests; (d) the expiry date of the options; and (e) any rights that option holders have under the options to participate in any share issue or interest issue of the company, registered scheme or disclosing entity or of any other body corporate or registered scheme.
s.300(7)	The details of shares and interests issued as a result of the exercise of any option should include: (a) the company, registered scheme or disclosing entity issuing the shares or interests; (b) the number of shares or interests issued; (c) if the company, registered scheme or disclosing entity has different classes of shares or interests, the class to which each of those shares or interests belongs; (d) the amount unpaid on each of those shares or interests; and (e) the amount paid, or agreed to be considered as paid, on each of those shares or interests.

Source	RDR Holdings (Australia) Pty Limited

s.300(1)(e), s.300(3), s.300(6)

Details of unissued shares or interests under option as at the date of this report are:

Issuing entity	Number of shares under option	Class of shares	Exercise price of option	Expiry date of options
RDR Holdings (Australia) Pty Limited	136,000	Ordinary	$1.00	30 September 2014
RDR Holdings (Australia) Pty Limited	60,000	Ordinary	$1.00[(a)]	31 March 2015

[(a)] These share options can only be exercised once the share price of RDR Holdings (Australia) Pty Limited exceeds $4.00.

The holders of these options do not have the right, by virtue of the option, to participate in any share issue or interest issue of the company or of any other body corporate or registered scheme.

s.300(1)(f), s.300(3), s.300(7)

Details of shares or interests issued during or since the end of the financial year as a result of exercise of an option are:

Issuing entity	Number of shares issued	Class of shares	Amount paid for shares	Amount unpaid on shares
RDR Holdings (Australia) Pty Limited	314,000	Ordinary	$1.00	$nil

Indemnification of officers and auditors

s.300(1)(g), s.300(8), s.300(9)

During the financial year, the company paid a premium in respect of a contract insuring the directors of the company (as named above), the company secretary, Mr A.B. Grey, and all executive officers of the company and of any related body corporate against a liability incurred as such a director, secretary or executive officer to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

The company has not otherwise, during or since the end of the financial year, except to the extent permitted by law, indemnified or agreed to indemnify an officer or auditor of the company or of any related body corporate against a liability incurred as such an officer or auditor.

Where the company has not indemnified or agreed to indemnify an officer or auditor against a liability incurred, or paid an insurance premium in respect of a contract insuring against a liability incurred by an officer or auditor, the following disclosure is encouraged:

'During or since the end of the financial year the company has not indemnified or made a relevant agreement to indemnify an officer or auditor of the company or of any related body corporate against a liability incurred as such an officer or auditor. In addition, the company has not paid, or agreed to pay, a premium in respect of a contract insuring against a liability incurred by an officer or auditor.'

Proceedings on behalf of the company

s.300(14)

The directors' report should disclose, with respect to persons applying for leave under s.237 to bring, or intervene in, proceedings on behalf of the company, the applicant's name and a statement whether leave was granted.

s.300(15)

Where leave is granted under s.237, the directors' report should disclose the following details of any proceedings that a person has brought, or intervened in, on behalf of the company:

(a) the person's name;
(b) the names of the parties to the proceedings; and
(c) sufficient information to enable members to understand the nature and status of the proceedings (including the cause of action and any orders made by the court).

s.298(1AA)(c)

Auditor's independence declaration

The auditor's independence declaration is included after this report.

	True and fair view
s.298(1A)	If the financial statements for a financial year include additional information under s.295(3)(c) to give a true and fair view of financial position and performance, the directors' report for the financial year must also: (a) set out the directors' reasons for forming the opinion that the inclusion of that additional information was necessary to give a true and fair view required by s.297; and (b) specify where that additional information can be found in the financial statements.
	Rounding off of amounts
	If the company is of the kind referred to in ASIC Class Order 98/100, dated 10 July 1998, and consequently the amounts in the directors' report and the financial statements are rounded, that fact must be disclosed in the financial statements or the directors' report.
ASIC-CO 98/100	The company is a company of the kind referred to in ASIC Class Order 98/100, dated 10 July 1998, and in accordance with that Class Order amounts in the directors' report and the financial statements are rounded off to the nearest thousand dollars, unless otherwise indicated.
	Or
ASIC-CO 98/100	The company is a company of the kind referred to in ASIC Class Order 98/100, dated 10 July 1998, and in accordance with that Class Order amounts in the directors' report and the financial statements are rounded off to the nearest hundred thousand dollars, unless otherwise indicated.
	Or
ASIC-CO 98/100	The company is a company of the kind referred to in ASIC Class Order 98/100, dated 10 July 1998, and in accordance with that Class Order amounts in the directors' report and the financial statements are rounded off to the nearest million dollars, unless otherwise indicated.
s.298(2)	This directors' report is signed in accordance with a resolution of directors made pursuant to s.298(2) of the Corporations Act 2001. On behalf of the Directors *(Signature)* C.J. Chambers Director Sydney, 11 September 2014

The Board of Directors
RDR Holdings (Australia) Pty Limited
167 Admin Ave
SYDNEY, NSW 2000

11 September 2014

Dear Board Members,

RDR Holdings (Australia) Pty Limited

s.298(1AA)(c) or s.298(1AB)(b), s.307C, ASIC-CO 98/2395

In accordance with section 307C of the Corporations Act 2001, I am pleased to provide the following declaration of independence to the directors of RDR Holdings (Australia) Pty Limited.

As lead audit partner for the audit [or review]of the financial statements of RDR Holdings (Australia) Pty Limited for the financial year ended 30 June 2014, I declare that to the best of my knowledge and belief, there have been no contraventions of:

(i) the auditor independence requirements of the Corporations Act 2001 in relation to the audit [or review]; and
(ii) any applicable code of professional conduct in relation to the audit [or review].

Yours sincerely

DELOITTE TOUCHE TOHMATSU

T.L. Green
Partner
Chartered Accountants

Member of Deloitte Touche Tohmatsu Limited

Source	RDR Holdings (Australia) Pty Limited
s.307C(1), (3)	If an audit firm, audit company or individual auditor conducts an audit or review of the financial statements for the financial year, the lead auditor must give the directors of the company, registered scheme or disclosing entity a written declaration that, to the best of the lead auditor's knowledge and belief, there have been: (i) no contraventions of the auditor independence requirements of the Corporations Act 2001 in relation to the audit or review; and (ii) no contraventions of any applicable code of professional conduct in relation to the audit or review; or a written declaration that, to the best of the lead auditor's knowledge and belief, the only contraventions of: (i) the auditor independence requirements of the Corporations Act 2001 in relation to the audit or review; or (ii) any applicable code of professional conduct in relation to the audit or review; are those contraventions details of which are set out in the declaration.
s.307C(5)(a)	The auditor's independence declaration must be given when the audit report is given to the directors of the company, registered scheme or disclosing entity (other than when the conditions in s.307(5A) are satisfied – see below) and must be signed by the person making the declaration.
s.307(5A)	A declaration under s.307C(1) or s.307C(3) in relation to financial statements for a financial year satisfies the conditions in this subsection if: (a) the declaration is given to the directors of the company, registered scheme or disclosing entity before the directors pass a resolution under s.298(2) in relation to the directors' report for the financial year; and (b) a director signs the directors' report within 7 days after the declaration is given to the directors; and (c) the auditors' report on the financial statements is made within 7 days after the directors' report is signed; and (d) the auditors' report includes either of the following statements: i. a statement to the effect that the declaration would be in the same terms if it had been given to the directors at the time that auditors' report was made; ii. a statement to the effect that circumstances have changed since the declaration was given to the directors, and setting out how the declaration would differ if it had been given to the directors at the time the auditor's report was made.
s.307C(5B)	An individual auditor or lead auditor is not required to give a declaration under s.307C(1) and s.307C(3) in respect of a contravention if: (a) the contravention was a contravention by a person of s.324CE(2) or s.324CG(2) (strict liability contravention of specific independence requirements by individual auditor or audit firm), or s.324CF(2) (contravention of independence requirements by members of audit firms); and (b) the person does not commit an offence because of s.324CE(4), s.324CF(4) or s.324CG(4) (quality control system defence).

Source	RDR Holdings (Australia) Pty Limited
	Independent auditor's report to the members of RDR Holdings (Australia) Pty Limited
	An independent auditor's report shall be prepared by the auditor in accordance with the Australian Auditing Standards.
	Duty to form an opinion
	The auditor is required to form an opinion on the following:
s.307(a), s.308(1)	• whether the financial statements are in accordance with the Corporations Act 2001, including: i. whether the financial statements comply with accounting standards; and ii. whether the financial statements give a true and fair view of the financial performance and position of the entity (or consolidated entity);
s.307(aa)	• if the financial statements include additional information under s.295(3)(c) (information included to give true and fair view of financial position and performance) – whether the inclusion of that additional information was necessary to give the true and fair view required by s.297;
s.307(b)	• whether the auditor has been given all information, explanations and assistance necessary for the conduct of the audit;
s.307(c)	• whether the company, registered scheme or disclosing entity has kept financial records sufficient to enable financial statements to be prepared and audited;
s.307(d)	• whether the company, registered scheme or disclosing entity has kept other records and registers as required by the Corporations Act 2001;
s.308(3)(b)	The auditor is only required to include in the audit report particulars of any deficiency, failure or shortcoming in respect of any matter referred to in s.307(b), (c) or (d) above.
	Qualified audit opinions
s.308(2)	Where, in the auditor's opinion, there has been a departure from a particular Australian Accounting Standard, the audit report must, to the extent that is practicable to do so, quantify the effect that non-compliance has on the financial statements. If it is not practicable to quantify the effect fully, the report must say why.
	Duty to report
s.308(3)(a)	The auditor is required to report any defect or irregularity in the financial statements.
s.308(3A)	The audit report must include any statements or disclosures required by the auditing standards.
s.308(3B)	If the financial statements include additional information under s.295(3)(c) (information included to give true and fair view of financial position and performance), the audit report must also include a statement of the auditor's opinion on whether the inclusion of that additional information was necessary to give the true and fair view required by s.297.
	Duty to inform
s.311(c)	The auditor must inform the ASIC in writing if the auditor is aware of circumstances that: • the auditor has reasonable grounds to suspect amount to a contravention of the Corporations Act 2001; or • amount to an attempt, in relation to the audit, by any person to unduly influence, coerce, manipulate or mislead a person involved in the conduct of the audit; or • amount to an attempt, by any person, to otherwise interfere with the proper conduct of the audit.
s.311	The auditor is required to notify ASIC in writing of the circumstances of the matters outlined above as soon as practicable and in any case within 28 days, after the auditor becomes aware of those circumstances.
ASIC-RG 34	ASIC Regulatory Guide 34 provides guidance on the procedures to be followed by registered company auditors in complying with s.311 of the Corporations Act 2001, including specific reference to evidence of a contravention, examples of contraventions and timing of notification.

	Directors' declaration
	The directors declare that:
s.295(4)(c)	(a) in the directors' opinion, there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable; and
s.295(4)(d)	(b) in the directors' opinion, the attached financial statements and notes thereto are in accordance with the Corporations Act 2001, including compliance with accounting standards and giving a true and fair view of the financial position and performance of the consolidated entity.
ASIC-CO 98/1418	At the date of this declaration, the company is within the class of companies affected by ASIC Class Order 98/1418. The nature of the deed of cross guarantee is such that each company which is party to the deed guarantees to each creditor payment in full of any debt in accordance with the deed of cross guarantee. In the directors' opinion, there are reasonable grounds to believe that the company and the companies to which the ASIC Class Order applies, as detailed in note 19 to the financial statements will, as a group, be able to meet any obligations or liabilities to which they are, or may become, subject by virtue of the deed of cross guarantee.
s.295(5)	Signed in accordance with a resolution of the directors made pursuant to s.295(5) of the Corporations Act 2001. On behalf of the Directors *(Signature)* C.J. Chambers Director Sydney, 11 September 2014

	Format of the financial statements
	General disclosures Minimum general requirements relating to the format of the financial statements are included in Australian Accounting Standards AASB 101 'Presentation of Financial Statements' and AASB 108 'Accounting Policies, Changes in Accounting Estimates and Errors' and have been implicitly applied in the model financial statements. These include:
AASB101.49	(a) An entity shall clearly identify the financial statements and distinguish them from other information in the same published document;
AASB101.36	(b) An entity shall present a complete set of financial statements (including comparative information) at least annually;
AASB101.36	(c) When an entity changes the end of its reporting period and presents financial statements for a period longer or shorter than one year, an entity shall disclose, in addition to the period covered by the financial statements: i. the reason for using a longer or shorter period; and ii. the fact that amounts presented in the financial statements are not entirely comparable;
AASB101.51	(d) An entity shall clearly identify each financial statement and the notes;
AASB101.51	(e) An entity shall display the following information prominently, and repeat it when necessary for the information presented to be understandable:
AASB101.51(a)	i. the name of the reporting entity or other means of identification, and any change in that information from the end of the preceding reporting period (for example, to give a proper understanding, the change of name may be disclosed on the cover of the annual report and repeated in the directors' report, the directors' declaration, auditor's independence declaration, independent auditor's report and on the face of the financial statements);
AASB101.51(b)	ii. whether the financial statements are of the individual entity or a group of entities;
AASB101.51(c)	iii. the date of the end of the reporting period or the period covered by the set of financial statements or notes;
AASB101.51(d)	iv. the presentation currency, as defined in AASB 121 'The Effects of Changes in Foreign Exchange Rates'; and
AASB101.51(e)	v. the level of rounding used in presenting amounts in the financial statements; and
AASB101.45	(f) An entity shall retain the presentation and classification of items in the financial statements from one period to the next unless:
AASB101.45(a	i. it is apparent, following a significant change in the nature of the entity's operations or a review of its financial statements, that another presentation or classification would be more appropriate having regard to the criteria for the selection and application of accounting policies in AASB 108; or
AASB101.45(b)	ii. an Australian Accounting Standard requires a change in presentation.
	Notes to the financial statements
AASB101.112	The notes shall: (a) present information about the basis of preparation of the financial statements and the specific accounting policies used; (b) disclose the information required by Australian Accounting Standards that is not presented elsewhere in the financial statements; and (c) provide information that is not presented elsewhere in the financial statements, but is relevant to an understanding of any of them.
AASB101.113	An entity shall, as far as practicable, present notes in a systematic manner. An entity shall cross-reference each item in the statements of financial position and of comprehensive income, in the separate income statement (if presented), and in the statements of changes in equity and of cash flows to any related information in the notes.
	Comparative information
AASB101.38	Except when Australian Accounting Standards permit or require otherwise, an entity shall disclose comparative information in respect of the previous period for all amounts reported in the current period's financial statements. An entity shall include comparative information for narrative and descriptive information when it is relevant to an understanding of the current period's financial statements.

Source	RDR Holdings (Australia) Pty Limited
AASB101.41	**Reclassification of financial information** When the entity changes the presentation or classification of items in its financial statements, the entity shall reclassify comparative amounts unless reclassification is impracticable. When the entity reclassifies comparative amounts, the entity shall disclose: (a) the nature of the reclassification; (b) the amount of each item or class of items that is reclassified; and (c) the reason for the reclassification.
AASB101.42(a)	When it is impracticable to reclassify comparative amounts, an entity shall disclose the reason for not reclassifying the amounts.
	Errors made in prior periods
AASB108.42	Material prior period errors shall be retrospectively corrected in the first financial statements authorised for issue after their discovery by: (a) restating the comparative amounts for the prior period(s) presented in which the error occurred; or (b) if the error occurred before the earliest prior period presented, restating the opening balances of assets, liabilities and equity for the earliest prior period presented.
AASB108.43 AASB108.44	However, to the extent that it is impracticable to determine either: (a) the period-specific effects of an error on comparative information for one or more prior periods presented, the entity shall restate the opening balances of assets, liabilities and equity for the earliest period for which retrospective restatement is practicable (which may be the current period); or
AASB108.45	(b) the cumulative effect, at the beginning of the current period, of an error on all prior periods, the entity shall restate the comparative information to correct the error prospectively from the earliest date practicable.
AASB108.46	The correction of a prior period error is excluded from profit or loss for the period in which the error is discovered. Any information presented about prior periods, including any historical summaries of financial data, is restated as far back as is practicable. The disclosure requirements are illustrated in note 4 to the model financial statements.
	Change in accounting estimates
AASB108.36	The effect of a change in an accounting estimate shall be recognised prospectively by including it in profit or loss in: (a) the period of the change, if the change affects that period only; or (b) the period of the change and future periods, if the change affects both.
AASB108.37	To the extent that a change in an accounting estimate gives rise to changes in assets and liabilities, or relates to an item of equity, it shall be recognised by adjusting the carrying amount of the related asset, liability or equity item in the period of the change. The disclosure requirements with respect to revisions of accounting estimates are illustrated in note 4 to the model financial statements.

Source	RDR Holdings (Australia) Pty Limited
AASB101. RDR15.1	**True and fair override** Financial statements shall present fairly the financial position, financial performance and cash flows of an entity applying Australian Accounting Standards – Reduced Disclosure Requirements. Fair presentation requires the faithful representation of the effects of transactions, other events and conditions in accordance with the definitions and recognition criteria for assets, liabilities, income and expenses set out in the Framework. The application of Australian Accounting Standards – Reduced Disclosure Requirements, with additional disclosure when necessary, is presumed to result in financial statements that achieve a fair presentation.
AASB101.19	In the extremely rare circumstances in which management concludes that compliance with a requirement in an Australian Accounting Standard would be so misleading that it would conflict with the objective of financial statements set out in the Framework, the entity shall depart from that requirement in the manner set out in AASB 101 para.20 if the relevant regulatory framework requires, or otherwise does not prohibit, such a departure.
AASB101. Aus19.1	In relation to AASB 101 para.19 above, the following shall not depart from a requirement in an Australian Accounting Standard: (a) entities required to prepare financial reports under Part 2M.3 of the Corporations Act; (b) private and public sector not-for-profit entities; and (c) entities applying Australian Accounting Standards – Reduced Disclosure Requirements.
AASB101.23	In the extremely rare circumstances in which management concludes that compliance with a requirement in an Australian Accounting Standard would be so misleading that it would conflict with the objective of financial statements set out in the Framework, but the relevant regulatory framework prohibits departure from the requirement, the entity shall, to the maximum extent possible, reduce the perceived misleading aspects of compliance by disclosing: (a) the title of the Australian Accounting Standard in question, the nature of the requirement, and the reason why management has concluded that complying with that requirement is so misleading in the circumstances that it conflicts with the objective of financial statements set out in the Framework; and (b) for each period presented, the adjustments to each item in the financial statements that management has concluded would be necessary to achieve a fair presentation.
	Consolidated entity vs. group The provisions of the Corporations Act 2001 use the term ‘consolidated entity’, rather than ‘group’, to refer to the parent entity and the subsidiaries included in the consolidated financial statements. Therefore, where consolidated financial statements are prepared under the Corporations Act 2001, the directors’ report, directors’ declaration, auditor’s independence declaration and independent auditor’s report shall adopt the term ‘consolidated entity’. However, as the Accounting Standards use the term ‘group’ to refer to the parent entity and its subsidiaries, it would be equally acceptable for the financial statements and the notes thereto to adopt the term ‘group’, as has been illustrated in the model reduced disclosure financial statements.

			27,115	31,639

The Group has applied the amendments to AASB 101 arising from AASB 2011-9 'Amendments to Australian Accounting Standards – Presentation of Items of Other Comprehensive Income' for the first time in the current year. The amendments to AASB 101 introduce new terminology for the statement of comprehensive income and income statement. Under the amendments to AASB 101, the 'statement of comprehensive income' is renamed as the 'statement of profit or loss and other comprehensive income' and the 'income statement' is renamed as the 'statement of profit or loss'.

AASB101.10A **One statement vs. two statements**

The amendments to AASB 101 retain the option to present profit or loss and other comprehensive income in either a single statement or in two separate but consecutive statements. Alt 1 above illustrates the presentation of profit or loss and other comprehensive income in one statement with expenses analysed by function. Alt 2 (see following pages) illustrates the presentation of profit or loss and other comprehensive income in two separate but consecutive statements with expenses analysed by nature.

Whichever presentation approach is adopted, the distinction is retained between items recognised in profit or loss and items recognised in other comprehensive income. Under both approaches, profit or loss, total other comprehensive income, as well as comprehensive income for the period (being the total of profit or loss and other comprehensive income) should be presented. Under the two-statement approach, the separate statement of profit or loss ends at 'profit for the year', and this 'profit for the year' is then the starting point for the statement of profit or loss and other comprehensive income, which is required to be presented immediately following the statement of profit or loss. In addition, the analysis of 'profit for the year' between the amount attributable to the owners of the Company and the amount attributable to non-controlling interests is presented as part of the separate statement of profit or loss.

AASB101.82A **Other comprehensive income: items that may or may not be reclassified**

Irrespective of whether the one-statement or the two-statement approach is followed, the items of other comprehensive income should be classified by nature and grouped into those that, in accordance with other AASBs:

(a) will not be reclassified subsequently to profit or loss; and
(b) will be reclassified subsequently to profit or loss when specific conditions are met.

	Presentation of revenues and expenses
AASB101.10A	An entity may present a single statement of profit or loss and other comprehensive income, with profit or loss and other comprehensive income presented in two sections. The sections shall be presented together, with the profit or loss section presented first followed directly by the other comprehensive income section. An entity may present the profit or loss section in a separate statement of profit or loss. If so, the separate statement of profit or loss shall immediately precede the statement presenting comprehensive income, which shall begin with profit or loss.
AASB101.81A	The statement of profit or loss and other comprehensive income (statement of comprehensive income) shall present, in addition to the profit or loss and other comprehensive income sections: (a) profit or loss; (b) total other comprehensive income; (c) comprehensive income for the period, being the total of profit or loss and other comprehensive income. If an entity presents a separate statement of profit or loss it does not present the profit or loss section in the statement presenting comprehensive income.
AASB 101.81B	An entity shall present the following items, in addition to the profit or loss and other comprehensive income sections, as allocation of profit or loss and other comprehensive income for the period: (a) profit or loss for the period attributable to: (i) non-controlling interests; and (ii) owners of the parent. (b) total comprehensive income for the period attributable to: (i) non-controlling interests; and (ii) owners of the parent. If an entity presents profit or loss in a separate statement it shall present (a) in that statement.
AASB 101.82	In addition to items required by other Australian Accounting Standards, the profit or loss section or the statement of profit or loss shall include line items that present the following amounts for the period: (a) revenue; (b) finance costs; (c) share of the profit or loss of associates and joint ventures accounted for using the equity method; (d) tax expense; (e) [deleted by the IASB] (ea) a single amount for the total of discontinued operations (see AASB5). (f)-(i) [deleted by the IASB]
AASB101.82A	The other comprehensive income section shall present line items for amounts of other comprehensive income in the period, classified by nature (including share of the other comprehensive income of associates and joint ventures accounted for using the equity method) and grouped into those that, in accordance with other Australian Accounting Standards: (a) will not be reclassified subsequently to profit or loss; and (b) will be reclassified subsequently to profit or loss when specific conditions are met.
AASB101.88	All items of income and expense recognised in a period are to be included in profit or loss unless another Accounting Standard requires otherwise. Other Accounting Standards require some gains and losses (for example, revaluation increases and decreases, particular foreign exchange differences, gains or losses on remeasuring available-for-sale financial assets, and related amounts of current tax and deferred tax) to be recognised directly as changes in equity. Examples of items of income and expense recognised directly in equity not illustrated in these model financial statements include: • gains/losses on a hedge of the net investment in a foreign operation • transfers to profit or loss on impairment of available-for-sale financial assets • transfers to profit or loss on sale of available-for-sale financial assets • share of increments in reserves attributable to associates • share of increments in reserves attributable to joint ventures.

Source	RDR Holdings (Australia) Pty Limited
AASB101.99, 100	An entity shall present, in the statement(s) presenting profit or loss and other comprehensive income, or in the notes, an analysis of expenses recognised in profit or loss using a classification based on either their nature or their function within the entity, whichever provides information that is reliable and more relevant. Sub-classifications of expenses by nature or function have been illustrated in the example on the face of the statement(s) presenting profit or loss and other comprehensive income respectively as is encouraged by the Accounting Standard.
AASB101.105	The choice between the function of expense method and the nature of expense method depends on historical and industry factors and the nature of the entity. Both methods provide an indication of those costs that might vary, directly or indirectly, with the level of sales or production of the entity. Because each method of presentation has merit for different types of entities, management is required to select the most relevant and reliable presentation. However, because information on the nature of expenses is useful in predicting future cash flows, additional disclosure is required when the function of expense classification is used.
AASB101.29,30 AASB101.31	Regardless of whether expenses are classified by nature or by function, each material class is separately disclosed. Unclassified expenses that are immaterial both individually and in aggregate may be combined and presented as a single line item. An item that is not sufficiently material to warrant separate presentation on the face of the financial statements may nevertheless be sufficiently material for it to be presented separately in the notes. It follows that the total of unclassified expenses is unlikely to exceed 10% of total expenses classified by nature or by function, whether disclosed either on the face or in the notes to the financial statements.
	Offsetting
AASB101.32	An entity shall not offset income and expenses, unless required or permitted by an Australian Accounting Standard.
AASB101.34	An entity undertakes, in the course of its ordinary activities, transactions that do not generate revenue but are incidental to the main revenue-generating activities. An entity presents the results of such transactions, when this presentation reflects the substance of the transaction or other event, by netting any income with related expenses arising on the same transaction. For example: (a) an entity presents gains and losses on the disposal of non-current assets, including investments and operating assets, by deducting from the proceeds on disposal the carrying amount of the asset and related selling expenses; and (b) an entity may net expenditure related to a provision that is recognised in accordance with AASB 137 'Provisions, Contingent Liabilities and Contingent Assets' and reimbursed under a contractual arrangement with a third party (for example, a supplier's warranty agreement) against the related reimbursement.
AASB101.35	An entity presents on a net basis gains and losses arising from a group of similar transactions, for example, foreign exchange gains and losses or gains and losses arising on financial instruments held for trading. However, an entity presents such gains and losses separately if they are material.
	Disclosure of specific revenues and expenses
AASB101.97	When items of income and expense are material, an entity shall disclose their nature and amount separately either in the statement(s) presenting profit or loss and other comprehensive income or in the notes.
	Disclosure of additional information
AASB101.85	An entity shall present additional line items, headings and subtotals in the statement(s) presenting profit or loss and other comprehensive income, when such presentation is relevant to an understanding of the entity's financial performance.
	Prohibition on extraordinary items
AASB101.87	An entity shall not present any items of income or expense as extraordinary items, in the statement (s) presenting profit or loss and other comprehensive income, or in the notes.
	Other comprehensive income for the period
AASB119.93B	Where an entity recognises actuarial gains and losses with respect to defined benefit plans in other comprehensive income, the entity must present these in the statement of profit or loss and other comprehensive income.

	Current/non-current vs. liquidity presentation
AASB101.60	All assets and all liabilities shall be classified and presented as either current or non-current unless they are presented in order of their liquidity. The term 'current' is defined for:
AASB101.66	(a) assets, as an asset that is: i. expected to be realised in, or is intended for sale or consumption in, the entity's normal operating cycle; ii. held primarily for the purpose of being traded; iii. expected to be realised within 12 months after the reporting period; or iv. cash or a cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period;
AASB101.69	(b) liabilities, as a liability that: i. is expected to be settled in the entity's normal operating cycle; ii. is held primarily for the purpose of being traded; iii. is due to be settled within 12 months after the reporting period; or iv. the entity does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in settlement by the issue of equity instruments do not affect its classification.
AASB101.60	A liquidity basis shall only be presented where a liquidity presentation provides information that is reliable and more relevant than the current/non-current presentation. The liquidity basis of presentation is not illustrated in these model financial statements.
	Operating cycle
AASB101.68	A company's operating cycle is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents. Once an entity defines their operating cycle it affects the classification and presentation of assets and liabilities as either current or non-current.
AASB101.68, 70	When an entity's normal operating cycle is not clearly identifiable, its duration is assumed to be 12 months.
AASB101.66, 69	However, where there is a single clearly identifiable operating cycle that extends over a period greater than 12 months, the longer period shall be used as the basis for identifying as: (a) current assets, those assets expected to be realised in, or intended for sale or consumption in, the entity's normal operating cycle; and (b) current liabilities, those liabilities expected to be settled in the entity's normal operating cycle.
AASB101.68, 70	Current assets will include inventories and trade receivables that are sold, consumed or realised as part of the normal operating cycle and current liabilities will include those liabilities that form part of the working capital used in a normal operating cycle of the entity, for example trade payables and accruals for employee benefits expense. This is the case even when they are not expected to be realised/settled within 12 months of the reporting period.
	Refinancing liabilities
AASB101.72	Where current and non-current liabilities are presented separately, financial liabilities shall be categorised as current when they are due to be settled within 12 months of the reporting period, even if: (a) the original term was for a period longer than 12 months; and (b) an agreement to refinance, or to reschedule payments, on a long term basis is completed after the reporting period and before the financial statements are authorised for issue.
AASB101.73	However, if an entity expects, and has the discretion, to refinance or roll over an obligation for at least 12 months after the reporting period under an existing loan facility, it classifies the obligation as non-current, even if it would otherwise be due within a shorter period. However, when refinancing or rolling over the obligation is not at the discretion of the entity (for example, there is no arrangement for refinancing), the entity does not consider the potential to refinance the obligation and classifies the obligation as current.

Source	RDR Holdings (Australia) Pty Limited
	Breach of loan covenants
AASB101.74	When an entity breaches a provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand, it classifies the liability as current, even if the lender has agreed, after the reporting period, and before the authorisation of the financial statements for issue, not to demand payment as a consequence of the breach. An entity classifies the liability as current because, at the end of the reporting period, it does not have an unconditional right to defer its settlement for at least twelve months after that date
AASB101.75	However, an entity classifies the liability as non-current if the lender agreed by the end of the reporting period to provide a period of grace ending at least 12 months after the reporting period, within which the entity can rectify the breach and during which the lender cannot demand immediate repayment.
	Offsetting
AASB101.32	An entity shall not offset assets and liabilities, unless required or permitted by an Accounting Standard, for example, AASB 132 'Financial Instruments: Presentation'.
	Income taxes
AASB112.71	An entity shall offset current tax assets and current tax liabilities if, and only if, the entity: (a) has a legally enforceable right to set-off the recognised amounts; and (b) intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.
AASB112.74	An entity shall offset deferred tax assets and deferred tax liabilities if, and only if: (a) the entity has a legally enforceable right to set-off current tax assets against current tax liabilities; and (b) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either: i. the same taxable entity; or ii. different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.
	Presentation of a non-current asset or disposal group classified as held for sale
AASB5.40	An entity shall not reclassify or re-present amounts presented for non-current assets or for the assets and liabilities of disposal groups classified as held for sale in the statements of financial position for prior periods to reflect the classification in the statement of financial position for the latest period presented.

AASB101.106	An entity shall present a statement of changes in equity as required by paragraph 10. The statement of changes in equity includes the following information: (a) total comprehensive income for the period, showing separately the total amounts attributable to owners of the parent and to non-controlling interests; (b) for each component of equity, the effects of retrospective application or retrospective restatement recognised in accordance with AASB 108; and (c) [deleted by the IASB] (d) for each component of equity, a reconciliation between the carrying amount at the beginning and the end of the period, separately disclosing changes resulting from: (i) profit or loss; (ii) other comprehensive income; and (iii) transactions with owners in their capacity as owners, showing separately contributions by and distributions to owners and changes in ownership interests in subsidiaries that do not result in a loss of control.
AASB101.106A	For each component of equity an entity shall present, either in the statement of changes in equity or in the notes, an analysis of other comprehensive income by item (see paragraph 106(d)(ii)).
AASB101.107, Aus1.8(c), BC75	An entity shall present, either in the statement of changes in equity or in the notes, the amount of dividends recognised as distributions to owners during the period. (Note that presentation of dividend disclosures in the statement of comprehensive income is no longer permitted.)
AASB101.109	Changes in an entity's equity between the beginning and the end of the reporting period reflect the increase or decrease in its net assets during the period. Except for changes resulting from transactions with owners in their capacity as owners (such as equity contributions, reacquisitions of the entity's own equity instruments and dividends) and transaction costs directly related to such transactions, the overall change in equity during a period represents the total amount of income and expense, including gains and losses, generated by the entity's activities during that period.

The above illustrates the indirect method of reporting cash flows from operating activities.

Source	RDR Holdings (Australia) Pty Limited
AASB107.14	**Operating activities** Cash flows from operating activities are primarily derived from the principal revenue-producing activities of the entity. Therefore, they generally result from the transactions and other events that enter into the determination of profit or loss. Examples of cash flows from operating activities are: (a) cash receipts from the sale of goods and the rendering of services; (b) cash receipts from royalties, fees, commissions and other revenue; (c) cash payments to suppliers for goods and services; (d) cash payments to and on behalf of employees; (e) cash receipts and cash payments of an insurance entity for premiums and claims, annuities and other policy benefits; (f) cash payments or refunds of income taxes unless they can be specifically identified with financing and investing activities; and (g) cash receipts and payments from contracts held for dealing or trading purposes. Some transactions, such as the sale of an item of plant, may give rise to a gain or loss that is included in recognised profit or loss. The cash flows relating to such transactions are cash flows from investing activities. However, cash payments to manufacture or acquire assets held for rental to others and subsequently held for sale as described in paragraph 68A of AASB 116 'Property, Plant and Equipment' are cash flows from operating activities. The cash receipts from rents and subsequent sales of such assets are also cash flows from operating activities.
AASB107.18	Entities shall report cash flows from operations using the direct method or indirect method.
AASB107.19	Entities are encouraged to report cash flows from operating activities using the direct method.
AASB107.16	**Investing activities** The separate disclosure of cash flows arising from investing activities is important because the cash flows represent the extent to which expenditures have been made for resources intended to generate future income and cash flows. Only expenditures that result in a recognised asset in the statement of financial position are eligible for classification as investing activities. Examples of cash flows arising from investing activities are: (a) cash payments to acquire property, plant and equipment, intangibles and other long-term assets. These payments include those relating to capitalised development costs and self-constructed property, plant and equipment; (b) cash receipts from sales of property, plant and equipment, intangibles and other long-term assets; (c) cash payments to acquire equity or debt instruments of other entities and interests in joint ventures (other than payments for those instruments considered to be cash equivalents or those held for dealing or trading purposes); (d) cash receipts from sales of equity or debt instruments of other entities and interests in joint ventures (other than receipts for those instruments considered to be cash equivalents and those held for dealing or trading purposes); (e) cash advances and loans made to other parties (other than advances and loans made by a financial institution); (f) cash receipts from the repayment of advances and loans made to other parties (other than advances and loans of a financial institution); (g) cash payments for futures contracts, forward contracts, option contracts and swap contracts except when the contracts are held for dealing or trading purposes, or the payments are classified as financing activities; and (h) cash receipts from futures contracts, forward contracts, option contracts and swap contracts except when the contracts are held for dealing or trading purposes, or the receipts are classified as financing activities. When a contract is accounted for as a hedge of an identifiable position, the cash flows of the contract are classified in the same manner as the cash flows of the position being hedged.

Source	RDR Holdings (Australia) Pty Limited
AASB107.17	**Financing activities** The separate disclosure of cash flows arising from financing activities is important because it is useful in predicting claims on future cash flows by providers of capital to the entity. Examples of cash flows arising from financing activities are: (a) cash proceeds from issuing shares or other equity instruments; (b) cash payments to owners to acquire or redeem the entity's shares; (c) cash proceeds from issuing debentures, loans, notes, bonds, mortgages and other short-term or long-term borrowings; (d) cash repayments of amounts borrowed; and (e) cash payments by a lessee for the reduction of the outstanding liability relating to a finance lease.
AASB107.31	**Interest and dividends** Cash flows from interest and dividends received and paid shall each be disclosed separately. Each shall be classified in a consistent manner from period to period as either operating, investing or financing activities.
AASB107.32	The total amount of interest paid during a period is disclosed in the cash flow statement whether it has been recognised as an expense in profit or loss or capitalised in accordance with AASB 123 'Borrowing Costs'.
AASB107.33	Interest paid and interest and dividends received are usually classified as operating cash flows for a financial institution. However, there is no consensus on the classification of these cash flows for other entities. Interest paid and interest and dividends received may be classified as operating cash flows because they enter into the determination of net profit or loss. Alternatively, interest paid and interest and dividends received may be classified as financing cash flows and investing cash flows respectively, because they are costs of obtaining financial resources or returns on investments.
AASB107.34	Dividends paid may be classified as a financing cash flow because they are a cost of obtaining financial resources. Alternatively, dividends paid may be classified as a component of cash flows from operating activities in order to assist users to determine the ability of an entity to pay dividends out of operating cash flows.
AASB107.35	**Taxes on income** Cash flows arising from taxes on income shall be separately disclosed and shall be classified as cash flows from operating activities unless they can be specifically identified with financing and investing activities.
AASB107.37	**Investments in subsidiaries, associates and joint ventures** When accounting for an investment in an associate or a subsidiary accounted for by use of the equity or cost method, an investor restricts its reporting in the cash flow statement to the cash flows between itself and the investee, for example, to dividends and advances.
AASB107.38	An entity that reports its interest in an associate or a joint venture using the equity method includes in its statement of cash flows the cash flows in respect of its investments in the associate or joint venture, and distributions and other payments or receipts between it and the associate or joint venture.
AASB107.43	**Non-cash transactions** Investing and financing transactions that do not require the use of cash or cash equivalents shall be excluded from a cash flow statement. Such transactions shall be disclosed elsewhere in the financial statements in a way that provides all the relevant information about these investing and financing activities.

Source	RDR Holdings (Australia) Pty Limited
AASB101.10(e), (ea),	**1. General information**
	General information about the entity as required by AASB 101 'Presentation of Financial Statements' paragraph 138(a) is not required under RDR. This note reference has therefore been included only to assist users to more easily compare the reduced disclosures illustrated in this publication to those which entities would be expected to make under 'Tier 1' as illustrated in the corresponding note in the 30 June 2014 'Model Financial Statements'.
	2. Application of new and revised Accounting Standards
	2.1 New and revised AASBs affecting amounts reported and/or disclosures in the financial statements
	In the current year, the Group has applied a number of new and revised AASBs issued by the Australian Accounting Standards Board (AASB).
AASB1053.3 – 4, AASB2010-2.10	AASB 1053 'Application of Tiers of Australian Accounting Standards' and AASB 2010-2 'Amendments to Australian Accounting Standards arising from Reduced Disclosure Requirements' — AASB 1053 establishes a differential financial reporting framework consisting of two tiers of reporting requirements for general purpose financial statements, comprising Tier 1: Australian Accounting Standards and Tier 2: Australian Accounting Standards – Reduced Disclosure Requirements (RDR). AASB 2010-2 makes amendments to each Standard and Interpretation indicating the disclosures not required to be made by 'Tier 2' entities or inserting 'RDR' paragraphs requiring simplified disclosures for 'Tier 2' entities. The adoption of these standards has resulted in significantly reduced disclosures, largely in respect of income tax, segments, impairment, related parties, share-based payments, financial instruments and cash flows.
	AASB 2011-2 'Amendments to Australian Accounting Standards arising from the Trans-Tasman Convergence Project – Reduced Disclosure Requirements' — AASB 2011-2 establishes reduced disclosure requirements for entities preparing general purpose financial statements under Australian Accounting Standards – Reduced Disclosure Requirements in relation to the Australian additional disclosures arising from the Trans-Tasman Convergence Project. The adoption of this amending standard does not have any material impact on the consolidated financial statements.
	AASB 2011-6 'Amendments to Australian Accounting Standards – Extending Relief from Consolidation, the Equity Method and Proportionate Consolidation – Reduced Disclosure Requirements. — AASB 2011-6 extends the relief from consolidation, the equity method and proportionate consolidation to a parent entity, investor or venturer, subject to certain requirements of the standard. RDR Holdings (Australia) Pty Limited does not meet the requirements of the standard. Therefore the application of this amending standard will not have any impact on the consolidated financial statements.
AASB 108.28(a), (c)	AASB 2012-2 'Amendments to Australian Accounting Standards – Disclosures – Offsetting Financial Assets and Financial Liabilities' — The Group has applied the amendments to AASB 7 'Disclosures – Offsetting Financial Assets and Financial Liabilities' for the first time in the current year. The amendments to AASB 7 require entities to disclose information about rights of offset and related arrangements (such as collateral posting requirements) for financial instruments under an enforceable master netting agreement or similar arrangement. The amendments have been applied retrospectively. As the Group does not have any offsetting arrangements in place, the application of the amendments does not have any material impact on the consolidated financial statements.
	AASB 2012-5 'Amendments to Australian Accounting Standards arising from Annual Improvements 2009-2011 Cycle' — The Annual Improvements to AASBs 2009 - 2011 have made a number of amendments to AASBs. Amendments made to AASB 1, AASB 101, AASB 116, AASB 132 and AASB 134. The application of these amendments does not have any material impact on the consolidated financial statements.

Source	RDR Holdings (Australia) Pty Limited

2. Application of new and revised Accounting Standards (cont'd)

AASB 2012-9 'Amendment to AASB 1048 arising from the Withdrawal of Australian Interpretation 1039'	This standard makes amendment to AASB 1048 'Interpretation of Standards' following the withdrawal of Australian Interpretation 1039 'Substantive Enactment of Major Tax Bills in Australia'. The adoption of this amending standard does not have any material impact on the consolidated financial statements.
AASB CF 2013-1 'Amendments to the Australian Conceptual Framework' and AASB 2013-9 'Amendments to Australian Accounting Standards – Conceptual Framework, Materiality and Financial Instruments' (Part A Conceptual Framework)	This amendment has incorporated IASB's Chapters 1 and 3 Conceptual Framework for Financial Reporting as an Appendix to the Australian Framework for the Preparation and Presentation of Financial Statements. The amendment also included not-for-profit specific paragraphs to help clarify the concepts from the perspective of not-for-profit entities in the private and public sectors. As a result the Australian Conceptual Framework now supersedes the objective and the qualitative characteristics of financial statements, as well as the guidance previously available in Statement of Accounting Concepts SAC 2 'Objective of General Purpose Financial Reporting'. The adoption of this amending standard does not have any material impact on the consolidated financial statements.

AASB 108.28(a), (c)

New and revised Standards on consolidation, joint arrangements, associates and disclosures

In August 2011, a package of five standards on consolidation, joint arrangements, associates and disclosures was issued comprising AASB 10 'Consolidated Financial Statements', AASB 11 'Joint Arrangements', AASB 12 'Disclosure of Interests in Other Entities', AASB 127 (as revised in 2011) 'Separate Financial Statements' and AASB 128 (as revised in 2011) 'Investments in Associates and Joint Ventures'. Subsequent to the issue of these standards, amendments to AASB 10, AASB 11 and AASB 12 were issued to clarify certain transitional guidance on the first-time application of the standards.

In the current year, the Group has applied for the first time AASB 10, AASB 11, AASB 12 and AASB 128 (as revised in 2011) together with the amendments to AASB 10, AASB 11 and AASB 12 regarding the transitional guidance. AASB 127 (as revised in 2011) is not applicable to the Group as it deals only with separate financial statements.

The impact of the application of these standards is set out below.

AASB 10 'Consolidated Financial Statements', AASB 2011-7 'Amendments to Australian Accounting Standards arising from the consolidation and Joint Arrangements standards', and AASB 2012-11 'Amendments to Australian Accounting Standards - Reduced Disclosure Requirements and Other Amendments'	AASB 10 replaces the parts of AASB 127 'Consolidated and Separate Financial Statements' that deal with consolidated financial statements and Interpretation 112 'Consolidation – Special Purpose Entities'. AASB 10 changes the definition of control such that an investor controls an investee when a) it has power over an investee, b) it is exposed, or has rights, to variable returns from its involvement with the investee, and c) has the ability to use its power to affect its returns. All three of these criteria must be met for an investor to have control over an investee. Previously, control was defined as the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. Additional guidance has been included in AASB 10 to explain when an investor has control over an investee. Some guidance included in AASB 10 that deals with whether or not an investor that owns less than 50 per cent of the voting rights in an investee has control over the investee is relevant to the Group.

Source	RDR Holdings (Australia) Pty Limited	
	2. Application of new and revised Accounting Standards (cont'd)	
		Specifically, the Group has a 45% ownership interest in C Plus Limited, which is listed on the stock exchange of Australia. The Group's 45% ownership interest in C Plus Limited gives the Group the same percentage of the voting rights in C Plus Limited. The Group's 45% ownership interest in C Plus Limited was acquired in June 2010 and there has been no change in the Group's ownership in C Plus Limited since then. The remaining 55% of the ordinary shares of C Plus Limited are owned by thousands of shareholders, none individually holding more than two per cent. The directors of the Company made an assessment as the date of the initial application of AASB 10 (i.e. 1 July 2013) as to whether or not the Group has control over C Plus Limited in accordance with the new definition of control and the related guidance set out in AASB 10. The directors concluded that it has had control over C Plus Limited since the acquisition in December 2010 on the basis of the Group's absolute size of holding in C Plus Limited and the relative size of and dispersion of the shareholding owned by the other shareholders. Therefore, in accordance with the requirements of AASB 10, C Plus Limited has been a subsidiary of the Company since June 2010. Previously, C Plus Limited was treated as an associate of the Group and accounted for using the equity method of accounting.
AASB10.C4(a)		Comparative amounts for 2013 and the related amounts as at 1 July 2012 have been restated in accordance with the relevant transitional provisions set out in AASB 10 (see the tables below).
	AASB 11 'Joint Arrangements' and AASB 2011-7 'Amendments to Australian Accounting Standards arising from the consolidation and Joint Arrangements standards'	AASB 11 replaces AASB 131 'Interests in Joint Ventures', and the guidance contained in a related interpretation, Interpretation 113 'Jointly Controlled Entities – Non-Monetary Contributions by Venturers', has been incorporated in AASB 128 (as revised in 2011). AASB 11 deals with how a joint arrangement of which two or more parties have joint control should be classified and accounted for. Under AASB 11, there are only two types of joint arrangements – joint operations and joint ventures. The classification of joint arrangements under AASB 11 is determined based on the rights and obligations of parties to the joint arrangements by considering the structure, the legal form of the arrangements, the contractual terms agreed by the parties to the arrangement, and, when relevant, other facts and circumstances. A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement (i.e. joint operators) have rights to the assets, and obligations for the liabilities, relating to the arrangement. A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement (i.e. joint venturers) have rights to the net assets of the arrangement. Previously, AASB 131 contemplated three types of joint arrangements – jointly controlled entities, jointly controlled operations and jointly controlled assets. The classification of joint arrangements under AASB 131 was primarily determined based on the legal form of the arrangement (e.g. a joint arrangement that was established through a separate entity was accounted for as a jointly controlled entity).

Source	RDR Holdings (Australia) Pty Limited	
	2. Application of new and revised Accounting Standards (cont'd)	
		The initial and subsequent accounting of joint ventures and joint operations is different. Investments in joint ventures are accounted for using the equity method (proportionate consolidation is no longer allowed). Investments in joint operations are accounted for such that each joint operator recognises its assets (including its share of any assets jointly held), its liabilities (including its share of any liabilities incurred jointly), its revenue (including its share of revenue from the sale of the output by the joint operation) and its expenses (including its share of any expenses incurred jointly). Each joint operator accounts for the assets and liabilities, as well as revenues and expenses, relating to its interest in the joint operation in accordance with the applicable Standards. The directors of the Company reviewed and assessed the classification of the Group's investments in joint arrangements in accordance with the requirements of AASB 11. The directors concluded that the Group's investment in JV Electronics Limited, which was classified as a jointly controlled entity under AASB 131 and was accounted for using the proportionate consolidation method, should be classified as a joint venture under AASB 11 and accounted for using the equity method.
AASB11.C2,C3		The change in accounting of the Group's investment in JV Electronics Limited has been applied in accordance with the relevant transitional provisions set out in AASB 11. Comparative amounts for 2013 have been restated to reflect the change in accounting for the Group's investment in JV Electronics Limited. The initial investment as at 1 July 2012 for the purposes of applying the equity method is measured as the aggregate of the carrying amounts of the assets and liabilities that the Group had previously proportionately consolidated (see the tables below for details). Also, the directors of the Company performed an impairment assessment on the initial investment as at 1 July 2012 and concluded that no impairment loss is required.
	AASB 12 'Disclosure of Interests in Other Entities', AASB 2011-7 'Amendments to Australian Accounting Standards arising from the consolidation and Joint Arrangements standards', and AASB 2012-7 'Amendments to Australian Accounting Standards arising from Reduced Disclosure Requirements'	AASB 12 is a new disclosure standard and is applicable to entities that have interests in subsidiaries, joint arrangements, associates and/or unconsolidated structured entities. In general, the application of AASB 12 has resulted in more extensive disclosures in the consolidated financial statements (please see notes 4, 17, 18, 18A and 19 for details).
AASB 108.28(a), (c)	AASB 13 'Fair Value Measurement', AASB 2011-8 'Amendments to Australian Accounting Standards arising from AASB 13', and AASB 2012-1 'Amendments to Australian Accounting Standards Fair Value Measurement – Reduced Disclosure Requirements'	The Group has applied AASB 13 for the first time in the current year. AASB 13 establishes a single source of guidance for fair value measurements and disclosures about fair value measurements. The scope of AASB 13 is broad; the fair value measurement requirements of AASB 13 apply to both financial instrument items and non-financial instrument items for which other AASBs require or permit fair value measurements and disclosures about fair value measurements, except for share-based payment transactions that are within the scope of AASB 2 'Share-based Payment', leasing transactions that are within the scope of AASB 117 'Leases', and measurements that have some similarities to fair value but are not fair value (e.g. net realisable value for the purposes of measuring inventories or value in use for impairment assessment purposes).

Source	RDR Holdings (Australia) Pty Limited	
	2. Application of new and revised Accounting Standards (cont'd)	
		AASB 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions. Fair value under AASB 13 is an exit price regardless of whether that price is directly observable or estimated using another valuation technique. Also, AASB 13 includes extensive disclosure requirements. AASB 13 requires prospective application from 1 July 2013. In addition, specific transitional provisions were given to entities such that they need not apply the disclosure requirements set out in the Standard in comparative information provided for periods before the initial application of the Standard. In accordance with these transitional provisions, the Group has not made any new disclosures required by AASB 13 for the 2013 comparative period (please see notes 20, 21 and 40 for the 2014 disclosures). Other than the additional disclosures, the application of AASB 13 does not have any material impact on the amounts recognised in the consolidated financial statements.
	AASB 2012-10 'Amendments to Australian Accounting Standards – Transition Guidance and Other Amendments'	This standard amends AASB 10 and various Australian Accounting Standards to revise the transition guidance on the initial application of those Standards . This standard also clarifies the circumstances in which adjustments to an entity's previous accounting for its involvement with other entities are required and the timing of such adjustments. The adoption of this amending standard does not have any material impact on the consolidated financial statements.
AASB108.28 (a), (c)	AASB 119 'Employee Benefits' (2011), AASB 2011-10 'Amendments to Australian Accounting Standards arising from AASB 119 (2011)' and AASB 2011-11 'Amendments to AASB 119 (September 2011) arising from Reduced Disclosure Requirements'	In the current year, the Group has applied AASB 119 (as revised in 2011) 'Employee Benefits' and the related consequential amendments for the first time. AASB 119 (as revised in 2011) changes the accounting for defined benefit plans and termination benefits. The most significant change relates to the accounting for changes in defined benefit obligations and plan assets. The amendments require the recognition of changes in defined benefit obligations and in the fair value of plan assets when they occur, and hence eliminate the 'corridor approach' permitted under the previous version of AASB 119 and accelerate the recognition of past service costs. All actuarial gains and losses are recognised immediately through other comprehensive income in order for the net pension asset or liability recognised in the consolidated statement of financial position to reflect the full value of the plan deficit or surplus. Furthermore, the interest cost and expected return on plan assets used in the previous version of AASB 119 are replaced with a 'net interest' amount under AASB 119 (as revised in 2011), which is calculated by applying the discount rate to the net defined benefit liability or asset. These changes have had an impact on the amounts recognised in profit or loss and other comprehensive income in prior years (see the tables below for details). In addition, AASB 119 (as revised in 2011) introduces certain changes in the presentation of the defined benefit cost including more extensive disclosures. Specific transitional provisions are applicable to first-time application of AAS 119 (as revised in 2011). The Group has applied the relevant transitional provisions and restated the comparative amounts on a retrospective basis (see the tables below for details).

2. Application of new and revised Accounting Standards (cont'd)

AASB 10.C2A
AASB 11.C1B

The disclosures below illustrate the impact on profit or loss with expenses analysed by function. Entities should adopt the approach consistent with how expenses have been analysed in the statement of profit or loss and other comprehensive income.

In accordance with the amendments to AASBs 10, 11 and 12 regarding the transition guidance on the first-time application of these Standards, an entity need only present the quantitative information required by paragraph 28(f) of AASB 108 for the annual period immediately preceding the date of initial application of AASB 10 (i.e. 2012). The note below, therefore, has not included the quantitative information required by AASB 108.28(f) for the current year on the application of AASBs 10, 11 and 12.

AASB 108.28(f)(i)

The table above shows the aggregate impact on total comprehensive income of the application of the new and revised Standards adopted for the first time in the current year. Although such disclosure is not specifically required by AASB 108, it is considered useful to provide users of the financial statements with the aggregate effect.

Furthermore, in accordance with the transitional provisions set out in AASB 10 and AASB 11, the Group has not shown the impact of the application of AASB 10 and AASB 11 on profit (loss) for the year ended 30 June 2014. Therefore, the impact on total comprehensive income for the year ended 30 June 2014 reflects only the effect of the application of AASB 119 (as revised in 2011).

	2. Application of new and revised Accounting Standards (cont'd)
AASB108.28, Aus2.9	**Changes in accounting policies on initial application of Accounting Standards** When initial application of an Accounting Standard has an effect on the current period or any prior period, or would have such an effect except that it is impracticable to determine the amount of the adjustment, or might have an effect on future periods, an entity shall disclose: (a) the title of the Accounting Standard; (b) [not required under RDR]; (c) the nature of the change in accounting policy; (d) [not required under RDR]; (e) [not required under RDR]; (f) for the current period and each prior period presented, to the extent practicable, the amount of the adjustment: i. for each financial statement line item affected; and ii. if AASB 133 'Earnings per Share' applies to the entity, for basic and diluted earnings per share; (g) the amount of the adjustment relating to periods before those presented, to the extent practicable; and (h) [not required under RDR]. Financial reports of subsequent periods need not repeat these disclosures.
AASB108. RDR28.1	An entity applying Australian Accounting Standards – Reduced Disclosure Requirements shall disclose an explanation if it is impracticable to determine the amounts required to be disclosed by paragraph 28(f)(i) or 28(g). The above information would likely be disclosed in the accounting policy note of the relevant item and the relevant note for the item, or a change in accounting policy note.
AASB108.29	**Voluntary changes in accounting policies** When a voluntary change in accounting policy has an effect on the current period or any prior period, would have an effect on that period except that it is impracticable to determine the amount of the adjustment, or might have an effect on future periods, an entity shall disclose: (a) the nature of the change in accounting policy; (b) the reasons why applying the new accounting policy provides reliable and more relevant information; (c) for the current period and each prior period presented, to the extent practicable, the amount of the adjustment: i. for each financial statement line item affected; and ii. if AASB 133 'Earnings per Share' applies to the entity, for basic and diluted earnings per share; (d) the amount of the adjustment relating to periods before those presented, to the extent practicable; and (e) if retrospective application of the accounting policy is impracticable for a particular prior period, or for periods before those presented, the circumstances that led to the existence of that condition and a description of how and from when the change in accounting policy has been applied.
AASB108.20	Financial reports of subsequent periods need not repeat these disclosures. The early application of an Accounting Standard is not a voluntary change in accounting policy.

Source	RDR Holdings (Australia) Pty Limited
	2. Application of new and revised Accounting Standards (cont'd)
AASB134.26	**Changes in accounting policy since the most recent interim financial report** Where there is a change in an accounting policy during the final current interim period of the annual reporting period but a separate interim financial report is not published for that final current interim period, the nature of the change in accounting policy and the financial effect of the change on prior interim financial reports of the current annual reporting period shall be disclosed in the notes in the annual financial report for that annual reporting period.
AASB134.27	If the entity does not prepare interim financial reports other than for the first half-year, the requirements above apply where there is a change in accounting policy between the first half-year reporting date and the annual reporting date.
AASB134.43	A change in accounting policy, other than one for which the transition is specified by a new Accounting Standard, shall be reflected by: (a) restating the financial statements of prior interim periods of the current annual reporting period and the comparable interim periods of any prior annual reporting periods that will be restated in the annual financial statements in accordance with AASB 108 'Accounting Policies, Changes in Accounting Estimates and Errors'; or (b) when it is impracticable to determine the cumulative effect at the beginning of the annual reporting period of applying a new accounting policy to all prior periods, adjusting the financial statements of prior interim periods of the current annual reporting period, and comparable interim periods of prior annual reporting periods to apply the new accounting policy prospectively from the earliest date practicable.
AASB101.112(a), 117	**3. Significant accounting policies**
	The following are examples of the types of accounting policies that might be disclosed in this entity's financial statements. Entities are required to disclose in the summary of significant accounting policies the measurement basis (or bases) used in preparing the financial statements, and the other accounting policies used that are relevant to an understanding of the financial statements. An accounting policy may be significant because of the nature of the entity's operations even if amounts for the current and prior periods are not material. In deciding whether a particular accounting policy should be disclosed, management considers whether disclosure would assist users in understanding how transactions, other events and conditions are reflected in the reported financial performance and financial position. Disclosure of particular accounting policies is especially useful to users when those policies are selected from alternatives allowed in Standards and Interpretations. Each entity considers the nature of its operations and the policies that users of its financial statements would expect to be disclosed for that type of entity. It is also appropriate to disclose each significant accounting policy that is not specifically required by Accounting Standards, but that is selected and applied in accordance with AASB 108 'Accounting Policies, Changes in Accounting Estimates and Errors'. For completeness, in these model financial statements accounting policies have been provided for some immaterial items, although this is not required under Accounting Standards. <u>Materiality</u> In accordance with AASB 1031 'Materiality', accounting polices need only be identified in the summary of accounting policies where they are considered 'material'. Accounting policies will be considered material if their omission, misstatement or non-disclosure has the potential, individually or collectively, to: (a) influence the economic decisions of users taken on the basis of the financial report; and (b) affect the discharge of accountability by the management or governing body of the entity.

Source	RDR Holdings (Australia) Pty Limited
	3. Significant accounting policies (cont'd)
	3.1 Statement of compliance
AASB1054.7-9 AASB101. RDR16.1	These financial statements are general purpose financial statements which have been prepared in accordance with the Corporations Act 2001 and Australian Accounting Standards – Reduced Disclosure Requirements, and comply with other requirements of the law.
	The financial statements comprise the consolidated financial statements of the Group. For the purposes of preparing the consolidated financial statements, the Company is a for-profit entity.
AASB110.17	The financial statements were authorised for issue by the directors on 11 September 2014.
AASB101.17(b) 112(a), 117 (a)	***3.2 Basis of preparation***
AASB101.51(d), 108(a)	The consolidated financial statements have been prepared on the basis of historical cost, except for certain properties and financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair values of the consideration given in exchange for assets. All amounts are presented in Australian dollars, unless otherwise noted.
	Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of AASB 2, leasing transactions that are within the scope of AASB 117, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in AASB 2 or value in use in AASB 136.
	In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:
	• Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
	• Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
	• Level 3 inputs are unobservable inputs for the asset or liability.
ASIC-CO 98/100	If the company is of the kind referred to in ASIC Class Order 98/100, dated 10 July 1998, and consequently the amounts in the directors' report and the financial report are rounded, that fact must be disclosed in the report. Where the conditions of the Class Order are met, entities may round to the nearest thousand dollars, nearest hundred thousand dollars, or to the nearest million dollars.
ASIC-CO 98/100, AASB101.51(e)	The company is a company of the kind referred to in ASIC Class Order 98/100, dated 10 July 1998, and in accordance with that Class Order amounts in the financial report are rounded off to the nearest thousand dollars, unless otherwise indicated.
	Early adoption of Accounting Standards
	The following disclosure is recommended where an Accounting Standard has been adopted early: 'The directors have elected under s.334(5) of the Corporations Act 2001 to apply Accounting Standard AASB 10XX '[title]' for this financial year, even though the Standard is not required to be applied until annual reporting periods beginning on or after [date].' In accordance with s.334(5) of the Corporations Act 2011, the election must be made in writing by directors.

Source	RDR Holdings (Australia) Pty Limited
	3. Significant accounting policies (cont'd)
AASB101.17(b), 112(a), 117(b)	The principal accounting policies are set out below.
	Going concern basis
AASB101.25	Where the financial report is prepared on a going concern basis, but material uncertainties exist in relation to events or conditions which cast doubt on the entity's ability to continue as a going concern, those uncertainties shall be disclosed. The events or conditions requiring disclosure may arise after the reporting date.
AASB101.25, AASB110.14	Where the going concern basis has not been used, this shall be disclosed together with a statement of the reasons for not applying this basis and the basis on which the financial report has been prepared. An entity shall not prepare its financial report on a going concern basis if management determines after the reporting date either that it intends to liquidate the entity or to cease trading, or that it has no realistic alternative but to do so.
	Example accounting policies
	The following illustrations are quoted by way of example only, and do not necessarily represent the only treatment which may be appropriate for the item concerned and does not cover all items that shall be considered for inclusion in the summary of accounting policies.
	For example, an entity may elect:
AASB139.98, 99	• not to adjust the initial measurement of the cost of a non-financial asset or a non-financial liability arising from a hedged forecast transaction by the amount deferred in equity;
AASB119. 92-93D	• for actuarial gains and losses arising in relation to defined benefit plans, to adopt the corridor approach or to recognise actuarial gains and losses directly in retained profits or in full in profit or loss;
AASB139.38	• to recognise investments on settlement date or on trade date;
AASB139.92	• in respect of fair value hedges, to amortise the adjustment to a hedged item measured at amortised cost to profit or loss from the date the adjustment is made or to begin the amortisation no later than when hedge accounting is discontinued;
AASB112.78	• to present exchange differences on deferred foreign tax liabilities or assets recognised in the statement of comprehensive income as deferred tax expense (income);
AASB138.72	• to measure intangible assets after initial recognition on either the cost or revaluation (fair value) basis, where conditions for doing so are met;
AASB140.30	• to measure investment property under either the cost model or the fair value model;
AASB140.6	• to classify and account for property interests held under operating leases as investment properties on a property-by-property basis;
AASB120.23	• to account for government grants in the form of a non-monetary asset at a nominal amount;
AASB120.24	• to present government grants related to assets as a deduction from the carrying amount of the asset;
AASB120.29	• to deduct government grants received and recognised in the statement of profit or loss in reporting the related expense; or
AASB107.18	• to prepare the statement of cash flows using either the direct or the indirect method.
	Entities may also need to disclose the manner in which they account for:
AASB3.2(c)	• business combinations involving entities under common control;
AASB141	• biological assets or agricultural produce; or
AASB6	• exploration and evaluation activities.

3. Significant accounting policies (cont'd)

3.3 Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities (including structured entities) controlled by the Company and its subsidiaries. Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Company has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:

- the size of the Company's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;

- potential voting rights held by the Company, other vote holders or other parties;

- rights arising from other contractual arrangements; and

any additional facts and circumstances that indicate that the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Company gains control until the date when the Company ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

3.3.1 Changes in the Group's ownership interests in existing subsidiaries

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Company.

Source	RDR Holdings (Australia) Pty Limited

3. Significant accounting policies (cont'd)

When the Group loses control of a subsidiary, a gain or loss is recognised in profit or loss and is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interests. All amounts previously recognised in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as specified/permitted by applicable AASBs). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under AASB 139, when applicable, the cost on initial recognition of an investment in an associate or a joint venture.

3.4 Business combinations

AASB3

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value which is calculated as the sum of the acquisition-date fair values of assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquire and the equity instruments issued by the Group in exchange for control of the acquiree. Acquisition-related costs are recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value:

- deferred tax assets or liabilities and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with AASB 112 'Income Taxes' and AASB 119 'Employee Benefits' respectively;

- liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered into to replace share-based payment arrangements of the acquire are measured in accordance with AASB 2 'Share-based Payment' at the acquisition date; and

- assets (or disposal groups) that are classified as held for sale in accordance with AASB 5 'Non-current Assets Held for Sale and Discontinued Operations' are measured in accordance with that Standard.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation may be initially measured either at fair value or at the non-controlling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets. The choice of measurement basis is made on a transaction-by-transaction basis. Other types of non-controlling interests are measured at fair value or, when applicable, on the basis specified in another Standard.

Source	RDR Holdings (Australia) Pty Limited

3. Significant accounting policies (cont'd)

Where the consideration transferred by the Group in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value. Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the 'measurement period' (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

The subsequent accounting for changes in the fair value of contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Contingent consideration that is classified as an asset or liability is remeasured at subsequent reporting dates in accordance with AASB 139, or AASB 137 'Provisions, Contingent Liabilities and Contingent Assets', as appropriate, with the corresponding gain or loss being recognised in profit or loss.

Where a business combination is achieved in stages, the Group's previously held equity interest in the acquire is remeasured to its acquisition date fair value and the resulting gain or loss, if any, is recognised in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are reclassified to profit or loss where such treatment would be appropriate if that interest were disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the amounts recognised as of that date.

3.5 Goodwill

AASB3

Goodwill arising on an acquisition of a business is carried at cost as established at the date of the acquisition of the business (see 3.4 above) less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Group's cash-generating units (or groups of cash-generating units) that is expected to benefit from the synergies of the combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

The Group's policy for goodwill arising on the acquisition of an associate is described at 3.6 below.

Source	RDR Holdings (Australia) Pty Limited

3. Significant accounting policies (cont'd)

3.6 Investments in associates and joint ventures

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The results and assets and liabilities of associates or joint ventures are incorporated in these consolidated financial statements using the equity method of accounting, except when the investment, or a portion thereof, is classified as held for sale, in which case it is accounted for in accordance with AASB 5. Under the equity method, an investment in an associate or a joint venture is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the associate or joint venture. When the Group's share of losses of an associate or a joint venture exceeds the Group's interest in that associate or joint venture (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate or joint venture), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture.

An investment in an associate or a joint venture is accounted for using the equity method from the date on which the investee becomes an associate or a joint venture. On acquisition of the investment in an associate or a joint venture, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The requirements of AASB 139 are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group's investment in an associate or a joint venture. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with AASB 136 *Impairment of Assets* as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs to sell) with its carrying amount, Any impairment loss recognised forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with AASB 136 to the extent that the recoverable amount of the investment subsequently increases.

The Group discontinues the use of the equity method from the date when the investment ceases to be an associate or a joint venture, or when the investment is classified as held for sale. When the Group retains an interest in the former associate or joint venture and the retained interest is a financial asset, the Group measures the retained interest at fair value at that date and the fair value is regarded as its fair value on initial recognition in accordance with AASB 139. The difference between the carrying amount of the associate or joint venture at the date the equity method was discontinued, and the fair value of any retained interest and any proceeds from disposing of a part interest in the associate or joint venture is included in the determination of the gain or loss on disposal of the associate or joint venture. In addition, the Group accounts for all amounts previously recognised in other comprehensive income in relation to that associate or joint venture on the same basis as would be required if that associate or joint venture had directly disposed of the related assets or liabilities. Therefore, if a gain or loss previously recognised in other comprehensive income by that associate or joint venture would be reclassified to profit or loss on the disposal of the related assets or liabilities, the Group reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustment) when the equity method is discontinued.

The Group continues to use the equity method when an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate. There is no remeasurement to fair value upon such changes in ownership interests.

Source	RDR Holdings (Australia) Pty Limited

3. Significant accounting policies (cont'd)

When the Group reduces its ownership interest in an associate or a joint venture but the Group continues to use the equity method, the Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

When a group entity transacts with an associate or a joint venture of the Group, profits and losses resulting from the transactions with the associate or joint venture are recognised in the Group's consolidated financial statements only to the extent of interests in the associate or joint venture that are not related to the Group.

3.7 Interests in joint operations

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

When a group entity undertakes its activities under joint operations, the Group as a joint operator recognises in relation to its interest in a joint operation:

- its assets, including its share of any assets held jointly;
- its liabilities, including its share of any liabilities incurred jointly;
- its revenue from the sale of its share of the output arising from the joint operation;
- its share of the revenue from the sale of the output by the joint operation; and
- its expenses, including its share of any expenses incurred jointly.

The Group accounts for the assets, liabilities, revenues and expenses relating to its interest in a joint operation in accordance with the AASBs applicable to the particular assets, liabilities, revenues and expenses.

When a group entity transacts with a joint operation in which a group entity is a joint operator (such as a sale or contribution of assets), the Group is considered to be conducting the transaction with the other parties to the joint operation, and gains and losses resulting from the transactions are recognised in the Group's consolidated financial statements only to the extent of other parties' interests in the joint operation.

When a group entity transacts with a joint operation in which a group entity is a joint operator (such as a purchase of assets), the Group does not recognise its share of the gains and losses until it resells those assets to a third party.

3.8 Non-current assets held for sale

AASB5

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales for such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

When the Group is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the Group will retain a non-controlling interest in its former subsidiary after the sale.

Source	RDR Holdings (Australia) Pty Limited
	3. Significant accounting policies (cont'd)
	When the Group is committed to a sale plan involving disposal of an investment, or a portion of an investment, in an associate or joint venture, the investment or the portion of the investment that will be disposed of is classified as held for sale when the criteria described above are met, and the Group discontinues the use of the equity method in relation to the portion that is classified a held for sale. Any retained portion of an investment in an associate or a joint venture that has not been classified as held for sale continues to be accounted for using the equity method. The Group discontinues the use of the equity method at the time of disposal when the disposal results in the Group losing significant influence over the associate or joint venture.
	After the disposal takes place, the Group accounts for any retained interest in the associate or joint venture in accordance with AASB 139 unless the retained interest continues to be an associate or a joint venture, in which case the Group uses the equity method (see the accounting policy regarding investments in associates or joint ventures above).
	Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their previous carrying amount and fair value less costs to sell.
AASB118.35(a)	***3.9 Revenue recognition***
	Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances.
AASB118.35(a)	The revenue accounting policies that follow are generic and must be adapted to suit the specific circumstances of each entity. The entity should disclose the accounting policies adopted for each significant category of revenue recognised in the period including the methods adopted to determine the stage of completion of transactions involving the rendering of services.
	3.9.1 Sale of goods
	Revenue from the sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied: • the Group has transferred to the buyer the significant risks and rewards of ownership of the goods; • the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold; • the amount of revenue can be measured reliably; • it is probable that the economic benefits associated with the transaction will flow to the Group; and • the costs incurred or to be incurred in respect of the transaction can be measured reliably.
	Sales of goods that result in award credits for customers, under the Group's Maxi-Points Scheme, are accounted for as multiple element revenue transactions and the fair value of the consideration received or receivable is allocated between the goods supplied and the award credits granted. The consideration allocated to the award credits is measured by reference to their fair value – the amount for which the award credits could be sold separately. Such consideration is not recognised as revenue at the time of the initial sale transaction – but is deferred and recognised as revenue when the award credits are redeemed and the Group's obligations have been fulfilled.

Source	RDR Holdings (Australia) Pty Limited
	3. Significant accounting policies (cont'd)
AASB118.20	3.9.2 Rendering of services
AASB118.35(a)	The accounting policies must disclose the methods adopted to determine the stage of completion of transactions involving the rendering of services.
	Revenue from a contract to provide services is recognised by reference to the stage of completion of the contract. The stage of completion of the contract is determined as follows: • installation fees are recognised by reference to the stage of completion of the installation, determined as the proportion of the total time expected to install that has elapsed at the end of the reporting period; • servicing fees included in the price of products sold are recognised by reference to the proportion of the total cost of providing the servicing for the product sold; and • revenue from time and material contracts is recognised at the contractual rates as labour hours are delivered and direct expenses are incurred. The Group's policy for recognition of revenue from construction contracts is described at 3.10 below.
AASB118.30(c)	3.9.3 Royalties Royalty revenue is recognised on an accrual basis in accordance with the substance of the relevant agreement (provided that it is probable that the economic benefits will flow to the Group and the amount of revenue can be measured reliably). Royalties determined on a time basis are recognised on a straight-line basis over the period of the agreement. Royalty arrangements that are based on production, sales and other measures are recognised by reference to the underlying arrangement.
	3.9.4 Dividend and interest income
AASB118.30(c)	Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably).
AASB118.30(a)	Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Group and the amount of revenue can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.
	3.9.5 Rental income The Group's policy for recognition of revenue from operating leases is described in 3.11.1 below.
AASB111.39(b), (c)	***3.10 Construction contracts*** When the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the end of the reporting period, measured based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs, except where this would not be representative of the stage of completion. Variations in contract work, claims and incentive payments are included to the extent that the amount can be measured reliably and its receipt is considered probable. When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that it is probable will be recoverable. Contract costs are recognised as expenses in the period in which they are incurred.

Source	RDR Holdings (Australia) Pty Limited

3. Significant accounting policies (cont'd)

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

When contract costs incurred to date plus recognised profits less recognised losses exceed progress billings, the surplus is shown as amounts due from customers for contract work. For contracts where progress billings exceed contract costs incurred to date plus recognised profits less recognised losses, the surplus is shown as the amounts due to customers for contract work. Amounts received before the related work is performed are included in the consolidated statement of financial position, as a liability, as advances received. Amounts billed for work performed but not yet paid by the customer are included in the consolidated statement of financial position under trade and other receivables.

3.11 Leasing

AASB117

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

3.11.1 The Group as lessor

Amounts due from lessees under finance leases are recognised as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

3.11.2 The Group as lessee

Assets held under finance leases are initially recognised as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognised immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalised in accordance with the Group's general policy on borrowing costs (see 3.13 below). Contingent rentals are recognised as expenses in the periods in which they are incurred.

Operating lease payments are recognised as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

3.12 Foreign currencies

AASB121

The individual financial statements of each group entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each group entity are expressed in Australian dollars ('$'), which is the functional currency of the Company and the presentation currency for the consolidated financial statements.

Source	RDR Holdings (Australia) Pty Limited

3. Significant accounting policies (cont'd)

In preparing the financial statements of each individual group entity, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognised in profit or loss in the period in which they arise except for:

AASB123.6(e)
- exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;

AASB139.72
- exchange differences on transactions entered into in order to hedge certain foreign currency risks (see 3.25 below for hedging accounting policies); and

AASB121.15
- exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in the foreign operation), which are recognised initially in other comprehensive income and reclassified from equity to profit or loss on repayment of the monetary items.

For the purpose of presenting these consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into Australian dollars using exchange rates prevailing at the end of the reporting period. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuated significantly during that period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity (and attributed to non-controlling interests as appropriate).

On the disposal of a foreign operation (i.e. a disposal of the Group's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation, or a partial disposal of an interest in a joint arrangement or an associate that includes a foreign operation of which the retained interest becomes a financial asset), all of the exchange differences accumulated in equity in respect of that operation attributable to the owners of the Company are reclassified to profit or loss.

In addition, in relation to a partial disposal of a subsidiary that includes a foreign operation that does not result in the Group losing control over the subsidiary, the proportionate share of accumulated exchange differences are re-attributed to non-controlling interests and are not recognised in profit or loss. For all other partial disposals (i.e. partial disposals of associates or joint arrangements that do not result in the Group losing significant influence or joint control), the proportionate share of the accumulated exchange differences is reclassified to profit or loss.

Goodwill and fair value adjustments to identifiable assets acquired and liabilities assumed through acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the rate of exchange prevailing at the end of each reporting period. Exchange differences arising are recognised in other comprehensive income.

3.13 Borrowing costs

AASB123

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

Source	RDR Holdings (Australia) Pty Limited
	3. Significant accounting policies (cont'd)
AASB120.39(a)	***3.14 Government grants***
	Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.
	Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred revenue in the statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.
	Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in profit or loss in the period in which they become receivable.
	The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.
Int110	Government assistance which does not have conditions attached specifically relating to the operating activities of the entity is recognised in accordance with the accounting policies above.
	3.15 Employee benefits
AASB119. 120A (a)	3.15.1 Short-term and long-term employee benefits
	A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave, long service leave, and sick leave when it is probable that settlement will be required and they are capable of being measured reliably.
	Liabilities recognised in respect of short-term employee benefits, are measured at their nominal values using the remuneration rate expected to apply at the time of settlement.
	Liabilities recognised in respect of long term employee benefits are measured as the present value of the estimated future cash outflows to be made by the Group in respect of services provided by employees up to reporting date.
	3.15.2 Retirement benefits costs
	Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

Source	RDR Holdings (Australia) Pty Limited

3. Significant accounting policies (cont'd)

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected immediately in the statement of financial position with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss. Past service cost is recognised in profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are categorised as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- remeasurement.

The Group presents the first two components of defined benefit costs in profit or loss in the line item ['employee benefits expense'/others (please specify)]. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognised in the consolidated statement of financial position represents the actual deficit or surplus in the Group's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

3.15.3 Termination benefit

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs.

3.16 Share-based payments

3.16.1 Share-based payment transactions of the Company

AASB2.RDR46.1, RDR46.2, 11-12

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in note 41.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each reporting period, the Group revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled employee benefits reserve.

AASB2.10, 13

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the service.

For cash-settled share-based payments, a liability is recognised for the goods or services acquired, measured initially at the fair value of the liability. At the end of each reporting period until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in fair value recognised in profit or loss for the year.

Source	RDR Holdings (Australia) Pty Limited
	3. Significant accounting policies (cont'd)
	3.16.2 Share-based payment transactions of the acquiree in a business combination
	When the share-based payment awards held by the employees of an acquiree (acquiree awards) are replaced by the Group's share-based payment awards (replacement awards), both the acquiree awards and the replacement awards are measured in accordance with AASB 2 'Share-based Payment' ("market-based measure") at the acquisition date. The portion of the replacement awards that is included in measuring the consideration transferred in a business combination equals the market-based measure of the acquiree awards multiplied by the ratio of the portion of the vesting period completed to the greater of the total vesting period or the original vesting period of the acquiree award. The excess of the market-based measure of the replacement awards over the market-based measure of the acquiree awards included in measuring the consideration transferred is recognised as remuneration cost for post-combination service.
	However, when the acquiree awards expire as a consequence of a business combination and the Group replaces those awards when it does not have an obligation to do so, the replacement awards are measured at their market-based measure in accordance with AASB 2. All of the market-based measure of the replacement awards is recognised as remuneration cost for post-combination service.
	At the acquisition date, when the outstanding equity-settled share-based payment transactions held by the employees of an acquiree are not exchanged by the Group for its share-based payment transactions, the acquiree share-based payment transactions are measured at their market-based measure at the acquisition date. If the share-based payment transactions have vested by the acquisition date, they are included as part of the non-controlling interest in the acquiree. However, if the share-based payment transactions have not vested by the acquisition date, the market-based measure of the unvested share-based payment transactions is allocated to the non-controlling interest in the acquiree based on the ratio of the portion of the vesting period completed to the greater of the total vesting period or the original vesting period of the share-based payment transaction. The balance is recognised as remuneration cost for post-combination service.
	3.17 Taxation
	Income tax expense represents the sum of the tax currently payable and deferred tax.
	3.17.1 Current tax
AASB112.12, 46	The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the consolidated [statement of profit or loss and other comprehensive income/ statement of profit or loss] because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.
	3.17.2 Deferred tax
AASB112.15, 24	Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

Source	RDR Holdings (Australia) Pty Limited
	3. Significant accounting policies (cont'd)
AASB112.39, 44	Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.
AASB112.47, 51	Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.
AASB112.74	Deferred tax liabilities and assets are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.
AASB112.51B	For the purposes of measuring deferred tax liabilities and deferred tax assets for investment properties that are measured using the fair value model, the carrying amounts of such properties are presumed to be recovered entirely through sale, unless the presumption is rebutted. The presumption is rebutted when the investment property is depreciable and is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale. The directors of the Company reviewed the Group's investment property portfolios and concluded that none of the Group's investment properties are held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, the directors have determined that the 'sale' presumption set out in the amendments to AASB 12 is not rebutted. As a result, the Group has not recognised any deferred taxes on changes in fair value of the investment properties as the Group is not subject to any income taxes on the fair value changes of the investment properties on disposal.
	3.17.3 Current and deferred tax for the year
AASB112.58	Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case the current and deferred tax are also recognised in other comprehensive income or directly in equity, respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.
	Additional information on accounting policies shall be included where the entity has other material tax balances not covered by the above analysis, such as in relation to tax deductible share-based payment arrangements or where the company and its wholly-owned Australian resident subsidiaries have formed a tax consolidated group.
AASB116.73(a), (b)	***3.18 Property, plant and equipment*** Land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the consolidated statement of financial position at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are performed with sufficient regularity such that the carrying amounts do not differ materially from those that would be determined using fair values at the end of each reporting period.

Source	RDR Holdings (Australia) Pty Limited
	3. Significant accounting policies (cont'd)
	Any revaluation increase arising on the revaluation of such land and buildings is recognised in other comprehensive income and accumulated within equity, except to the extent that it reverses a revaluation decrease for the same asset previously recognised in profit or loss, in which case the increase is credited to profit or loss to the extent of the decrease previously expensed. A decrease in the carrying amount arising on the revaluation of such land and buildings is recognised in profit or loss to the extent that it exceeds the balance, if any, held in the properties revaluation reserve relating to a previous revaluation of that asset.
	Properties in the course of construction for production, supply or administrative purposes, or for purposes not yet determined, are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.
	Depreciation on revalued buildings is recognised in profit or loss. On the subsequent sale or retirement of a revalued property, the attributable revaluation surplus remaining in the properties revaluation reserve is transferred directly to retained earnings. No transfer is made from the revaluation reserve to retained earnings except when an asset is derecognised.
	Freehold land is not depreciated.
	Fixtures and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.
	Depreciation is recognised so as to write off the cost or valuation of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.
AASB116.51, 61	Depreciation rates and methods shall be reviewed at least annually and, where changed, shall be accounted for as a change in accounting estimate as illustrated in note 4.2.3. Where depreciation rates or methods are changed, the net written down value of the asset is depreciated from the date of the change in accordance with the new depreciation rate or method. Depreciation recognised in prior financial years shall not be changed, that is, the change in depreciation rate or method shall be accounted for on a 'prospective' basis.
	Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets. However, when there is no reasonable certainty that ownership will be obtained by the end of the lease term, assets are depreciated over the shorter of the lease term and their useful lives
	An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.
AASB140.75(a)	***3.19 Investment property***
	Investment properties are properties held to earn rentals and/or for capital appreciation (including property under construction for such purposes). Investment properties are measured initially at its cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at fair value. Gains and losses arising from changes in the fair value of investment properties are included in profit or loss in the period in which they arise.
	An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is derecognised.

	3. Significant accounting policies (cont'd)
	3.20 Intangible assets
	3.20.1 Intangible assets acquired separately
AASB138.118(b)	Intangible assets with finite lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.
	3.20.2 Internally-generated intangible assets - research and development expenditure
	Expenditure on research activities is recognised as an expense in the period in which it is incurred.
	An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated: • the technical feasibility of completing the intangible asset so that it will be available for use or sale; • the intention to complete the intangible asset and use or sell it; • the ability to use or sell the intangible asset; • how the intangible asset will generate probable future economic benefits; • the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and • the ability to measure reliably the expenditure attributable to the intangible asset during its development.
	The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.
AASB138.118(b)	Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.
	Where entities have intangible assets that have been assessed as having an indefinite useful life, an appropriate accounting policy shall be disclosed, for example: Brand names Brand names recognised by the company have an indefinite useful life and are not amortised. Each period, the useful life of this asset is reviewed to determine whether events and circumstances continue to support an indefinite useful life assessment for the asset. Such assets are tested for impairment in accordance with the policy stated in note 3.21.
	3.20.3 Intangible assets acquired in a business combination
	Intangible assets acquired in a business combination and recognised separately from goodwill are initially recognised at their fair value at the acquisition date (which is regarded as their cost).
AASB138.118(b)	Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.
	3.20.4 Derecognition of intangible assets
	An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset are recognised in profit or loss when the asset is derecognised.

Source	RDR Holdings (Australia) Pty Limited

3. Significant accounting policies (cont'd)

3.21 Impairment of tangible and intangible assets other than goodwill

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease (see 3.18 above).

When an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase (see 3.18 above).

AASB102.36(a)

3.22 Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are determined on a first-in-first-out basis. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

3.23 Provisions

AASB137

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Source	RDR Holdings (Australia) Pty Limited
	3. Significant accounting policies (cont'd)
	3.23.1 Onerous contracts
	Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Group has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.
	3.23.2 Restructurings
	A restructuring provision is recognised when the Group has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the entity.
	3.23.3 Warranties
	Provisions for the expected cost of warranty obligations under local sale of goods legislation are recognised at the date of sale of the relevant products, at the directors' best estimate of the expenditure required to settle the Group's obligation.
	3.23.4 Contingent liabilities acquired in a business combination
	Contingent liabilities acquired in a business combination are initially measured at fair value at the date of acquisition. At the end of subsequent reporting periods, such contingent liabilities are measured at the higher of the amount that would be recognised in accordance with AASB 137 'Provisions, Contingent Liabilities and Contingent Assets' and the amount initially recognised less cumulative amortisation recognised in accordance with AASB 118 'Revenue'.
AASB7.21	***3.24 Financial instruments***
	Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument.
	Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.
	3.24.1 Financial assets
AASB139.9	Financial assets are classified into the following specified categories: financial assets 'at fair value through profit or loss' (FVTPL), 'held-to-maturity' investments, 'available-for-sale' (AFS) financial assets and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

Source	RDR Holdings (Australia) Pty Limited

3. Significant accounting policies (cont'd)

3.24.1.1 Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees on points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

AASB7.B5(e)

Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL.

3.24.1.2 Financial assets at FVTPL

Financial assets are classified as at FVTPL when the financial asset is either held for trading or it is designated as at FVTPL.

A financial asset is classified as held for trading if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

A financial asset other than a financial asset held for trading may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial asset forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and AASB 139 'Financial Instruments: Recognition and Measurement' permits the entire combined contract to be designated as at FVTPL.

AASB7.B5(e)

Financial assets at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the 'other gains and losses' line item. Fair value is determined in the manner described in note 40.

3.24.1.3 Held-to-maturity investments

Bills of exchange and debentures with fixed or determinable payments and fixed maturity dates that the Group has the positive intent and ability to hold to maturity are classified as held-to-maturity investments. Held-to-maturity investments are measured at amortised cost using the effective interest method less any impairment.

3.24.1.4 AFS financial assets

Listed shares and listed redeemable notes held by the Group that are traded in an active market are classified as AFS and are stated at fair value. The Group also has investments in unlisted shares that are not traded in an active market but that are also classified as AFS financial assets and stated at fair value (because the directors consider that fair value can be reliably measured). Fair value is determined in the manner described in note 40. Gains and losses arising from changes in fair value are recognised in other comprehensive income and accumulated in the investments revaluation reserve, with the exception of impairment losses, interest calculated using the effective interest method, and foreign exchange gains and losses on monetary assets, which are recognised in profit or loss. Where the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss.

Source	RDR Holdings (Australia) Pty Limited
	3. Significant accounting policies (cont'd)
AASB132.35	Dividends on AFS equity instruments are recognised in profit or loss when the Group's right to receive the dividends is established. The fair value of AFS monetary assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. The foreign exchange gains and losses that are recognised in profit or loss are determined based on the amortised cost of the monetary asset. Other foreign exchange gains and losses are recognised in other comprehensive income. 3.24.1.5 Loans and receivables Trade receivables, loans, and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables'. Loans and receivables are measured at amortised cost using the effective interest method, less any impairment. Interest income is recognised by applying the effective interest rate, except for short-term receivables when the effect of discounting is immaterial. 3.24.1.6 Impairment of financial assets Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.
AASB139.61	For AFS equity instruments, including listed or unlisted shares, objective evidence of impairment includes information about significant changes with an adverse effect that have taken place in the technological, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment in the equity instrument may not be recovered. A significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment for unlisted shares classified as available-for-sale.
AASB139.58, 59	For all other financial assets, including redeemable notes classified as available-for-sale and finance lease receivables, objective evidence of impairment could include: • significant financial difficulty of the issuer or counterparty; or • breach of contract, such as a default or delinquency in interest or principal payments; or • it becoming probable that the borrower will enter bankruptcy or financial re-organisation; or • the disappearance of an active market for that financial asset because of financial difficulties. For certain categories of financial assets, such as trade receivables, assets that are assessed for impairment on a collective basis even if they were assessed not to be impaired individually. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period of 60 days, as well as observable changes in national or local economic conditions that correlate with default on receivables. For financial assets carried at amortised cost, the amount of the impairment loss recognised is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate. For financial assets that are carried at cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss will not be reversed in subsequent periods.

Source	RDR Holdings (Australia) Pty Limited

3. Significant accounting policies (cont'd)

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss.

When an AFS financial asset is considered to be impaired, cumulative gains or losses previously recognised in other comprehensive income are reclassified to profit or loss in the period.

For financial assets measured at amortised cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

In respect of AFS equity securities, impairment losses previously recognised in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognised in other comprehensive income and accumulated under the heading of investments revaluation reserve. In respect of AFS debt securities, impairment losses are subsequently reversed through profit or loss if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss.

3.24.1.7 Derecognition of financial assets

The Group derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss.

On derecognition of a financial asset other than in its entirety (e.g. when the Group retains an option to repurchase part of a transferred asset), the Group allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

AASB7.21

3.24.2 Financial liabilities and equity instruments

3.24.2.1 Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

Source	RDR Holdings (Australia) Pty Limited
	3. Significant accounting policies (cont'd)
	3.24.2.2 Equity instruments
	An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a group entity are recognised at the proceeds received, net of direct issue costs.
	Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.
	3.24.2.3 Compound instruments
AASB7.RDR27.1	The component parts of compound instruments (convertible bonds) issued by the Group are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. Conversion options that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument.
	At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments. This amount is recognised as a liability on an amortised cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date.
	The conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to [share premium/other equity [describe]]. Where the conversion option remains unexercised at the maturity date of the convertible note, the balance recognised in equity will be transferred to [retained profits/other equity [describe]]. No gain or loss is recognised in profit or loss upon conversion or expiration of the conversion option.
	Transaction costs that relate to the issue of the convertible notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortised over the lives of the convertible notes using the effective interest method.
	3.24.2.4 Financial guarantee contract liabilities
	A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.
	Financial guarantee contract issued by a group entity are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of: • the amount of the obligation under the contract, as determined in accordance with AASB 137 'Provisions, Contingent Liabilities and Contingent Assets'; and • the amount initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the revenue recognition policies set out at 3.9.4 above.
	3.24.2.5 Financial liabilities
	Financial liabilities are classified as either financial liabilities 'at FVTPL' or 'other financial liabilities'.

Source	RDR Holdings (Australia) Pty Limited

3. Significant accounting policies (cont'd)

3.24.2.6 Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when the financial liability is either held for trading or it is designated as at FVTPL.

A financial liability is classified as held for trading if:
- it has been incurred principally for the purpose of repurchasing it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition if:
- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and AASB 139 'Financial Instruments: Recognition and Measurement' permits the entire combined contract to be designated as at FVTPL.

AASB7.B5(e)

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'other gains and losses' line item. Fair value is determined in the manner described in note 40.

3.24.2.7 Other financial liabilities

Other financial liabilities, including borrowings and trade and other payables, are initially measured at fair value, net of transaction costs.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

3.24.2.8 Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

AASB7.21

3.25 Derivative financial instruments

The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risk, including foreign exchange forward contracts, interest rate swaps and cross currency swaps. Further details of derivative financial instruments are disclosed in note 40.

Derivatives are initially recognised at fair value at the date the derivative contract is entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

Source	RDR Holdings (Australia) Pty Limited

3. Significant accounting policies (cont'd)

3.25.1 Embedded derivatives

Derivatives embedded in non-derivative host contracts are treated as separate derivatives when they meet the definition of a derivative, their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL.

3.25.2 Hedge accounting

The Group designates certain hedging instruments, which include derivatives, embedded derivatives and non-derivatives in respect of foreign currency risk, as either fair value hedges, cash flow hedges, or hedges of net investments in foreign operations. Hedges of foreign exchange risk on firm commitments are accounted for as cash flow hedges.

At the inception of the hedge relationship, the entity documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk.

Note 40 sets out details of the fair values of the derivative instruments used for hedging purposes.

3.25.3 Fair value hedges

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recognised in profit or loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The change in the fair value of the hedging instrument and the change in the hedged item attributable to the hedged risk are recognised in profit or loss in the line item relating to the hedged item.

Hedge accounting is discontinued when the Group revokes the hedging relationship, when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. The fair value adjustment to the carrying amount of the hedged item arising from the hedged risk is amortised to profit or loss from that date.

3.25.4 Cash flow hedges

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income and accumulated under the heading of cash flow hedging reserve. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, and is included in the 'other gains and losses' line item.

Amounts previously recognised in other comprehensive income and accumulated in equity are reclassified to profit or loss in the periods when the hedged item affects profit or loss, in the same line as the recognised hedged item. However, when the hedged forecast transaction that is hedged results in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously recognised in other comprehensive income and accumulated in equity are transferred from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability.

Hedge accounting is discontinued when the Group revokes the hedging relationship, when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. Any gain or loss recognised in other comprehensive income and accumulated in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in profit or loss. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognised immediately in profit or loss.

Source	RDR Holdings (Australia) Pty Limited

3. Significant accounting policies (cont'd)

3.25.5 Hedges of net investments in foreign operations

Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. Any gain or loss on the hedging instrument relating to the effective portion of the hedge is recognised in other comprehensive income and accumulated under the heading of foreign currency translation reserve. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, and is included in the 'other gains and losses' line item.

Gains and losses on the hedging instrument relating to the effective portion of the hedge accumulated in the foreign currency translation reserve are reclassified to profit or loss on the disposal of the foreign operation.

3.26 Goods and services tax

Int1031

Revenues, expenses and assets are recognised net of the amount of goods and services tax (GST), except:

i. where the amount of GST incurred is not recoverable from the taxation authority, it is recognised as part of the cost of acquisition of an asset or as part of an item of expense; or
ii. for receivables and payables which are recognised inclusive of GST.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables.
Cash flows are included in the cash flow statement on a gross basis. The GST component of cash flows arising from investing and financing activities which is recoverable from, or payable to, the taxation authority is classified within operating cash flows.

3.27 Comparative amounts

AASB101.41

When an entity changes the presentation or classification of items in its financial statements comparative amounts shall be reclassified unless the reclassification is impracticable.
When comparative amounts are reclassified, an entity shall disclose:
(a) the nature of the reclassification;
(b) the amount of each item or class of items that is reclassified; and
(c) the reason for the reclassification.

AASB101.42(a)

When it is impracticable to reclassify comparative amounts, an entity shall disclose the reason for not reclassifying the amounts.

Example accounting policies for mining entities
The following example accounting policies may be relevant for entities operating in the resources industry. Entities will need to edit and adapt the accounting policies below to reflect their entity's policies and circumstances:

(xx) Provision for restoration and rehabilitation
A provision for restoration and rehabilitation is recognised when there is a present obligation as a result of *[exploration, development, production, transportation or storage]* activities undertaken, it is probable that an outflow of economic benefits will be required to settle the obligation, and the amount of the provision can be measured reliably. The estimated future obligations include the costs of *[removing facilities, abandoning sites/wells and restoring the affected areas]*.
The provision for future restoration costs is the best estimate of the present value of the expenditure required to settle the restoration obligation at the reporting date, *[based on current legal and other requirements and technology].* Future restoration costs are reviewed annually and any changes in the estimate are reflected in the present value of the restoration provision at each reporting date.

Source	RDR Holdings (Australia) Pty Limited

3. Significant accounting policies (cont'd)

The initial estimate of the restoration and rehabilitation provision relating to *[exploration, development and milling/production facilities]* is capitalised into the cost of the related asset and *[depreciated/amortised]* on the same basis as the related asset, unless the present obligation arises from the production of inventory in the period, in which case the amount is included in the cost of production for the period. Changes in the estimate of the provision for restoration and rehabilitation are treated in the same manner, except that the unwinding of the effect of discounting on the provision is recognised as a finance cost rather than being capitalised into the cost of the related asset.

(xx) Exploration and evaluation

The following example accounting policy assumes that an entity has adopted an 'area of interest' approach towards the capitalisation of exploration and evaluation, as is suggested by paragraph Aus7.2 of AASB 6 'Exploration for and Evaluation of Mineral Resources'. Where other approaches are adopted, the following wording will need to be edited as appropriate:

Exploration and evaluation expenditures in relation to each separate area of interest are recognised as an exploration and evaluation asset in the year in which they are incurred where the following conditions are satisfied:

(i) the rights to tenure of the area of interest are current; and

(ii) at least one of the following conditions is also met:

(a) the exploration and evaluation expenditures are expected to be recouped through successful development and exploration of the area of interest, or alternatively, by its sale; or

(b) exploration and evaluation activities in the area of interest have not, at the reporting date, reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable reserves, and active and significant operations in, or in relation to, the area of interest are continuing.

Exploration and evaluation assets are initially measured at cost and include acquisition of rights to explore, studies, exploratory drilling, trenching and sampling and associated activities and an allocation of depreciation and amortisation of assets used in exploration and evaluation activities. General and administrative costs are only included in the measurement of exploration and evaluation costs where they are related directly to operational activities in a particular area of interest.

Exploration and evaluation assets are assessed for impairment when facts and circumstances suggest that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount. The recoverable amount of the exploration and evaluation asset (or the cash-generating unit(s) to which it has been allocated, being no larger than the relevant area of interest) is estimated to determine the extent of the impairment loss (if any). Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in previous years.

Where a decision is made to proceed with development in respect of a particular area of interest, the relevant exploration and evaluation asset is tested for impairment and the balance is then reclassified to *[development]*.

(xx) Development

Development expenditure is recognised at cost less accumulated *[amortisation/depletion]* and any impairment losses. Where commercial production in an area of interest has commenced, the associated costs *[together with any forecast future capital expenditure necessary to develop proved and probable reserves]* are amortised over the estimated economic life of the *[mine/field]* on a units-of-production basis.

Changes in factors such as estimates of proved and probable reserves that affect unit-of-production calculations are dealt with on a prospective basis.

4. Critical accounting judgments and key sources of estimation uncertainty

The following are examples of the types of disclosures that might be required in this area. The matters disclosed will be dictated by the circumstances of the individual entity, and by the significance of judgements and estimates made to the performance and financial position of the entity.

Instead of disclosing this information in a separate note, it may be more appropriate to include such disclosures in the relevant asset and liability notes, or as part of the relevant accounting policy disclosures.

AASB 12.7 requires entities to disclose information about significant judgements and assumptions they have made in determining (i) whether they have control of another entity, (ii) whether they have joint control of an arrangement or significant influence over another entity, and (iii) the type of joint arrangement when the arrangement has been structured through a separate vehicle.

In the application of the Group's accounting policies, which are described in note 3, the directors of the Company are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

AASB101.122

4.1 Critical judgements in applying accounting policies

The following are the critical judgements, apart from those involving estimations (see 4.2 below), that the directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the consolidated financial statements.

4.1.1 Revenue recognition

Note 12.5 describes the expenditure required in the year for rectification work carried out on goods supplied to one of the Group's major customers. These goods were delivered to the customer in the months of June 2013 to January 2014, and shortly thereafter the defects were identified by the customer. Following negotiations, a schedule of works was agreed, which will involve expenditure by the Group until 2015. In the light of the problems identified, the directors were required to consider whether it was appropriate to recognise the revenue from these transactions of $19 million in the current year, in line with the Group's general policy of recognising revenue when goods are delivered, or whether it was more appropriate to defer recognition until the rectification work was complete.

In making their judgement, the directors considered the detailed criteria for the recognition of revenue from the sale of goods set out in AASB 118 'Revenue' and, in particular, whether the Group had transferred to the buyer the significant risks and rewards of ownership of the goods. Following the detailed quantification of the Group's liability in respect of rectification work, and the agreed limitation on the customer's ability to require further work or to require replacement of the goods, the directors are satisfied that the significant risks and rewards have been transferred and that recognition of the revenue in the current year is appropriate, in conjunction with the recognition of an appropriate provision for the rectification costs.

4.1.2 Held-to-maturity financial assets

The directors have reviewed the Group's held-to-maturity financial assets in the light of its capital maintenance and liquidity requirements and have confirmed the Group's positive intention and ability to hold those assets to maturity. The carrying amount of the held-to-maturity financial assets is $5.905 million (30 June 2013: $4.015 million). Details of these assets are set out in note 15.

Source	RDR Holdings (Australia) Pty Limited
	4. Critical accounting judgments and key sources of estimation uncertainty (cont'd)
	4.1.3 Deferred taxation on investment properties
	For the purposes of measuring deferred tax liabilities or deferred tax assets arising from investment properties that are measured using the fair value model, the directors have reviewed the Group's investment property portfolios and concluded that the Group's investment properties are not held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, in determining the Group's deferred taxation on investment properties, the directors have determined that the presumption that the carrying amounts of investment properties measured using the fair value model are recovered entirely through sale is not rebutted. As a result, the Group has not recognised any deferred taxes on changes in fair value of investment properties as the Group is not subject to any income taxes on the fair value changes of the investment properties on disposal.
AASB 12.7(a) AASB 12.9(b)	4.1.4 Control over C Plus Limited
	Note 17 describes that C Plus Limited is a subsidiary of the Group even though the Group has only a 45% ownership interest and has only 45% of the voting rights in C Plus Limited. C Plus Limited is listed on the stock exchange of Australia. The Group has held its 45% ownership since June 2010 and the remaining 55% of the ownership interests are held by thousands of shareholders that are unrelated to the Group.
	The directors of the Company assessed whether or not the Group has control over C Plus Limited based on whether the Group has the practical ability to direct the relevant activities of C Plus Limited unilaterally. In making their judgement, the directors considered the Group's absolute size of holding in C Plus Limited and the relative size of and dispersion of the shareholdings owned by the other shareholders. After assessment, the directors concluded that the Group has a sufficiently dominant voting interest to direct the relevant activities of C Plus Limited and therefore the Group has control over C Plus Limited.
AASB 12.7(a) AASB 12.9(b)	4.1.5 Control over Subtwo Limited
	Note 17 describes that Subtwo Limited is a subsidiary of the Group although the Group only owns a 45% ownership interest in Subtwo Limited. Based on the contractual arrangements between the Group and other investors, the Group has the power to appoint and remove the majority of the board of directors of Subtwo Limited that has the power to direct the relevant activities of Subtwo Limited. Therefore, the directors of the Company concluded that the Group has the practical ability to direct the relevant activities of Subtwo Limited unilaterally and hence the Group has control over Subtwo Limited.
AASB 12.7(b), (c)	4.1.6 Classification of JV Electronics Limited as a joint venture
	JV Electronics Limited is a limited liability company whose legal form confers separation between the parties to the joint arrangement and the company itself. Furthermore, there is no contractual arrangement or any other facts and circumstances that indicate that the parties to the joint arrangement have rights to the assets and obligations for the liabilities of the joint arrangement. Accordingly, JV Electronics Limited is classified as a joint venture of the Group. See note 18A for details.
	4.1.7 Discount rate used to determine the carrying amount of the Group's defined benefit obligation
	The Group's defined benefit obligation is discounted at a rate set by reference to market yields at the end of the reporting period on high quality corporate bonds. Significant judgement is required when setting the criteria for bonds to be included in the population from which the yield curve is derived. The most significant criteria considered for the selection of bonds include the issue size of the corporate bonds, qualify of the bonds and the identification of outliers which are excluded.

Source	RDR Holdings (Australia) Pty Limited

4. Critical accounting judgments and key sources of estimation uncertainty (cont'd)

4.1.8 Discount rate used to determine the carrying amount of the Group's defined benefit obligation

The Group's defined benefit obligation is discounted at a rate set by reference to market yields at the end of the reporting period on high quality corporate bonds. Significant judgement is required when setting the criteria for bonds to be included in the population from which the yield curve is derived. The most significant criteria considered for the selection of bonds include the issue size of the corporate bonds, qualify of the bonds and the identification of outliers which are excluded.

AASB101.125, 129

4.2 Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

4.2.1 Recoverability of internally generated intangible asset

During the year, the directors reconsidered the recoverability of the Group's internally generated intangible asset arising from its e-business development, which is included in the consolidated statement of financial position at 30 June 2014 with a carrying amount of $0.5 million (30 June 2013: $0.5 million).

The project continues to progress in a very satisfactory manner, and customer reaction has reconfirmed the directors' previous estimates of anticipated revenues from the project. However, increased competitor activity has caused the directors to reconsider their assumptions and anticipated margins on these products. Detailed sensitivity analysis has been carried out and the directors are confident that the carrying amount of the asset will be recovered in full, even if returns are reduced. This situation will be closely monitored, and adjustments made in future periods if future market activity indicates that such adjustments are appropriate.

4.2.2 Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value. Where the actual future cash flows are less than expected, a material impairment loss may arise.

The carrying amount of goodwill at 30 June 2014 was $20.3 million (30 June 2013: $24.1 million) after an impairment loss of $235,000 was recognised during 2014 (2013: nil). Refer to note 22.

4.2.3 Useful lives of property, plant and equipment

As described at 3.18 above, the Group reviews the estimated useful lives of property, plant and equipment at the end of each reporting period. During the current year, the directors determined that the useful lives of certain items of equipment should be shortened, due to developments in technology.

The financial effect of this reassessment, assuming the assets are held until the end of their estimated useful lives, is to increase the consolidated depreciation expense in the current financial year and for the next 3 years, by the following amounts:

	$'000
2014	879
2015	607
2016	144
2017	102

Source	RDR Holdings (Australia) Pty Limited

4. Critical accounting judgments and key sources of estimation uncertainty (cont'd)

4.2.4 Fair value measurements and valuation processes

Some of the Group's assets and liabilities are measured at fair value for financial reporting purposes. The board of directors of the Company has set up a valuation committee, which is headed up by the Chief Financial Officer of the Company, to determine the appropriate valuation techniques and inputs for fair value measurements.

AASB 13.93(g), AASB 13.IE65

In estimating the fair value of an asset or a liability, the Group uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Group engages third party qualified valuers to perform the valuation. The valuation committee works closely with the qualified external valuers to establish the appropriate valuation techniques and inputs to the model. The Chief Financial Officer reports the valuation committee's findings to the board of directors of the Company every quarter to explain the cause of fluctuations in the fair value of the assets and liabilities.

Information about the valuation techniques and inputs used in determining the fair value of various assets and liabilities are disclosed in notes 15, 16 and 40.

AASB108.36 The effect of a change in an accounting estimate, shall be recognised prospectively by including it in profit or loss in:

(a) the period of the change, if the change affects that period only; or

(b) the period of the change and future periods, if the change affects both.

AASB108.37 To the extent that a change in an accounting estimate gives rise to changes in assets and liabilities, or relates to an item of equity, it shall be recognised by adjusting the carrying amount of the related asset, liability or equity item in the period of the change.

AASB108.39 An entity shall disclose the nature and amount of a change in an accounting estimate that has an effect in the current period or is expected to have an effect in future periods, except for the disclosure of the effect on future periods when it is impracticable to estimate that effect.

AASB116.76 For property, plant and equipment, such disclosure may arise from changes in estimates with respect to:

(a) residual values;

(b) the estimated costs of dismantling, removing or restoring items of property, plant and equipment;

(c) useful lives; and

(d) depreciation methods.

5. Revenue

AASB118.35(b) The following is an analysis of the Group's revenue for the year from continuing operations (excluding investment income – see note 6).

		Year ended 30/06/14 $'000	Year ended 30/06/13 $'000 (restated)
AASB118.35(b)	Revenue from the sale of goods	119,232	128,852
AASB118.35(b)	Revenue from the rendering of services	16,388	18,215
AASB111.39(a)	Construction contract revenue	5,298	4,773
		140,918	151,840

AASB118.35(c) **Exchange of goods or services**
The amount of revenue arising from exchanges of goods or services included in each significant category of revenue shall be separately disclosed.

AASB140.76(d)	Change in fair value of investment property	30	297
AASB7.24(b)	Hedge ineffectiveness on cash flow hedges	89	68
AASB7.24(c)	Hedge ineffectiveness on net investment hedges	-	-
		647	1,005

(i) This amount includes the net loss on financial liabilities designated as at FVTPL and the net loss on financial liabilities classified as held for trading. The net loss on financial liabilities designated as at FVTPL includes a gain of $125,000 resulting from the decrease in fair value of the liabilities, offset by dividends of $613,000 paid during the year. The net loss on financial liabilities classified as held for trading relates to the loss arising on an interest rate swap that economically hedges the fair value of the redeemable cumulative preference shares, but for which hedge accounting is not applied (see note 29). The net loss on the interest rate swap comprises an increase in fair value of $51,000 of the swap, including interest of $3,000 paid during the year.

(ii) The amount represents a net gain on non-derivative held for trading financial assets (see note 15) and comprises an increase in fair value of $202,000 (2013: $99,000), including interest of $46,000 received during the year (2013: $27,000).

No other gains or losses have been recognised in respect of loans and receivables or held-to-maturity investments, other than as disclosed in notes 6 and 8 and impairment losses recognised/reversed in respect of trade receivables (see notes 13 and 15).

Source	RDR Holdings (Australia) Pty Limited

8. Finance costs

Preparers of financial reports should apply judgment in deciding whether hedging gains and losses form part of finance costs or part of other expenses. In so doing, they should consider among other factors, their accounting policies, the nature of the instrument and their objectives in entering into the hedging instrument.

		Year ended 30/06/14 $'000	Year ended 30/06/13 $'000 (restated)
	Continuing operations		
	Interest on bank overdrafts and loans	4,259	6,052

	Other finance costs	-	-
		4,418	6,023

Finance costs relating to financial liabilities classified as at fair value through profit or loss are included in 'other gains and losses' in note 7.

Finance costs

AASB123.4, 5

Borrowing costs are interest and other costs incurred by an entity in connection with the borrowing of funds and may include:

(a) interest on bank overdrafts and short-term and long-term borrowings;
(b) amortisation of discounts or premiums relating to borrowings;
(c) amortisation of ancillary costs incurred in connection with the arrangement of borrowings;
(d) finance charges in respect of finance leases recognised in accordance with AASB 117 'Leases'; and
(e) exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs.

In addition to borrowing costs, other costs which may form part of finance costs include costs arising from the unwinding of the discount on liabilities and provisions.

Source	RDR Holdings (Australia) Pty Limited

8. Finance costs (cont'd)

AASB123.17, 21

Capitalised borrowing costs
To the extent that funds are borrowed generally and used for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalisation shall be determined by applying a capitalisation rate to the expenditures on that asset. The average carrying amount of the asset during a period, including borrowing costs previously capitalised, is normally a reasonable approximation of the expenditures to which the capitalisation rate is applied in that period.

9. Income taxes relating to continuing operations

9.1 Income tax recognised in profit or loss

	Year ended 30/06/14 $'000	Year ended 30/06/13 $'000 (restated)
AASB112.79 ***Current tax***		
In respect of the current year	10,071	11,347
In respect of prior years	-	-
Others [describe]	-	-
	10,071	11,347
Deferred tax		
In respect of the current year	1,643	538
Deferred tax reclassified from equity to profit or loss	(150)	(86)
Adjustments to deferred tax attributable to changes in tax rates and laws	-	-
Write-downs (reversals of previous write-downs) of deferred tax assets	-	-
Others [describe]	-	-
	1,493	452
Total income tax expense recognised in the current year relating to continuing operations	11,564	11,799

AASB112.81

The two possible methods of explaining the relationship between tax expense/(income) and accounting profit are:

- a numerical reconciliation between tax expense/(income) and the product of accounting profit multiplied by the applicable tax rate (this option is illustrated below); and
- a numerical reconciliation between the average effective tax rate and applicable tax rate, disclosing also the basis on which the applicable tax rate is computed.

Source	RDR Holdings (Australia) Pty Limited

9. Income taxes relating to continuing operations (cont'd)

AASB112.81(c) The income tax expense for the year can be reconciled to the accounting profit as follows:

	Year ended 30/06/14 $'000	Year ended 30/06/13 $'000 (restated)
Profit before tax from continuing operations	29,739	31,997
Income tax expense calculated at 30% (2013: 30%)	8,922	9,599
Effect of income that is exempt from taxation	(30)	-
Effect of expenses that are not deductible in determining taxable profit	2,731	2,261
Effect of concessions (research and development and other allowances)	(75)	(66)
Impairment losses on goodwill that are not deductible	5	-
Effect of unused tax losses and tax offsets not recognised as deferred tax assets	-	-
Effect of previously unrecognised and unused tax losses and deductible temporary differences now recognised as deferred tax assets	-	-
Effect of different tax rates of subsidiaries operating in other jurisdictions	11	5
AASB112.81(d) Effect on deferred tax balances due to the change in income tax rate from xx% to xx% (effective [insert date])	-	-
Other [describe]	-	-
	11,564	11,799
Adjustments recognised in the current year in relation to the current tax of prior years	-	-
Income tax expense recognised in profit or loss (relating to continuing operations)	11,564	11,799

AASB112.81(c) The tax rate used for the 2014 and 2013 reconciliations above is the corporate tax rate of 30% payable by Australian corporate entities on taxable profits under Australian tax law.

Where the entity is subject to a number of different tax rates in the different jurisdictions in which it operates, the above disclosures may need to be expanded to highlight the various rates applicable to the entity, particularly where the effect on aggregate income tax expense is material.

AASB112.81(d) Where there is a change in the applicable tax rate(s) compared to the previous reporting period, an explanation must be given. The following example can be adapted as necessary:
'The corporate tax rate in Country Z was changed from [x]% to [y]% with effect from [date]. This revised rate has not impacted the current tax liability for the current year but will do so in future periods. However, the impact of the change in tax rate has been taken into account in the measurement of deferred taxes at the end of the reporting period. The effect of this change in tax rate on deferred taxes has been disclosed in the reconciliation of deferred taxes below.'

	Year ended 30/06/14 $'000	Year ended 30/06/13 $'000 (restated)
Current tax	-	-
Deferred tax	(177)	(648)
Total income tax recognised in other comprehensive income	(177)	(648)

Deferred tax balances

The following illustrative deferred tax balances disclosure is considered 'best practice'. The only requirements for a breakdown by type of temporary difference, i.e. the first column, are the opening and closing balances, and the amount charged to income (being the aggregate of the second and fifth columns). The other columns could be amalgamated or excluded so long as the other disclosures required by AASB 112 are made elsewhere in the financial statements in aggregate. Best practice would have all the deferred tax assets and deferred tax liabilities disclosed separately, albeit in the same note.

9.4 Deferred tax balances

Deferred tax balances are presented in the statement of financial position as follows:

	30/06/14 $'000	30/06/13 $'000 (restated)
Deferred tax assets	-	-
Deferred tax liabilities	4,646	3,693
Directly associated with assets held for sale	430	-
	5,076	3,693

	- tax losses (capital in nature)	-	-
	- unused tax credits (expire [date])	11	11
	- deductible temporary differences [describe]	-	-
		11	11

The unrecognised tax credits will expire in [date].

10. Discontinued operations

10.1 Disposal of toy manufacturing operations

AASB5.30, 41(a) – (c)

On 28 March 2014, the Company entered into a sale agreement to dispose of Subzero Limited, which carried out all of the Group's toy manufacturing operations. The proceeds of sale substantially exceeded the carrying amount of the related net assets and, accordingly, no impairment losses were recognised on the reclassification of these operations as held for sale. The disposal of the toy manufacturing operations is consistent with the Group's long-term policy to focus its activities in the electronic equipment and other leisure goods markets. The disposal was completed on 30 May 2014, on which date control of the toy manufacturing operations passed to the acquirer.

10.2 Plan to dispose of the bicycle business

AASB5.30, 41(a) – (c)

On 30 May 2014, the board of directors announced a plan to dispose of the Group's bicycle business. The disposal is consistent with the Group's long-term policy to focus its activities in the electronic equipment and other leisure goods markets. The Group is actively seeking a buyer for its bicycle business and expects to complete the sale by 31 January 2015. The Group has not recognised any impairment losses in respect of the bicycle business, neither when the assets and liabilities of the operation were reclassified as held for sale nor at the end of the reporting period (see note11).

Source	RDR Holdings (Australia) Pty Limited

10. Discontinued operations (cont'd)

10.3 Analysis of profit for the year from discontinued operations

The combined results of the discontinued operations (i.e. toy and bicycle businesses) included in the consolidated profit for the year are set out below. The comparative profit and cash flows from discontinued operations have been re-presented to include those operations classified as discontinued in the current year.

		Year ended 30/06/14	Year ended 30/06/13
		$'000	$'000
	Profit for the year from discontinued operations		
	Profit before tax	9,530	12,993
AASB112.81(h)	Attributable income tax expense	(2,524)	(2,998)
		7,006	9,995
	Gain/(loss) on discontinuance	1,940	-
AASB112.81(h)	Attributable income tax expense	(636)	-
		1,304	-
	Profit for the year from discontinued operations (attributable to owners of the Company)	8,310	9,995
AASB5.33(c)	***Cash flows from discontinued operations***		
	Net cash inflows from operating activities	6,381	7,078
	Net cash inflows from investing activities	2,767	-
	Net cash outflows from financing activities	(5,000)	-
	Net cash inflows	4,148	7,078

The bicycle business has been classified and accounted for at 30 June 2014 as a disposal group held for sale (see note 11).

11. Assets classified as held for sale

	30/06/14	30/06/13
	$'000	$'000
Freehold land held for sale (i)	1,260	-
Assets related to bicycle business (ii)	21,076	-
	22,336	-
Liabilities associated with assets held for sale (ii)	3,684	-
Amounts recognised directly in equity associated with assets held for sale	-	-

AASB5.41 (a) – (c)

(i) The Group intends to dispose of a parcel of freehold land it no longer utilises in the next 10 months. The property located on the freehold land was previously used in the Group's toy operations and has been fully depreciated. A search is underway for a buyer. No impairment loss was recognised on reclassification of the land as held for sale nor as at 30 June 2014 as the directors of the Company expect that the fair value (estimated based on the recent market prices of similar locations) less costs to sell is higher than the carrying amount.

Source	RDR Holdings (Australia) Pty Limited

11. Assets classified as held for sale (cont'd)

AASB5.41 (a) – (c), 38

(ii) As described in note 10, the Group plans to dispose of its bicycle business and anticipates that the disposal will be completed by 31 January 2015. The Group is currently in negotiation with some potential buyers and the directors of the Company expect that the fair value less costs to sell of the business will be higher than the aggregate carrying amount of the related assets and liabilities. Therefore, no impairment loss was recognised on reclassification of the assets and liabilities as held for sale nor as at 30 June 2014. The major classes of assets and liabilities of the bicycle business at the end of the reporting period are as follows:

	30/06/14 $'000
Goodwill	1,147
Property, plant and equipment	16,944
Inventories	830
Trade receivables	1,980
Cash and bank balances	175
Assets of bicycle business classified as held for sale	21,076
Trade payables	(3,254)
Current tax liabilities	-
Deferred tax liabilities	(430)
Liabilities of bicycle business associated with assets classified as held for sale	(3,684)
Net assets of bicycle business classified as held for sale	17,392

12. Profit for the year from continuing operations

Disclosure of material items of income and expense
When items of income and expense are material, their nature and amount shall be disclosed separately.

Profit for the year from continuing operations has been arrived at after charging (crediting):

Source	RDR Holdings (Australia) Pty Limited

13.1 Trade receivables

AASB7.7

The average credit period on sales of goods is 60 days. No interest is charged on trade receivables for the first 60 days from the date of the invoice. Thereafter, interest is charged at 2% per annum on the outstanding balance. The Group has recognised an allowance for doubtful debts of 100% against all receivables over 120 days because historical experience has been that receivables that are past due beyond 120 days are not recoverable. Allowances for doubtful debts are recognised against trade receivables between 60 days and 120 days based on estimated irrecoverable amounts determined by reference to past default experience of the counterparty and an analysis of the counterparty's current financial position.

AASB7.16

Movement in the allowance for doubtful debts

	Year ended 30/06/14 $'000	Year ended 30/06/13 $'000 (restated)
Balance at beginning of the year	838	628
Impairment losses recognised on receivables	63	430
Amounts written off during the year as uncollectible	-	(196)
Amounts recovered during the year	-	(24)
Impairment losses reversed	(103)	-
Foreign exchange translation gains and losses	-	-
Unwind of discount	-	-
AASB7.20(e) Balance at end of the year	798	838

13.2 Transfer of financial assets

AASB7.14(a), 42D(a),(b),(c),(f)

During the year, the Group discounted trade receivables with an aggregate carrying amount of $1.052 million to a bank for cash proceeds of $1 million. If the trade receivables are not paid at maturity, the bank has the right to request the Group to pay the unsettled balance. As the Group has not transferred the significant risks and rewards relating to these trade receivables, it continues to recognise the full carrying amount of the receivables and has recognised cash received on the transfer as a secured borrowing (see note27).

AASB7.42D(e)

At the end of the reporting period, the carrying amount of the trade receivables that have been transferred but have not been derecognised amounted to $0.946 million and the carrying amount of the associated liability is $0.923 million.

AASB7.42D

Transferred financial assets that are not derecognised in their entirety

An entity may have transferred financial assets in such a way that part or all of the transferred financial assets do not qualify for derecognition. To meet the objectives set out in paragraph 42B(a), the entity must disclose at each reporting date for each class of transferred financial assets that are not derecognised in their entirety:

(a) the nature of the transferred assets;
(b) the nature of the risks and rewards of ownership to which the entity is exposed;
(c) a description of the nature of the relationship between the transferred assets and the associated liabilities, including restrictions arising from the transfer on the reporting entity's use of the transferred assets;
(d) when the counterparty (counterparties) to the associated liabilities has (have) recourse only to the transferred assets, a schedule that sets out the fair value of the transferred assets, the fair value of the associated liabilities and the net position (the difference between the fair value of the transferred assets and the associated liabilities);
(e) when the entity continues to recognise all of the transferred assets, the carrying amounts of the transferred assets and the associated liabilities; and
(f) when the entity continues to recognise the assets to the extent of its continuing involvement (see paragraphs 20(c)(ii) and 30 of AASB 139), the total carrying amount of the original assets before the transfer, the carrying amounts of the assets that the entity continues to recognise, and the carrying amount of the associated liabilities.

AASB117.47(c)

Unguaranteed residual values of assets leased under finance leases at the end of the reporting period are estimated at $37,000 (30 June 2013: $42,000).

AASB7.7

The interest rate inherent in the leases is fixed at the contract date for the entire lease term. The average effective interest rate contracted is approximately 10.5% (30 June 2013: 11%) per annum.

AASB7.7

(i) The Group holds bills of exchange that carry interest at variable rate. The weighted average interest rate on these securities is 7.10% per annum (2013: 7.0% per annum). The bills have maturity dates ranging between 3 to 18 months from the end of the reporting period. The counterparties have a minimum A credit rating.

(ii) The debentures carry interest at 6% per annum payable monthly, and mature in September 2014.

(iii) The Group holds listed redeemable notes that carry interest at 7% per annum. The notes are redeemable at par value in 2016.

AASB124.18(b)

(iv) The Group has provided several of its key management personnel with short-term loans at rates comparable to the average commercial rate of interest. Further information about these loans is set out in note 42.

16. Inventories

	30/06/14	30/06/13
	$'000	$'000
Raw materials	7,973	8,340
Work in progress	4,490	4,354
Finished goods	16,751	14,306
	29,214	27,000

AASB102.36(d)

The cost of inventories recognised as an expense during the year in respect of continuing operations was $89.9million (2013: $91.9million).

Cost of sales
The financial report shall disclose the amount of inventories recognised as an expense during the period. The amount of inventories recognised as an expense during the period, which is often referred to as cost of sales, consists of those costs previously included in the measurement of inventory that has now been sold and unallocated production overheads and abnormal amounts of production costs of inventories. The circumstances of the entity may also warrant the inclusion of other amounts, such as distribution costs.

AASB102.36(e), (f)

The cost of inventories recognised as an expense includes $2.34 million (2013: $1.86 million) in respect of write-downs of inventory to net realisable value, and has been reduced by $0.5 million (2013: $0.4 million) in respect of the reversal of such write-downs.

Inventory
The write-down of inventory to net realisable value would be included in the cost of sales line on the face of the statement of comprehensive income where classification by function is used, and in the changes in inventory line where classification by nature is used.

17. Subsidiaries (cont'd)

17.1 Composition of the Group

AASB 12.10(a)(i)
AASB 12.4
AASB 12.B4(a)
AASB 12.B5-B6

Information about the composition of the Group at the end of the reporting period is as follows:

Principal activity	Place of incorporation and operation	Number of wholly-owned subsidiaries	
		30/06/14	30/06/13
Manufacture of electronic equipment	Australia	-	1
	C Land	1	1
Manufacture of leisure goods	Australia	1	--
Construction	Australia	1	1
Toys manufacturing	Australia	-	1
		3	4

Principal activity	Place of incorporation and operation	Number of non-wholly-owned subsidiaries	
		30/06/14	30/06/13
Manufacture of electronic equipment	Australia	2	1
Manufacture of leisure goods	Australia	2	1
	B Land	1	1
		5	3

AASB127.41(a)

The Group owns 45% equity shares of Subtwo Limited, and consequently does not control more than half of the voting power of those shares. However, based on the contractual arrangements between the Group and other investors, the Group has the power to appoint and remove the majority of the board of directors of Subtwo Limited, and hence the Group has control over the financial and operating policies of Subtwo Limited. Therefore, Subtwo Limited is controlled by the Group and is consolidated in these financial statements.

17.2 Significant restrictions

AASB 12.13(a)(i)

When there are significant restrictions on the Company's or its subsidiaries' ability to access or use the assets and settle the liabilities of the Group, the Group should disclose the nature and extent of significant restrictions. Please see AASB 12.13 for details.

17.3 Financial support

AASB 12.15, 17

When the Group gives financial support to a consolidated structured entity, the nature and risks (including the type and amount of support provided) should be disclosed in the financial statements. Please see AASB 12.15 and 17 for details.

17. Subsidiaries (cont'd)

ASIC-CO 98/1418

The above proforma consolidated financial statements shall comply with:

- in respect of the statement of comprehensive income – paragraphs 82 to 87 of AASB 101 'Presentation of Financial Statements'; and
- in respect of the statement of financial position – paragraphs 68 to 73 of AASB 101.

In addition, the principles of consolidation as prescribed by AASB 127 'Consolidated and Separate Financial Statements' shall be applied, therefore all transactions between parties to the deed of cross guarantee shall be eliminated.

Other disclosures

AASB127.41(a)

The consolidated financial statements shall disclose the nature of the relationship between the parent and a subsidiary when the parent does not own, directly or indirectly through subsidiaries, more than half of the voting power.

AASB127.41(d)

The consolidated financial statements shall disclose the nature and extent of any significant restrictions (e.g. resulting from borrowing arrangements or regulatory requirements) on the ability of subsidiaries to transfer funds to the parent in the form of cash dividends or to repay loans or advances.

18. Associates

AASB 12.21(a)(i), (iii) – (iv)

Details of each of the Group's material associates at the end of the reporting period are as follows:

Name of associate	Place of incorporation and operation	Proportion of ownership interest and voting power held by the Group	
		30/06/14	30/06/13
A Plus Limited (i)	M Land	35%	35%
B Plus Limited	Australia	17%	17%

AASB 12.21(b)(i)

All of the above associates are accounted for using the equity method in these consolidated financial statements.

AASB 12.21 (a)(iv)

(i) Pursuant to a shareholder agreement, the Company has the right to cast 37% of the votes at shareholder meetings of A Plus Limited.

Source	RDR Holdings (Australia) Pty Limited

18. Investments in associates (cont'd)

AASB128.24, 25

Different reporting dates or reporting periods

The most recent available financial statements of the associate are used by the investor in applying the equity method. When the reporting dates of the investor and the associate are different, the associate prepares, for the use of the investor, financial statements as of the same date as the financial statements of the investor unless it is impracticable to do so.

When the financial statements of an associate used in applying the equity method are prepared as of a different reporting date from that of the investor, adjustments shall be made for the effects of significant transactions or events that occur between that date and the date of the investor's financial statements. In any case, the difference between the reporting date of the associate and that of the investor shall be no more than three months. The length of the reporting periods and any difference in the reporting dates shall be the same from period to period.

18A. Joint venture

Similar to the disclosures applicable to investments in associates, AASB 12 requires the following information to be disclosed for each of the Group's material joint ventures. In this model, the Group only has one joint venture, JV Electronics Limited, and for illustrative purposes, JV Electronics Limited is assumed to be material to the Group.

18A.1 Details of material joint venture

AASB 12.21(a)(i), (iii), (iv)

Details of the Group's material joint venture at the end of the reporting period is as follows:

Name of joint venture	Place of incorporation and principal place of business	Proportion of ownership interest and voting rights held by the Group	
		30/06/14	30/06/13
JV Electronics Limited	C Land	33%	33%

AASB 12.21(b)(i)

The above joint venture is accounted for using the equity method in these consolidated financial statements.

19. Joint operation

AASB 12.21(a)

The Group has a material joint operation, Project ABC. The Group has a 25% share in the ownership of a property located in Central District, City A. The property upon completion will be held for leasing purposes. The Group is entitled to a proportionate share of the rental income received and bears a proportionate share of the joint operation's expenses.

20. Property, plant and equipment (cont'd)

AASB116.73(c) The following useful lives are used in the calculation of depreciation.

Buildings	20 – 30 years
Plant and equipment	5 – 15 years
Equipment under finance lease	5 years

20.1 Freehold land and buildings carried at fair value

AASB116.77 (a) & (b) AASB13.91(a), 93(d) The Group's freehold land and buildings are stated at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. The fair value measurements of the Group's freehold land and buildings as at 30 June 2014 and 30 June 2013 were performed by Messrs R & P Trent, independent valuers not related to the Group. Messrs R & P Trent are members of the Institute of Valuers of Australia, and they have appropriate qualifications and recent experience in the fair value measurement of properties in the relevant locations.

The fair value of the freehold land was determined [based on the market comparable approach that reflects recent transaction prices for similar properties/other methods [describe]]. The fair value of the buildings was determined using [the cost approach that reflects the cost to a market participant to construct assets of comparable utility and age, adjusted for obsolescence/other methods (describe)]. There has been no change to the valuation technique during the year.

AASB 13.93(a) Fair value of the Group's freehold land and buildings as at 30 June 2014 are as follows:

	Fair value as at 30/06/14 $'000
A manufacturing plant in Australia that contains:	
- freehold land	13,868
- buildings	11,147

20.2 Impairment losses recognised in the year

AASB136.126(a) The impairment losses have been included in profit or loss in the [other expenses/cost of sales] line item.

20.3 Assets pledged as security

AASB116.74(a) Freehold land and buildings with a carrying amount of $23 million approx. (30 June 2013: $28.8 million approx.) have been pledged to secure borrowings of the Group (see note 27). The freehold land and buildings have been pledged as security for bank loans under a mortgage. The Group is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.

In addition, the Group's obligations under finance leases (see note 33) are secured by the lessors' title to the leased assets, which have a carrying amount of $28,000 (30 June 2013: $162,000).

AASB116.35

Property, plant and equipment stated at revalued amounts

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is treated in one of the following ways:

(a) restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount. This method is often used when an asset is revalued by means of applying an index to its depreciated replacement cost; or

(b) eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset. This method is often used for buildings.

The amount of the adjustment arising on the restatement or elimination of accumulated depreciation forms part of the increase or decrease in carrying amount that is accounted for in accordance with AASB 116 'Property, Plant and Equipment'.

Source	RDR Holdings (Australia) Pty Limited

20. Property, plant and equipment (cont'd)

AASB136.5

Impairment of revalued property, plant and equipment

Property, plant and equipment carried at revalued amounts shall also be tested for impairment. Identifying whether a revalued asset may be impaired depends on the basis used to determine fair value:

(a) if the asset's fair value is its market value, the only difference between the asset's fair value and its fair value less costs to sell is the direct incremental costs to dispose of the asset:
   i. if the disposal costs are negligible, the recoverable amount of the revalued asset is necessarily close to, or greater than, its revalued amount (i.e. fair value). In this case, after the revaluation requirements have been applied, it is unlikely that the revalued asset is impaired and recoverable amount need not be estimated;
   ii. if the disposal costs are not negligible, the fair value less costs to sell of the revalued asset is necessarily less than its fair value. Therefore, the revalued asset will be impaired if its value in use is less than its revalued amount (i.e. fair value). In this case, after the revaluation requirements have been applied, an entity applies AASB 136 'Impairment of Assets' to determine whether the asset may be impaired; and

(b) if the asset's fair value is determined on a basis other than its market value, its revalued amount (i.e. fair value) may be greater or lower than its recoverable amount. Hence, after the revaluation requirements have been applied, an entity applies AASB 136 to determine whether the asset may be impaired.

Disclosure of impairment of property, plant and equipment

An entity shall disclose the information requirement by AASB 136 'Impairment of Assets' for each material impairment loss recognised or reversed during the period for property, plant and equipment.

AASB140.76 (a) – (d), (f), (g), Aus1.6(c), RDR76.1

21.1 Fair value measurement of the Group's investment properties

AASB140.75(e), AASB13.91(a)

The fair value of the Group's investment property as at 30 June 2014 and 30 June 2013 has been arrived at on the basis of a valuation carried out on the respective dates by Messrs R & P Trent, independent valuers not related to the Group. Messrs R & P Trent are members of the Institute of Valuers of Australia, and they have appropriate qualifications and recent experience in the valuation of properties in the relevant locations. The fair value was determined [based on the market comparable approach that reflects recent transaction prices for similar properties/other methods [describe]]. In estimating the fair value of the properties, the highest and best use of the properties is their current use.

Source	RDR Holdings (Australia) Pty Limited

21. Investment property (cont'd)

All of the Group's investment property is held under freehold interests.

AASB 13.93(a) Fair value of the Group's investment property as at 30 June 2014 are as follows:

	Fair value as at 30/06/14 $'000
Commercial property units located in Australia	1,968

AASB140.75(d), AASB140.75(e) An entity shall disclose the methods and significant assumptions applied in determining the fair value of investment property. The extent to which the fair value of investment property is based on a valuation by an independent valuer who holds a recognised and relevant professional qualification and has recent experience in the location and category of the investment property being valued shall be disclosed. If there has been no such valuation, that fact shall be disclosed.

Inability to determine fair value reliably

AASB140.78 In the exceptional cases where an entity is unable to reliably determine the fair value of an investment property, and accordingly measures that investment property using the cost model, the reconciliation illustrated above shall disclose amounts relating to that investment property separately from amounts relating to other investment property. In addition, an entity shall disclose:

(a) a description of the investment property;
(b) an explanation of why fair value cannot be determined reliably;
(c) if possible, the range of estimates within which fair value is highly likely to lie; and
(d) on disposal of investment property not carried at fair value:
    i. the fact that the entity has disposed of investment property not carried at fair value;
    ii. the carrying amount of that investment property at the time of sale; and
    iii. the amount of gain or loss recognised.

Investment properties measured under the cost model

AASB140.79, Aus1.6(b) An entity that applies the cost model shall disclose, in addition to the disclosures illustrated in notes 3.19, 6, 21 and 49 to these model financial statements:

(a) the depreciation methods used;
(b) the useful lives or the depreciation rates used;
(c) the gross carrying amount and the accumulated depreciation (aggregated with accumulated impairment losses) at the beginning and end of the period;
(d) a reconciliation of the carrying amount of investment property at the beginning and end of the period, showing the following:
    i. additions;
    ii. additions resulting from acquisitions through business combinations;
    iii. assets classified as held for sale or included in a disposal group in accordance with AASB 5 'Non-current Assets Held for Sale and Discontinued Operations' and other disposals;
    iv. depreciation;
    v. the amount of impairment losses recognised, and the amount of impairment losses reversed, during the period in accordance with AASB 136 'Impairment of Assets';
    vi. [not required under RDR];
    vii. [not required under RDR]; and
    viii. other changes; and
(e) [not required under RDR]

23.1 Significant intangible assets

AASB138.122(b) The Group holds a patent for the manufacture of its Series Z electronic equipment. The carrying amount of the patent of $2.25 million (30 June 2013: $2.4 million) will be fully amortised in 15 years (30 June 2013: 16 years).

Source	RDR Holdings (Australia) Pty Limited

23. Other intangible assets (cont'd)

Additional disclosures for indefinite life intangible assets

AASB138.122(a) An entity shall disclose, for an intangible asset assessed as having an indefinite useful life, the carrying amount of that asset and the reasons supporting the assessment of an indefinite useful life. In giving these reasons, the entity shall describe the factor(s) that played a significant role in determining that the asset has an indefinite useful life.

AASB138.90 Factors that are considered in determining the useful life of an intangible asset include:

(a) the expected usage of the asset by the entity and whether the asset could be managed efficiently by another management team;
(b) typical product life cycles for the asset and public information on estimates of useful lives of similar assets that are used in a similar way;
(c) technical, technological, commercial or other types of obsolescence;
(d) the stability of the industry in which the asset operates and changes in the market demand for the products or services output from the asset;
(e) expected actions by competitors or potential competitors;
(f) the level of maintenance expenditure required to obtain the expected future economic benefits from the asset and the entity's ability and intention to reach such a level;
(g) the period of control over the asset and legal or similar limits on the use of the asset, such as the expiry dates of related leases; and
(h) whether the useful life of the asset is dependent on the useful life of other assets of the entity.

Additional disclosures for intangible assets acquired by way of a government grant and initially recognised at fair value

AASB138.122(c) For intangible assets acquired by way of a government grant and initially recognised at fair value, an entity shall disclose:

(a) the fair value initially recognised for these assets;
(b) their carrying amount; and
(c) whether they are measured after recognition under the cost model or the revaluation model.

Intangible assets measured after revaluation using the revaluation model

AASB138.124, Aus1.8 If intangible assets are accounted for at revalued amounts, an entity shall disclose the following:

(a) by class of intangible assets:
  i. the effective date of the revaluation;
  ii. the carrying amount of revalued intangible assets; and
  iii. [not required under RDR];
(b) the amount of the revaluation reserve that relates to intangible assets at the beginning and end of the period, indicating the changes during the period and any restrictions on the distribution of the balance to shareholders; and
(c) the methods and significant assumptions applied in estimating the assets' fair values.

27. Borrowings (cont'd)

27.1 Summary of borrowing arrangements

AASB7.7

(i) Bills of exchange with a variable interest rate were issued in 2005. The current weighted average effective interest rate on the bills is 6.8% per annum (30 June 2013: 6.8% per annum).

(ii) Amounts repayable to related parties of the Group. Interest of 8.0% - 8.2% per annum is charged on the outstanding loan balances (30 June 2013: 8.0% - 8.2% per annum).

(iii) Fixed rate loans with a finance company with remaining maturity periods not exceeding 3 years (30 June 2013: 4 years). The weighted average effective interest rate on the loans is 8.15% per annum (30 June 2013: 8.10% per annum). The Group hedges a portion of the loans for interest rate risk via an interest rate swap exchanging fixed rate interest for variable rate interest. The outstanding balance is adjusted for fair value movements in the hedged risk, being movements in the inter-bank rate in Australia.

(iv) On 17 June 2014, the Group received an interest-free loan of $3 million from the government of Australia to finance staff training over a two-year period. The loan is repayable in full at the end of that two-year period. Using prevailing market interest rates for an equivalent loan of 7.2%, the fair value of the loan is estimated at $2.61 million. The difference of $390,000 between the gross proceeds and the fair value of the loan is the benefit derived from the interest-free loan and is recognised as deferred revenue (see note 31). Interest expenses will be recognised on this loan in 2015 ($188,000) and 2016 ($202,000) (see note 9).

(v) 2,500 perpetual notes with a coupon rate of 6% per annum were issued on 27 February 2014 at $2.5 million principal value. Issue costs of $0.595 million were incurred.

(vi) Secured by a mortgage over the Group's freehold land and buildings (see note 20). The weighted average effective interest rate on the bank loans is 8.30% per annum (30 June 2013: 8.32% per annum).

(vii) Secured by a charge over certain of the Group's trade receivables (see note 13).

(viii) Secured by the assets leased. The borrowings are a mix of variable and fixed interest rate debt with repayment periods not exceeding 5 years.

27.2 Breach of loan agreement

AASB7.RDR18.1

During the current year, the Group was late in paying interest for the first quarter on one of its loans with a carrying amount of $5 million. The delay arose because of a temporary lack of funds on the date interest was payable due to a technical problem on settlement. The interest payment outstanding of $107,500 was repaid in full on the following day, including the additional interest and penalty. The lender did not request accelerated repayment of the loan and the terms of the loan were not changed. Management has reviewed the Group's settlement procedures to ensure that such circumstances do not recur.

AASB7.RDR18.1

Defaults and breaches

For loans payable recognised at the end of the reporting period for which there is a breach of terms or default of principal, interest, sinking fund, or redemption terms that has not been remedied by the end of the reporting period, an entity preparing general purpose financial statements under Australian Accounting Standards – Reduced Disclosure Requirements shall disclose the following:

(a) details of that breach or default;

(b) the carrying amount of the related loans payable at the end of the reporting period; and

(c) whether the breach or default was remedied, or the terms of the loans payable were renegotiated, before the financial statements were authorised for issue.

28. Convertible notes

AASB7.7

4.5 million 5.5% $ denominated convertible notes were issued by the Company on 1 March 2014 at an issue price of $1.10 per note. Each note entitles the holder to convert to one ordinary share at a cost of $3 per share. Conversion may occur at any time between 1 January 2017 and 28 February 2017. If the notes have not been converted, they will be redeemed on 1 March 2017 at $1. Interest of 5.5% will be paid quarterly up until that settlement date.

AASB132.28

The net proceeds received from the issue of the convertible notes have been split between the financial liability element and an equity component, representing the residual attributable to the option to convert the financial liability into equity of the Company, as follows.

	$'000
Proceeds of issue	4,950
Liability component at date of issue	(4,116)
Equity component	834

The equity component of $834,000 has been credited to equity (option premium on convertible notes – see note 36.7).

AASB7.7

The liability component is measured at amortised cost. The interest expense for the year ($110,000) is calculated by applying an effective interest rate of 8% to the liability component for the four-month period since the loan notes were issued. Interest paid in the period since issue is $82,000. The difference between the carrying amount of the liability component at the date of issue ($4.116 million) and the amount reported in the statement of financial position at 30 June 2014 ($ 4.144 million) represents the effective interest rate less interest paid to that date.

AASB137.84(a)	Balance at 30 June 2014	3,058	528	730	4,316

AASB3.B64(j) AASB137.85(a), (b)

(i) The provision for employee benefits represents annual leave and vested long service leave entitlements accrued and compensation claims made by employees. On the acquisition of Subsix Limited, the Group recognised an additional contingent liability of $45,000 in respect of employees' compensation claims outstanding against that company, which was settled in August 2014. The decrease in the carrying amount of the provision for the current year results from benefits being paid in the current year.

AASB137.85(a), 85(b), Aus1.8(c)

(ii) The provision for rectification work relates to the estimated cost of work agreed to be carried out for the rectification of goods supplied to one of the Group's major customers (see note 12.5). Anticipated expenditure for 2015 is $1.94 million, and for 2016 is $1.118 million. These amounts have not been discounted for the purpose of measuring the provision for rectification work, because the effect is not material.

AASB137.85(a), 85(b), Aus1.8(c)

(iii) The provision for warranty claims represents the present value of the directors' best estimate of the future outflow of economic benefits that will be required under the Group's obligations for warranties under local sale of goods legislation. The estimate has been made on the basis of historical warranty trends and may vary as a result of new materials, altered manufacturing processes or other events affecting product quality.

AASB137.85(a), 85(b), Aus1.8(c)

(iv) The provision for onerous lease contracts represents the present value of the future lease payments that the Group is presently obligated to make under non-cancellable onerous operating lease contracts, less revenue expected to be earned on the lease, including estimated future sub-lease revenue, where applicable. The estimate may vary as a result of changes in the utilisation of the leased premises and sub-lease arrangements where applicable. The unexpired terms of the leases range from 3 to 5 years.

Source	RDR Holdings (Australia) Pty Limited

30. Provisions (cont'd)

Exemptions

AASB137.92 In extremely rare cases, disclosure of some or all of the information required by AASB 137 'Provisions, Contingent Liabilities and Contingent Assets' can be expected to prejudice seriously the position of the entity in a dispute with other parties on the subject matter of the provision. In such cases, an entity need not disclose the information, but shall disclose the general nature of the dispute, together with the fact that, and reason why, the information has not been disclosed.

Regardless of how sensitive certain information about provisions may be, this exemption from disclosure does not affect the requirement to recognise provisions that satisfy the criteria for recognition set out in AASB 137.

Contingent liabilities

AASB137.88 Where a provision and a contingent liability arise from the same set of circumstances, the disclosures in the financial report shall be made in such a way to show the link between the provision and the contingent liability.

Contingent liabilities recognised as part of a business combination

AASB3.B64(j) For contingent liabilities recognised separately as part of the allocation of the cost of a business combination, the acquirer shall disclose the information required by AASB 137 'Provisions, Contingent Liabilities and Contingent Assets' for each class of provision.

31. Deferred revenue

33. Obligations under finance leases

33.1 Leasing arrangements

AASB117.31(e)

The Group leased certain of its manufacturing equipment under finance leases. The average lease term is 5 years (2013: 5 years). The Group has options to purchase the equipment for a nominal amount at the end of the lease terms. The Group's obligations under finance leases are secured by the lessors' title to the leased assets.

Interest rates underlying all obligations under finance leases are fixed at respective contract dates ranging from 3.5% to 5.5% (2013: 3.75% to 6%) per annum.

33.2 Finance lease liabilities

33.3 Fair value

Disclosures for lessees

AASB117.31(e)

A general description about the lessee's material leasing arrangements shall be disclosed, including:

(a) the basis on which contingent rent payable is determined;
(b) the existence and terms of renewal or purchase options and escalation clauses; and
(c) restrictions imposed by lease arrangements such as those concerning dividends, additional debt and further leasing.

Assets under lease

AASB117.32, 57

The disclosure requirements specified by the relevant standards in relation to property, plant and equipment, intangible assets, impairment of assets, investment property and agriculture apply to:

(a) lessees for assets leased under finance leases;
(b) lessors for assets provided under operating leases.

Disclosure of these items would normally be incorporated into other existing notes to the financial statements, for example notes 20, 21 and 23 to these model financial statements.

Source	RDR Holdings (Australia) Pty Limited

34. Retirement benefit plans

34.1 Defined contribution plans

The Group operates defined contribution retirement benefit plans for all qualifying employees of its subsidiary in C Land. The assets of the plans are held separately from those of the Group in funds under the control of trustees. Where employees leave the plans prior to full vesting of the contributions, the contributions payable by the Group are reduced by the amount of forfeited contributions.

AASB 119.43

The employees of the Group's subsidiary in B Land are members of a state-managed retirement benefit plan operated by the government of B Land. The subsidiary is required to contribute a specified percentage of payroll costs to the retirement benefit scheme to fund the benefits. The only obligation of the Group with respect to the retirement benefit plan is to make the specified contributions.

AASB 119.53

The total expense recognised in profit or loss of $160,000 (2013: $148,000) represents contributions payable to these plans by the Group at rates specified in the rules of the plans. As at 30 June 2014, contributions of $8,000 (2013: $8,000) due in respect of the 2013 (2013) reporting period had not been paid over to the plans. The amounts were paid subsequent to the end of the reporting period.

34.2 Defined benefit plans

AASB 119.139

The Group sponsors funded defined benefit plans for qualifying employees of its subsidiaries in Australia. The defined benefit plans are administered by a separate Fund that is legally separated from the entity. The board of the pension fund is composed of an equal number of representatives from both employers and (former) employees.

Under the plans, the employees are entitled to post-retirement yearly installments amounting to 1.75% of final salary for each year of service until the retirement age of 65. The pensionable salary is limited to $ 20. The pensionable salary is the difference between the current salary of the employee and the state retirement benefit. In addition, the service period is limited to 40 years resulting in a maximum yearly entitlement (life-long annuity) of 70% of final salary.

AASB 119.139(b)

The plans in Australia typically expose the Group to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk.

Investment risk	The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to high quality corporate bond yields; if the return on plan asset is below this rate, it will create a plan deficit. Currently the plan has a relatively balanced investment in equity securities, debt instruments and real estates. Due to the long-term nature of the plan liabilities, the board of the pension fund considers it appropriate that a reasonable portion of the plan assets should be invested in equity securities and in real estate to leverage the return generated by the fund.
Interest risk	A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan's debt investments.
Longevity risk	The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.
Salary risk	The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

The risk relating to benefits to be paid to the dependents of plan members (widow and orphan benefits) is re-insured by an external insurance company.

Source	RDR Holdings (Australia) Pty Limited

34. Retirement benefit plans (cont'd)

No other post-retirement benefits are provided to these employees.

The most recent actuarial valuation of the plan assets and the present value of the defined benefit obligation were carried out at 30 June 2014 by Mr. F.G. Ho, Fellow of the Institute of Actuaries of Australia. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the projected unit credit method.

AASB 119.144

The principal assumptions used for the purposes of the actuarial valuations were as follows.

	Valuation at	
	30/06/14	30/06/13
Discount rate(s)	5.52%	5.20%
Expected rate(s) of salary increase	5.00%	5.00%
Average longevity at retirement age for current pensioners (years)*		
Males	27.5	27.3
Females	29.8	29.6
Average longevity at retirement age for current employees (future pensioners) (years)*		
Males	29.5	29.3
Females	31.0	30.9
Others [describe]	-	-

* Based on Australia's standard mortality table [with modification to reflect expected changes in mortality/ others (please describe)].

Total expense recognised in profit or loss	586	556

AASB 119.135

The current service cost and the net interest expense for the year are included in the employee benefits expense in profit or loss. / Of the expense for the year, an amount of $ 412,000 (2013: $ 402,000) has been included in profit or loss as cost of sales and the remainder has been included in administration expenses.

The remeasurement of the net defined benefit liability is included in other comprehensive income.

AASB 119.140

The amount included in the consolidated statement of financial position arising from the entity's obligation in respect of its defined benefit plans is as follows.

	30/06/14	30/06/13
	$'000	$'000 (restated)
Present value of funded defined benefit obligation	6,156	5,808
Fair value of plan assets	(5,648)	(4,915)
Funded status	508	893
Restrictions on asset recognised	-	-
Other [describe]	-	-
Net liability arising from defined benefit obligation	508	893

Source	RDR Holdings (Australia) Pty Limited

34. Retirement benefit plans (cont'd)

Amount recognised in comprehensive income in respect of these defined benefit plans are as follows:

		Year ended 30/06/14 $'000	Year ended 30/06/13 $'000 (restated)
AASB 119.141(f)	Contributions from the employer	910	870
AASB 119.141(f)	Contributions from plan participants	440	412
AASB 119.141(g)	Benefits paid	(956)	(1,481)

AASB 119.142 The fair value of the plan assets at the end of the reporting period for each category, are as follows.

	Fair value of plan assets 30/06/14 $'000	30/06/13 $'000 (restated)
Cash and cash equivalents	-	-
Equity investments	2,472	1,575
Debt investments	1,980	1,850
Properties	1,113	1,402
Other [describe]	-	-
Total	5,565	4,827

AASB 119.142 The fair values of the above equity and debt instruments are determined based on quoted market prices in active markets whereas the fair values of properties and derivatives are not based on quoted market prices in active markets. It is the policy of the fund to use interest rate swaps to hedge its exposure to interest rate risk. This policy has been implemented during the current and prior years. Foreign currency exposures are fully hedged by the use of the forward foreign exchange contracts.

The actual return on plan assets was $0.743 million (2013: $0.349 million).

AASB 119.143 The plan assets include ordinary shares of the Company with an aggregate fair value of $0.38 million (30 June 2013: $0.252 million) and a property occupied by a subsidiary of the Company with fair value of $0.62 million (30 June 2013: $0.62 million).

Source	RDR Holdings (Australia) Pty Limited
	34. Retirement benefit plans (cont'd)
	General
AASB119.135	An entity shall disclose information that: (a) explains the characteristics of its defined benefit plans and risks associated with them (see paragraph 139); (b) identifies and explains the amounts in its financial statements arising from its defined benefit plans (see paragraphs 140–144); and
AASB119.136	To meet the objectives in paragraph 135, an entity shall consider all the following: (a) the level of detail necessary to satisfy the disclosure requirements; (b) how much emphasis to place on each of the various requirements; (c) how much aggregation or disaggregation to undertake; and (d) whether users of financial statements need additional information to evaluate the quantitative information disclosed.
AASB119.138	An entity shall assess whether all or some disclosures should be disaggregated to distinguish plans or groups of plans with materially different risks. For example, an entity may disaggregate disclosure about plans showing one or more of the following features: (a) different geographical locations. (b) different characteristics such as flat salary pension plans, final salary pension plans or post-employment medical plans. (c) different regulatory environments. (d) different reporting segments. (e) different funding arrangements (eg wholly unfunded, wholly or partly funded).
	Multi-employer plans
AASB119.148	If an entity participates in a multi-employer defined benefit plan, it shall disclose: (a) a description of the funding arrangements, including the method used to determine the entity's rate of contributions and any minimum funding requirements (b) a description of the extent to which the entity can be liable to the plan for other entities' obligations under the terms and conditions of the multi-employer plan. (c) a description of any agreed allocation of a deficit or surplus on: i. wind-up of the plan; or ii. the entity's withdrawal from the plan. (d) if the entity accounts for that plan as if it were a defined contribution plan in accordance with paragraph 34, it shall disclose the following, in addition to the information required by (a)–(c) and instead of the information required by paragraphs 139–147: i. the fact that the plan is a defined benefit plan ii. the reason why sufficient information is not available to enable the entity to account for the plan as a defined benefit plan iii. the expected contributions to the plan for the next annual reporting period. iv. information about any deficit or surplus in the plan that may affect the amount of future contributions,
	Defined benefit plans that share risks between various entities under common control
AASB119.40	Defined benefit plans that share risks between entities under common control, for example, a parent and its subsidiaries, are not multi-employer plans.
AASB119.41	An entity participating in such a plan shall obtain information about the plan as a whole measured in accordance with this Standard on the basis of assumptions that apply to the plan as a whole. If there is a contractual agreement or stated policy for charging to individual group entities the net defined benefit cost for the plan as a whole measured in accordance with this Standard, the entity shall, in its separate or individual financial statements, recognise the net defined benefit cost so charged. If there is no such agreement or policy, the net defined benefit cost shall be recognised in the separate or individual financial statements of the group entity that is legally the sponsoring employer for the plan. The other group entities shall, in their separate or individual financial statements, recognise a cost equal to their contribution payable for the period.

Source	RDR Holdings (Australia) Pty Limited

35. Issued capital

Notes 35-37 and 39 below set out detailed descriptions and reconciliations for each class of share capital and each component of equity, as required by AASB 101.79, AASB 101.106 and AASB101.106A. AASB 101 permits some flexibility regarding the level of detail presented in the statement of changes in equity and these supporting notes. AASB 101 allows an analysis of other comprehensive income by item for each component of equity to be presented either in the statement of changes in equity or in the notes. For the purposes of the preparation of this model, the Group has applied the amendments to AASB 101 and has elected to present the analysis of other comprehensive income in the notes.

AASB 101 also allows that some of the details regarding items of other comprehensive income (income tax and reclassification adjustments) may be disclosed in the notes rather than in the statement of profit or loss and other comprehensive income. Entities will determine the most appropriate presentation for their circumstances – electing to present much of the detail in the notes (as we have done in these model financial statements) ensures that the primary financial statements are not cluttered by unnecessary detail, but it does result in very detailed supporting notes.

Whichever presentation is selected, entities will need to ensure that the following requirements are met:

- detailed reconciliations are required for each class of share capital (in the statement of financial position or the statement of changes in equity or in the notes);
- detailed reconciliations are required for each component of equity – separately disclosing the impact on each such component of (i) profit or loss, (ii) each component of other comprehensive income, and (iii) transactions with owners in their capacity as owners (in the statement of changes in equity or in the notes);
- the amount of income tax relating to each item of other comprehensive income should be disclosed (in the statement of profit or loss and other comprehensive income or in the notes) and
- reclassification adjustments should be presented separately from the related item of other comprehensive income (in the statement of profit or loss and other comprehensive income or in the notes).

An entity that elects to present a statement of changes in equity showing reconciliations between the carrying amount of each class of contributed equity at the beginning and the end of the period on the face of the statement need not repeat these disclosures in the notes to the financial statements. However, such entities shall disclose, either on the face of the statement of financial position or in the notes to the financial statements, for each class of share capital:

AASB101. 79(a)(i)	(a)	the number of shares authorised;
AASB101. 79(a)(ii)	(b)	the number of shares issued and fully paid, and issued but not fully paid;
AASB101. 79(a)(iii)	(c)	par value per share, or that the shares have no par value;
AASB101. 79(a)(iv)	(d)	a reconciliation of the number of shares outstanding at the beginning and at the end of the period;
AASB101. 79(a)(v)	(e)	the rights, preferences and restrictions attaching to that class including restrictions on the distribution of dividends and the repayment of capital;
AASB101. 79(a)(vi)	(f)	shares in the entity held by the entity or by its subsidiaries or associates; and
AASB101. 79(a)(vii)	(g)	shares reserved for issue under options and contracts for sale of shares, including the terms and amounts.

		32,439	48,672

AASB101.79(a)(iii) Changes to the then Corporations Law abolished the authorised capital and par value concept in relation to share capital from 1 July 1998. Therefore, the company does not have a limited amount of authorised capital and issued shares do not have a par value.

AASB101.79(a)(i) An entity shall disclose either on the face of the statement of financial position or in the notes to the financial statements, for each class of share capital, the number of shares authorised, if any.

AASB101.79(a) ***35.1 Fully paid ordinary shares***

	Number of shares	Share capital

	Number of shares	Share capital
	'000	$'000
Balance at 1 July 2012	1,100	1,100
Movements [describe]	-	-
Balance at 30 June 2013	1,100	1,100
Issue of shares	100	100
Share issue costs	-	(6)
Income tax relating to share issue costs	-	1
Balance at 30 June 2014	1,200	1,195

Convertible non-participating preference shares are entitled to receive a discretionary 10% preference dividend before any dividends are declared to the ordinary shareholders. The convertible non-participating preference shares can be converted into ordinary shares on a one-for-one basis at the option of the holder from 1 May 2017 to 30 April 2020. Any unconverted preference shares remaining after the end of the conversion period will remain as outstanding non-participating preference shares. Convertible non-participating preference shares have no right to share in any surplus assets or profits and no voting rights.

35.4 Share options granted under the Company's employee share option plan

AASB101.79(a)

At 30 June 2014, executives and senior employees held options over 196,000 ordinary shares of the Company, of which 136,000 will expire on 30 September 2014 and 60,000 will expire on 31 March 2015. At 30 June 2013, executives and senior employees held options over 290,000 ordinary shares of the Company, of which 140,000 were due to expire on 30 September 2013 and 150,000 were due to expire on 31 March 2014.

Share options granted under the Company's employee share option plan carry no rights to dividends and no voting rights. Further details of the employee share option plan are provided in note 41.

35.5 Redeemable cumulative preference shares

The redeemable cumulative preference shares issued by the Company have been classified as liabilities (see note 29).

Other share options on issue

AASB101.79(a)(vii)

An entity shall disclose, for each class of share capital, shares reserved for issue under options, including the terms and amounts.
An entity with other share options may wish to use the following illustrative wording as an example:

Source	RDR Holdings (Australia) Pty Limited

35. Issued capital (cont'd)

'As at 30 June 2014, the company has [number] share options on issue (2013: [number]), exercisable on a 1:1 basis for [number] ordinary shares of the company (2013: [number]) at an exercise price of $[amount]. The options expire between [date] and [date] (2013: [date] and [date]), and carry no rights to dividends and no voting rights.'

Contracts for the sale of shares

AASB101.79(a)(vii) An entity shall disclose, for each class of share capital, contracts for the sale of shares, including the terms and amounts.
An entity that has contracted to sell its shares to another party, for example, in a business combination occurring after the reporting date, may wish to use the following wording as a guide:
'On [date], the company finalised negotiations to purchase 100% of the ordinary share capital of Entity ABC. As part of the purchase consideration for the acquisition, the company will issue [number] of ordinary shares to the acquiree. Further details of the acquisition are disclosed in note [x].'

Shares held by subsidiaries or associates

AASB101.79(vi) Where a subsidiary or associate holds shares in the entity, the number of shares held shall be disclosed.

AASB101.79(b) AASB101.82A	The properties revaluation reserve arises on the revaluation of land and buildings. When revalued land or buildings are sold, the portion of the properties revaluation reserve that relates to that asset is transferred directly to retained earnings. Items of other comprehensive income included in the properties revaluation reserve will not be reclassified subsequently to profit or loss.		
AASB116.41	The asset revaluation reserve included in equity in respect of an item of property, plant and equipment may be transferred directly to retained earnings when the asset is derecognised. This may involve transferring the whole of the surplus when the asset is retired or disposed of. However, some of the surplus may be transferred as the asset is used by an entity through a transfer directly to retained earnings. In such a case, the amount of the surplus transferred would be the difference between depreciation based on the revalued carrying amount of the asset and depreciation based on the asset's original cost.		
AASB116.77(f)	The financial report shall disclose any restrictions on the distribution of the balance of the asset revaluation reserve to shareholders.

An entity shall disclose, either in the statement of changes in equity, or in the notes, the amount of dividends recognised as distributions to owners during the period.

Income tax consequences of dividends

AASB112.52A, 82A, Aus1.8(b)

In some jurisdictions, income taxes are payable at a higher or lower rate if part or all of the net profit or retained earnings is paid out as a dividend to shareholders of the entity. In some other jurisdictions, income taxes may be refundable or payable if part or all of the net profit or retained earnings is paid out as a dividend to shareholders of the entity. In these circumstances, current and deferred tax assets and liabilities are measured at the tax rate applicable to undistributed profits.

In these circumstances, an entity shall disclose the nature of the potential income tax consequences that would result from the payment of dividends to its shareholders.

Source	RDR Holdings (Australia) Pty Limited
	40. Financial instruments (cont'd)
AASB7.8	If the categories of financial instruments are apparent from the face of the statement of financial position, the above table would not be required.
	40.2 Forward foreign exchange contracts
	The Group undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters utilising forward foreign exchange contracts.
AASB7.22	It is the policy of the Group to enter into forward foreign exchange contracts to cover specific foreign currency payments and receipts within 70% to 80% of the exposure generated. The Group also enters into forward foreign exchange contracts to manage the risk associated with anticipated sales and purchase transactions out to 6 months within 40% to 50% of the exposure generated. Basis adjustments are made to the carrying amounts of non-financial hedged items when the anticipated sale or purchase transaction takes place.
	In the current year, the Group has designated certain forward contracts as a hedge of its net investment in Subfour Limited, which has B Currency as its functional currency. The Group's policy has been reviewed and, due to the increased volatility in B Currency, it was decided to hedge up to 50% of the net assets of the Subfour Limited for forward foreign currency risk arising on translation of the foreign operation. The Group utilises a rollover hedging strategy, using contracts with terms of up to 6 months. Upon the maturity of a forward contract, the Group enters into a new contract designated as a separate hedging relationship.
	The fair value of forward foreign currency (FC) contracts outstanding at the end of the reporting period is $157,000 (2013: $220,000).
	The Group has entered into contracts to supply electronic equipment to customers in B Land. The Group has entered into forward foreign exchange contracts (for terms not exceeding 3 months) to hedge the exchange rate risk arising from these anticipated future transactions, which are designated as cash flow hedges.
AASB7.23(a)	At 30 June 2014, the aggregate amount of losses under forward foreign exchange contracts recognised in other comprehensive income and accumulated in the cash flow hedging reserve relating to the exposure on these anticipated future transactions is $70,000 (2013: gains of $26,000). It is anticipated that the sales will take place during the first 3 months of the next financial year, at which time the amount deferred in equity will be reclassified to profit or loss.
	The Group has entered into contracts to purchase raw materials from suppliers in B Land and C Land. The Group has entered into forward foreign exchange contracts (for terms not exceeding 6 months) to hedge the exchange rate risk arising from these anticipated future purchases, which are designated into cash flow hedges.
AASB7.23(a)	At 30 June 2014, the aggregate amount of gains under forward foreign exchange contracts recognised in other comprehensive income and accumulated in the cash flow hedging reserve relating to these anticipated future purchase transactions is $239,000 (2013: unrealised gains of $194,000). It is anticipated that the purchases will take place during the first 6 months of the next financial year at which time the amount deferred in equity will be included in the carrying amount of the raw materials. It is anticipated that the raw materials will be converted into inventory and sold within 12 months after purchase, at which time the amount deferred in equity will be reclassified to profit or loss.
AASB7.23(b)	At the start of the third quarter, the Group reduced its forecasts on sales of electronic equipment to B Land due to increased local competition and higher shipping costs. The Group had previously hedged $1.079 million of future sales of which $97,000 are no longer expected to occur, and $982,000 remain highly probable. Accordingly, the Group has reclassified $3,000 of gains on foreign currency forward contracts relating to forecast transactions that are no longer expected to occur from the cash flow hedging reserve to profit or loss.

Source	RDR Holdings (Australia) Pty Limited
	40. Financial instruments (cont'd)
AASB7.24(c)	At 30 June 2014, no ineffectiveness has been recognised in profit or loss arising from hedging the net investment in Subfour Limited.
	40.3 Interest rate swap contracts
	The Group is exposed to interest rate risk because entities in the Group borrow funds at both fixed and floating interest rates. The risk is managed by the Group by maintaining an appropriate mix between fixed and floating rate borrowings, and by the use of interest rate swap contracts and forward interest rate contracts. Hedging activities are evaluated regularly to align with interest rate views and defined risk appetite, ensuring the most cost-effective hedging strategies are applied.
AASB7.22	Under interest rate swap contracts, the Group agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Such contracts enable the Group to mitigate the risk of changing interest rates on the fair value of issued fixed rate debt and the cash flow exposures on the issued variable rate debt. The fair value of interest rate swaps at the end of the reporting period is determined by discounting the future cash flows using the curves at the end of the reporting period and the credit risk inherent in the contract, and is disclosed below. The average interest rate is based on the outstanding balances at the end of the reporting period.
	The fair value of interest rate swap contracts designated as cash flow hedges outstanding at the end of the reporting period is $284,000 (2013: $177,000).
AASB7.22, 23(a)	All interest rate swap contracts exchanging floating rate interest amounts for fixed rate interest amounts are designated as cash flow hedges in order to reduce the Group's cash flow exposure resulting from variable interest rates on borrowings. The interest rate swaps and the interest payments on the loan occur simultaneously and the amount accumulated in equity is reclassified to profit or loss over the period that the floating rate interest payments on debt affect profit or loss.
AASB7.22	The fair value of interest rate swap contracts designated as fair value hedges outstanding at the end of the reporting period is $51,000 (2013: Nil).
AASB7.24(a)	Interest rate swap contracts exchanging fixed rate interest for floating rate interest are designated and effective as fair value hedges in respect of interest rates. During the year, the hedge was 100% effective in hedging the fair value exposure to interest rate movements and as a result the carrying amount of the loan was adjusted by $5,000 which was included in profit or loss at the same time that the fair value of the interest rate swap was included in profit or loss.

40.5 Fair value of financial instruments

This note provides information about how the Group determines fair values of various financial assets and financial liabilities.

40.5.1 Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

AASB 13.91(a), AASB 13.93(a)

Some of the Group's financial assets and financial liabilities are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique(s) and inputs used).

Financial assets/ financial liabilities	Fair value as at		Fair value hierar-chy	Valuation technique(s) and key input(s)	Significant unobservable input(s)	Relationship of unobservable inputs to fair value
	30/06/14	30/06/13				
1) Foreign currency forward contracts (see notes 17 and 31)	Assets – $ 244,000; and Liabilities – $87,000	Assets – $220,000	Level 2	Discounted cash flow. Future cash flows are estimated based on forward exchange rates (from observable forward exchange rates at the end of the reporting period) and contract forward rates, discounted at a rate that reflects the credit risk of various counterparties.	N/A	N/A
2) Interest rate swaps (see notes 17 and 31)	Assets – $284,000; Liabilities (designated for hedging) – $5,000; and Liabilities (not designated for hedging) – $51,000	Assets – $177,000	Level 2	Discounted cash flow. Future cash flows are estimated based on forward interest rates (from observable yield curves at the end of the reporting period) and contract interest rates, discounted at a rate that reflects the credit risk of various counterparties.	N/A	N/A
3) Held-for-trading non-derivative financial assets (see note 17)	Listed equity securities in Z land: • Real estate industry – $911,000; and • Oil and gas industry – $628,000.	Listed equity securities in Z land: • Real estate industry – $911,000; and • Oil and gas industry – $728,000.	Level 1	Quoted bid prices in an active market.	N/A	N/A

	40. Financial instruments (cont'd)
AASB13.91 (a)	**Fair value determined using valuation techniques** An entity shall disclose information that helps users of its financial statements assess the valuation techniques and inputs used to develop for assets and liabilities that are measured at fair value on a recurring or non-recurring basis in the statement of financial position after initial recognition.
AASB7.29	**Fair value not reliably determinable** Disclosures of fair value are not required for: (a) when the carrying amount is a reasonable approximation of fair value, for example, for financial instruments such as short-term trade receivables and payables; (b) for an investment in equity instruments that do not have a quoted price in an active market for an identical instrument (i.e. a Level 1 input), or derivatives linked to such equity instruments, that is measured at cost in accordance with AASB 139 because its fair value cannot otherwise be measured reliably; or (c) for a contract containing a discretionary participation feature (as described in AASB 4) if the fair value of that feature cannot be measured reliably.
AASB7.30	In the cases described in paragraph 29(b) and (c), an entity shall disclose information to help users of the financial statements make their own judgements about the extent of possible differences between the carrying amount of those financial assets or financial liabilities and their fair value, include the fact that fair value information has not been disclosed for these instruments because their fair value cannot be measured reliably;
AASB7.17	**Compound financial instruments with multiple embedded derivatives** If an entity has issued an instrument that contains both a liability and an equity component and the instrument has multiple embedded derivatives whose values are interdependent (such as a callable convertible debt instrument), it shall disclose the existence of those features.
AASB2.44	**41. Share-based payments**
	41.1 Employee share option plan
AASB2.45(a),	The Group has an ownership-based compensation scheme for executives and senior employees. In accordance with the terms of the plan, as approved by shareholders at a previous annual general meeting, executives and senior employees with more than five years service with the Group may be granted options to purchase ordinary shares at an exercise price of $1.00 per ordinary share. Each employee share option converts into one ordinary share of RDR Holdings (Australia) Pty Limited on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry. The number of options granted is calculated in accordance with the performance-based formula approved by shareholders at a previous annual general meeting and is subject to approval by the remuneration committee. The formula rewards executives and senior employees to the extent of the Group's and the individual's achievement judged against both qualitative and quantitative criteria from the following financial and customer service measures: • improvement in share price • improvement in net profit • improvement in return to shareholders • reduction in warranty claims • results of client satisfaction surveys • reduction in rate of staff turnover

Source	RDR Holdings (Australia) Pty Limited

AASB2.44

41. Share-based payments (cont'd)

AASB2.44, 45(a)

The following share-based payment arrangements were in existence during the current and prior reporting periods:

Options series	Grant date	Grant date fair value	Exercise price	Expiry date	Vesting date
		$	$		
Series 1	30/09/12	1.15	1.00	30/09/13	Vests at the date of grant
Series 2	31/03/13	1.18	1.00	31/03/14	Vests at the date of grant
Series 3	30/09/13	1.20	1.00	30/09/14	Vests at the date of grant
Series 4	31/03/14	1.05	1.00	31/03/15	Vests on the date that the RDR Holdings (Australia) Pty Limited share price exceeds $4.00, and provided that the eligible recipient is employed by the company on that date

There has been no alteration of the terms and conditions of the above share-based payment arrangements since the grant date

41.2 Fair value of share options granted in the year

AASB2.RDR46.1, RDR46.2

The weighted average fair value of the share options granted during the financial year is $0.94 (2013: $1.17). Options were priced using a binomial option pricing model (BOPM). The BOPM was used as it is better able to handle a variety of inputs and is therefore more accurate in determining fair value compared to other models.

41.3 Movements in shares options during the year

AASB2.45(b)

The following reconciles the share options outstanding at the beginning and end of the year:

		2014		2013	
		Number of options	Weighted average exercise price	Number of options	Weighted average exercise price
			$		$
AASB2.45(b)(i)	Balance at beginning of year	290,000	1.00	-	-
AASB2.45(b)(ii)	Granted during the year	220,000	1.00	290,000	1.00
AASB2.45(b)(iii)	Forfeited during the year	-	-	-	-
AASB2.45(b)(iv)	Exercised during the year	(314,000)	1.00	-	-
AASB2.45(b)(v)	Expired during the year	-	-	-	-
AASB2.45(b)(vi)	Balance at end of year	196,000	1.00	290,000	1.00
AASB2.45(b)(vii)	Exercisable at end of year	196,000	1.00	290,000	1.00

41.4 Share options outstanding at the end of the year

Executive share appreciation rights plan

AASB2.51(b)(i)

The aggregate cash-settled share-based payment liability recognised and included in the financial statements is disclosed in note 26.

AASB2.44

41. Share-based payments (cont'd)

Share-based payments

AASB2.44 An entity shall disclose information that enables users of the financial report to understand the nature and extent of share-based payment arrangements that existed during the period.

AASB2. RDR46.1 For equity-settled share-based payment arrangements, an entity applying Australian Accounting Standards – Reduced Disclosure Requirements shall disclose information about how it measured the fair value of the goods or services received or the fair value of the equity instruments granted. If a valuation methodology was used, the entity shall disclose the method and its reason for choosing it.

AASB2. RDR46.2 For cash-settled share-based payment arrangements, an entity applying Australian Accounting Standards – Reduced Disclosure Requirements shall disclose information about how the liability was measured.

AASB2. RDR50.1 An entity applying Australian Accounting Standards – Reduced Disclosure Requirements shall disclose the following information about the effect of share-based payment transactions on the entity's profit or loss for the period and on its financial position:

(a) the total expense recognised in profit or loss for the period; and

(b) the total carrying amount at the end of the period of liabilities arising from share-based payment transactions.

Modified share-based payment arrangements

AASB2.47(c)(i) Where the entity has measured the fair value of goods or services received as consideration for equity instruments of the entity indirectly, by reference to the fair value of the equity instruments granted, the entity shall disclose for share-based payment arrangements that were modified during the period, an explanation of those modifications.

42. Key management personnel compensation

ASIC-CO 98/100 An entity shall consider the extent to which ASIC Class Order 98/0100 permits information about key management personnel compensation to be rounded.

AASB124.17, Aus1.12(b) The aggregate compensation made to directors and other members of key management personnel of the company and the Group is set out below:

	Year ended 30/06/14	Year ended 30/06/13
Compensation to directors and other members of key management personnel of the company and the Group	1,737,000	1,428,000

43. Related party transactions

AASB124.13 The immediate parent and ultimate controlling party respectively of the Group are X Holdings Limited and Y Holdings Limited.

AASB124.13 If neither the entity's parent nor the ultimate controlling party produces financial reports available for public use, the name of the next most senior parent that does so shall also be disclosed.

Balances and transactions between the Company and its subsidiaries, which are related parties of the Company, have been eliminated on consolidation and are not disclosed in this note. Details of transactions between the Group and other related parties are disclosed below.

Source	RDR Holdings (Australia) Pty Limited

43. Related party transactions (cont'd)

43.1 Trading transactions

AASB124.18, 19 During the year, group entities entered into the following trading transactions with related parties that are not members of the Group:

	Sales of goods		Purchases of goods	
	Year ended 30/06/14	Year ended 30/06/13	Year ended 30/06/14	Year ended 30/06/13
	$	$	$	$
X Holdings Limited	693,000	582,000	439,000	427,000
Subsidiaries of Y Holdings Limited	1,289,000	981,000	897,000	883,000
Associates of Y Holdings	398,000	291,000	-	-

AASB124.18, 19 The following balances were outstanding at the end of the reporting period:

	Amounts owed by related parties		Amounts owed to related parties	
	30/06/14	30/06/13	30/06/14	30/06/13
	$	$	$	$
X Holdings Limited	209,000	197,000	231,000	139,000
Subsidiaries of Y Holdings Limited	398,000	293,000	149,000	78,000
Associates of Y Holdings	29,000	142,000	-	-

AASB124.23 Sales of goods to related parties were made at the Group's usual list prices, less average discounts of 5%. Purchases were made at market price discounted to reflect the quantity of goods purchased and the relationships between the parties.

AASB124.18 The amounts outstanding are unsecured and will be settled in cash. No guarantees have been given or received. No expense has been recognised in the current or prior periods for bad or doubtful debts in respect of the amounts owed by related parties.

43.2 Loans to related parties

	30/06/14	30/06/13
	$	$
Loans to key management personnel	2,420,000	-
	2,420,000	2,981,000

The Group has provided several of its key management personnel with short-term loans at rates comparable to the average commercial rate of interest.

The loans to key management personnel are unsecured.

43.3 Loans from related parties

	30/06/14	30/06/13
	$	$
Loans from Mr. John Banks (the ultimate controlling party of the Company)	10,376	29,843

The Group has been provided loans at rates comparable to the average commercial rate of interest. The loans from the ultimate controlling party are unsecured.

Source	RDR Holdings (Australia) Pty Limited

43. Related party transactions (cont'd)

43.4 Other related party transactions

AASB124.18, 19

In addition to the above, X Holdings Limited performed certain administrative services for the Company, for which a management fee of $0.18 million (2013: $0.16 million) was charged and paid, being an appropriate allocation of costs incurred by relevant administrative departments.

AASB124.19

Disclosures about transactions (other than key management personnel compensation) with related parties shall be made separately for each of the following categories:

(a) the parent;
(b) entities with joint control or significant influence over the entity;
(c) subsidiaries;
(d) associates;
(e) joint ventures in which the entity is a venturer;
(f) key management personnel of the entity or its parent; and
(g) other related parties.

Terms and conditions of related party transactions

AASB124.23

Disclosures that related party transactions were made on terms equivalent to those that prevail in arm's length transactions are made only if such terms can be substantiated.

Separate disclosure of individual transactions

AASB124.24

Items of a similar nature may be disclosed in aggregate except when separate disclosure is necessary for an understanding of the effects of related party transactions on the financial statements of the entity.

44. Business combinations

44.1 Subsidiaries acquired

AASB3. B64(a) – (c)

	Principal activity	Date of acquisition	Proportion of shares acquired	Consideration transferred
			(%)	$'000
2014				
Subsix Limited	Financial	15/01/14	80	505
Subseven Limited	Distribution	30/05/14	100	687
				1,192
2013				
[describe]				-
				-

For clarity of presentation in these model financial statements, it has been assumed that there were no business combinations in the comparative period. If there had been a business combination in 2013, all of the disclosures illustrated would also be required for that prior year business combination.

44. Business combinations (cont'd)

Individually immaterial business combinations

AASB3. RDRB65.1 For individually immaterial business combinations occurring during the reporting period that are material collectively, an acquirer applying Australian Accounting Standards – Reduced Disclosure Requirements shall disclose in aggregate the information required by paragraphs B64(f), B64(g), B64(i), B64(n)(i), B64(o)(i) and B64(p) and the first sentence of paragraph B64(j).

45. Disposal of subsidiary

The requirements of AASB 107 'Statement of Cash Flows' paragraph 40 and AASB 127 'Consolidated and Separate Financial Statements' paragraph 41(f), which require certain disclosures with respect to disposal of subsidiaries, are not required under RDR. This note reference has therefore been included only to assist users to more easily compare the reduced disclosures illustrated in this publication to those which entities would be expected to make under 'Tier 1', which are illustrated in corresponding notes in the GAAP Holdings Large Proprietary (Australia)Pty Limited 30 June 2014 'Model Financial Statements'.

46. Cash and cash equivalents

AASB107.45 For the purposes of the consolidated statement of cash flows, cash and cash equivalents include cash on hand and in banks, net of outstanding bank overdrafts. Cash and cash equivalents at the end of the reporting period as shown in the consolidated statement of cash flows can be reconciled to the related items in the consolidated statement of financial position as follows:

	30/06/14 $'000	30/06/13 $'000 (restated)
Cash and bank balances	23,446	19,778
Bank overdraft	(538)	(378)
	22,908	19,400
Cash and bank balances included in a disposal group held for sale	175	-
	23,083	19,400

46.1 Cash balances not available for use

AASB107.48 An entity shall disclose, together with commentary by management, the amount of significant cash and cash equivalent balances held by the entity that are not available for use by the Group.

Other disclosures

AASB107.50 (a) – (c) Additional information may be relevant to users in understanding the financial position and liquidity of an entity. Disclosure of this information, together with a commentary by management, is encouraged and may include:

(a) the amount of undrawn borrowing facilities that may be available for future operating activities and to settle capital commitments, indicating any restrictions on the use of these facilities;

(b) the aggregate amounts of the cash flows from each of operating, investing and financing activities related to interests in joint ventures reported using proportionate consolidation; and

(c) the aggregate amount of cash flows that represent increases in operating capacity separately from those cash flows that are required to maintain operating capacity;

AASB107.51 The separate disclosure of cash flows that represent increases in operating capacity and cash flows that are required to maintain operating capacity is useful in enabling the user to determine whether the entity is investing adequately in the maintenance of its operating capacity.

Source	RDR Holdings (Australia) Pty Limited

AASB107.43

47. Non-cash transactions

During the current year, the Group entered into the following non-cash investing and financing activities which are not reflected in the consolidated statement of cash flows:

- the Group disposed of property, plant and equipment with an aggregate fair value of $0.4 million to acquire Subseven Limited as indicated in note 44;
- proceeds in respect of the Group's disposal of part of its interest in E Plus Limited and its entire interest in Subzero Limited ($1.245 million and $960,000 respectively) had not been received in cash at the end of the reporting period;
- share issue proceeds of $8,000 were received in the form of consulting services, as described in note 35.1; and

In addition, the Group acquired $40,000 of equipment under a finance lease (2013: nil).

48. Operating lease arrangements

48.1 The Group as lessee

48.1.1 Leasing arrangements

AASB117.35(d)
AASB7.7

Operating leases relate to leases of land with lease terms of between 5 and 10 years. All operating lease contracts over 5 years contain clauses for 5-yearly market rental reviews. The Group does not have an option to purchase the leased land at the expiry of the lease periods.

48.1.2 Payments recognised as an expense

	Year ended 30/06/14 $'000	Year ended 30/06/13 $'000

48. Operating lease arrangements (cont'd)

Disclosures for lessees

AASB117.31(e), 35(d), AASB7.7

A general description about the lessee's material leasing arrangements shall be disclosed, including:

(a) the basis on which contingent rent payable is determined;

(b) the existence and terms of renewal or purchase options and escalation clauses; and

(c) restrictions imposed by lease arrangements such as those concerning dividends, additional debt and further leasing.

Arrangements containing an operating lease

Int4.15(b), Aus15.6

If an arrangement contains a lease, and the purchaser concludes that it is impracticable to separate lease payments from other payments reliably, it shall treat all payments under the arrangement as lease payments for the purposes of complying with the disclosure requirements of AASB 117 'Leases'.

Assets under lease

AASB117.32, 57

The disclosure requirements specified by the relevant standards in relation to property, plant and equipment, intangible assets, impairment of assets, investment property and agriculture apply to:

(a) lessees for assets leased under finance leases;

(b) lessors for assets provided under operating leases.

Disclosure of these items would normally be incorporated into other existing notes to the financial statements, for example notes 22, 23 and 21 to these model financial statements.

48.2 The Group as lessor

48.2.1 Leasing arrangements

AASB117.56(c)

Operating leases relate to the investment property owned by the Group with lease terms of between 5 to 10 years, with an option to extend for a further 10 years. All operating lease contracts contain market review clauses in the event that the lessee exercises its option to renew. The lessee does not have an option to purchase the property at the expiry of the lease period.

Rental income earned by the Group from its investment properties and direct operating expenses arising on the investment properties for the year are set out in notes 6 and 9 respectively.

AASB12.23(b)	Contingent liabilities incurred by the Group arising from its interests in associates (please disclose the details)	-	-
AASB12.23(b)	Group's share of associates' contingent liabilities (ii)	150	14
AASB12.23(b)	Group's share of joint ventures' contingent liabilities (please specify the details)	-	-

AASB12.23(b)
AASB137.86(b)

(i) A number of contingent liabilities have arisen as a result of the Group's interest in its joint ventures. The amount disclosed represents the aggregate amount of such contingent liabilities for which the Group as an investor is liable. The extent to which an outflow of funds will be required is dependent on the future operations of the joint venture being more or less favourable than currently expected. The Group is not contingently liable for the liabilities of other venturers in its joint venture.

AASB12.23(b)
AASB137.86(b)

(ii) The amount disclosed represents the Group's share of contingent liabilities of associates. The extent to which an outflow of funds will be required is dependent on the future operations of the associates being more or less favourable than currently expected.

50.2 Contingent assets

	30/06/14 $'000	30/06/13 $'000
AASB137.89 Faulty goods claim (iv)	140	-

(iv) A company in the Group has a claim outstanding against a supplier for the supply of faulty products. Based on negotiations to date, the directors believe that it is probable that their claim will be successful and that compensation of $0.14 million will be recovered.

Entities should carefully consider whether circumstances that may have formerly been disclosed as a contingent liability meet the definition of a financial guarantee contract and should be accounted for in accordance with AASB 139 'Financial Instruments: Recognition and Measurement'.
Examples of more common arrangements that would qualify as financial guarantee contracts and which are no longer be disclosed as contingent liabilities include:

- deeds of cross guarantees between members of the wholly-owned group;
- letters of support provided to subsidiaries whereby the parent undertakes to pay the debts of the subsidiary if it is unable to repay the debt; or
- guarantees provided by the parent to financiers providing borrowings to subsidiaries.

AASB137.86 Unless the possibility of any outflow in settlement is remote, an entity shall disclose for each class of contingent liability at the reporting date a brief description of the nature of the contingent liability and, where practicable:

(a) an estimate of its financial effect, measured in the same manner as a provision;
(b) an indication of the uncertainties relating to the amount or timing of any outflow; and
(c) the possibility of any reimbursement.

AASB137.87 In determining which contingent liabilities may be aggregated to form a class, it is necessary to consider whether the nature of the items is sufficiently similar for a single statement about them to fulfil the requirements of paragraphs (a) and (b) above.

AASB137.91 Where any of the information above is not disclosed because it is not practicable to do so, that fact shall be stated.

Interests in associates

AASB12.23(b) An entity shall disclose in accordance with AASB 137 Provisions, Contingent Liabilities and Contingent Assets, unless the probability of loss is remote, contingent liabilities incurred relating to its interests in joint ventures or associates (including its share of contingent liabilities incurred jointly with other investors with joint control of, or significant influence over, the joint ventures or associates), separately from the amount of other contingent liabilities.

Joint Arrangements

AASB11.20 A joint operator shall recognise in relation to its interest in a joint operation:

(a) its assets, including its share of any assets held jointly;
(b) its liabilities, including its share of any liabilities incurred jointly;
(a) its revenue from the sale of its share of the output arising from the joint operation;
(b) its share of the revenue from the sale of the output by the joint operation; and
(c) its expenses, including its share of any expenses incurred jointly.

AASB11.24 A joint venturer shall recognise its interest in a joint venture as an investment and shall account for that investment using the equity method in accordance with AASB 128 Investments in Associates

Source	RDR Holdings (Australia) Pty Limited
	50. Contingent liabilities and contingent assets (cont'd)
	Contingent assets
AASB137.89, 91	Where an inflow of economic benefits is probable, an entity shall disclose a brief description of the nature of the contingent assets at the reporting date, and, where practicable, an estimate of their financial effect. Where any of this information is not disclosed because it is not practicable to do so, that fact shall be stated.
AASB137.90	It is important that disclosures for contingent assets avoid giving misleading indications of the likelihood of income arising.
	Exemptions
AASB137.92	In extremely rare cases, disclosure of some or all of the information illustrated above would be expected to seriously prejudice the position of the entity in a dispute with other parties on the subject matter of the contingent liability or contingent asset. In such cases, an entity need not disclose the information, but shall disclose the general nature of the dispute, together with the fact that, and reason why, the information has not been disclosed.
	Provisions
AASB137.88	Where a provision and a contingent liability arise from the same set of circumstances, an entity makes the required disclosures in a way that shows the link between the provision and the contingent liability.
	Rights to interests arising from decommissioning, restoration and environmental rehabilitation funds
Int5.12	Where a contributor has an obligation to make potential additional contributions to a decommissioning, restoration and environmental rehabilitation fund that is not recognised as a liability, the contributor shall disclose the information required by AASB 137 in respect of contingent liabilities.
	51. Remuneration of auditors
	The disclosures required by AASB 1054 'Australian Additional Disclosures' paragraph 10, with respect to remuneration of the auditor, are not required under RDR. This note reference has therefore been included only to assist users to more easily compare the reduced disclosures illustrated in this publication to those which entities would be expected to make under 'Tier 1', which are illustrated in corresponding notes in the GAAP Holdings Large Proprietary (Australia)Pty Limited 30 June 2014 'Model Financial Statements'.
	52. Supplementary information
	The supplementary disclosures required by paragraphs 55- 57 of AASB 121 'The Effects of Changes in Foreign Exchange Rates' are not required under RDR. This note reference has therefore been included only to assist users to more easily compare the reduced disclosures illustrated in this publication to those which entities would be expected to make under 'Tier 1', which are illustrated in corresponding notes in the GAAP Holdings Large Proprietary (Australia) Pty Limited 30 June 2014 'Model Financial Statements'.
	53. Events after the reporting period
AASB110.21	On 18 July 2014, the premises of Subfive Limited were seriously damaged by fire. Insurance claims are in process, but the cost of refurbishment is currently expected to exceed the amount that will be reimbursed by $8.3 million.

Source	RDR Holdings (Australia) Pty Limited

53. Events after the reporting period (cont'd)

AASB110.21 The financial report shall disclose for each material category of subsequent events (other than those events whose financial effects have already been brought to account):

(a) the nature of the event; and

(b) an estimate of its financial effect, or a statement that such an estimate cannot be made.

AASB110.22 Examples of events occurring after the end of the reporting period that do not provide evidence about conditions existing at the reporting date include:

- a major business combination after the end of the reporting period or disposing of a major subsidiary;
- announcing a plan to discontinue an operation;
- major purchases of assets, classifications of assets as held for sale, other disposals of assets, or expropriation of major assets by government;
- the destruction of a major production plant by a fire after the end of the reporting period;
- announcing, or commencing the implementation of, a major restructuring;
- major ordinary share transactions and potential ordinary share transactions after the end of the reporting period;
- abnormally large changes after the reporting period in asset prices or foreign exchange rates
- changes in tax rates or tax laws enacted or announced after the end of the reporting period that have a significant effect on current and deferred tax assets and liabilities;
- entering into significant commitments or contingent liabilities, for example, by issuing significant guarantees; and
- commencing major litigation arising solely out of events that occurred after the end of the reporting period.

AASB110.8 The effects of events after the end of the reporting period providing evidence of conditions that existed at the end of the reporting period shall be brought to account rather than disclosed by way of note to the financial statements.

54. Parent entity information

The accounting policies of the parent entity, which have been applied in determining the financial information shown below, are the same as those applied in the consolidated financial statements. Refer to note 3 for a summary of the significant accounting policies relating to the Group.

	54. Parent entity information (cont'd)
	Financial statements
s.295(2)	The financial statements for the year are: (a) unless paragraph (b) applies—the financial statements in relation to the company, registered scheme or disclosing entity required by the accounting standards; or (b) if the accounting standards require the company, registered scheme or disclosing entity to prepare financial statements in relation to the consolidated entity—the financial statements in relation to the consolidated entity required by the accounting standards.
	Notes to financial statements
s.295(3)	The notes to the financial statements are: (a) disclosures required by the regulations; and (b) notes required by the accounting standards; and (c) any other information necessary to give a true and fair view (see section 297).
	Disclosures required in the notes to the consolidated financial statements
Reg2M.3.01	(1) For paragraph 295(3)(a) of the Act, if paragraph 295(2)(b) of the Act applies to a parent entity, the following disclosures are required in the notes to the financial statements of the consolidated entity: (a) current assets of the parent entity; (b) total assets of the parent entity; (c) current liabilities of the parent entity; (d) total liabilities of the parent entity; (e) shareholders' equity in the parent entity separately showing issued capital and each reserve; (f) profit or loss of the parent entity; (g) total comprehensive income of the parent company; (h) details of any guarantees entered into by the parent entity in relation to the debts of its subsidiaries; (i) details of any contingent liabilities of the parent entity; (j) details of any contractual commitments by the parent entity for the acquisition of property, plant or equipment; (k) comparative information for the previous period for each of paragraphs (a) to (j). (2) The disclosures in subregulation (1) must be calculated in accordance with accounting standards in force in the financial year to which the disclosure relates. (3) In this regulation: *parent entity* means a company, registered scheme or disclosing entity that is required by the accounting standards to prepare financial statements in relation to a consolidated entity.
	55. Approval of financial statements
AASB110.17	The financial statements were approved by the board of directors and authorised for issue on 11 September 2014.
